Sir,—I beg to bring to your notice a few facts in connection with my late Court-martial. A Court of Inquiry assembled on board H.M.S. Clyde in October last. I had no idea that it was to try me, nor was I ever told so. I was very ill the whole time the court lasted, and any attempt to speak brought on a violent attack of coughing, which prevented me from questioning or explaining matters as I otherwise should have; the president of the court more than once told me to speak as little as possible, and to confine myself to signs. The afternoon of the day the court of inquiry closed, the surgeon ordered me to bed, where I remained for more than a fortnight, too ill to do anything; and Staff Com. Hayward, of H.M.S. Lord Warden, was ordered to take over temporary command of H.M.S. Clyde on Oct. 31 last. On Nov. 5, whilst still confined to my bed, I was placed under arrest, but no reason for this arrest was given me. On Dec. 3, I received no less than fourteen charges which had been framed against me, and the circumstantial letter, the letter being nothing less than a damnatory report from the court of inquiry, which was entirely against me. I was ordered at the same time to report myself on board H.M.S. Duke of Wellington on Dec. 11, for trial on Dec. 13, so that, allowing the bare time for travelling, I had six and a half days to get up my defence against the fourteen charges which had taken the Admiralty five weeks to frame, after receiving the proceedings of the court of inquiry. A few days after the court of inquiry closed, two of the principal witnesses against me, viz., John Bourne, boatswain's mate, and Robert Sieveright, A.B., doing duty as painter, were suddenly arrested, and sent prisoners, under escort, to H.M.S. Lord Warden, where they were kept close prisoners for a fortnight or more, and then as suddenly released and sent back to H.M.S. Clyde, where they were shortly afterwards followed and privately questioned by Assist.-Pymr. Collings, of H.M.S. Lord Warden. It was then that Bourne brought that foul and lying charge against me of having ordered him to destroy his account-book on Sept. 26, though at the court of inquiry he denied ever having kept any such book. I most solemnly swear that I never knew nor heard of the book in question, until it was asked for at the court of inquiry. And yet this man is allowed to go unpunished, though his own evidence at the court-martial on this very charge proved he was lying, and that he had brought a false charge against me; in spite of this, in addition to the proved lie he told at the court of inquiry, this man's evidence was taken on other charges against me. Robert Sieveright, painter, at the same private examination, stated that 300 lb. of paint from the ship had been used in my house, but he never told Assist.-Pymr. Collings what quantity of stores had been supplied by me to the ship from my own pocket. I never knew, on my sacred oath, nor do I believe, that any such quantity of paint was used at my house. The first time that I heard anything about the quantity of paint used at my house was from Maurice Fitzgerald, the gunner, who informed me during the court of inquiry that 100 lb. of paint had been used by me. One of the principal charges against me was that of oppression towards Corporal Hadden, who, I considered, and still consider, was guilty of highly insubordinate language and conduct, and who was actuated solely by malice when he made his report. But what were Bourne and Sieveright arrested for, and oppressively treated? I leave those by whose authority it was done to answer the question. Still, it is a strange and significant fact that two of the worst charges against me were framed on the statements made by these two men, as soon as they were released from imprisonment on board H.M.S. Lord Warden. While Sievewright was a prisoner, his wife came to my house in the deepest distress, and actually begged for food and money, both of which, together with some clothing, were given to her. I only quote this as against my so-called oppressive treatment of Hadden, although I never gave orders, nor did I know that he was a close prisoner on board H.M.S. Clyde. When my legal friend went on board the Clyde to try and obtain evidence for my defence, the Paymaster and all the men who were sent for refused to give him any information whatever, as they had been warned by Staff Com. Hayward not to speak, unless they liked. The only other means I had of obtaining information, viz., through my private servant, was stopped, as he was prohibited from going on board the Clyde, and was ordered out of the ship. Had there been but one executive commissioned officer in the Clyde beside myself, I could not have come to ruin and disgrace, as I have. If you will give publicity to these facts, which defy contradiction, you will earn the deepest gratitude from a ruined and almost heart-broken man, who after $32\frac{1}{2}$ years of hard and honourable service, and the possessor of four medals, two clasps, and an order, is condemned to absolute poverty. I often wonder if any of those writers to the papers who have so vilified and abused me, as though I were the worst of criminals, can realise the meaning of my sentence, and what it entails? I trow not. Dismissal with disgrace, or even imprisonment, could have added but little, and the sentence as it now stands will make my life but a living death! I only ask for simple justice, and therefore appeal to your columns to protest against the Court of Inquiry, which prejudged my case, its subsequent proceedings, and the way in which I have been hunted out of the Navy by the aid of detectives and false testimony. I have more to tell you, which the public know nothing of, but I will reserve it for the present. Nor would I trouble you now, unless I could say that, as God is my witness, I have a clear conscience, and am falsely condemned and unjustly punished.—I am, &c.,

F. Maxwell Heron.

32 Royal York Crescent, Clifton, near Bristol, Feb. 10.

Sir,—After all the sensational articles which have appeared in the Press on the Maxwell-Heron Court-martial, will you permit me to offer a few remarks in your columns on the subject? I shall as briefly as possible state facts which may enlighten the public. The stereotyped heading of the articles referred to has been "The Clyde Scandal;" if it be a scandal, surely that lies at the door of those who instigated, aided, and abetted a system which has been tacitly recognised by the Admiralty. Here, is a gallant officer of 32 years' meritorious service, of unblemished character, and decorated with five medals for gallant actions in which he had participated, arraigned on the charge of embezzlement and misappropriation of Government stores of the value of a few pounds sterling! The trifling amount is still a mystery. One of the charges on which he is found guilty is that of borrowing from the Government stores, a day or two before occupying his house, five-shillings' worth of coal, for the purpose of airing the rooms, he having none laid in, and fully intending to repay the loan; and another, on which he is found guilty, is that of signing his name to a voucher, supported by a report of the gunner, his trusted second-in-command, in charge of the stores, of the loss of an old carpet, worth some four or five shillings. Fancy a court-martial consisting of gallant Naval officers, and I have no doubt honourable men, listening to such frivolous charges, and to others, on the evidence of the rascally schemer and defaulter who, according to all principles of English law and justice, should never have been admitted as a witness, he being under arrest for malversation of the missing stores, and not entitled to the privilege of Queen's evidence. The prisoner could have shielded himself by merely calling the attention of the court to the practice of his predecessors holding the same command, but he abstained from doing so. All who have known Com. Maxwell Heron during his career in the service know him to have been most scrupulous in money matters, never having been in debt by borrowing money from any one. Another charge on which he was arraigned I must notice. He was found guilty of employing on his own private affairs three or four men who were under his orders. Now, I have a vivid recollection of a favourite toast of an old friend of mine, a Liberal Peer, who flourished many years ago (I am an old man), and that toast was, "Fair-play to all grades." Is that maxim applicable to the treatment Naval officers are subjected to in these reforming times? I fear not. When the Right Hon. Mr. Childers, then First Lord of the Admiralty, on different occasions took his wife and family to the Mediterranean, or elsewhere, in her Majesty's ships, did he pay for the extra cabin fittings and attendance on his family, or were they found by the ship? I put these questions with reference to my noble friend's favourite maxim, "Fair-play to all grades." Far be it from me to object to such privileges being accorded to the before-named illustrious personages, but is it fair that there should be different rules of official integrity to different grades? It was within my own knowledge, during my long sojourn in the East, that on all occasions when festivities were given on board her Majesty's ships, both men and boys were employed as servants; and I recollect a gallant Admiral, a friend of mine, who had a retinue of those belonging to the ship, both on board and on shore, clad in livery, and excused all ship's duty. I will also ask this question,—If the houses of the present Lords of the Admiralty, of the Commanders-in-Chief at home and abroad, and of all officers now living on shore while serving on board, were searched, would *nothing* belonging to Government be found? Why, then, make Maxwell Heron a scapegoat? There is another shuffling of the cards which I shall now notice. I impute no improper motives to the Admiralty, but the outside public may think otherwise. It must have been patent to all that the prosecutor used every means to enable him to convict the gallant prisoner on all the charges, and partially succeeded in doing so, aided by the perjured evidence of the arch-offender, who was improperly and, I confidently assert, illegally admitted by the court as a witness; for it can hardly be believed that when subsequently the gunner was on his trial, Com. Maxwell Heron, though summoned as a witness, was denied the retributive satisfaction of exposing the villainy of his successful slanderer. In fact, Com. Heron was coolly informed by the prosecutor that his evidence was not required. Some may suppose, and justly so, that this gallant officer, a man of unblemished honour and integrity, might have thrown some light on the subject, which he never was allowed the chance of doing before, and which would demonstrate to the public the damaging fact that he had been convicted by illegal, perjured evidence, and that this mode of procedure was adopted by the Admiralty. In concluding this letter, let me ask Com. Maxwell Heron's predecessors in command of the Clyde, or the officers who tried Com. Heron, or Naval officers generally, if they can declare on honour that they have never borrowed or made use of Government stores of any description, or have never employed any man belonging to the ship, or of the Reserve, in helping them, with their willing services, in any way whatever? Since writing the foregoing, the boatswain of the Jackal, who pleaded guilty to the charge of selling ship's stores for his own benefit (not for the benefit of the ship), was merely reprimanded and dismissed from his ship. Is this equal justice? Let it be remembered that Com. Maxwell Heron trusted everything to his second-in-command; was seldom on board his ship; was away on leave in Paris when the sales were made; and only disrated Hadden when he refused to produce witnesses, disrating him to support his second-in-command, as the Admiralty have ever set the example.—I am, &c.,

An Old Officer of the Honourable
East India Company's Service.

Commencing with the issue of Feb. 17, a series of political coloured portraits, similar to the war series which was so highly appreciated, will appear weekly in the *Pictorial World*. A Conservative and Liberal Member of the Upper or Lower House will alternate each week, and a page in each number will be devoted to views and letter-press descriptive of the constituency to which the Member belongs.

It is certain the Queen's Physician, Dr. Fairbank, has written strongly recommending Lentilla, or Tonic Daily Food. It cures indigestion, heartburn, constipation, liver and stomach complaints, &c., besides having such wondrous nourishing properties. Makes soup, puddings, porridge, biscuits, custards, &c. Tins, 1 lb., 1s 6d; ½ lb., 10d. Barrels, 28 lb., 30s; 14 lb., 16s. Of all Chemists.—Proprietor, H. J. Deacon, Beckenham, Kent.

The Navy.

ADMIRALTY, February 9, 1883.

Staff Surgeon Robert James McMorris has been promoted to the rank of Fleet Surgeon in her Majesty's Fleet, with seniority of February 5.

ADMIRALTY, February 13, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Commander Laurens Matthews Malet has this day been placed on the Retired List of his rank.

ADMIRALTY, February 15, 1883.

Royal Naval Artillery Volunteers.—London Brigade: John Caldwell Uhtoff, Esq., M.D., to be Surgeon (Feb. 15).

APPOINTMENTS.

Captains—Frederick S. Vander-Menlen, to the Dido, recommissioned; Arthur E. Dupuis, to the Serapis, vice Twiss.

Commander—William H. G. Nowell, to the Repulse, vice Craigie.

Lieutenants—Ernest G. Rason, to the Lord Warden, vice Elias; James P. Montgomery, to the Superb, vice Graves-Sawle; Francis W. Sanders, to the Starling, vice Izat; Henry Bigge, to the Decoy, vice Festing.

Sub-Lieutenant—Francis A. R. Bowles, to the Stork, vice Norman, resigned.

Midshipman—Henry St. G. S. Clive, to the Tenedos.

Staff Surgeon—Henry G. Lauder, to the Valiant, vice Norbury.

Chief Engineers—George T. Craddock, to the Indus, additional, for the Rapid; Alexander Wilson, to the Cambridge, additional, vice Turner.

Surgeon and Agent—Francis A. de T. Mouillat, at Courtown and Ballymoney, vice Allen.

Naval Instructor—James R. Clark, M.A., to the Alexandra.

Assistant-Paymaster—Edgar V. Sharpe, to the Duncan, vice Collier.

Engineers—C. F. Hulford, to the Indus, additional, for the Albacore; John Keast, to the Forester, vice Laughrin.

Gunners—Charles W. Frail, to the President, vice Smith; William Barrett (b), to the Asia, additional, for the Bacchante, vice Frail.

Boatswain—Thomas Henley, to the St. Vincent, vice Collins.

Carpenter—George Popplestone, to the Nankin, additional, for the Howe.

Agincourt, Capt. J. G. Mead, joined the Channel Squadron at Villa Garcia, Spain, on Monday last.

Cockchafer, Lieut.-Com. H. W. Hill, returned to Plymouth Sound on Monday for shelter, and to make good defects, having lost a boat during the gale on Sunday night.

Dryad, Com. C. Johnstone, arrived at Zanzibar on Monday last.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., Commander-in-Chief on the East Indies station, was to leave Trincomalee on Feb. 2, returning on Feb. 26. The Osprey was at Aden on Dec. 28, and was to leave on Jan. 2, to cruise in the Red Sea for six weeks; was to be at Massowah about Feb. 2, and to return to Aden on Feb. 14; has been ordered by telegraph to proceed to Zanzibar. The Woodlark was at Bussorah on Jan. 12; would proceed on Feb. 14 for Bushire and Muscat, and to Bombay on being relieved by the Arab. The Dryad arrived at Zanzibar on Feb. 12. The Arab was at Bombay on Jan. 19, making good defects. The Harrier and Undine are cruising for the suppression of the slave-trade on the east coast of Africa.

Fawn, Com. P. Aldrich, which has been employed surveying in the Red Sea, arrived at Ascension on Jan. 29, and would leave for Devonport after coaling.

Helicon, Lieut. and Com. Winsloe, flying the flag of Admiral Lord Alcester, G.C.B., Commander-in-Chief of the Mediterranean, was at Malta on Feb. 10, at which date the Alexandra, Carysfort, Hecla, Superb, Condor, Cygnet, Antelope, Cruiser, Coquette, Iron Duke, and Dragon were at Malta. The Condor would leave for Alexandria on Feb. 15, to relieve the Decoy. The Temeraire was on a cruise of instruction to Navarino, Angostali, and Corfu; mails to Malta. The Inflexible was to return from the coast of Sicily on Feb. 12; mails to Malta. The Invincible was to return from Malta on Feb. 17; mails to Malta. The Orion and Decoy were at Alexandria. The Monarch and Falcon were at Port Said. The Falcon was to proceed to Ismailia on Feb. 14, to relieve the Bittern, which, on relief, will proceed to the Piræus for seven days, and thence to Malta; mails to Malta. The Beacon was at Suez.

Himalaya, Capt. H. St. L. B. Palliser, arrived at Singapore on Monday last, and was to leave immediately for Hong Kong.

Iris, Capt. Ernest Rice, has arrived at Malta, where she will repair, after having been aground.

Iron Duke, Capt. St. John, left Gibraltar on Wednesday for Devonport, to pay off.

Lively, Com. Alfred A. C. Parr, flying the flag of Vice-Admiral the Right Hon. Lord John Hay, on passage out to relieve Lord Alcester in the command of the Mediterranean Fleet, put into Corcubion, Spain, on Feb. 12, through stress of weather, having also damaged her rudder.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., Commander-in-Chief on the North America and West Indies station, was at Grenada up to Jan. 23; had arrived Jan. 20 from St. Vincent and Trinidad. The Urgent, from Bermuda, will be towed to Jamaica by the Dido, after her return from Charleston. The Tenedos, Fantôme, and Flamingo were at Grenada Jan. 22. cruising with flag. The Garnet will cruise with flag after arrival of Commander-in-Chief at Jamaica; was at Jamaica on Jan. 25. The Griffon, ordered to Bermuda to refit when the Commodore can spare her, would be at Jamaica Feb. 1. The Foam, at Jamaica on Jan. 25, will cruise with flag on arrival of Commander-in-Chief at Jamaica. The Firebrand, at Jamaica on Jan. 31, will proceed to England as soon as her services can be spared.

Sapphire, Capt. J. R. T. Fullerton, was moved into Keyham Basin on Saturday, for the purpose of having 30 tons of ballast placed on board.

Seagull, Lieut. Ebenezer Rae (in command through the promotion of Com. Mather Byles, and the appointment of Lieut. Graham to the Euryalus), put into Simon's Bay on Jan. 13 for supplies. When at Madagascar she was boarded at Tamatave by the Hovan officers, and went through shell practice. She has visited St. Augustine's Bay, and the Seychelles. While *en route* to Devonport, the Seagull will call at St. Helena, Teneriffe, and Madeira.

Sultan, Capt. Walter Hunt Grubbe, K.C.B., arrived on Tuesday at Port Mahon, *en route* to join the Channel Squadron.

Wye, Staff Com. A. W. Miller, left Portsmouth on Saturday for Bombay with Naval supernumeraries and stores for the East Indies station, calling at Gibraltar and Malta. She has on board a consignment of guns, &c., for arming merchant steamers in the East Indies.

NAVAL NOTES.

The Secretary of the Admiralty presents his compliments to the Editor of the *Army and Navy Gazette*, and begs to inform him that information has been received that H.M.S. Iris, which was on shore for a short time off Port Augusta, has been got off, and left for Malta on Feb. 12.

The under-named men have been awarded the medal for long service and good conduct:—David Aherne and John H. Odam, first-class writers, of the London; Evan Jones, second captain maintop, of the Briton; James Sandercombe, Naval schoolmaster, of the St. Vincent; John Nichols, captain of the foretop, of the Impregnable; William Harris, serjt. R.M.L.I., of the Defence; John Parsley, corpl. R.M.L.I., of the Indus; Samuel Forster, private R.M.L.I., of the Belleisle; Henry Claxton, steward, James Peter Bushby, first-class cook, Edmund D. Holdway, leading-stoker, and George Allen, private R.M.L.I., of H.M.'s yacht Victoria and Albert; Joseph Parry and James H. Wakem, chief boatmen, Michael Coady, commissioned boatman, and Henry James Byres, boatman, of the Coastguard; George Davis, master-at-arms, of the Lion; John Lavers, leading stoker, of the Northumberland; John Parker, additional coxswain, of the Agincourt; William Brett, chief boatman, Frederick W. Thorne, Henry Fluellon, and Robert H. Sewell, commissioned boatmen, and John Fogwell, boatman, of the Coastguard; Joseph Hockey, captain of quarter-deck men, of the Invincible; Charles Thrasher, boatswain's mate, and William Andrews, ship's cook first class, of the Iris.

A compound armour-plate manufactured by Cammell and Co., on the Wilson system, was tested on board the Nettle, at Portsmouth, on Tuesday morning. The plate was 8 ft. long by 6 ft. broad and 10 in. thick, and was a representative sample of those made by the firm for the Impérieuse, now under construction at Portsmouth. Notwithstanding the severity of the trial, the plate resisted the whole of the three projectiles fired at it. They were all broken up into small pieces, the greatest penetration being about 4 in. Several fine hair-cracks were developed on the steel face of the plate. The value of the compound system of armour-plating was prominently manifested during the trial. The steel composing the face was 3½ in. thick, and was unusually hard; but the iron at the back held the plate together, preserving it as a whole, and so maintaining its protection against the work of further shots almost undiminished in efficiency, A plate made wholly of steel would under a similar ordeal have been either perforated or disintegrated—in other words, would have been broken up into many separate pieces. The plate in this instance was held to the backing by only four bolts. Since the recent experiments at Spezia, however, the number of bolts in all the thicker armour has been increased, the number now being in the proportion of 1 to every 6 or 7 feet of area of plate, instead of as formerly about 1 to every 11 feet of area. The plate having passed the test satisfactorily, a number of similarly finished armour-plates will be liberated at the manufacturers' works, so that progress will be made with the Impérieuse. The testing was superintended by Capt. Codrington, of the Excellent.

The hired transport Nepaul arrived at Portsmouth on Sunday last from Malta. She brought home the relieved crews of the Alexandra, Cygnet, Coquette, and Cruiser. She has been chartered by the Government to convey to the West Indies a crew for the Dido and Naval supernumeraries.

The Accountant-General of the Navy notifies that arrangements are in progress for the distribution of the prize-money awarded for the slave-dhow Fatalher, captured on April 17 last by the Eclipse. Due notice will be given of the date of the proposed distribution.

Rear-Admiral C. T. Curme will vacate his appointment as admiral-superintendent of Devonport Dockyard on Tuesday next on the expiration of his three years' term, and will, says the *Morning Post*, succeed Rear-Admiral R. V. Hamilton, C.B., as senior officer on the coast of Ireland. Although the appointment is not yet finally decided, the name of Rear-Admiral T. B. Lethbridge is mentioned as the successor of Rear-Admiral Curme at Devonport.

It has been definitely settled that the present Director of Transports, Admiral Sir W. Mends, will retire on March 31. Many officers have been named as his successor, but there is good reason to believe that the appointment will be conferred on a flag officer on the Active List, and that the office will not be permanent, as at present, but only for a limited term, as in the case of the Controller of the Navy.

The Opal is to be commissioned at the latter end of the month, and will, it is expected, relieve the Briton, Capt. Andrew J. Kennedy. The Opal has shipped her heavy guns.

The Sapphire's stability did not satisfy the officer from the Admiralty, who inclined her a week or two since, and consequently, she was taken into the basin at Keyham on Saturday, where she is to ship 30 tons of iron ballast. This is to be stowed in the screw alley and underneath the coal-boxes in the bunker passage. It is then believed the stability of the ship will be assured. The present arrangements are that the Sapphire is to start to-morrow for the China station, to relieve the Encounter.

The Lieutenant's Naval Pension of £50 per annum, vacant by the death of Retired Com. J. D. Robinson on Jan. 6 last, has been awarded to Retired Com. E. L. Hoblyn from that date.

The Channel Squadron, under Vice-Admiral Sir William M. Dowell, consisting of the Minotaur, Achilles, and Northumberland, arrived at Arosa Bay on Sunday, having experienced very rough weather on the passage. The ships were to leave for Vigo on Thursday.

The Admiralty announce the following as the addresses of detached ships: Mediterranean—Letters for the Orion, Condor, and Decoy, to be sent to Alexandria. Letters for the Monarch to be sent to Port Said. N.B.—Letters for Alexandria and Port Said may be sent Monday, *viâ* Naples; Tuesday, *viâ* Marseilles; and Friday, *viâ* Brindisi (British packet). Letters for the Beacon, Suez, care of H.B.M.'s Consul; Grappler, Gibraltar, *viâ* France, daily; Falcon, Ismailia, *viâ* Port Said. Channel Squadron: Minotaur, Agincourt, Achilles, Northumberland, care of H.B.M.'s Consul, Vigo, daily; Sultan, Gibraltar. East Indies: Dragon, Malta. Pacific—Letters for the Mutine should be addressed care of H.B.M.'s Consul, San Francisco, to be forwarded to Honolulu every Tuesday, Thursday, and Saturday; Sappho, should be addressed care of H.B.M.'s Consul, San Francisco; letters to be dispatched same days as to the Commander-in-Chief. Miscellaneous—Jackal, Rothesay, Bute, N.B.; Sylvia, Sandy Point, Straits of Magellan; Valorous, Devonport; Lively, Malta. Outward bound—Thalia, Singapore. Homeward bound—Iron Duke, Devonport; Rocket, Devonport, unless specially addressed; Seagull, Teneriffe, Canary Islands, care of H.B.M.'s Consul—mail on Feb. 16. Fawn, Devonport.

The Neptune will be commissioned at Portsmouth on Feb. 20. She was originally the Independencia, built in England for the Brazilian Government, but was purchased by the Admiralty in 1878 out of the special grant of six millions. It is intended she shall join the Channel Squadron. The Neptune has never been commissioned, but has undergone extensive alterations. She is hog-backed, owing to the strain she underwent when aground in the Thames.

The Conqueror has had a large number of mechanics placed on her, in order that she may be hastened forward for commission.

"Major" writes:—"Allow me to call attention to paragraph 43, Section 13, of the Queen's Regulations, which is still in force, and by which men going on furlough are prohibited from taking their arms or accoutrements with them? A waist-belt being part of a man's accoutrements, it is for this reason that some regiments do not allow their men to wear them on furlough. I have simply mentioned this in fairness to those regiments who evidently carry out the instructions laid down in the Queen's Regulations, but which Staff Officers seem to have overlooked."

We are requested by the Committee of the Army Medical Department "Memorial Fund to the Officers who fell in Afghanistan and South Africa" to announce that they have decided the memorial is to take the form of a mural tablet sculptured in white marble, and placed in the central hall of the Royal Victoria Hospital, Netley. The subject of the tablet, which will represent medical officers and men of the Army Hospital Corps attending wounded on the field, has been designed, and will be executed, by Count Gleichen.

We (*Irish Times*) understand that it is not only in contemplation to "reduce" Sir Archibald Alison's appointment, that of Deputy-Qrmr.-Gen. for the Intelligence Department at the War Office, but that a decision has lately been arrived at to abolish the office from April 1 next.

Major de Winton desires us to state that he has retired from the editorship of *Colburn's United Service Magazine*. He is succeeded, we understand, by Lieut.-Col. W. W. Knollys, half-pay, 93rd Highlanders.

The subscription will open to-day for H. H. Vivian and Company (Limited), Swansea, Birmingham, and Norway, and close on or before Thursday, Feb. 22. The capital of the company is £36,000. The company is formed to take over from Sir H. Hussey Vivian, Bart., M.P., the extensive nickel and cobalt works at Swansea, and the German silver and brass rolling mills, tube and wire mills at Birmingham, and also the nickel-plating works and warehouses at that place with the well-known business carried on thereat respectively, together with the nickel mine and smelting works at Senjen, in Norway, worked in connection therewith. The business at Swansea was established by Sir H. Hussey Vivian upwards of 27 years ago, and that in Birmingham was added in 1860, and has been from time to time extended.

Messrs. C. H. May and Co. have just published their *Press Annual for* 1883, being the sixth year of publication. All that may be said about it is that it contains its old features of interest, and is supplied with a good deal of new matter.

Messrs. Russell and Co., of New York, China, and London, are authorised by Messrs. Post, Martin, and Co., of New York, the bankers and agents of The Railroad Equipment Company, to offer for public subscription $1,000,000 Car Trust Securities in 1,000 bonds of $1,000, or £205 each, of The Railroad Equipment Company, at the price of £205 per bond, in addition to the amount of the accrued interest thereon, payable—£10 per bond on application, and the balance thirty days after the date of allotment, when the bonds will be delivered. Interest at the rate of 6 per cent. per annum, viz., £12 6s. per bond, is payable at the Company's London Agency, by quarterly or half-yearly coupons attached, where also the bonds are repayable at maturity at the price of issue.

"Sapo Carbonis Detergens" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "Wright, Southwark," are on each wrapper, and branded on each tablet, without which none is genuine.

EGYPTIAN WAR FUND.

NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

PATRON.
Her Most Gracious Majesty the QUEEN.

The principles of application of the Egyptian War Fund are:—1st. To afford immediate assistance to the families of the killed on a scale which, though perhaps temporarily small, may yet prevent a great deal of suffering. 2nd. To afford such permanent assistance to the families of the killed, or to disabled men, by either direct aid to the sufferers, or grants of money to cognate institutions, as may seem best. All branches of the Service are eligible, the sole condition being service in the Egyptian Expeditionary Force.

Subscriptions are earnestly requested. Remittances can be sent to Lady Jane Taylor, 16 Eaton Place, S.W.; or to Cox and Co., Craig's Court, S.W.

Application for assistance to be made to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, London, S.W.

PUBLICATIONS BY LIEUTENANT CAMPBELL-COPELAND, The ROYAL SCOTS.

Consequent on change of station, and other circumstances over which the Compiler has no control, it has been found necessary to alter dates of issue, &c., as follows:—

No. 1, SERVICE CATECHISMS, April 15.
No. 1, MILITARY ANECDOTES, &c., May 1.

The under-mentioned alterations and additions are also noted for information:—

MODERN MILITARY MAXIMS. Dedicated, by permission, to H.S.H. General Prince Edward of Saxe-Weimar, K.C.B. In 1 vol. June 1.

Now ready.

The COLOUR-SERJEANTS' POCKET-BOOK, for 1883.

The COLOUR-SERJEANTS' LEDGER.

These two Books are recommended to the notice of all Troop and Company Commanders.

In the press.

A MUSKETRY POCKET-BOOK, for COMPANY OFFICERS and INSTRUCTORS. Being a Detail of Subjects mentioned in last Syllabus.

HOTCHKISS AND CO.,
21 RUE ROYALE, PARIS;

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures at their wholesale-trade Prices, which are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have taken this course of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

May and Co.)—Dod's Parliamentary Companion, 1883 (Whittaker and Co.)—A Summary of Tactics, by H. F. Morgan, late Captain, 28th Regiment (Marcus Ward and Co.)—The Golden Calf, by the author of "Lady Audley's Secret," 3 vols. (J. and R. Maxwell).

NOTICES TO CORRESPONDENTS.

G.—Next relief season.

LIEUTENANT-COLONEL.—Your letter is written in such bad taste, that we must refuse to give it insertion. It is simply a personal attack.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 17, 1883.

THE Biennial Hunterian Oration was delivered to a large and distinguished audience in the theatre of the Royal College of Surgeons on Wednesday, the 14th inst., by Mr. T. Spencer Wells, the eminent surgeon. After a brief account of the origin of this periodical oration, Mr. Wells gave biographical sketches of some eminent members of the College, and some interesting details of the development of the institution. The orator afterwards dwelt on the services rendered by medical officers in recent wars, and pronounced his opinion that, "to ensure efficiency, the Medical officers and the Army Hospital Corps should be made one Royal Corps, placed on a perfect equality with other corps, and receive a fair share of honorary distinctions. A field hospital, fully equipped for the field, should be maintained at Aldershot, or elsewhere, and the whole corps be frequently exercised during peace in all the duties they may be called upon to perform in war." Mr. Wells did not say what opportunities, if any, he had of acquiring knowledge of military medical questions; and prudently following the well-known legal advice, he did not give any reasons for the opinions he pronounced. We should be glad to know how he would exercise his model medical corps in peace, at Aldershot "or elsewhere," in performing those operations which are necessitated in war by gunshot wounds, and the lacerations inflicted by shells and cannon-shot. Mr. Wells's opinions on purely surgical questions may be very valuable, but his notions on military matters are decidedly unpractical. Some one who was asked the meaning of the word metaphysics, said that when a man talked of something he knew nothing about to people who didn't understand him, he was talking metaphysics. Mr. Spencer Wells's opinions on military matters are decidedly metaphysical.

From Russia we hear that a war between that empire and Germany is trembling in the balance. So imminent is the impending danger, that German officers in the Russian service are making arrangements to leave it forthwith. They cannot, however, at once re-enter the service of their own country, as, in the event of their being taken prisoners, they would be treated as spies by the Russian authorities. Hence they are looking abroad for Military service, and not a few are turning longing glances towards India and Egypt, while a few hope that their services may be accepted in England. We fail to see that they have any chance at all in this country, unless, indeed, the Military authorities choose to avail themselves of the special knowledge possessed by these officers, in the Intelligence Department.

Major-General W. H. B. de Horsey completed five years' service on the Unemployed List on Saturday last, and is about to be placed on the Retired List.

If what we hear be true, the command of Regimental Districts will not in future be given to Lieutenant-Colonels as a matter of right. Anyway, Lord Wolseley is, we believe, most strongly opposed to the principle upon which these appointments are at present filled, and his lordship has even gone so far as to make his views known in the highest quarter. In his lordship's opinion, the command ought not to be conferred upon any officer simply because his position on the Half-pay establishes for him a claim to employment. He ought to possess some special qualification, and without this Lord Wolseley contends that he is better retired altogether, than borne on the Active List, only to become an incubus. But are there not two ways of looking at the matter? It is all very well for the War Office to say that no man should be selected for Regimental Districts, unless he has qualifications which will justify his being employed. What about the officers themselves? It is not always the best officers who bear the best reputation, for influence carries great weight, and without this the ablest and most devoted soldier often quits the service an unknown and disappointed man.

The command of the 19th Regimental District, Richmond, Yorks., becomes vacant on Tuesday next, when Colonel R. Mockler's period of service in the appointment expires.

A recent selection for a regimental command has created considerable amazement throughout the service. There is no occasion for us to mention names, the case has been so much discussed, that an allusion to it will suffice to point out the particular regiment to which we refer. The chosen one, in this instance, is a notorious "duffer." He cannot ride, he never succeeded in passing his examination; he is a bad drill, possesses a fearful temper, and is altogether unfitted for command. "How comes it that such a man has managed to get himself pushed on?" We have been asked the question many times, and were most anxious to obtain information on the subject. As a result of the inquiries we have instituted, we find that, to use the language of our informant — one in office—"the business was worked." It happens that the officer in question is a friend or distant relative of a great friend of a distinguished officer now holding a high appointment on the Staff. His case was pressed, the high official could not refuse the request of his friend, and so all was made right. So much for selection!—which, we were told, was going to produce such wonderful benefits for the British Army.

We believe that the present disgraceful condition of the Royal Barracks, Dublin, will be brought to the notice of the Secretary of State for War early in the Session, and that Lord Hartington will be urged to take immediate steps either to withdraw the troops occupying these quarters, or obtain a vote in order that the barracks may be put into a habitable condition.

A wholesome change is gradually being introduced at the Horse Guards, in that the patronage of the Royal Artillery, and, to a certain extent, the superintendence of the administration of that important branch of the Army, are being taken charge of by the Adjutant-General. Lord Wolseley has always held the view taken by this journal, that while Artillery officers are entitled to a fair share of Staff appointments, the so-called Regiment of Artillery ought not to be treated as a special corps, and has no claim to exceptional privileges distinct and apart from other branches of the Army. When, some years ago, Lord Wolseley was in charge of Section D (Discipline) of the Adjutant-General's Department, he claimed that questions affecting the discipline of the Artillery should be referred to his office, in the same way as such questions were referred in the case of the Cavalry and Infantry. The strong opposition which was then offered by the Deputy-Adjutant-General, Royal Artillery, to this, and, indeed, to every proposal tending to limit his responsibility, prevented Lord Wolseley from pressing the point. It was not, however, likely that when he became Adjutant-General he would allow the existing *imperium in imperio* to continue, or would look with favour upon a system which practically invests one of his deputies with authority independent of his own, and enables the Deputy-Adjutant-General, Royal Artillery, to go direct to the Commander-in-Chief, over the head of his superior. The new system which has been lately initiated will probably be very acceptable to the majority of Artillery officers, many of whose interests undoubtedly suffer, owing to the narrow lines upon which the administration of their regiment has hitherto been conducted. We have always held the view that an officer, however able he may be, who has passed all his service as a regimental officer of Artillery, is about the most unfitted person in the world to dispense the very large amount of patronage with which, under the orders of the Commander-in-Chief, the Deputy-Adjutant-General, Royal Artillery, is at present entrusted. It is to be hoped that the change which we have indicated above is only a step in the direction of further important Artillery reforms. With many of Lord Wolseley's proposals we have, as our readers are aware, been unable to agree; but in any endeavour which he may make to take in hand a thorough and comprehensive reform of the Artillery, he may rely on carrying public opinion with him, and will not fail to receive our cordial and consistent support.

Great complaints reach us from Cairo as to the ruinous cost of living in Egypt. On married officers especially, the expense falls very heavily. Furnished apartments command as much as £25 to £40 a month, and the necessaries of life are all charged at fancy prices.

The following extract from the obituary for August, 1800, in the *Annual Register* for that year, seems almost incredible in these days of short service and young veterans:—"At Tetbury, aged 106 years and ten months, Ambrose Bennett, who had been a common soldier between sixty and seventy years, and had fought in many battles in the reigns of Queen Anne, George I., II., and III." We may assume that the above statement is not an absolute fiction, though there may be some inaccuracy or exaggeration. The length of service of this tough Gloucestershire man is as extraordinary as even his longevity.

On returning to Aldershot on April 1, the Duke of Connaught will take over his former command of the 3rd Infantry Brigade, in the North Camp, relieving Major-General H. Rowlands, V.C., C.B., who will revert to the Unemployed List.

We hear from Dublin the most heartrending stories as to the state of health of the troops stationed in that command, which would almost have the effect, we believe, of shaming the screeching sisterhood who are everlastingly howling on public platforms for the repeal of certain Acts, introduced by a humane Government in the true interests of morality. It is to us astonishing how people professing Christianity can be found so wanting in all feeling of Christian charity, as to endeavour to gain an unenviable notoriety for themselves at the expense of their fellow-creatures, and of many a babe unborn. The garrison of Dublin at the present time furnishes the most convincing proof, if proof were needed, of the soundness of the principle upon which these Acts are framed, and of the serious results which follow in cases where they are not put into operation.

The transfer of Major-General J. R. S. Sayer, C.B., from the Belfast to the Devonport District is simply an act of justice. General Sayer is senior to nearly all the Major-Generals holding District commands, and it was therefore an anomaly that he should be but a Brigadier-General, whilst his juniors have been in the enjoyment of the pay and allowances of Major-Generals.

As we announced some weeks ago was probable, a decision has been come to to divide the Northern District into two commands. Major-General Cameron will continue in command at York, and a second Major-General will be added to the Staff, with headquarters at Manchester. This arrangement has been rendered necessary by the increase of work and responsibility thrown on the Staff in the command since the introduction of the Territorial system.

The question of the refusal to grant Indian pay and allowances to the British portion of the Indian Contingent in the late campaign, is, we believe, to be again brought before Parliament early in the ensuing Session, when Lord Hartington will have an opportunity of explaining why he, as Secretary of State for India, thought fit to practise this very small economy at the expense of the officers of British regiments and batteries of the Indian Contingent; for be it clearly understood, the pay of the non-commissioned officers and men remained unaltered by the change to English rates. The force was started from India with camp-followers and equipage according to Indian rules, and many officers brought their native servants, scyces, cooks, &c., with them, all of whom had to be paid considerably more than in India, on English pay. The Indian Government was, it is well known, perfectly ready and willing to continue the Indian rates of pay, the officers of the English force cordially agreed as to the injustice of the deprivation, and it was only the cheese-paring—for the sum in question is comparatively insignificant—economy of politicians at home, which called forth a refusal which was as unjust to those concerned as it was unexpected by them. The cases of the two British regiments who came on home are bad enough, but how much worse are those of the two batteries, and of the two companies of the 2nd Battalion Seaforth Highlanders, who, after serving throughout the campaign, returned again to India with the native portion of the force.

From the departure of the 74th Highland Light Infantry from Egypt for England, when the 1st Battalion of the regiment (71st) has only been at home since 1880, it would appear that the authorities no longer attach any importance to one of the great cardinal points of their Army scheme, which was that territorial regiments should have one battalion abroad, which was to be fed by the one at home. As six regiments have at the present time both battalions abroad, we may expect soon to hear of "volunteering" to keep them up to their establishments.

The details of the arrangements made by Colonel the Hon. P. Methuen, C.B., for the march of the Volunteer troops on Brighton, were issued last night. About 4,000 officers and men will take part in it, including the field battery of the Honourable Artillery Company and a squadron of Middlesex Yeomanry, and a strong ambulance party. The idea is to the following effect:—Information having been received on Thursday evening, March 22, that an enemy's fleet has been sighted off the Brighton coast, threatening a disembarkation; an army corps is sent early on Friday morning by the London, Brighton, and South Coast Railway to Three Bridges. The orders given to the General Officer commanding the Army Corps are to push forward to Brighton, making use of the railway and the parallel roads. The marching column forms the advance guard, and arrives at Three Bridges at 10.15 a.m. The instructions received by the commander of the advance guard are, "Advance towards Brighton, covering Army Corps on both sides of railway. In case of meeting enemy, push him back, or hold your ground till reinforced." The head of the main body of the Army Corps, whilst on the march, may be supposed to be five miles in rear. The columns will be commanded by Colonel Blackburn Tew, 10th Middlesex; Colonel Somers Lewis, 4th Middlesex; Colonel Routledge, 23rd Middlesex; Colonel Ward, London Irish; and Colonel Wethered, 1st Bucks.

The official *Army List* for the quarter ending December 31, 1882, popularly known as the "Birthday Book," which has just been issued, contains, amongst other information, the "war services" of all officers. On referring to its pages, we naturally expected to find the names of those officers of the Pay Department who served in Egypt recorded under the heading "War Services." There were 31 Paymasters in that country, 14 of whom have previous active service duly noted; but, strange to say, only two out of the 31, Colonel Otway, C.B., and Captain Orange, have the words, "Egyptian Campaign, 1882," recorded against their names. This is not only an instance of the slipshod way in which the official *Army List* is edited, but furnishes another proof, if proof were wanting, of the necessity of the Department, the largest in the service, except the Medical, being represented by one of its own officers at the War Office. To assist the editor of that bulky volume in his arduous duties, we append a list of the officers of the Army Pay Department who served in Egypt, which we have reason to believe he will find correct. Those having previous war service are specially indicated:—Colonel Olivey, C.B.*; Majors Rouse, Forbes,* Chauncy, Briggs,* McNair,* Timbrell,* Spiller,* Pyne, Beaumont,* Bell,* and Whittington; Captains Griffith, Bateman,* Thornhill, Mortimer, Fox, Dougherty,* Vander-Meulen,* Booth,* Kneller, Orange,* Dowdall, Ternan, Singer, Creighton, Hood, P. A. Robinson, Long, Lane, and Gleig.*

General E. Ogle becomes a Colonel-Commandant of the Corps of Royal Engineers, by the death of General Sir H. D. Harness, K.C.B.

Under the title of "Pioneers in Central Asia," the *Newcastle Weekly Chronicle* intends publishing a series of sketches from the pen of Mr. Charles Marvin, which might with fitness be termed "Military Explorations of Central Asia," seeing that only three civilians figure on the list. The series commences with Arminus Vambery, and includes sketches of the travels of Major Marsh, General Valentine Baker, Captain Gill, Colonel Burnaby, General Sir Charles Macgregor, Captain Butler, Mr. O'Donovan, Colonel Stewart, Generals Petroosevitch and Grodekoff, Lieutenant Alikhanoff (who recently penetrated in disguise to Merv), and the Engineer Lessar. Apart from his well-known familiarity with the Central Asian question, it may be mentioned that Mr. Marvin possesses some acquaintance with the Asiatic border-region of Russia, having spent two months in Orenburg and the Kirghez district beyond, in 1875.

Field-Marshal Baron Hanslett died at Vienna on Sunday, at the age of 85. The deceased officer belonged to the Austrian Artillery, and was at one time Director of the Turkish Military School which formerly existed in Vienna.

By General Order No. 241, of 1882, it is decreed that in the event of any warrant or non-commissioned officer being reduced to the ranks by the sentence of a court-martial, or by the order of a Commander-in-Chief, his discharge from the Army shall be proceeded with immediately. This order has caused unqualified surprise and dissatisfaction in the service by reason of its uncompromising severity, and we are therefore glad to learn that the subject is receiving the consideration of the Secretary of State for War, with a view to a modification of the terms and conditions of the order. It is generally conceded that an opportunity should be given to the offender of regaining by subsequent meritorious conduct the position which he had lost by perhaps only one imprudent action

Lieut.-Col. Macdonald, of Guelph, is to command the Canadian Artillery team which will be sent this year to compete at Shoeburyness.

MEMORIAL BRASSES.—Messrs. JOHN HARDMAN and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

The *Morning Post* says:—"In the general Russian Budget for the current year (in which the expenditure is set down at £116,775,810) the Army Estimates of 1883 exceed those of 1882 by £1,489,281, being this year £28,963,494, against £27,474,212 in 1882. The greatest increase is under the heading of dress and equipment, viz., £1,050,000. The increase given to officers for rations and mess expenses figures with £300,000. The Navy Estimates for 1883 also exceed those of the previous year by £468,822, being £4,594,980, against £4,126,158 in 1882. The greatest increase is under the heading of ship construction, with over £300,000."

The Duke of Cambridge, K.G., has consented to preside at the 68th Anniversary Festival of the Royal Caledonian Asylum, Holloway, to be held at the Freemasons' Tavern, Great Queen Street, W.C., on Monday, April 23.

THROAT IRRITATION.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use Epps's Glycerine Jujubes. In contact with the glands at the moment they are excited by the act of sucking, the Glycerine in these agreeable confections becomes actively healing. Sold only in boxes, 7½d, tins, 1s 1½d, labelled "JAMES EPPS and Co., Homœopathic Chemists, London." A letter received:—"Gentlemen,—It may, perhaps, interest you to know that, after an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment) in almost all forms of throat disease. They soften and clear the voice.—Yours faithfully, GORDON HOLMES, M.D., Senior Physician to the Municipal Throat and Ear Infirmary."

The *Times of India* says, "Sir Frederick Roberts's energy of character has already proved of practical utility to the Madras Army, and we think we are not wrong in prophesying that it will, moreover, materially assist in developing a prestige which has long lain dormant and unrecognised."

The Clothworkers' Company, having munificently placed the sum of £250 at the disposal of Lord Wolseley for any military charity he considered it would be most worthily bestowed upon, his Lordship recommended the "Cambridge Fund for Old and Disabled Soldiers," as being, in his opinion, the most deserving of assistance; and the Company have, therefore, forwarded a cheque for the above amount in aid of this fund.

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

BIRTHS.

ACLAND—On the 8th inst., at Ilfracombe, the wife of Lieutenant B. D. Acland, R N., of a son.

EARDLEY-WILMOT—On the 15th inst, at 41 St. George's Road, Eccleston Square, the wife of Commander S. Eardley-Wilmot, of a daughter.

DEATH.

TAYLOR.—On February 3, at Brighton, Adeline Georgina Mary, loved wife of Major G. L. Le M. Taylor, Bedfordshire Regiment, from apoplexy.

Advertisements.

NEWMAN MEMORIAL FUND.

A Meeting of Officers was held, under the presidency of Rear-Admiral McCrea, on Saturday, the 9th inst., when the following Resolutions were unanimously carried:—

Proposed by Mr. Morcom, and seconded by Mr. Gissing:—"That it is desirable to perpetuate the memory of the late Mr. Newman, Chief Engineer, Portsmouth Dockyard, and with this object in view, a Committee be formed, for the purpose of obtaining subscriptions to establish an Annual Prize to the Engineer Student taking the first place at the Examination in Practical Engineering, and to place a Monument in Haslar Cemetery."

Proposed that the following gentlemen be appointed to act as a Committee to carry out this object:—Captain Colomb, R.N., Mr. Owen, Mr. Ellis, R.N., Mr. Morcom, and Mr. Gissing, R.N., and that Mr. Richards be appointed Hon. Secretary.

Subscriptions will be gladly received by the Members of the Committee, and Hon. Secretary, addressed, "Newman Memorial Fund," the Dockyard, Portsmouth.

H.M.'s Dockyard, Portsmouth, Dec. 19, 1882.

A GENTLEMAN by Birth and Education (between the ages of 25 and 45, and unmarried) is REQUIRED, as COMPANION to a GENTLEMAN, who has been a Dipsomaniac. Salary (in addition to a comfortable home), to commence with, £150 per annum. A total abstainer preferred.—Address, by letter only, stating age and full particulars of education, and previous occupation (if any), and references, to "A. B.," care of WILLIAMSON HILL and CO., Solicitors (to the Trustees), 13 Sherborne Lane, E.C. As only the selected applicants will be replied to, stamps should not be enclosed, or anything it is desirable should be returned.

WANTED, an OFFICER, who has Retired, or is Retiring, from the Navy or Army, to be TRAINED in the MANAGEMENT of a FLOURISHING BUSINESS. He must not be over 32 years of age, of great energy, perseverance, and of business habits, possessing tact and good temper. Should he give satisfaction, this may lead to a good position. Full name, rank, and address required, name of ship or regiment, and how employed during service, and copies only of three or four testimonials.—Address, "YOUNG OFFICER," Sell's Advertising Offices, 167 Fleet Street, E.C.

WANTED, immediately, by the Guardians of a Young Gentleman of 18, a GENTLEMAN (not under 30), as TUTOR and COMPANION, to travel abroad for 10 or 12 months, to take entire charge. A member of one of the Universities desired; and one competent to instruct in Classics, Mathematics, English History, French, and German, and possessing a knowledge of Navigation and Astronomy, if possible. Unexceptionable references required.—Apply by letter only, to "M. A.," care of Messrs. F. J. and G. J. BRAIKENRIDGE, Solicitors, 16 Bartlett's Buildings, London, E.C.

WANTED, at once, STAFF OFFICER or a late GARRISON INSTRUCTOR to COACH in the Military Subjects for the Militia Further Examination. Would be required to visit near Town a few hours daily. Liberal terms offered to a really first-class man.—Apply to ASKIN, GABBITAS, and KILLIK, 38 Sackville Street, W.

WANTED, a First-class MAN COOK, for a Regiment under orders to leave Ireland. Must be strictly sober, and have excellent testimonials. Catering Mess.—Apply to MESS PRESIDENT, 80th Regiment, Tralee.

WANTED, a COOK for the OFFICERS' MESS, 1st Battalion Somerset Light Infantry.—Apply, forwarding testimonials and terms, to the MESS PRESIDENT, Richmond Barracks, Dublin.

WANTED.—A MESSMAN, for the OFFICERS' MESS, 2nd Batn. OXFORDSHIRE LIGHT INFANTRY.—Applications must be made immediately to the MESS PRESIDENT, Limerick.

1ST VOLUNTEER BATTALION, DUKE of WELLINGTON'S (WEST RIDING) REGIMENT.—WANTED, for the above Corps, a SERJEANT-INSTRUCTOR.—Applications, with testimonials, to be sent to the ADJUTANT, Orderly Room, Halifax.

LEFT-OFF CLOTHES, Old Uniforms, Epaulettes, Books, Jewellery, Miscellaneous Property, &c. Mr. J. Norton, 5 Wych Street, Strand, continues giving the highest price in the trade for the above. The utmost value remitted by Post-Office order the same day for all Parcels forwarded.

All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

THE PARASCHO CIGARETTES.

THE PARASCHO CIGARETTES are now being made from the New Crop of Yenijeh Tobacco, and will be found to possess in perfection the peculiar and delicate aroma for which these Cigarettes have become so famous. The Parascho Cigarettes are made only from the finest Yenijeh (Turkey) Tobacco, and are rolled in the best paper procurable, free from Nitre, and made specially for the Parascho Cigarettes. The Parascho Cigarettes will be found different from and superior to all others. The Parascho Cigarettes are pronounced by connoisseurs to be "the only Cigarettes worth smoking."

The Parascho Cigarettes are supplied to the leading members of Fashionable Society, Clubs, and Messes.

The Parascho Cigarettes are made in eight different sizes, and are put up in boxes, each containing 50, 100, and 250 Cigarettes. The Parascho Cigarettes may also be had in sample boxes, containing 24 Cigarettes (accompanied by a detailed price List), on receipt of 2s 6d in stamps, or postal order.

THE PARASCHO CIGARETTE DEPOT, 65 Park Street, Grosvenor Square, London, W.
And may be had from all the leading Tobacconists.

LAMPLOUGH'S
PYRETIC SALINE

HAVE IT IN YOUR HOUSES AND TRAVELS, USING NO OTHER. This is the true antidote in Fevers, Eruptive Affections, Sea or Bilious Sickness, having peculiar and exclusive merits. *Officers and others proceeding to Egypt, India, and the Colonies should not fail to take a supply with them.*

EKOWE (with Col. Pearson).—"There was great demand for Lamplough's Pyretic Saline."—See *Blackwood's Magazine.*

LETTER FROM RAWUL PINDEE.—"Your Pyretic Saline will do more to prevent *fever* than all the quinine can cure."

Observe the GENUINE has my NAME and TRADE-MARK on a BUFF-COLOURED WRAPPER.

113 HOLBORN HILL, LONDON.

GREY WHISKERS.

PICKARD'S EAU MAGIQUE is warranted to permanently change Grey Hair, Whiskers, or Moustaches to a natural brown or black, as desired, in a few hours, without trouble. Pickard's Eau Magique is daily acknowledged to be the best and cheapest preparation, as it gives such natural shades, and will not wash away; perfectly harmless. Cases, 1s 6d, sent secretly, packed for 22 stamps.

T. PICKARD, 3 Oxford Street, London, W.

HOLLOWAY'S PILLS.—For the cure of debility, bile, liver and stomach complaints, this inappreciable medicine is so well known in every part of the world, and the cures performed by its use are so wonderful that it now stands pre-eminent above all other remedies, more particularly for the cure of bilious and liver complaints, disorders of the stomach, dropsy, and debilitated constitution. A course of these digestive Pills painlessly but surely regulates the organs of digestion, and acts most beneficially on the secretory and excretory organs generally. They expel from the secretive organs and the circulation those effete and morbific matters which produce inflammation, pain, fever, debility, and physical decay, thus annihilating, by their purifying properties, the virulence of the most painful and devastating diseases.

H. H. VIVIAN AND COMPANY, LIMITED,

SWANSEA, BIRMINGHAM, AND NORWAY.

CAPITAL, £360,000, in 36,000 SHARES of £10 EACH, viz.:—

20,000 A Shares, entitled to 6 per cent. Cumulative Preference Dividend, on the Capital for the time being paid up.

16,000 B Shares, entitled to 6 per cent. Dividend, after payment of 6 per cent. on the A Shares, all of which will be taken by the Vendor.

ISSUE of 20,000 SIX-PER-CENT. PREFERENCE A SHARES, £10 EACH.

The Residue of the Profits of each year, after payment of 6 per cent. on the two classes of Shares, will be applied in payment of additional Dividends on both A and B Shares to the further extent of 4 per cent. After payment of 10 per cent. per annum on all the Shares, the balance of profits in each year will be carried to a Reserve Fund.

In case the net profits for any five consecutive years shall amount to 40 per cent., or an average of 8 per cent. per annum on the total paid-up Capital on both A and B Shares, the B Shares will be converted into A Shares.

The A Shares are now offered for subscription, payment for which is to be made as follows:— Ten Shillings per Share on Application; £1 10s per Share on Allotment; £2 in Two Months; £2 in Four Months; and £2 in Six Months; the remainder as and when required.

Subscribers will have the option of paying up the full amount of £10 per Share, and interest at the rate of £5 per cent. per annum will be allowed on all sums prepaid.

SECRETARY, (pro tem.)—Mr. R. L. LIDGEY.
LONDON OFFICE, (pro tem.)—2 MOORGATE STREET, E.C.

ABRIDGED PROSPECTUS.

The Company is formed to take over from Sir H. Hussey Vivian, Bart., M.P., the extensive Nickel and Cobalt Works at Swansea, and the German Silver and Brass Rolling Mills, Tube and Wire Mills at Birmingham, and also the Nickel Plating Works and Warehouses at that place, with the well-known businesses carried on thereat respectively, together with the Nickel Mine and Smelting Works at Senjen, in Norway, worked in connection therewith. The business at Swansea was established by Sir H. Hussey Vivian upwards of twenty-seven years ago, and that at Birmingham was added in 1860, and has been from time to time extended. The Nickel Mine in Norway was acquired in the year 1872, for the purpose of ensuring a constant supply of Nickel ore without payment of intermediate profit. All the businesses have from the first been under the personal supervision of Sir H. Hussey Vivian, who will continue to give the benefit of his general superintendence. Mr. R. W. Lindsay, who has been the resident partner at Birmingham, will, as Managing Director at Birmingham, conduct the operations at that place, as heretofore. Mr. A. S. Merry, who has hitherto managed the Swansea Works, will continue to reside at Swansea, and as Managing Director there, give all his time to the business.

The three undertakings, which have from the first been closely connected, practically form one business, which is in the advantageous position of possessing its own Nickel-ore Mine,—its own Smelting and Refining Works, which are probably the largest of the kind in the world—and its own Mills for working-up the Nickel in all the forms of German Silver known to the trade, as well as in Blanks for Coinage purposes.

TERMS OF PURCHASE.

Sir Hussey Vivian has signed a provisional Agreement with the Company, by which he contracts to sell as going concerns the various Works and Properties, together with stocks and stores, as at 31st July, 1882, and including goodwill, for £320,000.

The purchase-money is payable—£160,000 in cash, in four instalments, at one, four, six, and nine months from the date of the contract, with interest at the rate of 5 per cent. per annum from July 31, 1882, on all unpaid instalments, and £160,000 in fully paid-up B Shares.

No dividend will be paid on the B Shares until the cumulative 6 per-cent. dividend has been paid out of profits to the holders of the A Shares.

The average net profits of the three concerns for the last ten years, and of the Nickel plating during the four years of its existence, are equal to nearly 14 per cent. per annum on the estimated amount of Capital required to be called up on the A Shares.

The demand for the Nickel produced by these Works is steadily increasing, and any advance in the price of Nickel—which, like other metals, has been for some years abnormally low—will add largely to the profits of the Company.

The Sale is to take effect as from July 31, 1882, and the Company will be entitled to all profits from that date.

If no allotment is made, the Deposit will be returned without deduction, and where the number of Shares allotted is less than the number applied for, the surplus will be credited in reduction of the amount payable on allotment.

Copies of the Agreements and of the Memorandum and Articles of Association may be seen at the Offices of Messrs. Hollams, Son, and Coward, Solicitors, Mincing Lane, E.C., and of Messrs. Chadwicks, Collier, and Co., 2 Moorgate Street, E.C.; and at the Offices of the Company.

Applications for Shares must be made on the accompanying Form, to the Bankers of the Company, to whom the Deposit is to be paid. Copies of the full Prospectus, and Forms of Application for Shares, may be obtained by intending Subscribers, from the Secretary of the Company, No. 2 Moorgate Street, E.C.

2 Moorgate Street, London, E.C., February 15, 1883.

ALDERSHOT BREWERY COMPANY, Limited.

BREWERY — ALDERSHOT.

Secretary—Captain J. J. MALLANDAINE.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

PRICE LISTS SENT FREE ON APPLICATION.

THE VERSMANN'S
PATENT
GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address—
The Versmann's Moss Litter Company,
LIMITED,
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

OPENING
OF
PARLIAMENT.

*With to-day's Issue of "*THE PICTORIAL WORLD,*" a Series of Political Coloured Portraits is commenced, the subject being*

SIR STAFFORD NORTHCOTE,

Leader of the Opposition in the House of Commons, and M.P. for North Devon.

The intention is to alternate a Liberal and Conservative Member each week, and to accompany each Portrait with a page of Illustrations, with Letterpress descriptive of the Constituency to which the Member belongs. Where it is possible, Views of their Country Seats will be given. Subjoined, a List of Portraits is shown. As an Enormous Sale is expected for this Series, and as there will be no Reprints, intending Subscribers should order at once. The Portrait of the

Right Hon. W. E. GLADSTONE,

published October 21, 1882, *forms No.* 1 *of the Political Series; some few copies of this issue can still be had, post-free,* 6½*d.*

The following is the order in which the POLITICAL COLOURED PORTRAITS will appear in the

PICTORIAL WORLD:

Feb.	17.	Sir STAFFORD NORTHCOTE, Bart.
,,	24.	EARL of GRANVILLE.

EXPRESS RIFLES.

·360 bore DOUBLE EXPRESS...	£20
·450, ·500, and ·577 bore DOUBLE EXPRESS	£25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ...	£28

An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s, £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

ROYAL INDIAN ENGINEERING COLLEGE, Cooper's Hill, Staines.

This College has been recently placed on a new basis, and the advantages afforded by it as a training institution for those who purpose adopting the Civil Engineering profession in India or elsewhere, are now offered to all persons desirous of following the course of study pursued there.

A number of Students, not exceeding 60, will be admitted to the College in September, 1883. Candidates for admission must, on July 1, 1883, be over 17 and under 21 years of age, and must give satisfactory proof of their having received a fair general education.

The Secretary of State for India will offer 13 appointments in the Indian Public Works Department for competition among the students entering the College in September, 1883, at the termination of their prescribed three years' College course, that is, in the summer of 1886. The Secretary of State for India will further offer two appointments in the Indian Telegraph Department among the same students after two years' course of study, that is, in the summer of 1885.

In the event of there being more candidates for admission than the College can receive, the preference will be given to qualified candidates according to dates of application for admission.

For all further particulars, apply by letter only to the Secretary, Public Works Department, India Office, S.W.; or to the President, Royal Engineering College, Cooper's Hill, Staines.

JULAND DANVERS, Secretary,
Public Works Department.

India Office, October 25, 1882.

KELLY COLLEGE, Tavistock, Devon. Election of Foundationers in March, 1883. Priority, after Founders' Kin, to Sons of Deceased Naval Officers.—For particulars, apply to the HEAD MASTER.

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 (late 464), New Oxford Street, W.C., at one-fourth their original cost; or on hire. Swords, cloaks, belts, sashes, saddles, &c. for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens, W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, EIGHT obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) TEN passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

ARMY EXAMINATIONS.—Special Preparation, by JOHN GIBSON, M.A. (First-class Classics, Camb., 1874, formerly Master at Westminster), assisted by Two Resident University Graduates and Visiting Professors. In June, 1882, out of 4 Pupils sent up, 2 passed, and a third scored over 4,100 marks at his first trial. In November, 1882, out of 4 Pupils sent up, one took the 14th place on the list, and another scored over 4,300 marks. All the Pupils sent up were First trial Candidates, and 2 of the successful ones had only read 2 months with Mr. Gibson; the other, 4 months. In the last 2 Preliminary Examinations, 5 passed, out of 7 sent up.

N.B.—The next Preliminary Guide, containing the Answers to the Questions set in the February Examinations, will be published about the middle of February. Address, Bromley, Kent.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

THE ROYAL ACADEMY, Gosport.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

KELLY COLLEGE, Tavistock, Devon. ELECTION of FOUNDATIONERS. FOUR VACANCIES. Priority, after Founder's Kin, to Sons of Deceased Naval Officers. Examination, March 20.—Apply to the HEAD MASTER.

MALVERN COLLEGE, LIMITED.
Head Master, Rev. C. T. CRUTTWELL, M.A.
The NEXT TERM commences on FRIDAY, May 4. New Boys to arrive May 3. Entrance Examination, May 4, at 9 a.m.
Apply to E. B. SCALLON, Esq., M.A., Secretary.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence January 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE, SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

KINGSLEY COLLEGE, WESTWARD HO!
HEAD MASTER—Rev. F. HEWSON WALL, LL.D.
VISITING COUNCIL.
Vice-Admiral Sir Wm. M. Dowell, K.C.B.
Robert Ellis, Esq., M.R.C.S., &c.
Rev. Roger Granville.
General W. N. Hutchinson.
Colonel Kennard, M.P.
Major-General Molesworth, R.H.A.
Sir George Stucley Stucley.
Rear-Admiral A. T. Thrupp.
Secretary, Ambrose Berkeley Wall, Esq., R.N.

The EXAMINATION for the following EXHIBITIONS will commence on April 3, 1883:—(1.) Two KINGSLEY Exhibitions, value £15 each. (2.) Two MOLESWORTH Exhibitions, value £10 each. (3.) Two ARLINGTON Exhibitions, value £7 10s each. (4.) Two ARLINGTON Exhibitions, value £5 each.

BEDFORD MODERN SCHOOL. Rev. R. B. POOLE, B.D., Head Master; 26 Assistant Masters; 450 Boys. Large Endowment; Annual Exhibitions. Army, London University Matriculation, Business, &c. Fees to residents, £4, £6, or £9 per annum.

ARMY.—LINE and MILITIA.
IMPORTANT to STUDENTS.

Captain DUMARESQ DE CARTERET BISSON, M.A., Author of "Our Schools and Colleges" (graciously recognised by the Queen and H.R.H. the Commander-in-Chief), sends, free by post, a selected List of Prospectuses of all the most SUCCESSFUL ARMY TUTORS, and gives his Counsel on Military and Civil-Service Education free of charge. Reference kindly permitted to the late Secretary of State for War.—Address, Captain BISSON, No. 3 Berners Street, London, W.

ARMY,
CIVIL SERVICE, UNIVERSITIES,
PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

ARMY EXAMINATIONS, &c.—In the late Examinations, Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other Pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S E.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of Pupils to PREPARE for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to TWELVE. Five Pupils out of Six were successful at the last Sandhurst Examination (July, 1882).—Terms, References, and other information, sent on application.

MADAME ISABEL BIZET MICHAU receives LADIES and GENTLEMEN for PRIVATE INSTRUCTION in the Valse, Highland Schottische, &c., by previous appointment, at her Residence, 59 Baker Street, Portman Square. The Young Ladies' Classes at Kensington and Baker Street are held as usual.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell	23rd
J. E. Cullinan	12th	C. L. Crutchley	31st
C. W. Garraway	16th	B. T. Mahon	38th

—Apply to D. C. FEENY, B.A.

LIEUTENANTS of MILITIA, Candidates for Line Commissions, are PREPARED for the Preliminary, the Further Examination, also for the Military Competitive Examination, by Lieutenant-Colonel COATES, Reserve of Officers, formerly of the Royal Military Academy, Woolwich, and Acting Brigade-Major at the Cape.

Colonel Coates has had much experience in coaching, and was, until quite lately, instructing at a large Army Coaching Establishment. His fees are about one-third less than those usually charged; and as he limits the number of his Pupils to Four, great individual attention is insured.—Apply to Colonel COATES, Shepton Mallet, Somersetshire.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.
Patron—Her Most Gracious Majesty the QUEEN.
Chairman—Major-General J. T. BOILEAU, R.E., F.R.S.

The Daughters of all Officers in her Majesty's Army, inclusive of the Royal Marines, and of officers who have sold out or otherwise retired from the Service, provided those children were born prior to such retirement, are eligible. The ages of admission are from 10 to 15. Each donation of £5 5s entitles to one life vote. Each subscription of 10s 6d entitles to one vote at all elections during the year. Further CONTRIBUTIONS to meet the current expenses are earnestly solicited by the Committee.

By order, G. W. FORSTER, Secretary.
Office, 22 Cockspur Street, London.

TO PARENTS and GUARDIANS.—A highly educated English GENTLEWOMAN, living in the best part of Berlin, DESIRES to RECEIVE a FEW YOUNG LADIES, of good position, into her house. They would have all the advantages of Education which the German capital now so fully affords, combined with English home life and comforts. Quite young children, requiring a mother's care, could also be taken charge of. Highest references given and required.—Address in first instance "LEX," Messrs. Reynell and Son, 44 Chancery Lane.

Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity, 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by

The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

2/- TEA OF EXTRAORDINARY QUALITY,

As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS

A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves.

COOPER COOPER and CO. sell their Teas for ready money only. They have thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co, thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

BANKERS—Messrs. Martin and Co., 68 Lombard Street, E.C.
SOLICITORS—Messrs, Harwood and Stephenson, 31 Lombard Street, E.C.
BROKERS—Messrs. Henry Pawle and Co, 13 Copthall Court, Throgmorton Street, E.C.

Messrs. Russell and Co., of New York, China, and London, are authorised by Messrs. Post, Martin, and Co., of New York, the Bankers and Agents of the Railroad Equipment Company, to offer for publi, subscription $1,000,000 Car Trust Securities in 1,000 Bonds of $1,000, or £205 each, of the Railroad Equipment Company, at the price of £205 per Bond, in addition to the amount of the accrued interest thereon payable—£10 per Bond on application, and the Balance thirty days after the date of allotment, when the Bonds will be delivered. Interest at the rate of 6 per cent. per annum, viz., £12 6s per Bond, is payable at the Company's London Agency, by quarterly or half-yearly Coupons attached, where also the Bonds are repayable at maturity at the price of issue.

PROSPECTUS.

These Car Trust Bonds are issued against Railroad Equipment and Rolling Stock leased to Railroad Companies in the United States with a view to ultimate purchase. The Companies, on delivery to them of such Rolling Stock, pay on account in cash from 10 per cent. to 30 per cent. on the price thereof, and give their promissory notes payable periodically for rents which are calculated to cover the deferred instalments of capital and interest. The Contracts of Lease generally extend over a period of 5 to 12 years, during which time the Railroad Company holds the Rolling Stock as Lessee only (the ownership remaining in the Lessor), and by the terms of the contract the Railroad Company is bound to keep such Rolling Stock in repair, fully insured, and distinctly marked as the property of the Lessor, to replace it if destroyed, and to hold it subject to the Lessor's inspection. The Rolling Stock becomes the property of the Railroad Company only upon full payment of all rents and due performance of the provisions of the Contract of Lease.

The amount the Railroad Companies have to pay, under this system, to secure the eventual ownership of the Rolling Stock, is less than the rent per mile they would generally have to pay under what is known as the "mileage system" for hire alone, and it is to their interest to fulfil their obligations promptly, as any default forfeits, not only the use and possession of the Rolling Stock, but also the benefit of all previous payments made on account of capital and interest.

The Rolling Stock, Contracts of Lease, Promissory Notes, and Insurance Policies are assigned by the Lessor to some substantial Trustees (except where the Contracts are made with such Trustees direct), in trust for the Bondholders; and such Trustees attend to the collection of the Promissory Notes, the proper inspection of the Rolling Stock, and the payments of the principal and interest of the Bonds as they mature.

The rights of Lessors under these Contracts of Lease are fully supported by the Courts of the United States, whose practice has been, in the case of a Railroad failing to pay the interest on its Mortgage Bonds, and so being put into the hands of a Receiver, to order the notes covering the rents, on the prompt payment of which the right of the Railroad Company to the continued use of the Rolling Stock is dependent, to be paid by such Receiver, on the ground that the rolling stock is necessary to the running of the road, in the interest of the Bondholders, as well as of the Shareholders.

During the last three years the Railroad Equipment Company has made Contracts for Leases on this plan with more than thirty different Railroad Companies in the United States, supplying them with Rolling Stock to the extent of about $6,000,000.

The Railroad Equipment Company issues a separate series of its own Bonds against each Contract of Leas or original Car Trust, Certificates representing the Equipment Company's share or interest in the Lease, the face of each Bond bearing the name of the Railroad with which the Contract is made, and the endorsement of the Trustees that they hold the securities belonging to that particular issue in trust for the holders of those Bonds. The Railroad Equipment Company has thus far issued Bonds to the amount of $5,700,000
Of which there have been matured and paid 1,750,000
Leaving outstanding.......................... 3,950,000
which are being paid off at the rate of $100,000 per month. Of these issues, fully $5,000,000 have been purchased by Banks, Trust and Insurance Companies, and private investors in the United States.

It will be seen from the foregoing that the holders of Bonds are protected by

The obligation of the Equipment Company to the Bondholders direct.

The obligation of the Railroad Company, the benefit of which is vested in the Trustees for the Bondholders.

The Margin of Cash paid on delivery of the Rolling Stock.

The further instalment of Periodical Cash payments.

And lastly,

The Rolling Stock itself, which is a security for the fulfilment by the Railroad Company of its obligations to the Trustees, and thus becomes in effect a security to the Bondholders for the issue based thereon, which security is retained by the Trustees on behalf of the Bondholders, until the last note is paid.

Messrs. Russell and Co. will receive Subscriptions, through the Bankers of the Company in London, for the following Series of the Railroad Equipment Company's Bonds, viz.:—

400 Bonds for $1,000, or £205, each ($490,000 in all), maturing in ten equal Annual instalments of 40 Bonds each on Oct. 1, 1885, and on Oct. 1 in each succeeding year to Oct. 1, 1894, inclusive, with half-yearly Interest Coupons for £6 3s., each payable April 1 and Oct. 1, on the security of Rolling Stock supplied to the New York, Chicago, and St. Louis Railway Company, under a lease dated April 1, 1882.

400 Bonds for $1,000, or £205, each ($400,000 in all), maturing in ten equal Annual instalments of 40 Bonds each on Oct. 1, 1885, and on Oct. 1 in each succeeding year to Oct. 1, 1894, inclusive, with half-yearly Interest Coupons for £6 3s, each payable 1st April and 1st October, on the security of Rolling Stock supplied to the East Tennessee, Virginia, and Georgia Railroad Company, under a lease dated August 5, 1882.

75 Bonds for $1,000, or £205, each ($75,000 in all), maturing in instalments of 10 Bonds each half-yearly from January 20, 1884, to January 20, 1886, inclusive, and 15 Bonds on Jul 20, 1886, and 10 Bonds on January 20, 1887, with Quarterly Interest Coupons for £3 1s 6d each, payable January 20, April 20, July 20, October 20, on the security of Rolling Stock supplied to the Columbus Hocking Valley and Toledo Railway Company, under a lease dated January 9, 1882.

50 Bonds for $1,000, or £205, each ($50,000 in all), maturing in ten equal Quarterly instalments of 5 Bonds each on January 1, 1884, and on every succeeding April 1, July 1, October 1, and January 1, to April 1, 1886 inclusive, with Quarterly Interest Coupons for £3 1s 6d each, payable January 1, April 1, July 1, October 1, on the security of Rolling Stock supplied to the Texas and St. Louis Railway Company, under a lease dated July 18, 1882.

Trustee for foregoing Series of Bonds.—"The Central Trust Company of New York."

Also 40 Bonds for $1,000, or £205, each ($40,000 in all), maturing in instalments of 5 Bonds each Quarter from May 1, 1884, to February 1, 1885, inclusive, and 20 Bonds on November 1, 1885, with Quarterly Interest Coupons for £3 1s 6d each, payable February 1, May 1, August 1, November 1.

35 Bonds for $1,000, or £205, each ($35,000 in all), maturing in instalments of 5 Bonds each Quarter, from March 1, 1885, to March 1, 1886, inclusive, and 10 Bonds on June 1, 1886, with Quarterly Interest Coupons for £3 1s 6d each, payable March 1, June 1, September 1, December 1, on the security of Rolling Stock supplied to the Louisville, Evansville, and St. Louis Railway Company, under two separate leases, dated February 1, 1882, and June 10, 1882, respectively.

Trustee for last foregoing two Series of Bonds.—"The Fidelity Insurance Trust and Safe Deposit Company of Philadelphia."

These Bonds will supply what is greatly wanted at the present time in England, viz., a perfectly safe security yielding 6 per cent., repayable in London at the price of issue at fixed dates, thus enabling capitalists desiring investments for certain periods to select Bonds maturing at dates to suit their convenience.

Copies of the Laws of Connecticut, under which the Railroad Equipment Company is incorporated, certified copies of the Deed of Incorporation of the Company, and of the above-mentioned Leases and Trustees' Deposit Receipts can be inspected at the Offices of Messrs. Russell and Co. Copies can also be inspected at the Offices of Messrs. Harwood and Stephenson, Solicitors, 31 Lombard Street, E.C.

Prospectuses and Forms of Application may be obtained at the Offices of Messrs. Russell and Co., Nos. 5 and 7 Fenchurch Street; and from the Bankers and Brokers.

London, February, 1883.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London,—SATURDAY, February 17, 1883, Letters on Business and Remittances should be made to Mr. RICHARD JAMES WOOD,

SPECIAL SUPPLEMENT TO THE

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,204.—Vol. XXIV.] SATURDAY, FEBRUARY 17, 1883. [REGISTERED FOR TRANSMISSION ABROAD.} GRATIS.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, February 4, 1883.

Hospital Returns for week ending February 2, 1883:

	Total Force.	Sick.	Proportion %.
Artillery, Cairo	866	129	14·9
Cavalry "	1,194	216	18·1
Engineers "	263	23	8·7
1st Brigade "	3,505	335	9·5
2nd " "	4,149	322	7·7
Service Corps "	859	47	5·5
	10,836	1,072	9·9
Alexandria	2,624	252	9·6
Ismailia	153	7	4·5
	13,613	1,331	9·8
Officers	387	20	5·2
Men	13,226	1,311	9·9
	13,613	1,331	9·8
Horses	2,236	183	8·2
Mules	791	10	1·2
	3,027	193	6·3

The above returns, compared with those of last week, are satisfactory, as showing that the proportion of the forces upon the sick list has been reduced by more than one per cent., and that this amelioration is observable in each branch of the service, with the exception of the Artillery, which has slightly increased. Comparing it with the figures of a fortnight back, it will be found that the diminution amounts to nearly three per cent. on the total; and although some libellers of Tommy Atkins maintain that the decision to charge the usual stoppages against all men admitted into hospital has something to do with the reduction, it may still be assumed that the general health is improving. It should be noted that these stoppages do not apply to men already in hospital on January 10.

The following officers have left, per Carthage, in charge of invalids:—Surgeon Tidbury, A.M.D., and Major Groves, West Kent Regiment.

Assistant-Commissary-General Ronald Taylor, Commissariat and Transport Staff, will proceed to Ceylon, passage being provided per P. and O. steamer. Assistant-Commissary-General Fitz-Stubbs will assume the duties of Senior Commissariat Officer, Cairo District; and Assistant-Commissary-General Nugent will be Senior Commissariat Officer at Abbasiyeh, relieving Deputy-Assistant-Commissary-General Rainsford, who will assume charge of the 2nd Brigade, Cairo.

The following officers will proceed to England, per H.M.S. Serapis, for duty during voyage—Surgeon-W. E. Riordan and Surgeon N. McCreery, A.M.D.; and, per H.M.S. Tamar, for duty during voyage to Malta—Surgeon N. Leader, A.M.D., and Surgeon J. Tidbury, A.M.D. H.M.S. Serapis will leave about the 8th inst., and will take the 2nd Battalion Highland Light Infantry for England, and part of the 1st Battalion Shropshire Light Infantry for Malta, and part of 2nd Battalion Royal Irish Regiment for Malta.

H.M.S. Tamar will leave about 12th inst., and will take part of the 1st Battalion Shropshire Light Infantry and part of the 2nd Battalion Royal Irish Regiment.

The Lydian Monarch and the Assyrian Monarch will leave about the 27th inst., and will take the 7th Dragoon Guards, N Battery 2nd Brigade Royal Artillery, and No. 12 Company Commissariat and Transport Corps.

Passages will be provided for Lieutenant Hacket-Thompson, Cameron Highlanders, invalided to England; Lieutenant Hunter Blair, Gordon Highlanders, invalided to England; Lieutenant Lysley, King's Royal Rifle Corps, on three months' leave of absence on medical board to Malta.

Major Forster, King's Royal Rifle Corps, has been granted leave of absence as a special case, pending retirement from the service. Leave of absence in extension has been granted to Major W. Aitken, Royal Highlanders, from February 9 to March 5, 1883, on recommendation of medical board. Leave of absence for two months has been granted to Lieutenant Souter, Black Watch, as a very special case.

Lieutenant-Colonel Gordon, 2nd Argyll and Sutherland Highlanders, acting Assistant-Adjutant-General at Alexandria, will resume his duties as Brigade-Major, 2nd Brigade, from the 4th inst.; and Captain Carey, 2nd Highland Light Infantry, Acting Brigade-Major, 2nd Brigade, will rejoin his regiment.

The following officers have reported their arrival, are taken on the strength of the command, and are posted as under:—Surgeons-Major J. A. Shaw and W. O. B. White, Alexandria; Surgeon R. T. McGeagh, Alexandria; Surgeon-Major W. D. Wilson, Cairo; Surgeons H. R. Power, A. H. Anthony, and A. V. Lane, Cairo; Captain C. B. Willis, R.A., with C Baty. 3rd Brig. R.A., Abbasiyeh; Lieutenants H. J. Croft, R.H.A., with G Battery R.H.A., Helwan; Cutlar Fergusson, A.D.C. to Lieutenant-General Commanding; J. T. St. Aubyn, A.D.C. to General Officer commanding 1st Brigade; H. Huleatt, R.E., with 26th Company R.E.

Captain Dixon, Royal Irish Regiment, employed on topographical duties, is ordered to rejoin his battalion at Alexandria.

Major and Staff Paymaster Spiller has taken over the payment of the Highland Light Infantry from Captain Griffith, and proceeded with the battalion to England. Captain King, probationer for the A.P.D., has taken over from Major Spiller the payment of the 19th Hussars.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

The oldest inhabitant of the Camp cannot remember worse weather than we have had during the present month, and especially during the present week. Days and nights of continuous rain have been our portion, accompanied by such storms as make each rotten and leaky old hut strain and shiver like a ship at sea. Frost and snow would be more seasonable, and infinitely preferable. It is impossible to keep the rain out of the huts; it finds its way through roofs, casements, and doors, driven in by the storm. The soil underneath the huts being completely saturated, everything within is permeated with moisture, and unwholesome exhalations rise through the flooring, caused, to a great extent, by want of proper ventilation underneath. It is no unusual experience of an Aldershot hut to be awakened suddenly during the night by the descent of a body of water from the roof, caused by the tarred felt with which the huts are covered yielding to the wind and rain. Under the circumstances, it is needless to say that military exercises or drills of any kind are impossible. The drill-grounds are veritable quagmires, Cove Common and Rushmoor Bottom being impassable, and the ground between the North and South Camps flooded. Until we have at least a week's sunshine, it would be impossible to manœuvre infantry upon them, and mounted corps not for a much longer period. Sixty-two men of the 19th Hussars, 180 of the 85th, 103 of the Commissariat and Transport Corps, and 11 of the Military Police (all Reserve men), arrived here on Thursday from Egypt, *viâ* Portsmouth, having disembarked there from the Lusitania. Their discharge will be at once carried out. Serjeants Paulton, 26th Cameronians, Dunn, 85th Shropshire Light Infantry, and Kelly, 3rd Battalion, Rifle Brigade, have proceeded to the Royal Military College, Sandhurst, to be employed as drill instructors. A war game was played at the School of Garrison Instruction on Thursday, by officers of the Royal Engineers, assisted by Royal Artillery and Cavalry. Owing to pressure of regimental duty, caused in a great measure by the number of officers on leave, much difficulty is found in playing games twice a week. Several patterns of canvas ammunition-holders, similar in make to the leather ones used in South Africa, are being tried by the Infantry battalions here. A private of an Infantry regiment, confined in the Military Prison, has recently received, by order of a Board of Visitors, 25 lashes with the "cat," for insubordination, accompanied with personal violence to a warder. During the early part of last year, previous to the Aldershot Provost Prison being declared by the Secretary of State for War one of her Majesty's prisons, and within the meaning of the Act for regulating such establishments, difficulty was occasionally experienced in maintaining necessary discipline. But since this change was effected, it has been found that a judicious use of the lash has had a very sobering effect, the more so, as on these occasions the whole of the prisoners are paraded to see the punishment inflicted. The examination of officers attending the Veterinary Class, under Veterinary-Surgeon Walters, took place on Thursday. Captain C. H. Collette, 85th Shropshire L.I., has been appointed Adjutant of the School of Instruction for Auxiliary Forces (Infantry). The soup kitchen in connection with the Aldershot Lodging Association, established for the benefit of soldiers' families off the strength of regiments, is discontinued until further orders. If the Staff appointment of D.A.A.G. for Musketry be abolished in April next, as stated, it is hoped that the annual Army Rifle Meeting, which has been organised and successfully conducted here for several years past, by Major Burton, Scottish Rifles, who at present holds the appointment of D.A.A.G. for Musketry, may not be allowed to collapse. Last year the meeting did not take place, owing to Egyptian matters. There is a good round sum in the Funds to start with, and considering the vital importance of good shooting in the Army, and the desirability of encouraging such gatherings for this purpose, it will not be very creditable if this year does not see the meeting revived. Lieutenant-Colonel Slade, 3rd Rifle Brigade, is the inventor of a disappearing target, which has been used with success at some stations, but has not yet been tried here. Lieutenant H. de H. Haig, R.E., has been ordered to Aldershot. Lieutenant C. G. Neish, R.A., has been ordered here from Ireland. The first of a series of weekly winter-evening entertainments was given in the schoolroom of the 85th Shropshire Light Infantry, on Tuesday last, admission free. The room was well filled, and the entertainment was most successful. This is as it should be. If it were the general regimental custom to hold similar winter-evening amusements, they would do much to relieve the monotony and dullness of the camp at this season of the year. A class for instruction in Army Signalling, composed of officers and non-commissioned officers of the three arms, will assemble at the School of Army Signalling early next month,—Instructor, Major Thrupp, D.A.Q.M.G.; Assistant-Instructor, Serjeant-Major Hitchcock, R.E. Major C. D'O. Harmar, 39th Regiment, has been appointed to superintend the taking of a "remain" of all the military stores at Aldershot. The Divisional Drag Hounds have not been hunted during the week, owing to the weather. It has been notified, for general information, that the Secretary of State for War has decided that any soldier admitted into hospital for treatment for illness contracted in Egypt before January 1, 1883, shall be held to come within the class defined at Section A of Article 67 of the Allowance Regulations, and be exempt from stoppages for such treatment accordingly.

His Royal Highness the Duke of Cambridge opened a war exhibition at Humphreys Hall, Albert Gate, on Thursday, in aid of the Egypt War Fund. On the arrival of the Duke of Cambridge, shortly after three o'clock, the band of the 1st Life Guards played the National Anthem, at the conclusion of which his Royal Highness, accompanied by Princess Mary Adelaide, Duchess of Teck, the Duke of Teck, Lord and Lady Wolseley, proceeded to inspect the various exhibits. During the afternoon a selection of music was performed by the band of the 1st Life Guards, who were replaced in the evening by the band of the 4th Dragoon Guards.

We learn from India that a committee of military officers has been appointed to devise a scheme for the fortification of Ajmere.

The rising of Bheels and Afghans at Ali Rajpur has proved to be somewhat more serious than was at first supposed. Major Biddulph, the political agent at Bhopawar, attacked Chittoo, the insurgent leader, with a portion of the Malwa Bheel Corps and a troop of the Central India Horse, and drove him from his position towards the hills, south of Rajpur. One trooper was killed. The Bheels have again collected, and the troops are marching in two directions to attack them. Sir Lepel Griffin, the Governor-General's agent for Central India, has gone to the scene of the disturbances. A later despatch adds:—"The disturbances among the Bheels have apparently subsided. Three of the principal chiefs have fled, or are in hiding, with a few followers. The troops have not advanced beyond Dhar, and it is hoped that their services will not be called into requisition."

GERMANS AND ENGLISH.

A MILITARY-POLITICAL SKETCH.

BY A. VON BOGUSLAWSKI.

[Translated from the German.]

The Thirty Years' War gained for Germany her religious freedom; but the welfare of the nation was destroyed, the political power of the country broken, and the national pride annihilated. Germany stood amongst her neighbours without a united army, without a fleet, and without a centralised government. But we will not follow further the progress of her material and political decadency, for that has been often enough already described. We will content ourselves by drawing attention to those points which are necessary for considering the relations between the Germans and English. After the short-lived Naval power of the Dutch, England gained a Naval supremacy with which, up to the present day, she defies all rival efforts. When Germany, despite the bravery and success of her army, was sunk in a state of hopeless weakness; when the Pfalz was devastated by the French and Alsace torn away from us, the Revolutionary period in England had ended by the accession to the Throne of William of Orange, a united Army and Navy was organised. France was victoriously opposed, and through the enterprise of her merchants, the foundation of the Indian Empire was laid, which her soldiers and sailors conquered during centuries of energy and endurance. The British flag waved in all parts of the world, and that self-consciousness gradually awoke which can only be compared with the "Civis Romanus sum." What wonder, then, that the, at the time of the ocean-ruling Hansa, much-feared Germans sank in the esteem of such a nation, who, though it recognised in them the stuff to make good soldiers and sailors, yet, seeing them defenceless and powerless abroad, regarded them as unworthy of esteem. In Germany, the political narrow-mindedness increased more and more; in England, on the contrary, all eyes were turned across the seas to the remotest lands and most distant goals. Strength grew with each accomplished enterprise, and when one way did not lead to the end in view, another was tried. The Merchant Companies founded settlements, but Crown and Parliament never left them in the lurch, a fact which one would do well to recall to the memory of the German Reichstag. During the mercenary wars, England took her place as a Continental Power by the side of Austria and united Germany. One need only mention the name of Marlborough beside that of Prinz Eugen, to establish this fact. In the latter half of the seventeenth and the beginning of the eighteenth century, England and Austria unanimously opposed France. With the advent of Frederic II., a change took place. Maria Theresa's alliance with France placed England and Austria in direct opposition to one another, and effected the alliance of Prussia with England. Prussians, North Germans, and English troops gained glory and renown under the Duke of Brunswick, and the name of Prussia resounded through the world. The incomparable annals of the seven years' heroic struggle, as also the great King's system of government, gained for Prussia also from the English that acknowledgment which they, in their national pride, had unaccustomed themselves to allow the Germans. Frederic's subjects acquired self-esteem abroad, no one ventured to insult the Prussian flag, and yet we had no Fleet! After the great King's death, the change soon came, and the weak-minded policy which Prussia pursued at the commencement of this century placed us at the annexation of Hanover for a time in open conflict with the English, who, with admirable perseverance and endurance, continued to pursue their bitter warfare against France. The names of Nelson and Wellington are adorned with unfading laurels in the annals of English history; one English ship sufficed against three French, and defeats such as Ulm and Jena have never been suffered by the English arms. The rising of Prussia against Napoleon, poor and exhausted as the country then was, and three-fourths occupied by foreign troops, gave undeniably the most powerful impetus to the Imperator's downfall; but this fact was not fully recognised by Europe, and more especially by England. Sixty-five years later, an English military author first acquainted his countrymen with the truth, in his "Studies of Waterloo." There is no doubt that had it not been for the timely arrival of the Prussians, Wellington would have succumbed to his powerful adversary. According to English legends, however, the battle was decided by the advance of the English line, and the help from the Prussians did not count for much. During the times of peace which followed the great war, the feelings of the Germans and English towards each other cooled more and more. The free-born Englishman looked down with contempt on the oppressed and despotically governed Germans, who, even after their great and praiseworthy struggle for liberty, had no national tie to unite them. As the differences between England and Russia increased, so did also the dislike and mistrust of Prussia, which was considered to be completely dominated by Russian influence. The feelings of the Germans for the English were divided. The Liberals, as is well known, regarded the English Parliamentary system as the model of all constitutional development, while English public and private life found many admirers and imitators in Germany. On the other hand, not only the boastfulness of English statesmen gave much offence, but so also did the rude and pretentious behaviour of individual Englishmen, when coming in contact with foreigners. Many Englishmen looked upon the Germans as unpractical dreamers, who dragged on their miserable existences burdened by poverty and oppression. The Germans, on the other hand, saw often in the English only a pretentious, eccentric, thoroughly material people. Even those German Revolutionaries who, after the events of 1848-49 were banished from Prussia and took refuge in the land of liberty, complained bitterly of the exclusiveness of "those Chinese;" and certainly the English had small sympathy or regard for gentlemen with untrimmed beards and shabby clothes, who at table often used the knife in place of the fork. Even at the present day, the great difference in manners and customs considerably influences the opinions of one nation for the other. While the Englishman's hair stands on end if, when at table, he sees any one transgress the rules he has been taught, the German takes great offence at the Englishman's usual stiff bow, and cannot forgive him if, arriving a stranger at a party, he does not immediately get himself introduced to every one in the room in succession, a proceeding which the Englishman, again, thinks highly superfluous. The travelling Englishman, with all his eccentricities of appearance and behaviour, is the type presented on the German stage; while, in English plays, the German is represented as an ill-dressed, awkward, absent-minded, and spectacled professor. It is true that a certain class of English travellers have done much to injure their countrymen's reputation; but did not the citizens of Berlin, on their travels in South Germany, do formerly just the same, and help to gain for their countrymen the reputation of braggarts and boasters? But these English and Germans were not the real representatives of their countries, but only half-educated persons, of the lower middle-class, who possessed the means to travel. Despite these antipathies, the literature of both countries tended gradually to increase the influence exercised by each nation on the other. Voltaire had called Shakespeare "a half-drunken savage;" Goethe drew from him his best inspirations, and our modern novel-writers took English authors for their models. Lewes familiarised his countrymen with our great poet, and Carlyle wrote our greatest King's biography. While the English language had for a considerable time been much spoken in the higher circles of German society, German has in the last thirty years grown familiar to the English; and the influence of the Prince Consort, and the ties which unite the English and Prussian Royal Families, have done much to assimilate the manners and customs of the two countries. The policy pursued by Lord Palmerston ("Lord Firebrand") gave, again, much offence. While he encouraged and supported the movement for a united Italy, he showed himself decidedly hostile to German interests. In the war of 1848-50, England gave Denmark moral and diplomatic support, and England and Russia's interference compelled the Germans, who were at that time in a state of revolutionary agitation, to stand aloof from the struggle between the Danes and the Duchy of Schleswig-Holstein. In 1848 the English Press derided the attempt to organise a German Fleet, and it is true that the ways and means proposed for organising it deserved their contempt. England's frequent interference in the affairs of foreign States in the name of freedom and humanity, in direct opposition to which those people objecting to English rule were often treated, created the conviction in Germany that the English policy was a purely selfish one, and that those traditions of a united English and Prussian policy were purposely trampled under foot by the English. The Crimean War, again, enlisted the sympathies of the German Liberals; the reason of this was the repugnance felt by the greater part of the German nation for Russia and the Russian Emperor's system of Government, a repugnance which was increased by Russia's support of Austria in 1860. During the Danish War in 1864, England again forfeited all German sympathies by the hostile tone of her Press and her diplomatic relations with Germany and the Duchies. At that time the acknowledged antipathy of both nations reached its climax; but in 1848 affairs wore again a totally different aspect, when the Prussian policy was directed by a Bismarck. England had to witness, whether she liked it or not, the emancipation of the Duchies by Prussia and Austria. The English Government never at the time contemplated a serious interference—the whole uproar was created by the Press. During the whole course of these events there existed persons in both nations who did not follow the stream of idle prejudices, but exerted themselves to call to mind the common origin of the English and German races. The alliance of the Western Powers, sealed by the Crimean War and the *entente cordiale* between England and France, appeared for a time to govern European politics. But events soon showed that England had reserved for herself a complete independence of action, and it was only where English interests were really involved that this alliance held good. The year 1866 saw a rapid revulsion in the feelings of the English nation in regard to Germany, and especially Prussia. The energetic Englishman respects above everything energy in others. The rapid and brilliant success of the Prussians made a deep impression, and the sympathies of England during the war were decidedly on the side of Prussia. Then came the war of 1870. A number of newspapers ranged themselves on the French side, but the majority of the nation sympathised with the Germans. The partisans of the French gained ground, however, after the battle of Sedan and the continuation of the war, and when Germany demanded the restoration of German Lorraine and Alsace. The conditions of peace appeared too hard to those who had not, like Germany, perpetually suffered under the encroachments and invasions of the French; so public opinion remained divided till the conclusion of the war. Every one will remember the anxiety then prevalent in England and other countries after the war that Germany might follow the example of Napoleon I., and continue in her path of conquest. In several newspapers the possibility of a Prussian invasion was seriously discussed, and imaginations were excited by the "Battle of Dorking." Any thoughtful person must have recognised, however, that, after the French War, the German policy must be one of peace, and devoted to the strengthening of the new Empire, and that in no part of the world did German or English interests clash. During the years which followed, the relations of the two countries in nowise deteriorated, and the Press showed no hostility to Germany, while the result of the Berlin Congress was that in Russia the long-smouldering animosity to the German people began to manifest itself more and more openly. A large section of German society could not free itself from a blind predilection for or abandon the traditions of a close friendship with Russia. The years 1879-1881 first opened the eyes of many to the fact that this predilection would hardly find a response in the Russian people. If one inquires as to the reasons of the still partially existing aversion to England, one obtains no satisfactory answer. The trivial assertion that the English policy is a policy of shopkeepers, cannot be regarded as having any foundation. The policy of every nation is more or less selfish; and the term "shopkeeper" is the very last to apply to the English in the grandeur and ambitiousness of their commercial enterprises, and the bravery and persistency with which they know how to defend their interests. The English Empire is world-wide, and as such, with so extensive a frontier, she must be ever on the watch, and ready for action. In the German Army, one cannot forget that in 1870 English tradesmen furnished arms to Gambetta's agents. This was regarded, to a certain extent, as a breach of neutrality; but this view of the case is an incorrect one, as England and the English people remained perfectly neutral. No law can be framed to prevent private individuals from furnishing arms to a belligerent Power; tradesmen are tradesmen. Our manufacturers also supplied arms to foreign States. No. All these accusations against the English nation are unfounded; and since the year 1866, England has given the Germans no cause to complain. May this fact be remembered, and the antipathy which may have been here and there individually aroused, not extended to the entire great and noble nation, who are, through their origin and belief, closely related to us, and with whom for a whole century we have maintained the closest intellectual intercourse! England's continued silence in the great political questions which have arisen since the war of 1866 was regarded by many as a sign of weakness and decadency, it was a change from the policy of "Lord Firebrand," but in Germany this silence ought to have been valued, as she thereby acquired the ruling voice in European deliberations. This state of things was also doubtless brought about by England's inability, since the introduction of general conscription, to compete with foreign armies. The policy of Lord Beaconsfield completely destroyed the belief in England's decadency. The English commanded the Russians to halt in Bulgaria, after the war of 1877; they then annexed the Island of Cyprus, and carried on successful wars (with occasional reverses) in Afghanistan and South Africa. It is true the war with the Boers ended disastrously, and the want of energy with which it was carried on, and the treaty concluded with the Boers after the defeat of the English arms, were bitterly resented by the British Army; but the question is,—Was it not rather the result of a careful consideration on the part of the Government which induced them to make peace, and the conviction that the ill-feeling created in Germany and Holland by the war would, were the Boers ultimately defeated, greatly increase? But the victorious campaign in Egypt has now completely obliterated the stain on the British Military honour. The war commenced with the bombardment of Alexandria, and the fact that the town was thereby partially demolished, was seized upon as a pretext for an attack upon England. It cannot be denied that the English sailors did not always act exactly in a humane manner, and that their conduct contrasted ill with the professions of humanity blazoned abroad at English public meetings, called together to meddle in the affairs of foreign nations. But what General or Admiral has it in his power to direct every shot and prevent every excess? The wounding of the English Consul at Alexandria and the murder of the two sailors was sufficient to justify the bombardment, without taking into consideration the political and military situation. The English plan of operations on the mainland was distinguished by its correctness and precision. The English Military system cannot, in case of a European war, provide an army adequate to cope with those of other countries, but the fact has been again proved that in the event of a war with half-civilised nations, the indomitable energy and courage of the English lead them to speedy victory. A great mistake, which has been often latterly made by correspondents of the principal German papers, who are otherwise well informed, is to criticise the English Army from a Continental stand-point. The *République Française*, which contains often excellent military articles, does not fail to call attention to this fault of the German correspondents, the reasons for which are apparent. On the whole, the paper criticises English affairs in an able manner. It is not the aim of this article to criticise the operations in Egypt, for which purpose we have not as yet collected the necessary material, but we only allow ourselves a few general remarks. The English Army was confronted by an enemy much superior to them in numbers, but without an able leader, and destitute of military discipline and ordinary courage. After Arabi's troops had for weeks kept the English engaged in outpost skirmishes, the basis of the English operations near the Suez Canal was laid, and the advance made on Ismailia, a narrow tongue of land, surrounded on north and south by the Desert. The English troops had as usual to contend with the difficulties of climate and want of proper provision; but their losses on the whole, the battle of Tel-el-Kebir included, were comparatively small. The Infantry seems on both sides to have opened fire at a very great distance (with the exception of the English at Tel-el-Kebir); the Cavalry, which General Wolseley always placed on the wings of his small army, completely routed the Egyptian Artillery and Infantry, who fled panic-struck before them, but one cannot draw any reasonable conclusion from this as to the efficiency of a cavalry attack on an unbroken line of infantry. The Egyptian attack on the English camp at Kassassin, on September 9, was a complete failure; while, on the other hand, the attack made by the English on September 13, which led to their decisive victory, was successfully planned and carried out. It is quite apparent that the Egyptian Cavalry were no longer placed in the van of the army, and that they must have abandoned the field to the English, or they would have discovered the breaking-up of the English encampment, and given warning in time. The English General had decided to attack the Egyptian position at daybreak, and relying on the moral and physical judiciousness of his men, abandoned all elaborate flank movements and ordered a front attack, while the Cavalry was to surround the enemy's flanks; this manœuvre was carried out with English bravery, order, and precision. After a short engagement between the Artillery, in which the Egyptians suffered great loss, the English carried the enemy's earthworks at the point of the bayonet. Their construction is said to have been imperfect, while no authentic accounts have been given as regards their strength. The enemy, thus surprised, were finally defeated by the Cavalry operating on their right wing. The losses of the English, taking into consideration the Egyptian entrenchments and breech-loaders, were unusually small. Despite these, for the English, advantageous circumstances, Tel-el-Kebir can be regarded as a practical reminder of the importance, under favourable circumstances, of a sudden, powerful attack on intrenchments, and the usefulness of practising night marches and attacks, which is too much neglected at our manœuvres, and which are counted by many of our higher officers as belonging to the superannuated traditions of the past. The German and English Armies are organised on a totally different system, but resemble each other in the severity of discipline maintained in each.* They resemble each other also in the bravery and endurance which they display in the most dangerous military emergencies, but it is especially in the officers' ranks where the resemblance lies. We cannot extend the comparison to the "Landwehr" and officers of the Reserve, as they do not exist in England, but confine ourselves to those in the Line regiments. Formerly, the great difference between English and Germans was that the former could purchase their commissions, but this was abolished since 1871. Another existing difference is that the English commissioned officer does not occupy himself so much with the petty service and private drill of his men, but leaves them to the more experienced and often more competent non-commissioned officer. The frequent and long "leaves" of the English are unknown to the Germans, and the military service in Germany is much harder, owing to the constant enlistment of new recruits, and the share Line officers take in the Landwehr and Reserve; but on the other hand, the Englishman must be ever prepared to accompany his regiment to the most distant lands where waves the British flag; it can't be denied that this service in foreign climates tends to enlarge the mind, and to gain experience of every sort. All these differences in the two armies considered, our above assertion that the officers of both resemble each other is founded on the fact that they have the same social position, and are generally recruited from among the best and most highly-educated portion of their nation. In the eighteenth century, the Prussian and German nobility furnished most of the officers, and the English Army and Navy were filled with the younger sons of Peers, while the heir to the titles and estates generally served only a short time. In Germany, other elements have been introduced since 1808, and the sons of burghers and higher officials now swell the ranks; in one word, every English and German officer is more or less a gentleman, and one expects from him perfect breeding and a high sense of honour; if he does not possess these attributes, he is not long tolerated in the Army. In an army as numerous as the German, it is difficult to maintain these traditions; but it is all the more necessary, when one considers the important influence exercised on the men by their superiors. The other minor differences consist in the following,—that the English officer always appears in plain clothes when not on duty, and the German is not allowed to unless on leave; and that the English are, as a rule, much better off than the Germans, and their mess arranged on a far more luxuriant scale. We do not intend, by these comparisons, and by extolling the merits of English and German officers, to under-rate those of other armies, such as the Austrian and Italian; we are only anxious to prove the analogy existing between the two armies, and the absence of real cause for dislike in one nation for the other. The aim of this article is to remove as much as possible the hazy but yet strongly-felt prejudices still existing. If it is the business of a conscientious General to become acquainted with those political questions with which he must possess a keen power of observation and an impartial judgment, it is equally important that the officer of lower rank should follow closely the progress of passing events, for it is from among these younger officers that the future leaders of the Army will arise. In this way, these unfounded but strongly-felt prejudices would melt away. Having once taken root, they are regarded as inviolable truths. He who devotes himself to the study of current events will be able to form an opinion for himself. It would be well if, with this in view, the Military Correspondents would now and then cast a glance at what is passing in foreign countries, and which is necessary, to enable them to give a correct description of foreign campaigns.

Obituary.

Lieut.-Gen. C. Hood, on the Retired List, died on the 8th inst., aged 57. The deceased entered the Army in 1844, and obtained a lieutenancy in 1846, in which year he was employed as secretary on a special public mission to the Argentine Republic, to settle the difference on the part of the combined Powers of England and France, and General Rosas, the Governor of Buenos Ayres. The gallant officer was promoted to the rank of captain in 1851, and from May, 1855, till the following January he served in the Crimea with the Buffs, taking part in the siege and fall of Sebastopol. He commanded the ladder party of the above regiment in the assault of the Redan, and he marched his regiment, with colours flying, into the Karabelnaia, these being the only English colours that entered Sebastopol. (Medal, brevet rank of major, 5th Class of the Medjidie, and Turkish medal.) He became a col. in 1865, and became a major-gen. in 1870.

To the list of those officers who have succumbed to sickness contracted in the late campaign in Egypt must be added the name of Major G. Logan, of the Bengal S.C., second in command of the 7th Bengal N.I. Both on the outward and homeward voyage Major Logan paid special attention to the regiment's transport, and he contracted glanders while moving among the animals suffering from that disease. He died shortly after the return of his regiment to Lucknow, and is the only officer of the Indian Contingent whose death is attributable to the campaign. Major Logan served with distinction in the Indian Mutiny campaign.

The Worshipful Company of Bowyers have agreed to make an annual grant of 25 guineas to encourage good shooting in the Army, and the Secretary of State for War has agreed to apply the grant for this desirable object.

The Commissioners of the Patriotic Fund have issued the following notice, in reference to the admission of children to schools:—"The Royal Victoria Patriotic Asylum, on Wandsworth Common, for the maintenance and education of the orphan daughters of soldiers, sailors, and marines of her Majesty's Armies and Fleets, was in the first instance restricted to the daughters of those who had served in the Russian war. Its benefits were subsequently extended to the orphans of men who lost their lives in other wars. The Royal Commissioners of the Patriotic Fund are now enabled still further to extend its benefits, and to admit the daughters of men of the above classes whose deaths have resulted from other causes than war. The Executive and Finance Committee are therefore prepared to receive applications for admission. To fill the vacancies as they arise, from time to time, the claims will be considered in the following order:—(*a*) Those whose fathers have been killed or have died whilst engaged on war service, or within six months of the termination of such service, from wounds received or disease contracted therein. (*b*) When the father has met with a violent death whilst engaged in an act of duty. (*c*) Daughters of deceased men who had done good and faithful service in the Navy and Army. The ages of admission are from 7 to 11. The children of marriages contracted whilst the fathers were serving are alone eligible. Under similar circumstances to those above described, as regards the father's service and the parents' marriage, Roman Catholic orphans of both sexes will be placed in schools of their own faith, as vacancies occur. Applications to be addressed to the Secretary of the Royal Commission of the Patriotic Fund, 5 St. Martin's Place, London, W.C.—By order of the Committee, WM. H. MUGFORD, Secretary."

THE ROYAL MARINES.

The paper read by Capt. Colomb, of the Royal Marine Artillery, at the Royal United Service Institution, on Friday, Feb. 2, on the "Future of the Royal Marines," was comprehensive in its scope, inasmuch as it dealt not only with the probable future, but detailed the past history, the services, and fluctuations of the corps from its first formation. It was not, however, the past, but the suggested future employment of the Marines that called forth discussion at the conclusion of the lecture, in which many distinguished officers took part, among whom were Gen. Lowder, Admiral Boys, Gen. Schomberg, Gen. Sir Andrew Clarke, K.C.B., and others. The main points considered were, first, the utilisation of Marines as a nucleus for colonial defence; and, second, for embarkation on board armed merchant cruisers. The unsatisfactory state of the defence of our Colonial possessions has for years been a source of comment, and it is fortunate that the matter has stopped there, and that none of the coast towns of our dependencies have had to feel the want of a protecting element in time of actual warfare between the mother-country and a great Naval Power. The suggestion of Capt. Colomb that detachments of the Royal Marine Corps should furnish the nucleus for Colonial forces, and more especially for the Naval bases in our Colonies, is doubtless a good one, but these detachments should not be numberless small bodies sent out from the home head-quarters, but part and parcel of a strong battalion stationed in the chief seaport town of the particular colony, detachments from which should be located at the most exposed towns on the sea-coast, added to which there should be a certain strength available for the immediate placing of an armed force on board such merchant cruisers or vessels for coast defence as the colony might be able to improvise. To those colonies where there are at present no British troops, such as Australia and New Zealand, the aid of a force of Marines would be invaluable; and even where troops are already stationed, as at the Cape of Good Hope, Singapore, or Hong Kong, a battalion of Marines for any service that might be required afloat or along the coast would be of equal value. Vancouver's Island should also not be forgotten, as a holdfast in the North Pacific. It has been hinted that such an arrangement as that proposed would demoralise the men, from being too much on detached duties, and that in a few years they would lose their identity, and consequently their special value as marine soldiers altogether. Possibly this might be the case, if the same men were kept year after year on the same duties; but as, in order to meet the contingencies of a new system, the corps would have to be materially increased, there could be no reason why each battalion should not call in its detachments every three years and be relieved by another from home, the officers and men of the battalion returning to head-quarters going through a renewed gunnery course, and then in turn embarking for a tour afloat. By this routine it is possible that the same men would only, during their period of service, have their one, or at the outside two, terms of colonial employment, and consequently there would be no deterioration. As a set-off against the cost of the battalions detached to the colonies for particular service, each colony should bear the charge for the number it requires, and thus relieve the Admiralty of excess in estimates. With regard to the second point, the desirability of embarking Marine Artillery or men of the Light Infantry branch of the corps, duly qualified in gunnery, on board armed merchant cruisers, there can be no question. The scheme for the armament of these cruisers in time of emergency has already been propounded by the Admiralty, and supplies of guns are now being sent from the Royal Arsenal at Woolwich to Bombay, Hong Kong, Cape Town, and Sydney, where they will remain until required. If the merchant ships that are to be hired to receive these guns retain their own crews, it is very certain they will have to be supplemented by trained men to work the guns. In time of a great war, sufficient seamen gunners and able seamen from the Fleet could not be spared for this purpose, and, therefore, who more qualified for such special service than the men proposed? The presence of Gen. Sir Andrew Clarke, Royal Engineers, at Capt. Colomb's lecture was a happy coincidence, as (in his own words) he has at present "the responsibility of advising the Government, not only as to the defence of our commercial ports in England, but the defence of our coaling stations abroad, and he believed the Marine force supplied a satisfactory solution to both questions. To him, having regard to his present duties, the paper had come most opportunely."

A military commission, to which belong, besides Turkish officers, also the German officers temporarily in the service of the Porte, has, the *Morning Post* states, submitted to the Sultan a plan for the reorganisation of the Turkish Army. Three alternative schemes are proposed. The first, which suggests a new system of recruiting, as well as of mobilising the reserve, would involve no extra expense. The second scheme would necessitate a slight outlay. The execution of the third scheme, which aims at a total reorganisation of the Turkish Army, would cause the disbursement of large sums, to be distributed, however, over a long period. If the latter scheme should be carried out, it would have the effect of placing the defensive forces of the Turkish Empire on a level with those of the other Military Powers of Europe; while, if once completed, it would keep within the limits of the financial exigencies of Turkey. As had been expected, this plan advocates a radical change in the mode of spending money. Hitherto large sums have been wasted indirectly for the Turkish Army, the maintenance of which swallowed up a large proportion of the yearly budgets, without any equivalent benefit to the country. Besides other reforms tending in that direction, the commission proposed the total abolition of the rank of Pasha. There are at present so many incapable and completely useless, and, at the same time, highly-paid Pashas in the country, that their number is entirely out of proportion to the strength of the Army. The commission thus points out a disease which nothing but a radical remedy will cure.

---

* We do not attach any value to the statements which appeared in the papers of the excesses practised by English soldiers on the wounded. We know that there exist in every army wretches who disgrace their colours by their conduct, and everywhere in the heat of battle the bestial part in man's nature is let loose.

Tuesday's Gazette.

ARMY.

WAR OFFICE, PALL MALL, February 13, 1883.

6th Dragoons—Lieut.-Col. F. G. S. Curtis has been appointed to command the regt.; Major W. W. Bennitt to be Lieut.-Col., vice Col. E. A. Gore, placed on half-pay; Capt. A. C. McKean to be Major, vice W. W. Bennitt (all three dated Jan. 23).

8th Hussars—Lieut. B. T. Mahon, from the 21st Hussars, to be Lieut., vice C. Jackson, appointed a probationer for the S.C.

12th Lancers—Capt. W. Colquhoun has been seconded for service as a probationer for the Army Pay Department (Feb. 6).

ROYAL ARTILLERY.

Major and Brevet Lieut.-Col. E. Broadrick retires upon retired pay, with the hon. rank of Col.; Lieuts. F. H. M. Leader and E. Peel resign their commissions; Major and Brevet Col. H. Brackenbury, C.B., to be Lieut.-Col., vice J. Hanwell, retired (Dec. 15, 1882); Lieut.-Col. D. J. Welsh (late Bengal), from the Supernumerary List, to be Lieut.-Col., vice C. V. Arbuckle (late Bengal), retired (Dec. 17, 1882); Major H. F. Smyth, from half-pay, to be Major, vice Brevet Col. H. Brackenbury, C.B., promoted (Dec. 15, 1882); Capts. F. B. Knox to be Major, vice W. P. Platt, retired; W. L. Davidson, from the Supernumerary List, to be Capt., vice F. B. Knox; J. K. Trotter, from the Supernumerary List, to be Capt., vice W. Martin (all three dated Jan. 24); Lieut. S. D. Rainsford to be Capt., vice H. H. Costobadie, seconded for service as an Adjt. of Auxiliary Artillery (Feb. 1).

The under-mentioned Captains, from the Seconded List, to be Captains (dated Jan. 1):—E. Lake, A. E. Duthy, C. J. Long, G. R. Challenor, E. M. Flint, and A. H. Callwell.

The under-mentioned Lieutenants, from the Seconded List, to be Lieutenants (dated Jan. 1):—T. F. T. Fowle, C. E. Walker, J. J. Hewson, W. L. White, J. C. Marston, and the Hon. J. E. P. Vereker.

The under-mentioned officers have been placed upon the Seconded List (dated Jan. 1):—Capts. S. Murray, N. L. Walford, M. Wynell-Mayow, F. T. M. Beaver, F. W. Campbell, and J. St. L. Wheble; Lieuts. H. S. Dawkins, C. E. Reynolds, W. St. P. Bunbury, and F. L. Nathan.

Lieut. L. Bell to be Lieut. upon the Seconded List, on appointment as Inspector of Warlike Stores and Firemaster at Cape Town (Jan. 7).

Lieut. C. D. Cottrell to be Lieut. on the Seconded List, on appointment to the Bombay Native Artillery.

ROYAL ENGINEERS.

Col. J. M. C. Drake, C.B., has been placed upon retired pay, with an annuity and the hon. rank of Major-Gen. (dated Dec. 6, 1882, and not upon half-pay, as stated in the *Gazette* of Dec. 5, 1882).

Major and Brevet Lieut.-Col. C. C. S. Moncrieff, C.S.I. (late Bengal), has retired upon a pension and extra annuity, with the hon. rank of Col. (Jan. 23).

LINE BATTALIONS.

The King's (Liverpool Regiment)—Lieut. E. L. Maisey to be Capt., vice E. Hanstock, seconded (Jan. 30).

The Norfolk Regiment—Major C. H. Shepherd has been seconded for service as an Adjt. of Auxiliary Forces (Jan. 10).

The Bedfordshire Regiment—Qrmr.-Serjt. Henry Medd to be Qrmr., vice D. McCartney, retired.

The Leicestershire Regiment—Lieut. G. H. F. Burne to be Adjt., vice Capt. F. W. Reader, who has resigned the appointment (Jan. 15).

The Royal Scots Fusiliers—Lieut.-Col. and Col. R. W. C. Winsloe, Aide-de-Camp to the Queen, has been appointed to command a batn. (Jan. 23).

The Worcestershire Regiment—Lieut. J. E. Barry has been appointed a probationer for the S.C. (Jan. 24).

The East Lancashire Regiment—Lieuts. P. H. N. Lake resigns the appointment of Instructor of Musketry; B. G. Lewis has resigned the appointment of Instructor of Musketry (Nov. 1, 1882).

The Duke of Wellington's (West Riding Regiment)—Lieut. H. G. Fellowes resigns his commission,

The Royal Sussex Regiment—Col. S. Hackett, having completed five years' service as a Regtl. Lieut.-Col., has been placed on half-pay (Feb. 2); Lieut. E. M. Reed has been appointed a probationer for the S.C. (Oct. 1, 1882).

The Prince of Wales's Volunteers (South Lancashire Regiment)—Lieut.-Col. R. C. Brook has been appointed to command a batn. (Jan. 17); Major G. A. White to be Lieut.-Col., vice Col. W. D. Shipley, retired (Jan. 17); Supernumerary Major J. Brougham to be Major, vice G. A. White (Feb. 16).

Princess Charlotte of Wales's (Berkshire Regiment)—Lieut. F. B. R. Hemphill, Adjt., to be Capt., vice T. Harris, promoted (Jan. 8).

The King's Own Light Infantry (South Yorkshire Regiment)—Capt. G. H. Denshire retires from the service, receiving a gratuity, with permission to retain his rank and wear the prescribed uniform.

The Manchester Regiment—The promotion to the rank of Major of Capt. E. P. Phillipps. dated March 18, 1882, is cancelled under the provisions of Article 34 of the Royal Warrant of March 11, 1882.

The Rifle Brigade (The Prince Consort's Own)—Capt. and Brevet Lieut.-Col. R. B. Lane to be Major, vice W. H. M. Fitzherbert, retired (Nov. 18, 1882).

Medical Department—Surg.-Major R. W. Clifton to be Brigade-Surg., vice H. R. L. Veale, M.D., granted retired pay (Jan. 2); Surg. J. Mulrenan, M.D., from half-pay, to be Surg., vice T. C. Nugent, resigned (Jan. 16).

Army Hospital Corps—Lieut. of Orderlies Thomas Francis Kennedy to be Qrmr. (dated July 1, 1881, such antedate not to carry back pay as Qrmr. prior to Jan. 1, 1883).

Ordnance Store Department—The rank granted to Qrmr. G. Harris in the *Gazette* of Jan. 23, 1883, should have been the "hon. rank of Captain" only, and not the "hon. and relative" rank of Captain, as therein stated.

Half-Pay—Capt. A. G. Walker, from the Royal Artillery, to be Major (Jan. 11).

BREVET.

Major S. C. Kyle, R.A., to be Lieut.-Col., under the provisions of Article 11 (*f.f.*) of the Royal Warrant of March 11, 1882 (Jan. 15).

MEMORANDA.

The retirement of Major-Gen. W. J. Gray, Royal (late Bengal) Artillery, and the promotion in his succession of Major-Gen. C. Clarke, Royal (late Bombay) Artillery (since retired), are antedated to June 7, 1882.

Lieut.-Col. H. L. Jones, Royal (late Bengal) Artillery, to be Col. (Jan. 16).

Major H. H. A. Stewart, half-pay, has been placed on retired pay, with the hon. rank of Lieut.-Col. (Feb. 5). Major J. J. Ross, half-pay, is placed on retired pay. Capt. and Brevet Major A. T. Wintle, half-pay, Royal (late Bengal) Artillery, has retired upon a pension and extra annuity, with the hon. rank of Lieut.-Col. (Jan. 11).

RESERVE OF OFFICERS.

Lieut. R. E. Hamer resigns his commission.

Lieut. G. M. S. W. J. A. A. de Stacpoole, 3rd Batn. the Princess of Wales's Own (Yorkshire Regiment), to be Lieut.

INDIA OFFICE, February 13, 1883.

The Queen has approved of the following admissions to the S.C., made by the Governments in India:—

BENGAL STAFF CORPS.

To be Lieutenants:—Lieuts. J. W. B. Meade, from the Royal Artillery (dated April 2, 1881, but to rank from Jan. 25, 1877); F. Oswald, from the Bedfordshire Regt. (dated April 29, 1881, but to rank from June 19, 1879); 2nd Lieut. E. L. Wright, from the 1st Dragoon Guards (May 12, 1881).

BOMBAY STAFF CORPS.

To be Lieutenants:—Lieuts. A. D. Fordyce, from the Bedfordshire Regt. (dated Aug. 16, 1880, but to rank from July 2, 1879); W. B. Piers, from the East Yorkshire Regt. (dated March 29, 1881, but to rank from Jan. 1, 1881).

The Queen has approved of the retirement from the service of the under-mentioned officers of the Indian Military Forces:—Deputy-Surg.-Gens. Sir A. Christison, Bart., M.D., of the Bengal Army (Nov. 24, 1882); A. C. C. de Renzy, C.B., of the Bengal Army (Dec. 9, 1882); Brig.-Surg. J. Picthall, M.D., of the Bengal Army (Dec. 1, 1882); Surgs.-Major L. F. Dickson, M.D., of the Bengal Army (Nov. 27, 1882); P. F. Bellew, of the Bengal Army (Dec. 1, 1882); C. E. W Bensley, M.D., of the Bengal Army (Dec. 8, 1882); N. Hopkins, of the Bombay Army (Jan. 24, 1883).

The Queen has approved of the under-mentioned officer being transferred to the Retired List:—Lieut.-Col. H. D. E. W. Chester, of the Bengal S.C. (Dec. 14, 1882).

The Queen has approved of the under-mentioned officer being permitted to resign the service:—Lieut. E. V. Goldsmid, of the Bengal S.C. (Oct. 20, 1882).

BREVET.

The under-mentioned officer is granted a step of honorary rank on retirement:—To be Deputy-Surgeon-General: Brigade-Surg. E. S. Cleveland, M.D., of the Madras Army (Nov. 25, 1882).

The following appointment has been made on the Personal Staff of the Governor of Bombay:—Capt. G. H. Dean, 12th Lancers, to be Military Secretary, vice Major A. R. Heyland, Bombay S.C. (Jan. 1).

The following appointment has been made to the Staff of the Army in Madras:—Major J. R. Byng, Madras S.C., to be Deputy-Assist.-Adjt.-Gen., vice Lieut.-Col. Rowlandson, whose tour of duty has expired (Dec. 7, 1882).

MILITIA.

WAR OFFICE, PALL MALL, February 13, 1883.

ROYAL ARTILLERY.

3rd Brigade, Western Division—Lieut. W. B. Jones resigns his commission.

3rd Brigade, Scottish Division—Francis Leslie-Duncan, gent., to be Lieut.

2nd Brigade, Welsh Division—Lieut. C. L. Shubrick resigns his commission.

5th Brigade, South Irish Division—Lieut. T. C. Fair resigns his commission.

INFANTRY.

3rd Battalion, the Royal Scots (Lothian Regiment)—Capt. Sir G. D. Clerk, Bart., resigns his commission.

3rd Battalion, the Northumberland Fusiliers—Capt. A. H. Drummond to be Major.

3rd Battalion, the Royal Warwickshire Regiment—Lieut. W. A. Maude-Roxby resigns his commission.

4th Battalion, the Royal Warwickshire Regiment—The under-mentioned Lieuts. resign their commissions:—W. L. Fenwick and the Hon. U. J. G. R. Colborne.

4th Battalion, the Suffolk Regiment—The under-mentioned gentlemen to be Lieutenants:—Albert Julian Pell and Edward Papillon Prest.

4th Battalion, the Bedfordshire Regiment—William Martin-Leake, gent., to be Lieut.

3rd Battalion, the Leicestershire Regiment—The under-mentioned Lieutenants resign their commissions:—H. M. Edwards and E. C. G. Jackson.

3rd Battalion, the Royal Scots Fusiliers—Lieut. W. Younger resigns his commission.

4th Battalion, the Royal Scots Fusiliers—Lieut. the Hon. H. H. Dalrymple to be Capt.; Robert Bonham Bax Christie, gent., to be Lieut.

3rd Battalion, the Cheshire Regiment—Major and Hon. Lieut.-Col. C. H. France-Hayhurst to be Lieut.-Col. (Jan. 31).

4th Battalion, the Cheshire Regiment—The under-mentioned Lieuts. resign their commissions:—A. H. Nelson, E. L. B. Howard, and F. Morgan. Walter Arthur Bromley-Davenport, gent., to be Lieut. (Jan. 31).

3rd Battalion, the Royal Inniskilling Fusiliers)—Lieut. M. S. Stewart resigns his commission.

3rd Battalion, the Border Regiment—The under-mentioned officers resign their commissions:—Capt. H. Smith and Lieut. G. A. P. H. Warden.

3rd Battalion, the South Staffordshire Regiment—Capt. F. H. L. Newell, from the 3rd Batn. the Dorsetshire Regt., to be Capt.

3rd Battalion, the Oxfordshire Light Infantry—Henry George Hamilton Fitzmaurice, gent., to be Lieut.

4th Battalion, the Essex Regiment—Lieut. E. N. Disney resigns his commission.

3rd Battalion, the Loyal North Lancashire Regiment—Thomas Cowper, gent., to be Lieut.

3rd Battalion, the King's Own Light Infantry (South Yorkshire Regiment)—Frederick Louis Wolff, gent., to be Lieut.

6th Battalion, the King's Royal Rifle Corps—George Percy Lafont Pemberton, gent., to be Lieut.

3rd Battalion, the Highland Light Infantry—Capt. S. H. Hardy resigns his commission; also is granted the hon. rank of Major, and is permitted to wear the prescribed uniform on his retirement.

2nd Battalion, the Queen's Own Cameron Highlanders—Lieut. E. Grant resigns his commission.

4th Battalion, Princess Louise's (Argyll and Sutherland Highlanders)—Lieut. A. J. Blackett-Ord to be Capt.; Claude William Egerton Milborne-Swinnerton-Pilkington, gent., to be Lieut.

3rd Battalion, the Royal Munster Fusiliers—Thomas George Powell Glynn, gent., to be Lieut.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, February 13, 1883.

Berks—Capt. H. M. A. Warde, 19th Hussars, to be Adjt., in succession to R. W. Kearsley, who has retired from the service (Feb 2).

Royal 1st Devon—E. Gambier-Parry, late Lieut. Royal Welsh Fusiliers, to be Lieut.

Nottinghamshire (Southern Nottinghamshire)—Capt. and Brevet Major M. C. Day, 7th Dragoon Guards, to be Adjt., in succession to W. H. Dawson, who has retired from the service (Feb. 2).

West Somerset—Vet.-Surg. T. Channon resigns his commission.

VOLUNTEERS.

WAR OFFICE, PALL MALL, February 13, 1883.

ARTILLERY.

1st Cornwall (Duke of Cornwall's)—Lieut. E. C. Langford resigns his commission.

1st Fifeshire—Lieut. A. D. Brown resigns his commission.

5th Lancashire—Capt. J. Hardman resigns his commission; Acting Chaplain the Rev. S. Hastings resigns his appointment.

1st London (City of London)—Edward Charles Bambridge, gent., to be Lieut.

1st Newcastle-on-Tyne—Acting Chaplain the Rev. M. Gibson, M.A., resigns his appointment.

2nd Northumberland (the Percy)—The under-mentioned Lieuts. resign their commissions:—W. Hall and T. A. Scott.

1st Sussex—Acting Chaplain the Ven. Archdeacon J. Hannah, D.C.L., resigns his appointment.

2nd West Riding of Yorkshire—Capt. J. B. Holroyde to be Major.

4th West Riding of Yorkshire (Sheffield)—Qrmr. R. B. Streatfield resigns his commission; Charles Henry Gilbert Hay, gent., to be Qrmr.

ENGINEER.

1st Cheshire—Alexander Bleakley, gent., to be Lieut.

2nd Gloucestershire (the Bristol)—The under-mentioned gentlemen to be Lieutenants:—Charles Graham Geoffrey Lucas and Edward Roach Harding.

2nd West Riding of Yorkshire (Leeds)—Lieut. C. Malcolm resigns his commission.

RIFLE.

3rd Aberdeenshire (the Buchan)—Gen. the Hon. Sir A. Hamilton-Gordon, K.C.B., to be Hon. Col. of the Corps; Acting Surg. W. R. S. Jefferiss resigns his appointment.

1st Argyllshire—Lieut. D. Mactaggart to be Capt.

1st Berwickshire—Robert Marnock Donald, gent., to be Lieut.

2nd Bucks (Eton College)—Norman Tom Nickalls, gent., to be Lieut.

2nd Cambridgeshire (Cambridge University)—Lieut. J. H. E. Bailey resigns his commission.

5th Cheshire—Lieut.-Col. Comdt. Sir C. W. Shakerley, Bart., C.B., is granted the hon. rank of Col. Lieut. J. M. Toler to be Capt.; Lieut. J. Morgan resigns his commission.

1st Cornwall (Duke of Cornwall's)—Capt. G. G. Pender resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement. Lieut. J. A. Freeman to be Capt.

2nd Derbyshire—Thomas Swann, gent., to be Lieut.

3rd Devonshire—Acting Chaplain the Rev. T. Mozley, M.A., resigns his appointment.

3rd Volunteer Battalion, the Essex Regiment—Capt. J. Bellingham to be Major; Lieut. W. P. Heaton to be Capt. The under-mentioned gentlemen to be Lieuts.:—Frederick Emanuel Henbeck and Kilburn Llewellyn Knight.

1st Fifeshire—The services of Lieut. T. Mitchell are dispensed with.

Galloway—Capt. D. Craig is granted the hon. rank of Major.

2nd Lanarkshire—Capt. J. Loudon resigns his commission.

5th Lanarkshire (Glasgow 2nd Northern)—Lieut.-Col. Comdt. J. M. Forrester resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

6th Lanarkshire—Lieut. A. Campbell, jun., resigns his commission.

1st Volunteer Battalion, the King's Own (Royal Lancaster Regiment)—Lieut. A. B. Smith resigns his commission.

1st Volunteer Battalion, the Leicestershire Regiment—Charles Arthur Moore, gent., to be Lieut.; Acting Surg. J. Wright resigns his appointment.

2nd London—George Brooke Mee, gent., to be Lieut.

3rd London—Capt. A. Crossman is granted the hon. rank of Major.

4th Middlesex (West London)—Capt. H. C. S. Goldfrap, 2nd Batn. the Lincolnshire Regt., to be Adjt., in succession to Major J. Brougham, South Lancashire Regt., whose term of service as Adjt. expires (Feb. 16).

11th Middlesex (Railway)—Lieut. F. J. Fowles resigns his commission.

15th Middlesex (the Customs and the Docks)—Capt. T. Beck resigns his commission; Lieut. J. Z. Cahill to be Capt.

16th Middlesex (London Irish)—Acting Surg. C. H. Furnivall resigns his appointment.

17th (North) Middlesex—Lieut. F. L. Wolff resigns his commission.

21st Middlesex (the Finsbury)—Samuel Bateman East, gent., to be Lieut.

23rd Middlesex—Alfred Sprackley Johnson, gent., to be Lieut. (supernumerary).

3rd Monmouthshire—Lieut. R. W. Kennard resigns his commission.

1st Northamptonshire—Joseph Hunting, gent., to be Lieut.

2nd Oxfordshire—Edward Cotterell, gent., to be Acting Surg.

1st Staffordshire—Capt. W. E. Wood resigns his commission; also is granted the hon. rank of Major, and is permitted to continue to wear the uniform of the corps on his retirement. Paul Bedford Elwell, Esq., to be Capt.

7th Surrey—Capt. J. H. Hastie resigns his commission. The under-mentioned Lieuts. to be Capts.:—J. A. Ellis and W. H. Dieseldorff. The under-mentioned Lieuts. resign their commissions:—E. S. Whelpton, E. E. Salter, and T. Edmondston.

2nd Volunteer Battalion, the Royal Warwickshire Regiment—Lieut. C. A. Phillips resigns his commission.

1st Tower Hamlets (the Tower Hamlets Rifle Volunteer Brigade)—Lieut. W. S. Cottew, from 3rd Middlesex R.V.C., to be Lieut.

2nd Worcestershire—William Parker Yates Bainbrigge, gent., to be Lieut. (supernumerary).

(Where not otherwise specified, the foregoing commissions and announcements bear date February 14, and the current year must be understood.)

Friday's Gazette.

ARMY.

WAR OFFICE, PALL MALL, February 16, 1883.

STAFF.

Major-Gen. J. R. S. Sayer, C.B., from Brigdr.-Gen. on the Staff, to be a Major-Gen. on the Staff, to command the troops in the Western District, vice Lieut.-Gen. T. H. Pakenham, whose period of service in that appointment is about to expire (April 1).

Lieut. R. Cutlar-Fergusson, Scots Guards, to be Aide-de-Camp to Lieut.-Gen. Sir A. Alison, Bart, K.C.B., commanding the Force in Egypt (Jan. 31).

MEMORANDUM.

Qrmr., with the hon. and relative rank of Capt., J. Walsh, Seaforth Highlanders (Ross-shire Buffs, the Duke of Albany's), to have the hon. rank of Major, in recognition of his services during the recent campaigns in Afghanistan and Egypt.

(Where not otherwise specified, the foregoing commissions and announcements bear date February 17, and the current year must be understood.)

Amusements.

Morning performances, arranged to bring aspiring young actresses or provincial dramas before the metropolitan public, are increasing in number. When these are maladroitly fixed at different theatres for the same day, those most interested in obtaining critical commentaries can hardly complain of receiving scant attention.

At the GAIETY was played, on Tuesday, for the first time in London, Mr. E. Romaine Callender's three-act comedy, called "Light; or, My Darling," originally produced at the Theatre Royal, Sheffield, last August. It is only a moderately-effective play, illustrating a simple domestic story, in association with a travelling circus. Mr. E. R. Callender retains the character of Samson, and Mr. T. Nye, Mr. Harry Monkhouse, and Miss Sara Beryl represent Signor Smitherini, proprietor of the Cirque; Yorick, the clown; and Julius Cæsar, the young acrobat. Miss Myra Holme embodied Helen, Samson's daughter; Miss Rosie May appeared as Lucinda, the leading equestrienne; and Miss Lyons was introduced as the child Nelly. The approval of the audience was very faintly expressed when the curtain fell.

At the VAUDEVILLE was presented the same afternoon a new farcical comedy, called "Our Regiment," founded on the German, and written by Mr. H. Hamilton, who dramatised Ouida's novel of "Moths." The scene is laid at a country town known as Mudborough-on-Slush, and the three acts take place in the drawing-room of Mr. Dobbinson, a retired merchant; the breakfast-parlour in the house of his friend, Mr. Ellaby; and the gardens of Mr. Dobbinson's mansion. The military element is represented by two officers of the 8th Lancers,—Captain Fetherston and Guy Warrener, played by Mr. F. W. Wyndham and Mr. Gerald Moore. A song, called "Lance and Pennon," composed by Mr. F. Stanislaus, is introduced in the second act. Mrs. Leigh, Miss Fanny Brough, Miss Maggie Hunt, Miss Gabrielle Goldney, and Messrs. W. H. Denny, Frederick Thorne, and Herbert Akhurst, shared the other characters among them. Much compression is required, before any hope can be entertained of the piece becoming popular.

Another afternoon performance was given at the GAIETY on Thursday, for the benefit of Mr. Kyrle Bellew, who identified the occasion with his last appearance in London this year. The programme comprised scenes from "The School for Scandal," the balcony scene from "Romeo and Juliet," and a miscellaneous concert.

At the SAVOY THEATRE, on Thursday afternoon, Mr. D'Oyley Carte gave a special performance of "Iolanthe," when, for the first time, the whole of the fairies appeared with electric star-lights in their hair.

Miss Mary Dickens, daughter of Mr. Charles Dickens, and grand-daughter of the illustrious novelist, is now adopting the stage as a profession, and is accustoming herself to the presence of an audience by playing the small part of the tavern-keeper's daughter in the third act of "The Silver King," at the PRINCESS's.

With this week closes Mrs. Bernard-Beere's association with the management of the GLOBE THEATRE, which has not proved so financially prosperous as was anticipated.

LIEUTENANT-GENERAL SIR PATRICK MACDOUGALL has long been recognised as one of the foremost members of that section of the official community known in common parlance as the "reformers,"—in other words, the advanced school of Army reformers. We have before us a pamphlet, published for the General by Messrs. Blackwood, entitled, "Short-service Enlistment and the Organisation of Our Infantry, as Illustrated by Recent Events." The pamphlet is "Dedicated to General Lord Wolseley, whose campaign in Egypt has so gloriously vindicated the organisation which he had so large a share in establishing." We are told in the preface that "the remarks were written before the outbreak of the Egyptian War, and their publication was afterwards delayed as inopportune." General MacDougall continues:—"The paragraph in Sir G. Wolseley's Tel-el-Kebir despatch respecting the efficiency of the Infantry battalions engaged, seems to have revived the controversy as to the comparative value of old and young soldiers; and it is assumed, rather unreasonably, by his critics, that he meant to imply that the battalions were composed altogether of 'young soldiers,' rather than 'Short-service soldiers,' which obviously was his real meaning. Sir Garnet would have been strictly accurate in stating that the young soldiers, of whom there were a large number of between one and three years' service, behaved magnificently; but no one in his senses would contend that a force so composed throughout would be equal in war value to one having a leaven of old soldiers in the ranks. The controversy thus revived cannot have any useful result. Even those who would preferably return to a 'Long-service' Army, if they could—excepting always a few of extreme views—admit such a return to be impossible; and more than one of Sir Garnet's critics adduces the fact, in opposition to his advocacy of a Short-service Army, that the battalions in Egypt had all a strong backbone of Reserve men, thus employing the primary recommendation of 'short service' as an argument against that method of enlistment. Under the old system, there never was a war in which a battalion took the field without a large proportion of men of from one to three years' service at the one end, and of more than fifteen years' service at the other end. Thus, the 'long-service battalions' made up for war were composed of men having from one to twenty-one years' service, whilst the battalions that fought in Egypt, made up 'short-service battalions,' are intended to be—and as they always can be made up, if the system is properly administered—composed of men of from one to ten years' service, and of ages varying from twenty to thirty. And those who, with a view to disparage young soldiers, have shown they were composed of men averaging seven years' service, at a date when the Short-service system had been eleven years in operation, are really paying the highest compliment to a system capable of producing the results they describe." We consider it desirable to give the writer's preface in full, showing as it does the arguments advanced by the reformers to justify their views. But the question arises,—was the campaign in Egypt a crucial test of the merits of the system which the reformers have built up? The enemy we had pitted against us was a rebel army, commanded by an inexperienced rebel leader. The expedition which was despatched to Alexandria consisted of one Army corps only, and the campaign was of such short duration, that climatic or other influences had little time to make serious havoc among the forces in the field. When we consider all the circumstances of the case, we cannot but feel that General MacDougall has been induced to take far too favourable a view of the situation, when he speaks of the operations against Arabi having "gloriously vindicated the organisation of which Lord Wolseley has had so large a share in establishing." Occupying as we do a position among European nations, it should be our aim to produce a Military system which would enable us to assert our authority, and protect our rights in European warfare. Are we in a position to do this now? General MacDougall and those of his school may prefer to think that we are; we think otherwise. We are ready to give the reformers the fullest credit for the attempts they have made to provide us with an efficient Army, for we believe that they have been actuated by a desire to promote the interests of the nation. We cannot, however, close our eyes to facts, and no amount of argument, even from so high an authority as General MacDougall, will serve to show that we possess at the present time a defensive organisation worthy of the name. Wars now-a-days are short and decisive. Complications may arise at any moment to compel us to have recourse to arms. It is our bounden duty, then, to look the position in the face. We have been reforming for twelve years, and the result of the measures undertaken by successive Ministers has not been such as to render us more secure than we were, when the Army was taken in hand by Lord Cardwell in 1870. Lord Cardwell inaugurated the principle of short service. The idea was a good one. Germany had introduced the system, and had found that it worked well. But the German Army is organised on a different footing to our own. The Germans command the services of every able-bodied man. We, on the other hand, depend entirely upon voluntary enlistment. Our Regular Army is necessarily small. Being small, it should be as efficient as it is possible to make it. General MacDougall says:—"The changes in our Military system introduced by Lord Cardwell, and recently developed by Mr. Childers, are still viewed with dislike by regimental officers, who are unable to perceive how an army can be benefited by a system under which the condition of individual battalions was allowed not long ago so palpably to deteriorate. The deterioration was palpable, but the causes were not so evident, and until they are properly understood, no just judgment is possible." But why were these changes viewed with dislike? Only because those who knew best what the effect of them would be—the regimental officers, upon whom devolved the duty of working the new system—saw from the first that the system would not produce the beneficial results which were expected of it. We have no hesitation in saying that regimental officers of all ranks did their utmost to overcome the difficulties against which they had to contend; and yet, notwithstanding their exertions, the system broke down, and the changes since carried out have plainly demonstrated that they were right in their condemnation of the new order of things. The idea upon which Lord Cardwell based his reforms was good enough in theory, but his lordship and his advisers were, unfortunately, theorists only, and they could not, therefore, recognise the dangers which were ahead. They were so impressed, too, with the wisdom of their own ideas, that they refused to listen to the advice of those whose experience gave them a claim to make themselves heard, until the utter collapse of the system upon which they so prided themselves compelled them to do so. General MacDougall maintains that "the object of 'short service,' and its primary advantage, is the promotion of a Reserve." Now, nobody has ever uttered one word against short service, as a fundamental principle, and certainly there has never been any objection to the existence of a Reserve. What was contended was that the reformers, in their desire to establish a Reserve, entirely overlooked the necessity of maintaining the efficiency of regiments on home service; and Mr. Childers, to whom General MacDougall gives well-deserved credit, himself admitted, by the steps he took to raise the strength of regiments first for service, that there was reason for the complaints which reached the War Office as to the impossibility of working Short Service on the lines which Lord Cardwell laid down. Sir Patrick MacDougall has been guilty of the error—a common one, among those who think as he thinks—of supposing that those who differ from him object to reform simply because it is reform. We fail to see that any advantage is to be derived from such a form of argument. The "obstructives," as they have been called, are as anxious as General MacDougall or any other reformer is to find the Army placed on a proper footing of efficiency, but they refuse to follow the advocates of short service blindly, and, with all due deference to General MacDougall, we consider that it is greatly to the advantage of the Army that there are men holding high rank in the service independent enough to raise their voices when they find that mistakes are being made. It is only fair that all parties should have an opportunity of expressing themselves. The reformers should remember that they started with everything in their favour. They were in office; they had adopted a cry which they knew would be popular with the great Liberal party, to which they appealed; and, moreover, they had, and still have, recourse to all sorts of documents to prove the correctness of their statements, and refute those of their opponents. But notwithstanding the strong position they occupied, and the popularity of their measures with the party to which they looked for support, they have failed miserably in everything they have attempted, and they have failed just where they were told from the first by practical soldiers that they would fail. And now, when their policy has been proved to have been false, they attempt to make out that short service was from the first distasteful to the Army, and that this is the reason why it has not hitherto produced the benefits which were expected from it. Experience has taught practical soldiers, as we trust it has taught many of those who have been so ready to demolish, that Army reform is a far more serious business than many of those occupying seats in Parliament seem to imagine. In legislating for the Army, a Minister has to deal with a national institution upon which the welfare of the country largely depends. New systems may do all very well, so long as we are at peace, but let troubles arise to compel us to take up arms, and the systems which have originated in civilian brains soon show their weak points, and crumble to pieces before the fire of the enemy. Short service was tried in South Africa and Afghanistan, and it collapsed, as the report of Lord Airey's Committee shows beyond doubt. The arrangements worked more satisfactorily in Egypt, because our troops met there with no opposition worth speaking of, whilst the campaign was of so short duration that it put no real strain on our organisation. We fail to see how a campaign, which in a military sense was little better than a walk-over, can have "gloriously vindicated the present organisation." We must, indeed, be deteriorating very much as a nation, when men in the position of Sir P. MacDougall accept as evidence of the military capability of our soldiers, the fact that they have been able to overcome an army in the most advanced stages of demoralisation, such as that which held the earthworks at Tel-el-Kebir. Perhaps, some day, our eyes may be opened by finding that there is more serious work in store for the Army which, we are asked to believe, has been proved by our experiences in Egypt to have attained the acme of perfection, under the fostering care of the modern Army reformer. Let us hope that our new organisation, even in its improved state, may pass through the ordeal of a European war as well as those in office presume it will do. But, in the meantime, our leading Military authorities ought to refrain from making us look ridiculous in the eyes of our neighbours, as General MacDougall must have done in the pages of the pamphlet under review, which, from its onesidedness and the position of its author, might be dangerous, but for the fact that it is so exaggerated in its tone as to lose all the value which it would otherwise have possessed.

WE have long been of opinion that, the actual effects of the many great changes which have taken place in the War Navies of the world during the last decade, have not received adequate recognition, when viewed with regard to the extraordinary difference in the composition of the fighting qualities of the ships of the past and present. There has been all along the very pardonable and most natural tendency on the part of our ablest and most skilful sailors to base their assumptions of the nature of the Naval combats of the future on the solid facts so firmly established by our glorious Naval successes during the past and early part of the present century, their views being strongly tinted by the great success the rebellious American States had with their large and powerfully armed frigates over the smaller and less powerful ships with which we opposed them. The results of these successes on their part may be traced in our own Navy in the construction of the magnificent wooden frigates, the *Mersey* and *Orlando*, short-lived as they were, and later on by the *Warrior*, *Black Prince*, *Minotaur*, &c., all of these noble vessels being the self-evident attempt to construct a class of frigates of unequalled power. That the same thoughts are evidently still running in the minds of our naval constructors, as well as in those of other nations, we have the more modern instances of the Italian *Dandolo*, *Duilio*, and *Lepanto*, the Russian *Peter the Great*, and our own *Inflexible* to prove. But in the face of these facts, it is obvious that, of late, there is a certain hesitation creeping in as to the wisdom of constructing such huge monsters, and there is also a very evident opinion slowly but surely gaining ground that to develop the full strength of these large armour-clads, they will require to be largely supplemented by swift vessels of a totally dissimilar construction. We hope this fact is recognised by our own Constructive Department, and that the commencement of fast vessels of the *Leander* type is the herald of still greater efforts in this direction. What we complain of is that there are so few vessels of this class constructed or building, and that they are structurally too weak to ram an enemy, even if his ship is unarmoured. Then, again, the fact that armour alters naval tactics has been lost sight of. The old principle on which ships were fought at once gives place to the new "end-on" plan of attack and defence from the moment the armour-plate and ram are used. The fear of being *raked* gives place to that of being taken *broadside on.* The value of the cosine of the angle formed by the ship's keel and the bearing of the enemy determines the penetrative power of his guns. Hence the bows of the modern armour-clad must be kept on to the foe with as great precision as those of a life-boat to the sea. This is beginning to be understood in the Navy. The question of fast cruisers is also being discussed. Their necessity is being more and more admitted. An important paper on this subject has lately been read at the Royal United Service Institution, by Captain Robert H. Harris, R.N., under the heading of "The Necessity of Supplementing Armour-clad Ships by Vessels of other Types." In the course of his paper, that gallant officer premises that our armour-clads are the successors and representatives of our old line-of-battle ships, and he then institutes a careful comparison as to their fitness to take up the work for which they have been constructed; he enters into a close examination as regards their efficiency or inefficiency to perform the work required of them. Want of space prevents us from entering, at present, as fully into a discussion on the important question brought forward by the gallant officer as we should wish; but we feel that, for the benefit of our readers, it will be well to quote one or two of the comparisons made by Captain Harris which are more particularly pleasing to us. In summing up the capabilities of the old line-of-battle ships of the past, he, after referring to the now disused term "line-of-battle," says:—"Nevertheless, if she and it have succumbed, their glories have not, and history will relate far into the future how, when fairly manned and found, a line-of-battle ship might, on her own element, proudly and justly assume to herself a certain potency that is impossible to any vessel in the present day. She stood on her own merits,—a floating castle, the positive equal of all vessels not exceeding her in size; no less costly or inferior vessel dare face her gun-power, no submarine mine lurked on hostile coast, no insignificant vessel or torpedo boat could, under cover of night or fog, attempt to blow a hole in her bottom, there existed no hostile ram which, under similar circumstances, could waterlog or sink her." "Uncertain as her motive-power was, it was practically inexhaustible; fickle and fluctuating as the winds are, so long as they blew, they favoured friends and foes alike. A fresh supply of provisions and water, with a few days to caulk, and refit aloft, put her into thoroughly efficient condition, even after the longest of cruises. When at sea, sailing east or west, north or south, increasing or decreasing speed, provided that the limits of her water and provisions were not too closely approached, no vital power was consumed. Her state was one of constant and immediate readiness for instant battle. No inferior enemy dare cross her ocean pathway, smaller foes sighting her sought safety in flight. Unsupported by frigate or corvette, sloop or brig, she was the proud and stately equal of any individual foe on the face of the broad seas or narrow waters." Captain Harris then plainly shows the hazards our modern armour-clads run through the suddenness of torpedo attacks—a danger believed in Germany to render efficient blockades in the future impossible—and exposes the inherent weakness from which all ironclads must suffer in their liability to run short of fuel. He further shows most plainly that the ordinary duties of a fleet in war-time, if performed by armour-clads alone, must speedily result in a visit to a friendly port or collier. The discussion which followed the reading of Captain Harris's paper fully confirmed the fact that his views were generally accepted as correct, and the remarks made by the Chairman, Captain Colomb, R.N., after clearly explaining the merits of this paper, threw additional light on the subject, by pointing out that this very question had been raised by Mr. Barnaby, some four years ago, at the Institution of Naval Architects, where he then made the following comparison as to the actual cost of certain vessels, which may be taken to represent the same power and cost, only in different form. For instance, one ironclad, carrying 500 men, will cost £500,000, and will carry 600 tons of fuel, and say, two torpedo boats; six unarmoured ships, with 1,800 men, will cost £900,000, and will carry 6,000 tons of fuel, and 24 torpedo boats, &c. We cannot conclude our remarks on Captain Harris's valuable paper without drawing attention to one other statement made by him, the full importance of which needs only to be read to be realised. In the course of his remarks in connection with the value of supplementing armour-clads with numerous swift vessels, he finishes by saying, "By employing swift vessels for this service, we should realise the wonderful factor that high speed will be in all naval operations of the future; these vessels, allowing them only to steam twelve knots when thus employed, are capable during twelve hours of daylight of clearing a circle of 144 knots' circumference round their base of operations, or of steaming twice round a circle of twenty-four miles' diameter during the same time." A more complete exposition of the value and power of high-speed vessels to a maritime Power than the above could not well be given. We hope the able remarks contained in Captain Harris's paper will be carefully studied, and that they may serve to strengthen the hands of the Naval Constructive Department, which, by building a class of strong, swift vessels, to efficiently supplement our armour-clads, and protect our grain-laden ships and ocean highways, can develope and augment the power of our Navy to a hitherto almost unsuspected extent.

THE entire organisation of the Artillery Militia, and the system, or rather the want of system, applied to the annual trainings, demand some special notice, now that Parliament has again assembled; and it is to be hoped that the subject will receive most careful attention, and that pressure may be brought to bear on the authorities, to induce them to put a stop to the yearly waste of public money which is now the invariable rule. A correspondence on the shortcomings of the Regulations in force for the annual training of the Militia generally has lately appeared in our columns. Believing, as we do, that most of the evil lies in the mismanagement of the Artillery branch of the service, we propose to deal principally with that particular "arm." The curious anomaly exists that these Artillery Brigades are, as now constituted, mere nurseries for candidates seeking commissions in the Cavalry and Infantry of the Line. They are in most cases treated by their commanding officers as infantry regiments, and opportunities are rarely afforded for either officers or men to learn their duties as garrison gunners. We find that twelve of the twenty-one brigades of Artillery Militia are to be in billets or lodgings in their county towns for this year's training, a system so faulty, that no argument can be raised in its favour, except by the local authorities and local publicans—often an interchangeable title—who clamour for the spending of the money in the town; backed up, we regret to say, by some commanding officers, who do not like garrison duties, and prefer displaying themselves in war-paint before the eyes of their county admirers, to enhancing the value of their brigades by a little practical work. Nothing satisfactory can be done with the men in lodgings or billets, and though the cost of sending them to the nearest garrison where they could be kept to some purpose at artillery duties might, in the eyes of War-Office clerkdom, constitute a formidable item in the Estimates, the outlay would be money well spent. At most of the head-quarters, there are neither proper guns nor sufficient stores for even the elementary course of drills. A few gun detachments are sent once a week during the training to some fort or battery; this constitutes all the practice in gun-drill which the men ever get. We are strongly of opinion that too much tinsel and empty title has been the only reward granted to the many hard-working Militia officers who have rendered themselves efficient in the performance of their duties; honorary rank, gold lace, and liberty to retire and wear uniform, being all an officer can hope for, under the present *régime.* If a Field Officer or Captain has deserved a step of rank, it should be called "brevet" rank, and carry brevet pay. Some of the permanent appointments in his own branch of the service should, we think, also be open to the Militia officer. Any man of intelligence, soldierlike qualities, and capacity for work ought to be fit for the post of Adjutant in an Artillery regiment during training, and, subject to passing a qualifying examination, a Militia officer should be able to look forward to the appointment. An Adjutant's business is principally in the orderly-room, and in the Artillery he should seldom be allowed to act as a drill-instructor on parade, for such duties are altogether lowering to one who has received a scientific education. In a horse or field brigade, the Adjutant must certainly be thoroughly up in his drill; but that does not apply to a garrison brigade. There is, therefore, no special advantage in appointing Militia Artillery Adjutants from the Royal Artillery. The five years' system is not a good one, for an officer cannot take interest in a perfectly strange set of duties, with a strange body of men, to whom he is but temporarily attached, and no one can contend that the best men will take these appointments. There are some four classes of officers who look for them,—1st, those who do not like service with their own batteries; 2nd, those who desire to escape from a bad station; 3rd, those who want to economise; and, 4th, men who, by going to the Militia, save themselves from being shelved by the age clause,—those in the latter category being the best, seeing that they go to the Auxiliary Forces from love of their profession. Now, if any appointment should be filled from the Royal Regiment, it is that of Instructor of Artillery. How few there are holding that position in the Militia who can take a class of junior officers, non-commissioned officers, or gunners into the school-room, and, with blackboard and chalk, make plain to them the construction of the guns they e using and the fuzes and projectiles employed, or ho could give the lectures for the two months' epository course! Let us make our Militia Artillery a thoroughly useful body of garrison gunners, not by conferring upon them the mere title of "Royal Artillery"—which is absurd, as far as the officers are concerned—but by practical service in the best Artillery stations, and by putting a decided stop to the Infantry-review style of inspection, and the balls, drinking, big dinners, and mild swagger, which are the characteristics of the annual training of a Militia regiment in its county town. It is bad enough that Infantry regiments should in some cases—not all, but a few—set aside soldiering for such unseemly frivolities. The Militia Artillery have now been united with the Royal Artillery. They should show that they appreciate the honour conferred upon them by forcing the War Office to take them in hand, and inaugurate for them a new *régime*, by which inefficient commanding officers would disappear, with the accompanying evils of heavy mess bills, and, what is worse, an endless routine of parade-ground duties. We feel sure that the majority of Militia Artillerymen would hail with the utmost satisfaction reforms such as those we indicate, calculated, as they would be, to raise the tone of the service. The authorities ought to show a desire to encourage those who are really earnest in their work, and we hope that no time may be lost in introducing a better system on the lines we have laid down.

TWELVE years have now elapsed since one of the most gallant officers in her Majesty's Service was summarily ordered to haul down his flag, and, as time has proved, to suffer professional ruin, for what his bitterest enemy could only call an error in judgment. However much the exigencies of the case may have demanded justifiable severity at the time, the country never intended that, after a long course of distinguished services in all quarters of the globe, Admiral Wilmot's active career should be thus summarily closed. There are few, if any, on the list of Admirals who have seen so much real fighting, and none who bear a higher reputation for great personal courage and seamanship. He has served with distinction in Syria, in China, in Borneo, in Africa, in the Baltic, and in the Crimea, and owing to the discreditable neglect of his Flag-Captain and Staff Commander, lost the honours and emoluments which were so justly his due, at a time when he might not unreasonably have looked forward to one of the few prizes which the Admiralty have to distribute amongst many claimants. Would that we could say the selections were always wisely made! The singular anomaly of the case is one of its worst features, clearly indicating that personal pique, rather than an inherent love of justice, characterised the action of those who ought to have risen superior to such feelings. Thus the officers who were directly and indirectly responsible for the safe navigation of the *Agincourt* were, within a short period after the accident, again employed, and subsequently had the highest honours of the service thrust on them. Whatever interested and malevolent men may advance to the contrary as an excuse for their actions, the general opinion of the Navy, prior to the date of this accident, was that the Admiral was not personally responsible for the safe navigation of his flagship. Since this disaster, the principle has tacitly been acknowledged, in the grounding of the flagship of Admiral Randolph, and more recently still in the case of the *Iron Duke*, in the China Seas. If Admiral Wilmot had had the choice of naming a flag-captain and navigating officer, it is a well-known fact that it would not have fallen on those who were thrust on him, for it was no secret in the Fleet that he had little confidence in either. On what grounds, if they were not political, such different treatment was meted out, it is impossible to say, and it is not unreasonable to express a hope that the distinguished nobleman who now stands at the head of the Department, will no longer permit the services of Admiral Wilmot to remain without a proper acknowledgment. This is not the first occasion on which we have brought them under the notice of the public. Had he committed a great crime, in lieu of a doubtful error, the punishment could not have been more severe. One, at least, of those who sanctioned it experienced a just retribution; others may not escape, for "men who live in glass houses should not throw stones." The opinion we hold on this subject has recently been confirmed in a striking manner. Her Majesty's ship *Northumberland*, during a steam trial, ran into a Russian schooner, and inflicted serious damage to both vessels. Although the Captain of the Steam Reserve and the Captain of the ship were on the bridge, the officer of the watch is alone held responsible. It is illogical to admit the correctness of the decision of the court in this instance, but it plainly indicates that those who are in charge of the deck are not supposed to blunder into mischief with their eyes open, simply because their superior officer is on board. In the case of the *Agincourt*, it came out in evidence that Admiral Wilmot was below at the time of the accident, and that his orders to keep strictly in station were grossly neglected by those responsible for carrying them out. It, therefore, seems hard that the zeal and devotion of a lifetime should have been sacrificed to such a trifling cause, especially as the manner in which the ship was rescued from her perilous position by the gallant officer greatly excited the admiration of all who were cognisant of the difficulties under which he laboured. When we look at the manner in which honours have been awarded for Egypt, it is impossible, as we have before stated, not to infer that political or personal predilection has had much to do with the studied neglect with which one of the bravest of our Admirals has been treated; and we feel assured that if his case were brought under the notice of her Most Gracious Majesty the Queen, she would order the circumstances to be carefully gone into by a competent tribunal. The case is unique, and we trust will ever remain so.

The Earl of Belmore has given notice in the House of Lords that on Monday, March 5, he will call attention to the present scale of pay of the officers of the Royal Navy, and will ask the First Lord of the Admiralty whether he can hold out any hopes of an increase in the present rates, seeing that the cost of living has very much increased since they were fixed. It is high time this question were taken in hand, and the Navy will not fail to appreciate the service rendered to it by Lord Belmore.

The officers and crews of the merchant steamers chartered by the Admiralty to act as transports during the Egyptian war, and who actually conveyed troops and stores to the seat of war, are clearly entitled to the war medal, as they were for the time being in the Government service, and many of them risked going under fire when they entered the Suez Canal. The same holds good in regard to the officers and crews of the transports chartered in India. We should like to know whether the Admiralty have had lists prepared of the names of the officers and seamen who have thus earned the war medal. We fear they have not, and would point out that, even if the Admiralty could successfully contest the claims of these gallant seamen, who so materially contributed to the success of the campaign, it would be impolitic to do so, while a contrary policy would most assuredly be fraught with the greatest advantages to the country. It would infuse an incredible amount of zeal, ardour, and patriotism into the whole personnel of the Mercantile Marine. The ribbon might be of a different colour than that issued to the combatant forces.

In consequence of the failure of the torpedo fittings of the *Polyphemus*, as well as the defects which have manifested themselves in the torpedo-discharging apparatus of other ships, the Admiralty are about to appoint a special Committee to consider the whole subject of torpedoes and their equipments, as supplied to men-of-war. It is expected that Captain Codrington will be appointed Chairman of this Committee, Captain Gordon, of the *Vernon*, having been offered the command of the *Neptune*. We have repeatedly pointed out that nothing but failure could result from the torpedo gear in use in the Navy, and we are glad to find the Admiralty at last adopting our views on the subject. We can only add that, to attempt to launch so delicate a projectile or missile from a tube so placed as to necessitate the torpedo being jammed against the after side of the tube by the water passing the ship's side, or, more properly speaking, through which the ship passes at high velocities, is simply absurd, and likely to lead to serious disasters among our own ships, instead of among those of our enemies, in time of war.

The working-men of Westminster having invited Captain Bedford Pim, R.N., to lecture at their rooms in Victoria Street on "The State of the Navy," we are given to understand that the gallant officer intends to make his lecture a complete reply to Mr. Barnaby's recent paper on "Battle-ships: a Forecast."

We caution Naval officers against contributing to the maintenance of an individual who is trading upon their generosity by means of begging-letters, detailing the history of a distinguished family. These letters come from the neighbourhood of Fox Hill, Plumstead. The individual in question has, for years past, carried on a system of begging letter-writing, but not in such a way as will bring him within reach of the law.

Captain John Hext left England this week, to take up his appointment at Bombay as Director of the Indian Marine.

The Admiralty order regarding the steam trials of ships in commission runs as follows:—"When any ship under trial is in commission, the Captain (or Commander) of the Reserve is responsible only for the trial of the machinery, for the due performance of which he will apply for whatever assistance he may consider necessary to the officer in command of the ship, who is always responsible for the management of the ship." Why, therefore, make the officer of the watch responsible, as in the case of the *Northumberland* collision with the *Secundus*, when both the Captain of the ship and the Captain of the Steam Reserve were on the bridge at the time? We believe the *Northumberland* was undergoing a full-power trial. The Queen's Regulations and Admiralty Instructions direct that "Officers from the Dockyard and the Reserve will attend and watch this trial, and report how far, in their opinion, it was satisfactory; but they will not take any charge in the management of the machinery during the trial." This is somewhat contradictory of the order above quoted. The next article empowers the captain of the ship to use his discretion in giving up a trial, "with the approval of the senior officer present." What if the senior officer be the Captain of the Steam Reserve? We have taken part in many such trials, and have never known any step to have been taken by the Captain of the ship "without the approval of the senior officer present," except on one occasion, when "the senior officer present" at once interfered, and asserted his seniority. In the present instance, Captain Bosanquet, of the *Northumberland*, was "the senior officer present." Hence, Captain Kelly was not to blame, whatever happened. But, in our opinion, the system is wrong, as when ships are "in the hands of the Steam Reserve," the officers of the Reserve should be in charge, until the work done by the dockyard has been proved to be satisfactory, and the ship has been handed over to her own officers. We still fail to see how the officer of the watch was to blame, unless he had been given charge of the ship by the Captain; but, even in that case, the Instructions still hold the Captain of the ship responsible.

The United States frigate *Lancaster*, flagship of Admiral Nicholson, commanding the American Squadron in European waters, has arrived in the Solent. Admiral Nicholson rendered this country most valuable service at a critical moment, in landing his Marines at Alexandria after the bombardment, to assist Lord Alcester in restoring law and order, and it is to be hoped that the Government will not allow these services to go unrequited.

Who is in command of the *Seagull?* A correspondent says Captain Mather Byles; the *Navy List*, Lieutenant E. Rae. Commander Mather Byles was promoted for the part he took in the Egyptian Campaign, and, according to custom, would then give up the command of the *Seagull*, but has not done so, and is bringing his ship home, but the *Navy List* places him on half-pay.

The Admiralty have found it necessary to issue a Fleet Circular containing the precautions to be observed in the use of the Harfield capstans. Special instructions will also be prepared, and supplied to each vessel fitted with the Harfield windlass.

Captain Arthur Brownlow, C.B., R.N., Surveyor of Transports at the Admiralty, is so unwell that he has been compelled to obtain leave of absence until the end of April, and proceed to the South of France. His illness is attributed to overwork during the Egyptian Campaign, and it is hoped that the needful rest will have the effect of completely restoring his health, and enabling him to resume the duties of his office, from which he can be ill-spared. Commander E. Chichester, R.N., has been appointed to officiate for Captain Brownlow during his absence.

The Bombardment of Alexandria formed the subject of a paper read this week at the Royal United Service Institution by Captain N. L. Walford, R.A. The lecture was delivered under the presidency of H.R.H. the Duke of Cambridge, and among the large and distinguished audience present were Lord Chelmsford, Lord Waveney, the Marquis of Hertford, Mr. W. H. Smith, M.P., Sir E. J. Reed, M.P., General Sir A. J. Herbert, Admiral Sir Cooper Key, Sir John Hay, M.P., General Schomberg, General Freeth, Admiral Boys, Colonel Sir Lumley Graham, Admiral Nicholson, and numerous other distinguished officers. The lecture is of too important a nature to be properly treated in the limited space at our disposal this week, and we, therefore, reserve it for our next issue.

Major A. H. Pascoe, who has been borne on the books of the flagship on the China station since June, 1880, for supervision of the Marine detachments on that station, returned to England on Tuesday last in the *Iron Duke*, and rejoined his head-quarters at Plymouth, the appointment he held having been abolished.

The retirement of Lieutenant-Colonel F. Ley, of the Royal Marine Light Infantry, promotes Major Cairncross, who would otherwise have been retired by age early in March. It also promotes Captain C. H. Scafe to Major, and raises Major Byam to the 16s. list. Major Byam will thus have to vacate his appointment of Instructor of Musketry at the Chatham Division.

When, a thousand years ago, our Kings used to sleep upon beds of straw instead of upon swan's down, and our humbler forefathers went about with painted bodies in semi-nudity instead of in fine broad-cloth, when dense fogs contested the ownership of the country with wild boars, when the stillness of the forests was only broken by the wailing of human beings offered in sacrifice to some wooden god—an intelligent Saxon monarch named Edgar began to build a Navy. By borrowing the unambitious lines of a nursery poem, one gets at the precise date and catches a glimpse of the precise prince and his precise motive:—

> "To Edgar, the brother of Edwy, the orb of dominion
> Passed in the year nine hundred and fifty and nine,
> And to build he a Navy began; for he held an opinion
> That old England at sea should not ever decline."

So, then, in 959, King Edgar discovered the necessity of constructing ships-of-war to defend the island in which he lived. For upwards of nine centuries, we have been following in his footsteps as well as acknowledging his foresight, and have not yet, even with the aid of science and the appliances of experience, arrived at any result worthy of permanent acceptance. Mr. N. Barnaby, the Director of Naval Construction, had formed no decided opinion last week, at the United Service Institution, whether ships of war were to be preferred to guns of war, or guns of war to ships of war. "I have always agreed," said Mr. Barnaby, "with those who held that England should put into the hands of her seamen the most powerful guns which can be made and worked." Clearly, Mr. Barnaby treats the present British Fleet as a collection of flotsams and jetsams, but is not sure that, after the prospective big guns have been cast, any sailor will be found to be leviathan enough to work them. The parts of Mr. Barnaby's views not to be controverted are, that England can furnish herself with ships "far more powerful than any which have yet been seen," and that the helpless, but squeezable tax payer must, according to immemorial usage, produce the money for the "Battle-ship" looming in "a Forecast." All this chopping and changing is called a new policy. We want a King Edgar to "come to judgment."

A feeling has lately sprung up amongst officers of the Royal Navy that the gentlemen who occupy high permanent positions at the Admiralty are paid far beyond what they should be, compared with their own pay and the great responsibility placed on their shoulders whilst afloat; and a similar feeling is gaining ground amongst the professional officers in her Majesty's Dockyards. We do not for one moment mean to defend the highly paid civil officials of the Admiralty, but we may point out that though their pay may appear excessive, they have during their lives to make provision for their widows and families, while the Naval officer's family is to a certain extent provided for by the State. On the other hand, it may be said of the civil official that he does not "go down to the sea in ships," nor is he exposed to its consequent dangers. Taking all circumstances into consideration, the Naval officer appears to have good cause for complaint. It is however, not with his grievance that we now propose to deal, but with that of the Professional Civil officer. When we consider the responsibility resting on the shoulders of the Professional officers of the several Royal Dockyards, we cannot help noticing how insufficiently they are remunerated. Take, for instance, the Chief Constructor at our principal Dockyard. We find by the Navy Estimates for 1882-3 that his pay is £700 to £850; a gentleman holding a similar position at a good private firm would be getting from one to two thousand per annum. Now, comparing the salary of a Principal Clerk in the Controller's Department of the Admiralty, we find his pay is from £700 to £900. Comment is unnecessary. Mr. Campbell-Bannerman, M.P., and Rear-Admiral Thomas Brandreth are at present investigating complaints of workmen as regards their pay, &c., in comparison with the pay of private firms who employ large numbers of shipwrights, &c., and we hope they will also consider the gentlemen upon whose shoulders all responsibility of building our ships of war rests.

The following are the Russian men-of-war on foreign service at the present moment:—The half-armoured frigate *Duke of Edinburgh*, at Hong Kong; the screw corvette *Skobeleff*, at Singapore; the cruiser *Africa* and the clippers *Plastoon* and *Vestnik*, at Hong Kong; the cruiser *Asia* and the clippers *Zabiaka* and *Djigit*, at the Piraeus; and the clipper *Naezdnik*, at Rio Janeiro. These vessels have a collective armament of 113 guns, are manned by 198 officers, and 1,993 seamen, and possess 2,950 indicated horse-power.

Honorary Major Edward McArthur, who has been Paymaster of the Royal Marine Artillery at Eastney since March, 1870, reached the age for retirement under the Order in Council of February 22, 1870, on the 15th inst. Major McArthur entered the service in September, 1847, and served in action at Lagos on the coast of Africa in December, 1851; at the bombardment of Odessa, April, 1854; at Redoubt Kaleh, and the bombardment of Sebastopol (medal and clasp, 5th Class Medjidie, and Turkish medal). He also saw further service on the coast of Africa in 1861, in the capture of the stockaded town of Saba, and the bombardment and destruction of Porto Novo.

With regard to the anomalous position of Marine officers in command of detachments of the corps on board her Majesty's ships—to which we alluded in a leading article on the 3rd inst.—Mr. J. E. Gorst, Q.C., M.P., writes that he was promised last Session that the matter referred to should be earnestly considered, and that in the coming Session he will take an early opportunity of eliciting from the Government what the result of that consideration has been.

The German corvette *Olga*, with Prince Heinrich of Prussia on board, has recently visited the island of Trinidad. She met there Vice-Admiral Sir John Commerell, V.C., in the *Northampton*, with the *Tenedos*, *Fantôme*, and *Flamingo* in company; also the French Admiral, and the American ship *Kearsage*, famed for her fight with the *Alabama*. The German residents of Trinidad gave a grand ball to Prince Heinrich, at which over 600 guests were present, in addition to the officers of the men-of-war in harbour. The German residents of Trinidad, to the number of 36, took advantage of the opportunity to present an address to the Prince, expressive of their loyalty and devotion to the Emperor, and their love for their fatherland. They at the same time requested the Prince to take charge of a handsome sum of money they had subscribed towards the relief of the sufferers from the inundations in Germany. Prince Heinrich, in replying to the address, thanked his compatriots for the devotion they had displayed towards his family, and assured them it would gladden the heart of his grandfather, the Emperor, when he heard that, notwithstanding their long sojourn in that most hospitable English colony, they had not forgotten their love of fatherland nor their loyalty to the throne.

We hear that Captain W. E. Gordon, late of the *Vernon*, has been offered the command of the *Neptune*. In the event of his refusal, the Admiralty will most probably select either Captain St. John or Captain Cleveland. As the latter officer nearly lost the *Iron Duke* on two occasions, he is regarded in Naval circles as having the best chance of securing the *Neptune*. Captain Codrington, it is said, will go to the Admiralty after all, as Admiral Herbert intends remaining, and Admiral Curme will succeed Admiral Hamilton on the Irish Coast.

It is usual in France to have an Admiral for the office of Minister of Marine, and this practice is very seldom departed from. Since the fall of the Empire, the following Admirals have successively been at the head of the Naval Department:—In 1872, in the Dufaure Ministry, Admiral Pothuau; in 1873, under the De Broglie Ministry, Admiral Dompierre d'Hornoy; in 1874, under the De Cissey Ministry, Admiral De Montaignac; in 1875, under the Buffet Ministry, Admiral De Montaignac remained in office; in 1876, under another Dufaure Administration, Admiral Fourichon; in 1877, under a second De Broglie Ministry, Admiral Gicquel des Touches; in 1878, under a third Dufaure Ministry, Admiral Pothuau once more; in 1879, under M. Waddington, Admiral Jauréguiberry, who continued to serve under M. De Freycinet the following year; in 1881, under M. Jules Ferry, Admiral Cloué; in 1881, under M. Gambetta, Captain Gougeard; in 1882, Admiral Jauréguiberry returned to office with M. De Freycinet, and remained in office under M. Duclerc, but resigned rather than accept the Pretender's Bill—resigned at the same time as the Premier and the War Minister, considering the Bill unjust and unnecessary. As a civilian has now been appointed Minister of Marine, one can only suppose that no French Admiral could be found to accept a task from which Admiral Jauréguiberry shrunk. As for General Thibaudin, he remains War Minister.

A correspondent suggests in the columns of the *Volunteer Service Gazette* that a County Rifle Team Championship should be established for the Volunteer Force. The idea is a good one. But why not carry it even further, and introduce similar competitions for the Regular Army, Militia, and Yeomanry? The principal features of the proposal with regard to the Volunteers are as follows:—Three hundred men of each regiment to compete. The shooting of each team to take place at its own range on the Saturday previous to the August Bank Holiday, or, if the weather is unfavourable, on the Monday, if the captain of the team so decides. Enough money to be raised to give,—

The first 300, £20 (and Gold Medals)...	=	£6,000
Second ditto, £15 (and Silver Medals)	=	4,500
Third ditto, £12 (and Bronze Medals)...	=	3,600
Fourth ditto, £10	=	3,000
Fifth ditto, £7	=	2,100
Sixth ditto, £5	=	1,500
Total........................		£20,700

To this add the cost of medals, say £3,000. The chief argument against this scheme is its expense. The first thing to be considered is, would such a competition tend to promote an interest in rifle-shooting, and a rivalry among counties? There can be no doubt on the point, and, therefore, we hold that the suggestion is worthy of consideration.

We have reason to believe the command at Woolwich has been offered to and refused by Major-General Pipon, C.B., R.A. It is well known this class of appointment is best held by officers possessing large private means.

The annual meeting of the Newport-Market Refuge and Industrial School was held at the temporary premises in Long Acre on Tuesday, the 20th inst., when the Duke of Westminster presided. These beneficent institutions have been gradually developed from a single room, which was opened in Newport Market, 19 years ago, to afford temporary shelter to a few destitute men and women. The site of the buildings in Soho was cleared last year to admit of some extensive improvements, and the Metropolitan Board of Works gave such pecuniary compensation as enabled the committee to rent the houses they occupy in Long Acre, till they can get a suitable site and erect a commodious building. The name which these useful but unobtrusive institutions have borne for so many years has been retained. The Refuge has no particular connection with the military services, and therefore, while fully sensible of its good work, we will only mention that of 334 men who were relieved last year, 58 were discharged soldiers, and one was a "retired military officer." As the Industrial School gives a considerable numbers of boys and lads to the Army as musicians, it claims our special notice. Already 173 boys have enlisted from the school into the bands of regiments, or as drummers or buglers. Of these, 30 have joined the Foot Guards. Several others also have enlisted, after trying civil employments. Applications for 95 boys were received from regiments during the last year, but only 15 left the school during that time, of whom 12 enlisted. At the last "old boys'" dinner, about 50 were present in uniform, two of them wearing the medal for Egypt. The school appears to be admirably managed, and to be worthy of such support from the Army as would enable the energetic committee to increase the number of boys from 60 to 100 or 120. Lessons, drill, gymnastics, and out-door amusements occupy nearly all the boys' time, and they look hardy, healthy, and happy. Some of them form a full band, which plays very creditably. The uniform is plain and serviceable; it is military in cut, but rather sombre in colour. We are too pressed for space, to notice as fully as we ought the merits of this excellent institution.

Major W. J. Elliott, late Paymaster and Accountant, Royal Arsenal, Woolwich, has joined the Board of "The Auxiliary Forces Uniform and Equipment Company, Limited," as "Director of Accounts." This most important office in such an establishment is now, we believe, most satisfactorily filled, and we confidently look forward to this Company forming a valuable adjunct to the War-Office Clothing Factory, by working on their system and being always ready to undertake special contracts, when there is a press of work at Pimlico.

The German War Office has just taken a decisive step in the matter of the armament of the German Infantry, by the adoption of the magazine rifle. Thirty thousand rifles of this description have already been delivered, 60,000 more will be ready before the end of the year. To make sure of preserving the lead, the Prussian Government has entrusted the work of manufacture exclusively to State factories, to the exclusion of all private establishments. Bavaria and Würtemberg have followed, without hesitation, the course adopted by Prussia. On April 1, the Bavarian Army will count three battalions armed with "fusil à répetition," whilst the Würtemberg corps will have one. In face of these facts, we ask,—Is our War Office up and doing, or will it be the old tale of official prejudice standing in the way of efficiency? To our minds, the questions of machine-guns and magazine rifles are the two most important problems which the new Director of Artillery and Stores has to face, and he should not lose a moment in taking them up in earnest, now that the Germans have set the example.

Orders have been issued respecting the manœuvres of the German Army this year. The 4th and 11th Corps will each execute manœuvres in the autumn on a large scale. They will include review, corps manœuvres against a marked enemy, and field manœuvres, lasting three days, of the divisions against each other, all to take place before the Emperor. Time and place have yet to be submitted by the War Ministry. The Corps of Guards and the other army corps will undergo the usual annual exercises up to divisional manœuvres. The Cavalry Division of the Guards will manœuvre for four days in brigades, and for five days in divisions. In the 1st, 2nd, 3rd, 5th, and 6th Corps, all the cavalry regiments of each corps will be concentrated for brigade and divisional manœuvres lasting nine days, to which will be added, after the third day, a horse battery of the respective army corps. The regiments will consist of four squadrons each. The commanders of the divisions will be appointed by the Emperor. Marching will be practised by the cavalry of the Corps of Guards, the 1st, 2nd, 4th, 5th, 6th, and 7th Corps. Siege and mining operations will be carried on for five weeks in August and September at Graudenz, in which eight Prussian companies, one Saxon, and one Würtemberg will take part.

Major-General Mark Walker, V.C., C.B., succeeds Major-General J. B. Spurgin, C.B., C.S.I., in command of the 1st Infantry Brigade at Aldershot, on April 1.

The Army has recently raised a statue to the late Prince Imperial. A call to erect a lasting memorial to an old comrade ever meets with a ready response from the British soldier. We would appeal to our readers to aid in another good work. The beautiful porch which has, through the exertions of Mr. Hurt, been recently added to the English church at Biarritz, is a record of the losses sustained by the British Army in the campaign in South-west France, from October 7, 1813, to April 14, 1814. The different regiments engaged, with the names of all officers who fell, and the number of non-commissioned officers, rank and file, &c., have been inscribed on tablets. The work has been well executed, and no pains spared to obtain accurate information, and there now stands a fitting monument, commemorating the gallant soldiers who fell in this campaign. We regret to say that Mr. Hurt, who so patriotically interested himself in the undertaking, has not received from the Army, generally, the support his energy deserves. The reason for this doubtless is that the Army is not aware how much it owes to this gentleman's exertions. The expenses of the work have been heavy, amounting to about £1,450, of which nearly £400 has still to be subscribed. The late Emperor Napoleon was anxious to raise a memorial of this kind to those British officers and men who died in France in 1813 and 1814. The generous intention was only frustrated by his death. Let us finish the task we have begun, and as we have shown our appreciation of the gallant son, let us now complete the work the father's chivalrous spirit planned. We feel sure that neither the British Army or the British public will be backward in helping to contribute the funds to carry out so laudable an object. We would especially appeal to those regiments which have not yet subscribed. Full information can be obtained from, and subscriptions paid to, Messrs. Bosanquet, Salt, and Co., Lombard Street; S. Hurt, Esq., Amade, Bayonne; Lieutenant-Colonel Thornton (late 4th King's Own), Army and Navy Club; Captain Acland Troyte, St. George's Barracks, London, W.C.

Major-General Hackett, late commanding at Jamaica, was "reformed" or "reorganised" out of his command by the June Warrant, 1881. If this officer had been let alone, he would have been promoted to Major-General either in February or March, 1883, when he would have been retired on £700 per annum, for age.

The amount of incongenial labour imposed upon Quartermasters by the existing system of accounts for clothing, would scarcely be conceivable to any person outside the region of official life, whilst the fact that this labour entirely emanates from a collection of worn-out clothing, not even worth the paper upon which its existence is recorded, renders this system peculiarly ludicrous. As an instance of the intricacy of the present returns, we find an entry against one man's name of 160 figures, besides a record of their existence in several places in a voluminous account book, to which is attached a formidable array of vouchers, numbering 1,000, in addition to several other documents, which, although unofficial, are, nevertheless, relevant to an account which was at one time transacted upon a single sheet of paper. A continuance of this pernicious system would necessitate,—(1), The reconstruction, on sanitary grounds and for purposes of accommodation, of the stores of every barrack in the kingdom; (2), clerical assistance, fostered by some such nursery of red-tapeism as Pimlico; (3), a corps of strong-minded and able-bodied fatigue men, recruited from amongst the most expert of those obliging members of our community who are inured by practice to the delicate operation of over-hauling discarded garments, and pronouncing judgment thereon. On the publication of these Regulations, two years ago, we anticipated the confusion which now exists, and proposed a remedy. This remedy we repeat, "Place the soldier upon the same footing for clothing as for necessaries, paying him the annual value of the former."

It is strange how Parliament is enlightened on military matters. Sir Charles Dilke is reported to have stated that the Government had found it impossible to utilise Cyprus; the fact being that, not only was a Sanatorium and Depôt for the regiments in Egypt being established there, but arrangements were in progress by which Cyprus, in the event of the prolongation of the war, would have become the great base of supplies for the Army in Egypt.

A correspondent writes from Cairo:—"Much astonishment has been expressed at the statement attributed to Lord Wolseley, that he never saw a drunken man at Cairo; and as it must be taken as absolutely true, if his Lordship made it, the only way of explaining the fact is that the Commander-in-Chief did not stir out of Abdeen Palace after dark. Had he visited the main guard, close at hand, or the Caracols, he would have been unable to make such an assertion; but, generally, for very good reasons, there has been less intemperance than usual under similar circumstances. There has, however, been a very large increase of disease among the men, which is believed to have been imported."

From a correspondence which appears under the head of "Yeomanry," it will be seen that the National Rifle Association have resolved to allow members of the Yeomanry Cavalry in future to compete in the Volunteer competition at Wimbledon. This step taken by the National Rifle Association is a wise one, seeing that it will considerably extend its sphere of usefulness, and, at the same time, benefit a most important branch of the Auxiliary Forces. The Council of the Association have been actuated by a desire to promote the best interests of both the Yeomanry and Volunteers, in having thus broken down an absurd rule, which has debarred the Yeomanry from all chance of distinguishing itself at the butts at Wimbledon in any but mounted competitions. The concession granted to the Yeomanry has been obtained mainly through the exertions of Major Tynte, 4th Dragoon Guards, Adjutant of the Royal East Kent Mounted Rifles, who during his period of appointment has worked most zealously to secure not only the welfare of his own regiment, but the whole service with which he is temporarily associated.

We are pleased to learn that an attempt is being made to organise an Inter-County Regimental Competition for the Yeomanry Cavalry of Great Britain. The terms of the competition are proposed to be as follows:—Teams of 8 (officers included); weapon, Snider cavalry carbine; distance, 200, 500, and 600 yards; number of shots, 7 each range; not more than two teams from each regiment to compete; to be shot for in drill order, without belts; cup to be collected by subscription, added money by the National Rifle Association, for winners. It is suggested that the competition should come off at Wimbledon the day before the Loyd-Lindsay Prize is shot for. Though it is an undoubted boon for Yeomen to be able to shoot for the Queen's Prize, &c., this year, for the first time, we trust the National Rifle Association will see its way to organising a competition on the lines of that which has been proposed. The first encouragement to rifle-shooting should be given, according to our idea, to men with their own weapon. Now, there are no competitions open to Yeomen, excepting the "Loyd-Lindsay"—with their own weapon—the Snider carbine. Of course, the best shots from the Yeomanry go in for the Martini-Henry, but that is no encouragement to the average shots in a regiment. It is to be hoped, therefore, that in a team competition every man of a Yeomanry Cavalry regiment would be required to shoot for his regiment, and individual competition would at once be fostered. This would raise the shooting of the Yeomanry considerably. The matter is now before the National Rifle Association, and after the very sensible course adopted by the Council of the Association lately in extending its operations to the Yeomanry, we are inclined to think that the concession prayed for will be granted.

We read with the utmost satisfaction an announcement in the *Morning Post* that, by Horse Guards authority, officers of the Army are permitted to wear miniature decorations in plain clothes, and are expected to do so when they are invited to meet members of the Royal Family. We are sure this graceful concession to a desire so generally felt and so often expressed will be appreciated by the officers now serving, and will be a great boon to thousands who have retired. The permission and command now notified both go beyond the wishes frequently urged in our columns and in those of the *Morning Post*, for they specify plain clothes, without the limitation to evening dress.

The ordinary expenditure for the French Army for 1883 has been fixed by the Chamber of Deputies at £23,360,000—or £440,000 more than the previous year. The extraordinary expenses will probably reach the sum of £3,250,000. To the former must be added the quota for the year for the organisation of the new African Army, and the establishment of an independent fortress artillery, the cost of which is estimated at £730,000 and £200,000 respectively, and which sums do not include the original cost of those organisations. The ordinary expenditure, therefore, for the French Army for 1883 will exceed £25,000,000.

The programme for the French Autumn manœuvres has been published. The 5th, 6th, 7th, 8th, 9th, and 13th Corps will be concentrated for 20 days for the execution of manœuvres in Army Corps, the time for concentration and dislocation being included. The 7th and 8th Corps will operate against each other, a field-telegraph section of the first line being attached to each. The two divisions of the 5th Corps will change garrisons at the time of the manœuvres. The 4th, 10th, 11th, 12th, 17th, and 18th Corps, as well as the 8th Division of the 4th Corps, will execute divisional manœuvres during 15 days, the time of leaving garrisons and returning to be included. Brigade manœuvres lasting 15 days will be carried on by the 1st, 2nd, 3rd, 14th, 15th, and 16th Corps, but in the 3rd Corps only by the 9th and 10th Brigades. The 6th and 7th Divisions, garrisoned in Paris, will take no part in the manœuvres. The manœuvres of larger bodies of cavalry will take place under the command of General Galifet (president of the Cavalry Committee), for ten days, in three groups, of which the first will be concentrated from August 1 to 10, the second from August 13 to 22, in the camp at Châlons, the third at Chartres, from August 5 to September 3. Each group will consist of two divisions of three brigades each. Three horse batteries will be attached to each division.

The Army.

2nd Life Guards. The Prince of Wales, attended by Lieut.-Col. Clarke, left London on Thursday afternoon for Windsor, where he dined in the evening with Col. Ewart, C.B., and the officers.

Royal Horse Guards (Blue). The death is announced of Qrmr. W. Gordon. The deceased, who was only 36 years of age, was promoted to the quartermastership on Nov. 19, 1881, and was greatly respected by all ranks of the regiment.

7th Dragoon Guards. Lance-Serjt. Dauncey has been awarded the bronze medal of the Royal Humane Society, for his gallantry in saving another soldier from drowning on Oct. 11. The accident occurred in the Nile whilst bathing, and Serjt. Dauncey was fully clothed in uniform when he jumped in to the aid of his comrade.

6th Dragoons. A correspondent writes:—"I am delighted to see that attention has at length been drawn to the hardship inflicted on the married men of this regiment, whose wives and families were left behind in England, when the head-quarters and the service troops embarked, two years ago, for South Africa. For two years have the men been separated from their families, and there seems to be no probability of their coming together again for some time. Such treatment is cruel in the extreme. A wealthy Government, in considering its own interests, does not give a thought to the hardship it inflicts upon others. I do hope that some Member of Parliament may feel disposed to ask a question on the subject, for the matter deserves to be brought to the notice of the Secretary of State for War."

4th Hussars. Capt. Exham is retiring.

10th Hussars. Capt. Fisher embarks for India next week in H.M.S. Serapis.

11th Hussars. A correspondent writes:—"I see that Col. Stewart, C.M.G., is seconded in his regiment. I thought that officers of the rank of lieut.-col. holding Staff appointments, &c., were required to go on half-pay. Surely Lieut.-Col. Rivett-Carnac was from the same regiment, when he accepted the Military Secretaryship to the Commander-in-Chief of Bombay. As the retention of Col. Stewart may seriously affect the future prospects of some of the juniors, I consider it right to draw attention to the matter, in the interests of justice."

15th Hussars. Report says that Col. Luck, C.B., is likely to obtain a Staff appointment in India.

21st Hussars. Capt. Pigott is about to be seconded, for service with the Egyptian Army.

ROYAL ARTILLERY.

Col. G. C. Henry has succeeded Col. R. J. Hay in the command of the Royal Artillery, Southern District.

The following complimentary Order has been published:—"H.R.H. the Field-Marshal Commanding-in-Chief has great gratification in expressing his high appreciation of the conduct of Lieut.-Col. W. H. Wardell, Royal Artillery, and the officers, non-commissioned officers, and rank and file under his command, as detailed below, on board the transport Bolivar, when it was wrecked off Barbadoes on Dec. 13 last, upon which occasion the behaviour of all ranks was admirable, under circumstances very trying to the discipline of young soldiers, of whom the rank and file on board entirely consisted. Capt. J. F. Harman, Royal Artillery, acting adjt. on board the Bolivar, has been specially brought to his Royal Highness's notice for great zeal and energy displayed on the occasion." Then follows a list of the troops on board, nearly all of whom belonged to the 6th Baty. 1st Brig., Cinque Ports Division, Royal Artillery, and the 1st Batn. Royal Scots, the total number being 241.

Gunner Edward Hutchings, R.A., has been awarded a testimonial inscribed on vellum by the Royal Humane Society, for saving a shipwrecked man at considerable personal risk. The wreck occurred at the Mumbles Island, and several men of the Royal Artillery rendered every assistance possible to the crew of the lifeboat, which was capsized, and four of her crew drowned in gallantly doing their duty.

ROYAL ENGINEERS.

The 2nd Compy., which recently arrived home from South Africa, has proceeded from Chatham to Portsmouth.

The 21st Compy., which took part in the Egyptian War, arrived at Chatham on Monday night. Although the hour was late, large numbers of persons congregated in the streets to give them a welcome, and the band of the corps played them to barracks.

Coldstream Guards. The remains of Pay-Serjeant W. Mayo, 1st Batn., were interred, with the usual military honours, at the Windsor Cemetery on Monday, in the presence of her Majesty and Princess Beatrice. The deceased, who had been 18 years in the regiment, was on duty on Thursday last at Windsor Castle, while the Castle guard was being changed, when he was suddenly taken ill and died soon after, his wife, who had recently been confined, having arrived in a cab shortly before he expired. The Queen, who was attended by Lady Southampton, and also by Gen. Sir H. Ponsonby and Col. Byng on horseback, drove from Windsor Castle to the Cemetery, and awaited the arrival of the funeral outside the gates. The procession arrived about half-past 3, and was preceded by a firing-party of 20 men and the band of the regiment, who played the "Dead March" in *Saul*, and comprised the serjeants of the battalion and a large detachment. The coffin was borne by non-commissioned officers, the whole being under the command of the adjutant. After the procession had passed into the cemetery, the Queen drove up to the cemetery church, and viewed the interment from her carriage. The service was performed by the Rev. Arthur Robins, Chaplain to the Forces at Windsor. The usual three volleys were fired over the grave. At the conclusion of the ceremony, the Queen drove back to Windsor Castle. The deceased, who was much respected in the regiment, was about 36 years of age, and had been 18 years in the service. He leaves a wife and four children. A very handsome wreath was deposited on the coffin as the gift of her Majesty, who had already sent a sum of £5 to the widow on hearing of her sudden bereavement. Deputy-Surg.-Gen. C. V. Cay, M.D., on the Half-Pay List, was erroneously reported in the *Morning Post* of the 10th inst., in the report of "Tate *v.* Tate," in the Court of Chancery, to have married his ward without the consent of the Court. Now, the young lady in question happens to be the niece of Dr. Cay, who has one wife already, and, therefore, had the marriage been such as reported by the *Morning Post*, the doctor would have committed rather more than bigamy. The judge acquitted the doctor of all blame, but his remarks, we are informed, were not as reported by the newspaper in question.

1st or Royal Scots. The 2nd Battalion at Fermoy takes up duty at the Curragh. See Royal Artillery.

2nd Queen's (Royal West Surrey Regiment). Capt. Whittle, 2nd Batn., embarks for India next week in H.M.S. Serapis.

3rd Buffs, East Kent Regiment. Capt. Smith, 1st Batn., is a candidate for the Commissariat and Transport Staff.

4th King's Own (Royal Lancashire Regiment). Lieut. Vigors has resigned his probationary appointment in the Bombay S.C., and reverts to the 2nd Batn.

8th King's Liverpool Regiment. "King's Man" writes: "Considering that for nearly two hundred years previous to the muddling alterations of 1881, my regiment, the late 8th (the King's), held a glorious Royal title granted them by the Crown, it is incredible and cruel that we, the old original battalion, figure now in all official announcements simply and solely under the heading of '1st Liverpool.' I need scarcely state that this singular change is most acutely felt by all loyal King's men of the past and present, and I trust that before long this injustice will be remedied. If the authorities felt it so necessary to recently deprive many of our Line regiments of their ancient distinctions and associations, it would certainly have appeared fairer to pay a little regard for seniority; and that the older corps at least should retain their ancient, cherished names unmolested, with a permanent depôt established in the locality where historical records of the regiment clearly suggest. Unfortunately, now, before many years have elapsed, the fact of one corps being far senior to another will not be understood or recognised. Many regiments now possess a (to them) new-fangled title as long as your arm, but beyond this it will be well nigh impossible to search for their age, owing to the defunct numeral, which I trust that, as at present, your valued periodical will cherish the remembrance of to all time."

12th Suffolk Regiment. Sir W. Wallace Rhoderic Onslow, Bart., formerly of the regiment, has been appointed, by H.R.H. the Prince of Wales, High Sheriff of the County of Cornwall.

15th East Yorkshire Regiment. The 1st Batn. will arrive at Liverpool early next week from Londonderry, and will take over quarters at Sheffield and Fleetwood.

31st East Surrey Regiment. Lieut.-Col. Leir leaves Portsmouth to-day in the troopship Nepaul, to join headquarters at Gibraltar.

38th South Staffordshire Regiment. Lieut. Hoare and Qrmr. Jarrett leave England to-day, in the troopship Nepaul, for Alexandria.

44th Essex Regiment. Capt. Ventris embarks for India next week in H.M.S. Serapis.

46th Duke of Cornwall's Light Infantry. Major Forster embarks at Queenstown next week in the troopship Nepaul, for conveyance to Egypt to rejoin headquarters.

ROYAL MARINES.

Lieut.-Col. Frederick Ley, R.M.L.I., having been found, after medical examination, permanently unfit for further service, has been placed on the Retired List, Jan. 25, 1883, under Order in Council of Nov. 29, 1881.

Three majors, two captains, and three lieutenants of the Royal Marines, who, since the beginning of January, have been going through a course of equitation at the Cavalry Depôt at Canterbury, finished their course during the past week, and have rejoined their respective headquarters.

Major C. S. C. Webb and Lieuts. G. T. Onslow and A. F. Gatliff have obtained certificates for Military Equitation at the Cavalry Depôt, Canterbury.

The under-mentioned lieutenants, R.M.L.I., have been accepted as probationers for the S.C., and will embark for India in H.M.S. Euphrates at Portsmouth on the 3rd prox.:—F. H. N. Wilson, M. T. Shewen, C. Chamier, and C. H. Macdonald.

Major and Brevet Lieut.-Col. J. W. Scott, R.M.L.I., has been ordered to join the Royal Marines' Depôt, Walmer, for duty, on the expiration of his present leave of absence.

The Rev. T. F. Morton, M.A., from Malta Dockyard and Hospital, has been appointed chaplain to the Chatham Division, R.M.L.I., vice Clemenger, who retires on March 1 next.

The under-mentioned captains have been ordered to be detached from Gosport for duty at the Divisions noted against them:—T. K. Byam, Plymouth; C. W. Hawkins, Chatham.

Leave of absence has been granted as under:—Major and Barrackmaster T. Q. Meade, R.M.A., two months; Lieut. G. D. C. Raitt, R.M.A., two months, on disembarkation; Capt. L. S. Burrowes, R.M.A., six weeks; Lieut.-Col. C. B. Nurse and Lieuts. J. R. H. Oldfield and H. C. Fraser, R.M.L.I., one month.

50th Queen's Own (Royal West Kent Regiment). Brevet Lieut.-Col. Leach leaves England to-day for Cyprus in the troopship Nepaul.

51st King's Own Light Infantry. Capt. Sparke embarks for India next week in H.M.S. Serapis.

60th King's Royal Rifle Corps. The Egyptian War medals were presented to the 3rd Batn. at Cairo on the 10th inst., by Major-Gen. Sir Gerald Graham, K.C.B., who gave them to each individual officer and man. Before the distribution, the battalion was formed into a hollow square, and addressed by the Major-Gen. as follows:—"3rd Batn. King's Royal Rifles. I have been invited by Col. Sir Cromer Ashburnham to present the Egyptian medals to you, an honour I gladly accept, as it gives me an opportunity of telling you how highly I esteem the noble corps to which you belong. To recite the actions (now 32 in number) in which your regiment has been engaged, would be to enter into the history of British arms for the last 125 years. *Celer et audax*—'swift and bold'—is your proud motto, given to you at the battle of Montmorency, before Quebec, by the illustrious Wolfe; and you have since proved your right to it in the glorious fields of the Peninsula, in India, South Africa, China, Afghanistan, and now in Egypt. Your battalion was in the South-African Campaign of 1879-81, when you showed yourselves to be of the true metal, both in victory and defeat, at Ulundi, as at Ingogo, where nothing but real discipline and coolness could have preserved you from destruction. You are a battalion of what are now called old soldiers, your average service is about seven years. Of those present on parade (11 officers 414 non-commissioned officers and men), 3 officers, including your commanding officer, and 132 men were present at the action on the Ingogo river, for which no medal was given; 2 officers and 212 men are wearing the South-African medal; while 4 officers and 12 men are wearing other medals, or more than 1 medal. To recite briefly your services in Egypt:—You landed at Alexandria on July 18 last, took outpost duties at Ramleh during the hottest weather, and even engaged in the reconnaissance of Aug. 5. Although not belonging to my division, you fought under me in the action of Sept. 9, at Kassassin, when you advanced steadily on the left flank under a heavy fire, and when your casualties were greater than those of any other battalion engaged. At Tel-el-Kebir, where Sir C. Ashburnham commanded a brigade composed of your battalion and the Duke of Cornwall's Light Infantry, you supported the left of the Highland Brigade, and played a distinguished part in the crowning victory. Your conduct both in the field and in garrison has been worthy of your splendid regiment, and you now stand a seasoned body of efficient soldiers that any officer would be proud to command."

64th North Staffordshire Regiment. Capt. Mortimer has been appointed Instructor of Topography at the Royal Military College.

69th Welsh Regiment. The regiment, under command of Lieut.-Col. Fitzgerald, embarked in H.M.S. Assistance at Liverpool on Thursday, for conveyance to Belfast, *en route* to Londonderry, there to relieve the 1st Batn. 15th Regt.

74th Highland Light Infantry. H.M.S. Serapis arrived in Plymouth Sound on Sunday morning, having on board the head-quarters and service companies, a total of 765, viz., 19 officers, consisting of Col. J. Jago (commanding); Lieut.-Cols. Straghan and Leigh; Majors Wallace, Simpson, and McAlpine; Capts. Hay, Kelham, and Carey (adjt.); Lieuts. Stephenson, Scrace-Dickens, Stockwell, Heneage, Synge, Maxwell, Elphinstone, Whistler, Templer, and Pagan, and Qrmr. Litster; 11 warrant officers and staff serjeants, 33 serjeants, 20 buglers, 29 corporals, and 645 privates.

79th Queen's Own Cameron Highlanders. On the break-up of the Army of Occupation in Egypt, the regiment is expected to return to England.

86th Royal Irish Rifles. Major Chatfield leaves England to-day in the troopship Nepaul, *en route* to join headquarters at Bermuda.

87th Royal Irish Fusiliers. Brevet Lieut.-Col. Taylor has proceeded to the depôt at Armagh, relieving Major Dashwood, who has rejoined head-quarters at Aldershot.

88th Connaught Rangers. The detachment which had been stationed at Fort Akalgarh (Dera Ismail Khan), being too sickly to march with the regiment, will be railed to Umballa. The maintenance of a British garrison at Dera Ismail Khan is to be discontinued.

94th Connaught Rangers. The regiment proceeds from the Curragh to Fermoy, exchanging quarters with the Royal Scots.

98th North Staffordshire Regiment. Capt. Williams embarks for India next week in H.M.S. Serapis.

1st West India Regiment. A correspondent writes:—"You have ever been an advocate for the claims of all the various regiments and departments of the British Army to equal treatment and equal opportunities of distinction. In the interests of one branch, I write to you now, viz., the West India regiments. Save on the coast of Africa and on the Western Islands themselves, these regiments have few opportunities of service. Would it not be a wise measure if an exchange were sanctioned between one battalion of the West Indian Infantry and one of East Indian Infantry? Both services would, in my opinion, gain immensely by the transfer. Firstly, a fresh stimulus would be given to the West Indian Regiments, offering a wider field of distinction, a less wearisome round of duty, and an opportunity of association with other troops in brigade and division. There are plenty of extremely healthy stations in India, in all parts; Bangalore, Poona, Sealkote, &c., might be quoted. Secondly, the East Indian has very little, if any, objection to foreign service now-a-days. Many East Indians emigrate to islands where a larger wage is obtainable for their labour than they obtain at home. The desire to revisit home is, doubtless, extremely strong, but it is frequently gratified, and very small savings, in addition to pension, will make an East Indian soldier extremely comfortable and contented in his village during his declining years. As to the moral effect of the small detail of military administration now treated of in the proposed exchange of battalions, I believe it would be very great. 1st. In East India (*a*), one more alien battalion; (*b*), one less indigenous one; (*c*), ocular demonstration to the natives of India of the number and variety of the races we rule; (*d*), an example of a Christian battalion, with black faces, neither pauperised nor demoralised by a religion which has that effect generally on themselves (and, therefore, as a missionary agency, more valuable than a whole legion of preachers!); (*e*), on emergency, a negro battalion might always be depended on to remain on the British side, which, however loyal our Native Army is, cannot be regarded as an absolute certainty, in certain contingencies, with certain races; (*f*), a certain stagnation and fossilising—particularly noticeable in Madras, less in Bombay, and least in Bengal—would be relieved by foreign service. These advantages would be also gained in the West Indies, where a black mutiny is not absolutely unknown, and where the stagnation I speak of is more rarely relieved by change than in the East Indies. Of course, there remains the great bugbear of cost, which it is hard to estimate, including as it does the cost of transport. (A partial solution of the expense of sea transport might be found in the rearrangement of the Naval West Indian and East Indian reliefs, by which the going and returning drafts of East and West Indian Infantry might be utilised as Marines. This would involve the partial adoption of double-battalion regiments in India.) The East Indian battalion would, of course, be cheaper, while more efficient, to the West Indies than would the West. The West, again, would be a dearer battalion to the East-Indian exchequer, but I cannot think that this alone, though a difficulty, balances the advantages gained. No experienced officer would balance a British against an Indian battalion; but for garrison service in ordinary times, the addition to East Indian strength by the substitution of a negro for an Asiatic battalion might be sufficient to allow of the withdrawal of one British regiment from India. Eventually also, if this small attempt should prove a success, a proportion of the Mediterranean and other island garrisons, such as Bermuda, Malta, Cyprus, &c., might be furnished from India and the West Indies in one general roster for relief, as is now done at Aden. This is, doubtless, the Imperial policy of Lord Beaconsfield and politicians now discredited with the constituencies; but as the welding-together of the Empire has been partially accepted by the present Government, who have undertaken the commencement of an investigation into Colonial defence, some further steps in the direction of military insurance may possibly, even now, be acceptable. I may here state that the attitude of certain Chiefs of Central India, which was generally supposed to indicate a kind of sulky disaffection a few months ago, has been most favourably affected by the Egyptian successes, and that any measure which tends to give the natives of India a better idea of our real power has always a beneficial effect. The march of troops in relief is, it is thought, one of our means of showing that the velvet glove covers the iron hand; the disposal of many British battalions in the hills has lessened the visible display of force in the crowded centres, and a measure, such as is now sketched out, which would give greater display of force within and a larger withdrawal of hostages without, could not be otherwise than beneficial to our greatest dependency."

Medical Department. "A Candidate" writes:—"Now that the Army Medical Department is so popular with young surgeons, and the competition is much greater than in former years, is it not hard on unsuccessful candidates that the War Office give them no information as to the number of marks they obtain; while, on the other hand, the India Office, when returning the papers to those who have not been fortunate enough to gain a place in that service, always enclose a list of the marks obtained, though the examination is just the same? Surely, if this grievance was brought to the knowledge of the War Office, and remedied, it would confer a great boon on many who, after more than one trial, would esteem it an honour to obtain a commission in this popular branch of her Majesty's service." "Surgeon-Major" writes:—"With reference to your editorial remarks on the value of the opinions of the President of the Royal College of Surgeons, on the subject of the Army Medical service, I beg to state that you are, in my opinion, not correct in undervaluing Mr. Spencer Wells's views. So far from being inexperienced in these questions, Mr. Spencer Wells has had many opportunities of arriving at a sound judgment on the subject. 1. Mr. Spencer Wells for eight years served as a Naval surgeon on foreign service, being thus enabled to see the medical establishments of our home and foreign armies in various quarters of the globe. 2. He served in the East throughout the whole of the Crimean Campaign, and was on duty as a Military surgeon at Smyrna and Renkioi, in the large hospitals at these places. He thus had large opportunities of seeing the needs of the Medical service. 3. Quite apart from these purely English military experiences, Mr. Spencer Wells has also seen much of military surgery in Paris, in 1848, and likewise at Rome and Palermo. 4. Further, you are, I think, in error in believing that it is impossible to exercise a field hospital in peace as a practice for war. It is not only easy to do so, but it is essential in the interests of humanity that such experience should be available for the Army Medical Department. The mere pitching of the camp is a lesson from which much may be learned; the water supply, the sanitation, the field cooking, the field washing of clothes can all be practised as well in the Long Valley as in the plains of Roumelia. Further, it would be a valuable experience for all Medical officers, if during the summer months tent hospitals were pitched near the larger military hospitals, and any suitable cases treated in them. By this means, the wards of the hospitals could, with much sanitary advantage, be emptied for a time, and the custom of treating the sick in tents, as practised in some foreign armies, be introduced amongst us. It is this practice Mr. Spencer Wells desires to see introduced into our service, and I think every Military and Medical officer will agree in the soundness of his views."

The Auxiliary Forces.

MILITIA.

Royal Scots Fusiliers. Capt. M'Neillie, senior captain of the 3rd Batn., died, at his residence, Castle Hill, near Dumfries, on the 12th inst., and was interred on the 16th, with military honours. At a distance of a mile and a half from the family burying-place in Troqueer Churchyard, the funeral procession was met by the detachment representing the battalion, numbering 140 of all ranks, and comprising the commanding officer and other officers, the whole of the permanent staff, the band, pipers, and drum and fife band, and a firing-party, commanded, in the absence on leave of the adjt., by Capt. and Qrmr. Erwin, and composed of 64 rank and file, who, although the battalion is not now out for training, had voluntarily assembled to do honour to the deceased officer. Capts. Maxwell-Witham, Ewart, Kennedy, Irving, Dudgeon, and Johnstone acted as pall-bearers, Col. Walker, Major Hume, Surg.-Major Kerr, and Lieuts. Bayley, Mackie, Maxwell, and MacMurdo following as mourners. The remainder of the distance was traversed in slow time, marked alternately by the "Dead March" in *Saul* of the band, by the wail of the pipes, and by the muffled rolling of the drums. On arriving at the churchyard, the coffin, covered by the Union Jack, and surmounted by the claymore and bearskin of the deceased, was borne shoulder-high by eight colour-serjeants to the grave, into which, after prayer by the minister of the parish, the Rev. Mr. Campbell, it was solemnly lowered, and three volleys from the firing-party closed the regimental career of one who, during a service of nineteen years, had won the respect, esteem, and affection of all his comrades.

Bedfordshire Regiment. The 3rd Batn. assembles for training on May 21, and not on May 7, as previously ordered.

The preliminary training of the Hertfordshire and the 2nd Norfolk commenced on Monday, the former at Hertford for 83 days, and the latter at Great Yarmouth for 56 days.

The recruits of the following regiments assemble on Monday for 56 days' training:—Norfolk Artillery, at Great Yarmouth; Royal Carmarthen Artillery, at Carmarthen; Royal Pembroke Artillery, at Haverfordwest; the Royal Bucks, at High Wycombe; and the Royal Montgomery, at Welshpool.

The Government has now approved of the Irish Militia being called out this year for the usual period cf 27 days. All arrangements for carrying out the training of the same will be left to the discretion of the General Officer Commanding the Troops in Ireland, who will submit copies of the training arrangements to the Irish Government in Ireland, and to the War-Office authorities. The preliminary drill in most districts will be dispensed with, as the recruits are drilled on enrolment.

YEOMANRY CAVALRY.

We are pleased to be able to publish the following correspondence:—"National Rifle Association, 12 Pall Mall East, London, S.W., Jan. 22, 1883.—From the Secretary, National Rifle Association, to Major Tynte, 4th Dragoon Guards, Adjt. R. East Kent Yeomanry Cavalry, Canterbury. —Sir,—In reference to the resolutions passed at a meeting of Yeomanry Cavalry, held on the 21st of July, 1882, communicated by Lieut.-Col. Burt, 1st Warwick R.V., and yourself to the Committee in Camp, and by them referred to the Council of the N.R.A. for their consideration, I am directed to inform you that they were submitted to the Council at their meeting held on the 19th inst., when the following resolution was passed:—Moved by Lieut.-Col. Burt, seconded by Mr. Martin Smith, and resolved, 'That, as the terms of enrolment of Yeomanry Cavalry are so nearly identical with those of Volunteers and their members limited, the Council will allow them to compete at Wimbledon, in 1883, in Volunteer competitions, as a tentative measure.'—I have the honour to be, Sir, your obedient servant, Edmond St. John Mildmay."

THE VOLUNTEERS.

13th Middlesex, Queen's Westminster Rifles. The Duchess of Westminster presented the prizes to the regiment in Westminster Hall on Saturday. Her Grace was accompanied by the Duke, who is hon. col. The proceedings began with an inspection by Col. Kent, and this was followed by a statement from the col.-commandant, from which it appeared that the present strength of the regiment is 890 men, of whom 841 are efficients, or 16 more than in the previous year. The increase in recruits has been 15, and the per-centage of efficients is higher than was shown by the last report. The distribution of prizes by the Duchess of Westminster followed, and at its conclusion, Col. Kent proposed a vote of thanks to her Grace, which was carried with three hearty cheers.

24th Middlesex (Post Office) Rifles. The *Standard* says:—"Lieut.-Col. Du Plat Taylor has received instructions from the Secretary of State for War to form an Army Telegraph Corps which might take the field in time of war. The nucleus of this corps is a company raised principally from the Postal Telegraph Branch, which will be recruited to a strength of 200 rank and file, and supplied with the necessary field equipment."

"Templar" writes:—"I shall be much obliged, if either you or some of your readers can inform me whether absentee commanding officers are recognised by the Volunteer Regulations; and, if not, why these pseudo-ornamental gentry are suffered by the War-Office authorities to 'cumber the ground.' I have always understood from the military text-books that it is considered highly important that officers should make themselves thoroughly acquainted with the men under their command, and they are directed in the Queen's Regulations to lose no opportunity of gaining this knowledge; *a fortiori*, commanding officers should be known to those junior in rank. Now, Sir, one of the City of London regiments, in which I have for some time taken an interest, is commanded by an officer who is permanently resident on the Continent; for two or three years he has attended sufficient drills to render himself technically efficient, but from July 1, 1882, to the present time he has not been in England. The result of this absenteeism is that of the ten captains, three have seen him twice only, once at mess and once on parade; of the fifteen lieutenants, five have seen him twice only, once at mess and once on parade, seven have never seen him at all; of the 700 and odd men, it is not possible that he is known by sight even to two-thirds. I will not trench, Sir, upon the inconveniences and delays that must, through this disgraceful state of things, ensue to the internal economy of the regiment; but Easter is drawing near, and at the Volunteer Review, when, as every one knows, it is always extremely difficult to keep men well in hand, it is possible that the regiment of which I am writing will be governed for the nonce by an officer whose visits are, like angels', 'few and far between;' who is unknown to the larger portion of it, and who is not unlikely to have grown rusty from want of practice. Surely nothing but chaos can happen, and a fine regiment possibly be blamed. I hear that the officer in question has prevailed upon the council of Metropolitan commanding officers to relieve him from the important duties of joint secretary. Would it not be a fitting step, Sir, should he resign duties far more important to the country and to the well-being of the 2nd London—those of the commanding officer?"

The composition of the forces (as far as the Home District is concerned) to be assembled at Brighton on Easter Monday has now been forwarded to the Adjutant-General (Lord Wolseley), and is as follows:—Cavalry—Middlesex Yeomanry, 50. Artillery—Hon. Artillery Company's Field Battery, 63 officers and men, and four 9-pounder rifled muzzle-loader guns; 2nd Middlesex (Customs) Artillery, 400; and 3rd Middlesex Artillery, 12 20-pounder rifled breech-loader guns, 542 of all ranks; total, 1,005 and 16 guns. Engineers—1st Middlesex, 536; 1st London, 400; and 2nd Tower Hamlets, 500; total, 1,436. Infantry: 1st Middlesex (Victoria) R.V., 117; 2nd (South) Middlesex R.V., 500; 3rd Middlesex R.V., 402; 4th Middlesex (West London) R.V., 340; 5th (West) Middlesex R.V., 334; 6th Middlesex (St. George's) R.V., 329; 7th Middlesex (London Scottish) R.V., 500; 8th (South-West) Middlesex R.V., 481; 9th Middlesex (Harrow) R.V., 150; 10th Middlesex R.V., 552; 12th Middlesex (Civil Service) R.V., 230; 13th Middlesex (Queen's Westminster) R.V., 638; 14th Middlesex (Inns of Court) R.V., 80; 15th Middlesex (Customs and Docks) R.V., 437; 16th Middlesex (London Irish) R.V., 610; 17th Middlesex (North) R.V., 553; 18th Middlesex Rifle Regt., 750; 20th Middlesex (Artists) R.V., 425; 21st Middlesex (Finsbury) R.V., 502; 22nd Middlesex (Central London Rangers), 500; 23rd Middlesex (London and Westminster) R.V., 500; 2nd London R.V., 550; 3rd London R.V., 777; Tower Hamlets Rifle Brigade, 450; 2nd Tower Hamlets R.V., 492; 1st Surrey R.V., 314; 3rd Surrey R.V., 410; 5th Surrey R.V., 313; 1st Volunteer Batn. West Surrey Regt., 445; 2nd Volunteer Batn. West Surrey Regt., 431; 3rd Volunteer Batn. West Surrey Regt., 350; 1st Bucks R.V., 471; and 1st Oxford (University) R.V., 176; total, 14,596. The total force thus to be supplied from Major-Gen. Higginson's command is a little over 17,000 of the four arms, thus:—Cavalry, 50 sabres; Artillery, 1,005 and 16 guns; Engineers, 1,436; and Infantry, 14,596. Middlesex, of course, furnishes the largest quota, 10,495 officers and men, representing 25 regiments; next to which is Surrey, with 2,713 (seven regiments); the City of London, 1,790 (four regiments); the Tower Hamlets, 1,442 (three regiments); Bucks, 471; and Oxford, 176.

Friday's Gazette.

MILITIA.

WAR OFFICE, Pall Mall, February 23, 1883.

2nd Volunteer Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Edward Sydney Horton, gent., to be Lieut.

(Where not otherwise specified, the foregoing commissions and announcements bear date February 24, and the current year must be understood.)

Three different patterns of guns, viz., the 9, 13, and 16-pounder, appear to be in use at the present moment by our Field Artillery; to these will be doubtless added the new 22-pounder. We trust we may not be engaged in a European war with such an organisation!

The Duke of Cambridge, speaking at the Royal United Service Institution on Wednesday, after a lecture by Capt. Walford, R.A., on the bombardment of the forts of Alexandria, said it was highly creditable to our Navy that in reducing those forts so little damage had been done to the town of Alexandria. His Royal Highness urged the importance of supporting our naval power by the erection of forts at vulnerable points of this country and its possessions abroad.

The War Office has decided to erect an extensive range of buildings for the manufacture of torpedoes, in connection with the Torpedo School attached to the School of Military Engineering at Chatham. The buildings will abut on the River Medway, near Gillingham Pier, and a short distance from Chatham.

The Anglo-Indian Tea Company, Limited, has been incorporated, with a capital of £100,000, to purchase, work, and further develop and improve the estates known as the West Hopetown Tea Company, Limited, and the Herbertpore Tea Estate, situate in the Western Doon, in the North-West Provinces of the Empire of India—to acquire other suitable tea estates situate in any part of India—to deal in teas of all descriptions.

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

EGYPTIAN WAR FUND.

NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

PATRON.
Her Most Gracious Majesty the QUEEN.

The principles of application of the Egyptian War Fund are:—1st. To afford immediate assistance to the families of the killed on a scale which, though perhaps temporarily small, may yet prevent a great deal of suffering. 2nd. To afford such permanent assistance to the families of the killed, or to disabled men, by either direct aid to the sufferers, or grants of money to cognate institutions, as may seem best. All branches of the Service are eligible, the sole condition being service in the Egyptian Expeditionary Force.

Subscriptions are earnestly requested. Remittances can be sent to Lady Jane Taylor, 16 Eaton Place, S.W.; or to Cox and Co., Craig's Court, S.W.

Application for assistance to be made to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, London, S.W.

TO MESS PRESIDENTS AND OFFICERS' MESS COMMITTEES.

THE GROSVENOR GALLERY RESTAURANT,

The Cuisine Department and Wine Cellars are under his personal supervision, and the utmost care is taken to make every such gathering a success.

Full particulars may be obtained from W. A. BURROWS, Manager, 136 New Bond Street, London, W.

HOTCHKISS AND CO.,

21 RUE ROYALE, PARIS;
AND
49 PARLIAMENT STREET, LONDON.

MANUFACTURERS of HOTCHKISS' PATENT
REVOLVING CANNON,
SINGLE-BARREL RAPID-FIRING GUNS,
MOUNTAIN and YACHT GUNS, AMMUNITION,
&c.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures at their wholesale-trade Prices, which are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have taken this course of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

SCHWEITZER'S COCOATINA

ANTI-DYSPEPTIC COCOA OR CHOCOLATE POWDER.
Guaranteed Pure Soluble Cocoa, without Sugar, Spice, or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper, a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "the most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and young Children. Samples per post.

Highly commended by the entire Medical Press.
Adopted as a Medical Comfort in H.M.'s Royal Navy

In air-tight canisters at 1s 6d, 3s, 5s 6d, &c., by Chemists and Grocers.

SPECIAL NOTICE.

A. A.—Yes.
A SOLDIER has failed to send us his name.
E. S. BOGNOR.—Shall receive our early attention.
CHESHIRE.—Certainly.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 24, 1883.

WE commented not long ago upon the delay that almost invariably takes place in filling up vacancies in regiments, caused by death, retirement, or seconding. Here is an instance; we take it at random from the *Army List* of this month. A Major of a territorial regiment retired early last month. No doubt, before this retirement appeared in the *London Gazette*, the officer's application to quit the service had been for weeks or months under consideration, such being the wholly unnecessary, but usual, course pursued in these cases. A fortnight afterwards, with altogether remarkable promptitude, the senior Captain was promoted to fill the vacancy. The following week, however, it was discovered that this officer was on the Seconded List for Staff service, and so the next senior Captain was duly promoted. Lo, and behold! after the lapse of another fortnight, a second discovery was made, viz., that the last-mentioned officer had also been long ago seconded. In due course, this fact was made known (*vide London Gazette* of February 13). Now, the absurdity of the thing is this,—although three separate and distinct efforts have been made to fill this Majority, it remains vacant still! The reason of all this gazetting and regazetting is, we presume, that the responsible officials have not up to the present made that their third discovery. However, now that we have assisted them in what, to us, appears to be an extremely simple and common-place matter, let us hope that, by a fourth and final effort, the herculean task of filling a Majority in one of the old double battalion regiments may be soon surmounted, to the complete satisfaction not only of the authorities themselves, but likewise of all interested. Lord Hartington is now at the head of affairs in Pall Mall, and as it is almost needless to say that similar cases could be cited *ad infinitum*, we would venture to express a hope that, amongst other things, his lordship will put a stop to all this roundabout way of transacting official business, for without doubt the annoyance and anxiety of mind, not to mention the expense caused to officers by the habitually dilatory and uncertain mode pursued in gazetting regimental promotions, is almost inconceivable. In support of our opinion, we need only point to the fact that officers whose interests are concerned hasten to Pall Mall, not only from all corners of the United Kingdom, but from the uttermost parts of the Empire, to urge *in propriâ personâ* their claims, or glean information with regard to their expected promotion, from anybody—from his Royal Highness down to a departmental clerk. We ask,—Can this state of things be calculated to promote harmony or contentment? The question must be answered emphatically in the negative. We assert that the War Office, by this slackness, actually encourages discontent. As for the services of officers lost to the State—often for months at a time—that is, of course, a matter of no particular moment with the authorities. But leaving all considerations of personal inconvenience out of the question, we ask,—Is it fair to the State that official business should be carried on in such a slip-shod and eminently unsatisfactory manner?

If rumour be correct, great changes are contemplated in the organisation of the Royal Artillery. The more complete amalgamation of the whole force of Artillery with the other branches of the Army, the separation of the Garrison Artillery from the Horse and Field, the further development of the Territorial System, the organisation of the Horse and Field batteries in regiments with localised depôts, the abolition of the Royal Horse Artillery as a *corps d'élite*—these are some, among the many drastic reforms, which are said to be likely to be introduced. We propose to wait till the whole scheme is before us in a definite shape, before expressing an opinion as to the propriety and wisdom of the contemplated changes. It is, however, to be hoped that before the new arrangements are finally completed, there may be a general re-posting of the officers. There are, as is well known, officers now serving in the mounted branches of the Artillery, who are not fitted for active work in the field. Similarly there are officers who have found themselves promoted into garrison batteries, but who, owing to their previous service having been passed in the mounted branches, have not had the opportunities for acquiring the special knowledge necessary to enable them to become useful and scientific garrison artillerymen. Facilities for exchanges between officers should be offered, and it may even be desirable that the Deputy-Adjutant-General, Royal Artillery, should not hesitate to recommend to his Royal Highness the compulsory transfer of certain officers to that branch of the Artillery for which they have proved themselves specially fitted. Unless arrangements are made in this way for a general re-posting of officers, wholesale hardship will be inflicted on many deserving officers, and the interests of the service, no less than those of individuals, will suffer. We do not wish to be misunderstood. We are distinctly on the side of Artillery reform. That reform, if it is to be useful, should be complete, effective, and final. The periodical attempts made by each succeeding Deputy-Adjutant-General to patch up existing Artillery arrangements, are not creditable to the authorities. Reform, however, loses all its utility if it does not carry public opinion with it; and public opinion will never be in its favour, if vested interests are not preserved, as far as possible, and if, as has unfortunately been the case with so many recent Army reforms, the feelings, the sentiments, and what we may call the honourable prejudices of individuals, are ruthlessly trampled on.

The abolition of the Royal Horse Artillery as a *corps d'élite* will not be a popular step. The opposition to the proposed change is very strong, and may, after all, prove successful. In any case, we believe that it is not intended to interfere with what may be called the tactical organisation of Horse Artillery batteries. They will still be armed with a light gun; their gunners will still be mounted; their mobility and manœuvring power will not be lessened, but rather increased. Those batteries which gained for themselves so splendid a reputation in the Peninsular and Waterloo campaigns will be preserved intact. The proposed changes relate partly to dress and equipment, partly to the special organisation of the Royal Horse Artillery as a favoured and privileged corps. The existing dress is expensive, uncomfortable, and unserviceable. It is, indeed, invariably discarded as an encumbrance on active service. In giving the Horse Artilleryman a more suitable uniform, it is considered that the prestige of the Royal Horse Artillery stands too high, and is founded upon too sure a base to admit of its being seriously influenced by the cut of a jacket, the colour of a belt, or the shape of a head-dress. So long as the Horse Artillery batteries retain their present high state of efficiency, they will never fail to secure an inflow of good recruits. As regards the changes in organisation, it is thought that a modification is necessary in a system which sets Horse Artillerymen above their fellows, and unduly glorifies them at the expense of their less privileged, but quite as useful, brethren. The feeling of the day is undoubtedly against the maintenance of *corps d'élite*. At the same time, we implore the authorities to do nothing hastily, to spare the pruning-knife where possible, and above all, to avoid riding rough-shod over the feelings and traditions of one of the most distinguished corps in the British Army.

The new Governor of Gibraltar since his arrival has been endeavouring rather unsuccessfully to educate "Tommy Atkins" as to the proper name of his corps. To a sentry says his Excellency, "What's your regiment, my man?" "47th, sir." "No, no, you're a Loyal North Lancashire man." "Yes, sir, 47th always has been the loyallest and smartest regiment in the service, but I ain't a Lancashire lad, please, sir; I'm an Irishman!" To another such query the answer was, "56th, sir." "But you have got another name now, my man; can't you think of it?" says the Governor, after a pause. "We was Pompadours, sir; I don't know what we are now, they alters us about so!" is Tommy's reply. He evidently did not hail from Essex, or appreciate at its proper value the new distinctive territorial title.

An officer stationed in Ceylon, writing to us by the last mail, says:—"I had the pleasure of a talk with some of Arabi's people the other day, who attribute the whole of our success in Egypt to the vigilance of our Cavalry. Arabi was not prepared for such rapid movements of our mounted arms, and has the greatest admiration for the manner in which the Cavalry were handled throughout. Both at Kassassin, he says, and Tel-el-Kebir, the timely arrival of the Cavalry left him no chance. He speaks of the shock occasioned in the latter engagement by the appearance of the Cavalry on his left flank, and says that from that moment success for the British forces was assured. He never expected to be followed to Cairo with such rapidity, and he speaks of the forced march of Cavalry from Tel-el-Kebir to Cairo as a wonderful piece of military enterprise, reflecting the highest possible credit on all who took part in the march, but more especially on its leader. As there has been so much discussion on this subject, and there is an evident desire in some quarters to rob the Cavalrymen of the credit which is due to them, it may be well to let the public at home know what the views are which are expressed by the Egyptians themselves."

A splendid soldier was lost to the Army at the battle of Tel-el-Kebir, in the person of Serjeant-Major J. M'Neil, 42nd Highlanders, and it will be long ere his name is forgotten in the Black Watch. There are certain facts in connection with the deceased's career which it may be well to bring to light, reflecting as they do as greatly to his credit as they do to the discredit of the country he served so well, and in whose interest he sacrificed his life. Serjeant-Major M'Neil was an unmarried man,—he had always refused to enter the married state, because he had a widowed mother. His mother was at one time in an infirmary at Aberdeen. From this her son removed her, in order to place her in a comfortable home. He put aside a portion of his pay to cover the cost of this home, and this allowance was paid to the time of his death. Had he married, his widow would have been entitled to a pension. His mother is entitled to nothing, and on the case being represented, the War Office could not see its way to make any exception to the ordinary rules of the service. The officers of the regiment, on the facts becoming known, at once subscribed £50 for the bereaved mother, who has been deprived of a good son and all means of subsistence at the same time.

The announcement was made by Lord Hartington on Thursday, that the Government have approved of the Irish Militia being called out this year, for the usual period of twenty-seven days. Considering what we have seen of the Irish policy of the Ministry, it would scarcely be fair to charge the Government with inconsistency, although it is manifest that some time must elapse before the anarchical forces at work below the surface of society in Ireland will be at rest. Is it wise, however, to throw temptation in the way of possible ramifications of the "Irish Invincibles," with their linked battalion the Land League, and so relieve the strain upon the funds of the latter, in providing arms and ammunition for future trouble?

Major-General Tower, C.B., late 3rd Dragoon Guards, was awarded a good-service pension—£100 per annum—for "distinguished and meritorious service," on January 24, 1883. On March 21, 1883, General Tower will be retired, for five years' non-employment, under the Warrant of June 26, 1881. Consequently, he will lose the good-service pension. The sum which will be actually paid to him will be exactly £16 0s. 5¼d. This award must be either a piece of official chaff, or it must foreshadow the grant of a good-service medal and ribbon to all officers who have been granted the pensions. The Generals who held this good-service pension were deprived of them by the Warrant of June 26, 1881, *in toto*, on compulsory retirement; and the Colonels removed from the Army who did not receive the reward until after July 1, 1881, took half of it, on enforced retirement. The following is a copy of the official letter which is addressed by the Commander-in-Chief to an officer, on his selection for the pension:—

"Horse Guards, War Office.

SIR,—I have the satisfaction to acquaint you that her Majesty the Queen has been pleased to approve of your receiving, from the grant for distinguished and meritorious service, an allowance of £100 per annum, from ——, inclusive. You will receive a communication from the Secretary of State for War as to the mode in which this allowance is to be paid to you,—I am, Sir, yours,

To Major-General ——, &c." GEORGE.

Under the new rule, officers of high rank who have been selected for the pension have nothing whatever to show for it, after compulsory removal from the Army.

The following General Order has been issued, to the despair of all civilians who now lose their one means of identifying military friends or the uniforms of any regiments in which they may be interested:—"It having been brought to notice that officers, warrant officers, and serjeants still wear in some regiments numerals on their forage-caps, H.R.H. the Field-Marshal Commanding-in-Chief has directed that this practice be at once discontinued." The Line and the Militia have, indeed, at length been welded into one harmonious (w)hole!

As a sequence to the transformation, lately ordered, of all uhlan and hussar regiments of the Russian Army into dragoons, a common uniform has been introduced for the cavalry and horse artillery. It consists of the national Russian coat of dark green cloth, already supplied to the infantry, wide trowsers, high boots, and round fur cap. Only the collars and shoulder-straps are different, the latter bearing the regimental number. The *number* to be observed. British army reformers please note! They do some things more sensibly in Russia than we do in England.

A recapitulation of the grievances under which the Army Pay Officers are weighted may serve to remind the present Secretary of State for War that nothing has yet been done to alleviate their complaints, although nearly twelve months have elapsed since they were given to understand that no objection could be advanced on the part of the War Office to the very moderate propositions made by the Chief Paymasters who represented the Department. The principal items are as follows:—1. An officer to represent the Department at the War Office. 2. Chief Paymasters to all stations commanded by a General Officer. 3. Additional rank after total service of 20 years. 4. The option of drawing servants' and lodging allowances. 5. Corps of clerks. We are fully aware that delays are inseparable from the carrying into effect of important changes in any branch of the service. The Treasury must be consulted, and warrants prepared, which require full consideration; but in the present instance, we can only assume that, as the Paymasters are unrepresented at the War Office by one of their own body, it is the duty of no one in particular to take an interest in the position and prospects of over 300 officers, the majority of whom are protesting strongly at the want of consideration shown to them. Either the Accountant-General is engaged on other matters more congenial to his tastes, or the duty has been delegated to a clerk incapable of grasping the question. It is only too plain that, under existing regulations, the Army cannot get Paymasters, and those that are serving regret the day they were tempted to leave their regiments. Under these circumstances, the wisest course is to rely upon the disinterested evidence of those Chief Paymasters who long since advised the Accountant-General of the concessions it is absolutely necessary to make, in order that the Department may be put on a satisfactory footing.

The Navy.

EGYPT MEDAL.

Department of the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, Spring Gardens, February 20, 1883.

Notice is hereby given, that Medals for the operations in Egypt are ready for issue to the Officers and Crews, entitled thereto, of the ships named below, viz.:—Her Majesty's ships "Alexandra," "Coquette," "Cygnet," "Helicon," "Ruby." Application should be made personally or by letter to the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, London, S.W. Petty officers and seamen, whether applying in person or by letter, are requested to produce their certificates of service.

ADMIRALTY, February 15, 1883.

ROYAL MARINE ARTILLERY.—Captain and Honorory Major and Paymaster Edward McArthur has been placed on the Retired List (February 15, 1883); Major Henry Holdsworth Kelly has been appointed Paymaster, vice McArthur, retired, and has been placed on the Half-Pay List (February 15, 1883).

ROYAL MARINE LIGHT INFANTRY.—Lieutenant-Colonel Frederick Ley, having been found to be permanently unfit for further service, has been placed on the Retired List (January 25, 1883); Major Clement Winstanley Carlyon has been placed on the Retired List (February 10, 1883).

The under-mentioned gentlemen have been appointed, February 1, 1883, Lieutenants in the Royal Marine Light Infantry, viz.:—Ernest Edward Chown, Walter Erskine Binney, Kenneth James Buchanan, James Rainey Goddard, Cunliffe McNeile Parsons, Herbert St. Leger Curteis, William Hugh Munro Warrand, Arthur Lewis Harries, Charles Louis Shubrick, Donald Baker, Bernard Lucian Hubbard, Richard James Saumarez, David Mercer, Thomas Henry O'Brien, and Cecil Henderson.

ADMIRALTY, February 16, 1883.

Navigating Lieutenant Edmund Nankivell has been promoted to the rank of Staff Commander in her Majesty's Fleet, with seniority of February 14, 1883.

ADMIRALTY, February 17, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Lieutenant Hugh Hamond George William Carruthers Massy has this day been placed on the Retired List.

ADMIRALTY, February 19, 1883.

ROYAL MARINE ARTILLERY.—Captain Robert Calder Allen to be Major, vice Kelly, appointed Paymaster (February 15).

ADMIRALTY, February 20, 1883.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer Henry Mackavoy has been placed on the Retired List of his rank from the 15th inst.

ADMIRALTY, February 21, 1883.

Fleet Surgeon John Money Shaw, C.B., has been promoted to the rank of Deputy-Inspector-General of Hospitals and Fleets in her Majesty's Fleet, with seniority of 16th inst.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer Thomas Carter has been placed on the Retired List of his rank from the 7th inst.

ADMIRALTY, February 22, 1883.

ROYAL NAVAL ARTILLERY VOLUNTEERS (BRISTOL BRIGADE).—Joseph Wright Simpson, Esq., to be Sub-Lieutenant (February 22).

APPOINTMENTS.

Commanders—E. Chichester, to the President, additional, for transport service; W. F. S. Mann, to the Bittern; and A. W. Moore, to the Beacon.

Lieutenants—R. A. Gwynn, to the Serapis; Francis T. Barr, to the Iris, vice Williams; Charles W. Dickinson, to the Alexandra, additional.

Sub-Lieutenants—John F. Graham, to the Achilles; Robert H. Anstruther, to the Northumberland; Ernest B. Beck, to the Amethyst.

Midshipmen—Arthur T. Taylor, to the Carysfort; John R. Hargreaves, Bryan G. Godfrey Faussett, W. C. M. Nicholson, Edward W. de W. Bruce, Hugh H. D. Tothill, and James C. Cleghorn, to the Sultan; Allan H. Ozzard, to the Carysfort.

Chaplain and Naval Instructor—Rev. J. C. Cox-Edwards, to the Ganges.

Chaplains—Rev. T. F. Morton, M.A., to the Chatham Division of the Royal Marines; Rev. H. P. Goodridge, B.A., to Malta Dockyard and Hospital; and Rev. R. V. Wilson, B.A., to the Sultan.

Staff Surgeon—James Dunlop, to the Opal.

Chief Engineer—W. J. Pettit, to the Opal.

Surgeons—Edward J. Biden, to the Opal; Edmond A. Lucas, to the Forester, vice Biden.

Surgeons and Agents—J. D. Gaff, M.D., to Ardrossan; Donald R. M. Murray, to Leith, vice Coldstream.

Engineers—Henry Attwood, to the Asia, additional, for the Neptune; Joseph W. Allen, to the Opal; Thomas A. Morris, to the Duke of Wellington, additional, for the Ant.

Assistant-Engineers—Henry Lane, to the Asia, addiional, for the Mercury, vice Atwood; Joseph T. Purkis, to the Serapis, complement incomplete; James H. Beattie, to the Opal.

Boatswain—George T. Loveday, to the Duke of Wellington, additional, for the Ant.

COASTGUARD.

Chief Boatman-in-Charge—William E. Cobden, Fosdyke, to be chief officer, Hartlepool, vice H. Wrate.

Chief Boatmen—Jeremiah Pine, Bray, to be chief boatman-in-charge, Five Mile, vice Birch, pensioned; F. Watty, Mill, to be chief boatman-in-charge, Johnshaven.

Commissioned Boatmen—William E. Head, St. Nicholas, to be chief boatman, Burnham, vice J. F. Bolson, promoted; Henry Smith, Kessingham, to be chief boatman, North Yarmouth, vice Bridgland, promoted; H. McDaniels, Moville, to be chief boatman, Larne, vice J. Giffin; William H. Walker, Tilbury, to be chief boatman, Walton-on-Naze, vice Pierse, pensioned.

AMETHYST, Capt. Bowden-Smith, senior officer on the South-east Coast of America, was at Port Belgrano, Bahia Blanca, on Jan. 9; was about to proceed to the Falkland Islands, and would return to Monte Video about April 1. The Rambler, with senior officer, was about to proceed to Monte Video. The Rifleman was at Monte Video, and would proceed up the River Plate when relieved by the Rambler. The Firefly was at the Falkland Islands; would return to Monte Video about the middle of February.

CARYSFORT, Capt. H. Stephenson, C.B., left Malta at the close of the past week, for Corfu and Athens.

COCKCHAFER, Lieut. and Com. Henry W. Hill, was at Vigo on Feb. 22; would sail on Feb. 25.

CONDOR, Com. E. F. Jeffreys, has left Malta for Alexandria, to relieve the Decoy.

CROCODILE, Capt. Henry Hand, arrived at Bombay on Jan. 31.

ELK, Lieut.-Com. Smythies, after having undergone a complete repair of her hull and machinery at Portsmouth, has made a successful three hours' trial of her engines in the Solent. The Elk is attached to the Lord Warden at Queensferry as tender.

ESPOIR, Lieut.-Com. E. H. Gamble, left Plymouth Sound on Monday for the China station, calling at Gibraltar and Malta.

EUPHRATES, Capt. Charles S. Cardale, left Bombay on Jan. 30 for Portsmouth.

EURYALUS, Capt. Hastings, C.B., flagship of Rear-Admiral Sir W. Hewett, V.C., Commander-in-Chief of the East Indies Station, was at Trincomalee up to Jan. 25. The Eclipse was at Bombay Jan. 25, about to proceed to Persian Gulf. The Tourmaline at Bombay Jan. 25 making good defects. The Philomel ordered to proceed at once to Bombay from Persian Gulf, to prepare to pay off and recommission. The Ranger was at Trincomalee Jan. 25, and will remain in company with flagship for a time. The Arab at Bombay Jan. 25, making good defects; was to return to Persian Gulf about the middle of Feb., to relieve Woodlark, ordered to Bombay. The Harrier and the Undine were cruising on East Coast of Africa. The Dryad at Zanzibar.

IRON DUKE, Capt. St. John, arrived at Devonport from the China station to pay off on Feb. 19.

MOORHEN, Lieut. and Com. James H. Corfe, was at Yokohama on Dec. 21.

NELSON, Comdre. James E. Erskine, A.D.C., in command of the Australian station, was at Hobart Town up to Jan. 2. The Diamond, at Sydney on Dec. 29, was to leave for Hobart on Jan. 3. The Espiègle, at Sydney, on Dec. 29, was to leave for Hobart when undocked. The Miranda was at Hobart on Jan. 2, and remains. The Lark, at Sydney, on Dec. 29, was to leave shortly for Auckland, to survey. The Beagle, Sandfly, and Renard were at Sydney on Dec. 29, and were to remain.

SEAGULL, Lieut. Rae (in charge), was at Simon's Bay on Jan. 29, and is expected to leave ports of call on homeward voyage to Devonport as follows:—Sierra Leone, March 10; St. Vincent, March 23; Teneriffe, April 5; and Gibraltar, April 22. Mails should be despatched accordingly.

STORK, Lieut.-Com. A. Blennerhasset, left Plymouth Sound on Monday for the West Coast of Africa, proceeding to Cape Coast Castle, and calling at Madeira.

SULTAN, Capt. Walter Hunt Grubbe, K.C.B., arrived at Gibraltar on Feb. 20, on her way to join the Channel Squadron.

THALIA, Capt. Brackenbury, C.M.G., arrived at Colombo on Feb. 23; would leave on Feb. 24 for Singapore.

WYE, Staff Com. A. W. Miller, left Plymouth Sound on Monday for Bombay with supernumeraries and stores, *viâ* the Suez Canal.

In consequence of the twin-screws of the Iris having been considerably damaged by her grounding at Port Augusta, orders have been received at Portsmouth for the despatch to Malta as soon as possible of the four right-handed and the four left-handed propeller blades of the sister-ship Mercury, which will be fitted to the Iris.

Several hundred of the mechanics at Chatham and Sheerness dockyards are working extra hours daily, in order to hasten forward the armourclad and other vessels which are being prepared for immediate commission. Among the first of the vessels which are intended to be commissioned are the Ajax, the Satellite, and the Opal, the last mentioned being intended to be commissioned on the 28th inst. for the West Coast of Africa. Several other vessels are also being prepared, but will not be ready for sea before those enumerated.

The following members of the Royal Naval Club of 1765 dined together on Tuesday, Feb. 20:—Admiral Sir W. R. Mends, G.C.B. (chairman); Col. Pemberton, guest; Admiral of the Fleet the Hon. Sir H. Keppel, G.C.B.; Rear-Admirals C. T. Curme, Edward Hardinge, H. P. de Kantzow, J. Byng, and G. W. Watson, C.B.; Capts. Stuart H. Rickman, P. H. Dyke, G. A. Douglas, Horatio Nelson, W. L. de Kantzow, Lindsay Brine, W. G. England, and Leycester J. Keppel.

The Bacchante has been ordered to be brought forward for commission as a flagship.

The finding of the court-martial which has been investigating the circumstances under which the Iris got aground at Port Augusta, Sicily, reprimands Capt. Rice and Nav.-Lieut. Williams, and orders the latter to be dismissed his ship.

The manufacture of the new breechloading ordnance for the Navy is progressing. The 43-ton gun has been approved by the Ordnance Committee. In about twenty years' time, we may expect to see the Navy armed with this new ordnance; and then it will be obsolete?

Lord Alcester has addressed the following letter to the Lord Chancellor:—"H.M.S. Alexandra (at Malta), Nov. 16. 1882. My Lord,—I have the honour to receive your Lordship's letter communicating to me the resolutions passed by the House of Lords on Oct. 26, and conveying to me, and to the admirals, captains, officers, petty and non-commissioned officers, seamen, and marines lately serving under my orders in Egypt, the expression of their Lordships' approbation of them, and thanks for our conduct during the campaign recently terminated. I have duly given full publicity to the same, and I beg to assure your Lordship that the honour done us by your Lordships is most highly appreciated by myself and all those under my command, and that it was with feelings of great pride we received your Lordship's communication.—I have the honour to be, my Lord Chancellor, your Lordship's obedient servant, BEAUCHAMP SEYMOUR."

MEMORIAL BRASSES.—Messrs. JOHN HARDMAN and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

ANTI-FOULING COMPOSITIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In two articles appearing in recent impressions of your paper, you have stated, with reference to trials of Anti-fouling Compositions, that Hay's compositions and my own are identical, that they are manufactured by the same firm, and that my paint has for some years been in use in the Navy. As these statements are likely to be misleading to many of your readers, allow me, through your columns, to contradict them. My paint is in no way similar to that of Hay's, nor is it manufactured by the same firm; its capabilities of application are more varied, and it has only been introduced into the Navy proper for the last eight months, its use having to that date been confined to the Indian Transports alone. Allow me to add that your statements as to the trial of my paint on the Malta, steam-tug, are equally without foundation.—I am, &c.,

J. F. CREASE, Lieut.-Col., R.M.A.

HARBOUR WATCHKEEPING & LIEUTENANTS, R.N.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—It is with some diffidence I approach my subject, which is none other than the abolition of harbour watchkeeping for Lieutenants, R.N. There is no need to tell you how much disgust this duty causes in the service; and should you deem it worth your while to suggest some way out of the difficulty, you would certainly gain the lasting gratitude of all who have to suffer from the old-service notion that there must be an officer of the watch at all times. Anyone conversant with the service is aware that in harbour the duties of the officer of the watch in the daytime are purely ornamental, and are confined to walking up and down the bridge in a frock-coat and sword-belt, occasionally descending for the highly important duty of carrying a letter (service or otherwise) into the captain's cabin. At night his principal function appears to be to do "sentry go" on the boats, and to inspect any liberty men who may have returned from the shore. Surely a time has come when this ancient order of things might be modified, and the principal cause of all the discontent and grumbling among the Executive officers of the Navy abolished. My suggestions are as follows:—In every large vessel where at present an officer of the watch is considered an absolute necessity, I would substitute for him an officer of the day, whose duties would necessarily be very much similar, but who, at the same time, would not be bound to remain walking up and down, "sentry-go" fashion, while the ship's company are at meals, or any other time when no work was in progress. This officer might be responsible to the commanding officer (as the officer of the watch is at present) that the routine was properly carried out, and also perform all the other ordinary duties, such as receiving officers, &c. I would have the officer of the day responsible from 8 a.m. to 8 p.m., when he might be relieved by the officer of the night. This officer I would allow to occupy the chart-house, much in the same way as an officer of the guard on shore, I mean with regard to his being allowed to read or smoke. All reports would, of course, be made to him, and things would go on much as they do at present. Of course, in bad weather, or any position of anxiety, all this would have to be modified; but for the ordinary conditions of man-of-war life in harbour, I feel sure the above plan would be found to work just as well as the present one, and remove the most fruitful source of discontent and grumbling in the Navy. Of course, this is only the crude outline of a plan which might be worked out.—I am, &c.,

X.

Notice is given this week by the Admiralty that the distribution of the tonnage-bounty awarded for the Arab slave-dhow, Bada-Thee-Ky, captured by the boats of the London on Nov. 26, 1882, will commence on Tuesday, Feb. 27, at the Prize Branch of the Admiralty, Spring Gardens, S.W. The following are the shares due to an individual in the several classes:—Flag, £11 18s. 4d.; Captain, £34 11s. 2d.; 2nd class, £5 13s.; 3rd, £4 16s. 9d.; 4th, £3 4s. 7d.; 5th, £1 18s. 9d.; 6th, £1 12s. 3d.; 7th, £1 2s. 7d.; 8th, 12s. 11d.; and 9th, 6s. 5d.

The Channel Squadron, under the command of Vice-Admiral Sir W. M. Dowell, K.C.B., arrived at Vigo on Saturday last, and is expected to leave for Lisbon on Feb. 26.

The damage done to the Lively during the recent gales seems to have been more serious than was at first supposed, she having lost some of her boats and received severe injuries, besides losing her rudder. Her detention in port will necessarily be prolonged, much to the annoyance of Lord John Hay.

The issue is announced of £1,275,000 stock (canal capital), guaranteed by the special allocation of tolls and rentals, and bearing cumulative interest at the rate of 4 per cent. per annum for the first five years, and 4½ per cent. in perpetuity after that period), of the Regent's Canal City and Docks Railway Company. The company is constituted for the purpose of constructing an important arterial line of railway, commencing at the Great Western Railway at Paddington, running almost parallel with the Regent's Canal as far as the City Road, and thence extending to a new City Terminus at Barbican, and to the Victoria and Albert Docks and the River Thames.

The *Standard* says:—"The command of the Woolwich District, which has been held by Lieut.-Gen. the Hon. E. T. Gage, C.B., R.A., for only two years out of the five years for which he was appointed, will shortly be changed, consequent on the promotion of Gen. Gage, which, by the rules of the service, necessitates his retirement. It is understood that Major-Gen. E. A. Williams, C.B., who stands sixth on the list of major-generals, Royal Artillery, will be Gen. Gage's successor at the Commandant's Office, Woolwich."

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "WRIGHT, SOUTHWARK," are on each wrapper, and branded on each tablet, without which none is genuine.

A General Order by the Field-Marshal Commanding-in-Chief notifies some modifications of the conditions of extension of Army service, which have been approved. They are as follows:—"(*a.*) Non-commissioned officers of any branch of the service, on the expiration of a year's probation, as non-commissioned officer, not below the rank of corporal, bombardier, or second corporal, have the right to extend their service to 12 years with the colours, this right to be exercised within one month of the expiration of the probationary service. (*b.*) Non-commissioned officers of any branch of the service who failed to exercise the right referred to in par. *a*, and bandsmen, pipers, and artificers of any branch of the service, at any time after completing three years' service, may be allowed to extend their service to 12 years with the colours, on the recommendation of their commanding officer. (*c.*) Lance-corporals and acting bombardiers, during the last year of their Army service, may be allowed to extend their service to 10 years with the colours on the recommendation of their commanding officer. (*d.*) Privates, drivers, gunners, and sappers, during the last year of their Army service, will not be allowed, except in very special cases, to extend their service, and then only to complete a period not exceeding 10 years with the colours, on the recommendation of their commanding officer. (*e.*) Officers' servants serving at depôts during the last year of their Army service may be permitted to extend their service from year to year, provided their total service with the colours does not extend nine years. (*f.*) Trumpeters, drummers, and buglers (enlisted for short service), during the last year of their Army service may be allowed to extend their service to 12 years with the colours, provided that the total number permitted to extend does not exceed one-fourth of the men of this class in the battalion or regiment. (*g.*) Men enumerated in classes *c*, *d*, *f*, on embarkation for foreign service, may, on the recommendation of their commanding officer, be allowed to extend their service to complete a period not exceeding 10 years with the colours. (*h.*) Gunners of the Royal Artillery, selected for transfer to the Coast Brigade, after completing five years' service, may be allowed to extend their service to 10 years with the colours on the recommendation of their commanding officer."

The screw gun-vessel Slaney, attached to the Chatham Steam Reserve, is ordered to be brought forward, in readiness to proceed to sea with the Royal Naval Volunteers for their annual summer cruise.

The Humber is ordered to be ready for a further tour of troop and store service on the South-African coast, by March 10. Since her return from Egypt, the Humber has had a thorough overhaul and repair.

The Caroline, 12, unarmoured composite sloop, 1,420 tons, 950 horse-power, recently launched at Sheerness Dockyard, has been placed in the steam basin, in order to be engined by Messrs. Maudslay, Field, and Co., the contractors.

On the arrival of Lord John Hay at Malta, Lord Alcester will proceed to Marseilles, and travel by train to Cherbourg, where he will be met by the Admiralty yacht Enchantress, which will bring him to England.

"SPECTACLES: THEIR USE AND ABUSE," a Pamphlet by Henry Laurance, F.S.S., Oculist Optician, should be read by all suffering from weak and defective vision; valuable and special instructions are given to those using and requiring Spectacles. It shows how sight is seriously injured by the indiscriminate purchase of Spectacles without regard to their proper adaptation, and traces more cases of blindness and defective vision from this than any other cause. Sent post free. Mr. Henry Laurance, F.S.S., Oculist Optician, personally adapts his Improved Spectacles at his residence, 3 Endsleigh Gardens, Euston Square, daily (Saturdays excepted), 10 to 4. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but your spectacles suit me admirably. The clearness of your glasses as compared with others is really surprising." Dr. Bird, Chelmsford, late Surgeon-Major W.E.M., writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age, 82. I can now read the smallest print, although suffering from cataract on the right eye." Similar testimonials from Ven. Archdeacon Palmer, Clifton; the Rev. Tidd Pratt, Bracknell, Berks; Rev. O. Thorpe, Peckham; Rev. Mother Abbess, Mill Hill, Hendon; Lieut.-Gen. Macmullen, Brentwood, &c.

BIRTH.

STOKES.—On the 18th inst., at Guernsey, the wife of Captain Radclyffe H. Stokes, 2nd King's Own Light Infantry, and D.A.C.G, of a daughter.

MARRIAGE.

CARROW—TOMES.—On the 15th inst., at the Parish Church, Weston-super-Mare, by the Rev. Prebendary Buckle, M.A., rector, William Galton Carrow, Commander (retired), R.N., to Fanny, daughter of the late Fisher Tomes, Esq., of Long Marston, Gloucestershire.

MANAGER—E. R. Holberton, Esq., 31 Eastcheap, E.C.

SOLICITOR—J. W. Talbot, 18 Bennett's Hill Doctor's Commons.

TEMPORARY OFFICES—31 Eastcheap, E.C.

ABRIDGED PROSPECTUS.

The objects of this Company, are—1. To acquire well-developed Tea Estates in India from which immediate returns will be obtained, and in particular the West Hopetown and Herbertpore Estates, situate in the Doon in the North-West Provinces of India. 2. To supply to the consumer pure Teas of all kinds received direct from the plantations. 3. To grant to Shareholders special advantages (on the co-operative principle) which are set out at length in the full prospectus.

The gardens it is proposed to acquire are in a high state of cultivation, unusually well laid out, and in perfect order as regards buildings and factories.

The consumption of pure Tea is practically unlimited, the demand for the same increasing largely every year.

There is no element of speculation in the objects of the Company; the profits are certain; the Shareholders may confidently expect substantial and steadily increasing dividends.

Applications for Shares in small amounts are especially solicited from consumers of Tea.

For full prospectus and forms of application for Shares, apply to the Bankers, Solicitor, or Directors of the Company.

ANGLO-INDIAN TEA COMPANY, Limited, 31 Eastcheap, are now prepared to supply, in 5lb. caddies, superb Teas at 2s, 2s 6d, and 3s per lb. A trial order is urgently solicited.

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 (late 464), New Oxford Street, W.C., at one-fourth their original cost; or on hire. Swords, cloaks, belts, sashes, saddles, &c. for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

ARGOSY BRACES.

For **RIDING,** *For* **BICYCLING,** *For* **TRAVELLING,**
For **ROWING,** *For* **HUNTING,** *For* **POLOING,**
For **WALKING,** *For* **SHOOTING,** *For* **TUG-OF-WAR.**
For **TENNISSING,** FOR EVERY-DAY LIFE.

THE ARGOSY BRACES are for sale by every Hosier and Outfitter throughout **EUROPE, INDIA,** and all **BRITISH POSSESSIONS.**

They will wear longer than any other Suspenders, and as they contain no india-rubber, are particularly suitable for hot climates.

The characteristic feature of these Braces consists in the employment of pulleys and cords instead of the fixed attachment at present in use. The effect of this is that the strain varies with the movement of the body, and never becomes excessive on any one part. The advantage is obvious. These Braces may always be worn with comfort, and buttons are not pulled off. Insist on having only the **ARGOSY BRACE.**

Kept in three sizes: No. 1, Boys; No. 2, medium Men's; No. 3, large Men's. Prices from 1s 6d (advancing 6d per pair) to 8s 6d.

⁂ Be very careful to get the right size, when perfect comfort is guaranteed. Size of waist required.

Retail of every Hosier and Army Outfitter throughout the Civilised World, or of

J. E. KILLICK and CO., 137 Strand, London, W.C. (opposite Gaiety Theatre).

PATRONS.

THE LORD ROBERT BRUDENELL-BRUCE.
COLONEL CARRICK-BUCHANAN (of Drumpellier), C.B.
GENERAL SIR HENRY DE BATHE, BART.
THE EARL OF ELLESMERE.
VICE-ADMIRAL H.S.H. PRINCE LEININGEN, G.C.B.
COLONEL SIR ROBERT LOYD-LINDSAY, V.C., K.C.B., M.P.
GENERAL LORD WOLSELEY OF CAIRO, G.C.B., G.C.M.G.

COMMITTEE.

(Nominated by the Patrons.)

The Club is started as a Grill Club, and to enable its Members to obtain from the Proprietors for their own home consumption, Wines, Spirits, and Liqueurs, at the actual wholesale cost price.

This last is an entirely new feature, the advantage of which must be apparent to every wine consumer.

All working expenses, &c., being covered by the Annual Subscriptions, Members will through the Club obtain for their own home consumption, Wines, Spirits, and Liqueurs at actual wholesale cost price, as invoiced to the Proprietors.

Thus, any Member consuming, say, only £20 worth of Wine per annum will, in addition to enjoying the advantages of a good Club, virtually receive back his subscription by the saving of the profit he would otherwise have paid to the supplier in the ordinary course of trade. To large consumers the gain will be proportionately greater.

Members may introduce Ladies into the Club between noon and 5 p.m., and they may be served with refreshments in a room set apart for the purpose.

Special arrangements will be made for the supply of Naval and Military Messes.

For Rules, Application for Membership, &c., apply to

CHARLES A. PRITCHARD, Secretary, (pro tem.)
Temporary Offices, 20 Regent Street, Waterloo Place,
London, W.

ALDERSHOT BREWERY COMPANY, Limited.

⁂ Sold Wholesale by the Proprietors, Worcester; CROSSE and BLACKWELL, London; and Export Oilmen generally. Retail by dealers in Sauces throughout the world.

ISSUE of £1,275,000 STOCK (CANAL CAPITAL), Guaranteed by the special allocation of Tolls and Rentals, and bearing Cumulative Interest at the rate of 4 per cent. per annum for the first Five Years, and 4½ per cent. in perpetuity after that period, of the

REGENT'S CANAL CITY and DOCKS RAILWAY COMPANY.

Created for the purchase of the entire undertaking of the existing Regent's Canal Company, including the Canal itself and all its Wharves, Buildings, Lands, Rents, Rights, and Privileges, present and prospective.

The Interest on this Stock will form a first charge on the nett profit derived from the working of the Regent's Canal, and the existing and accruing rentals of the lands and property thereof, and will be further secured by the undertaking of the Company (entered into under Resolution of a Special General Meeting, pursuant to the Companies' Act of 1882), to pay as Rental to the holders of the Stock such an additional amount (if any) as will be sufficient to guarantee the due payment of the Interest upon this Stock.

ISSUE PRICE: PAR.

BANKERS — London and Westminster Bank (Limited), Lothbury.

OFFICES OF THE COMPANY—3 Westminster Chambers, Victoria Street, S.W.

The DIRECTORS of the REGENT'S CANAL CITY and DOCKS RAILWAY COMPANY are prepared to RECEIVE APPLICATIONS for the above Stock at par, payable as follows:—

£5 per Cent. on Application.
20 „ „ Allotment.
25 „ „ March 29.
25 „ „ May 31.
25 „ „ July 31.
£100

The Regent's Canal City and Docks Railway Company is constituted for the purpose of constructing an important arterial line of Railway commencing at the Great Western Railway at Paddington, running almost parallel with the Regent's Canal as far as the City Road, and thence extending to a new City Terminus at Barbican, and to the Victoria and Albert Docks, and the River Thames.

This Company will, under the powers of the Act, be enabled to effect junctions with the Great Western, Midland, and Great Northern Railways; and similar junctions are contemplated with the Great Eastern and the London, Tilbury, and Southend Railways. By means of these junctions these great systems of Railway will be brought, for all purposes connected with the immense import and export business of the country, into direct communication with the Thames and the Royal Victoria and Albert Docks.

The Regent's Canal City and Docks Railway Company will, besides, afford a new east and west line, connecting in the most direct and convenient manner the dense residential and industrial populations already existing on the greater part of its length.

To the Great Western, Midland, and Great Northern Railways it will offer an additional and much-needed access to the City; and for the whole district embraced in the area between the Great Western and the City, including Harrow Road, Maida Hill, Regent's Park, Zoological Gardens, St. Pancras, King's Cross, Pentonville, and Islington, it will become for local traffic a West End and City railway of the first importance.

In accordance with the powers of the Regent's Canal City and Docks Act, 1882, the Company has resolved that the undertaking of the existing Regent's Canal Company shall be a separate undertaking, with a separate Capital, and has also determined to secure the payment of the dividend upon this separate Capital by giving it a cumulative claim upon and specifically appropriating to it all the nett revenue derived from the tolls and rentals, present and future, of the Regent's Canal. As further security the Company has undertaken to pay a sufficient annual sum as rental for the use of that portion of the surplus lands of the Canal which are to be utilised in the construction of the Railway along its banks.

As is well known, the Regent's Canal is an old and well-established security, for many years past regularly paying dividends on its ordinary capital of from Four and a Half to Five per cent. The revenue of the Canal Company as from the date of transfer is estimated of itself to be more than sufficient to secure the interest on the Stock. Under the provisions of the Act of Parliament the Canal, as a navigable water-way, will be greatly improved, and the rights of transit of the Grand Junction and other Canal Companies, as well as of local traders, are carefully guarded, so that the existing traffic will not only be maintained, but will be capable of considerable development. A large increase of tolls may be expected, as well as an important addition to the rental of the wharves and premises used in connection with the Canal and from leases falling in from time to time. The natural increase in the value of the surplus lands in the centre and suburbs of London, through which the Canal passes, will also be considerable.

In accordance with the terms of the Canal Purchase, the Company are to pay at the rate of £130 for each £100 of the existing Regent's Canal Stock. The Directors are prepared to allow existing Shareholders in the Regent's Canal Company, whose applications shall be received before the Subscription List is closed, to exchange their holdings into Stock of the new Company in the above proportion, free of expense.

Applications for the above Stock on the enclosed form will be received by the London and Westminster Bank (Limited), Lothbury, and its Branches, accompanied by payment of 5 per cent. on the amount applied for.

The Subscription List will be closed on or before March 1.

Where no allotment is made the deposit will be returned without deduction, and where a partial allotment is made the surplus deposit will be applied towards the amount payable on allotment.

Interest at the rate of 4 per cent. per annum will accrue upon the instalments from date of payment, and interest will be paid hereafter on April 1 and October 1 in each year. Payment in full may be made on any day on which an instalment is due, under discount at the rate of 4 per cent. per annum. The failure to pay any of the instalments will render all previous payments liable to forfeiture.

Scrip Certificates to Bearer will be issued as soon as possible against Allotment Letters and Bankers' Receipts. When paid up in full, the Scrip Certificates will be exchanged for Registered Stock. Transfers of Stock must not be in fractions of a £.

The Act of Parliament and all documents relating to this issue may be inspected at the offices of Messrs. Higginson and Vigars, 3 Westminster Chambers, Victoria Street, the Solicitors of the Company.

Forms of Application may be obtained at the London and Westminster Bank (Limited), Lothbury; Messrs. Laurie, Milbank, and Co., 22 Threadneedle Street; and at the Offices of the Company, 3 Westminster Chambers, Victoria Street, S.W.

F. COOLE, Secretary, (pro tem.)

London, February 22, 1883.

Issue of £1,275,000 Stock (Canal Capital), guaranteed by the special allocation of Tolls and Rentals, and bearing Cumulative Interest at the rate of 4 per Cent. per Annum for the first Five Years, and 4½ per Cent. in perpetuity after that period, of the

REGENT'S CANAL CITY and DOCKS RAILWAY COMPANY.

COCKS' ORIGINAL READING SAUCE IS THE BEST & MOST ECONOMICAL SAUCE ever Manufactured for Soups, Fish, Chops, Steaks, &c. COCKS' READING SAUCE induces Appetite, accelerates Digestion, whilst its delicious flavour is unequalled. The Genuine is protected by Trade-Mark, viz:—Charles Cocks, Signature, on a White Ground, across the Reading Arms.

HOLLOWAY'S OINTMENT and PILLS are the best, the cheapest, and the most popular of remedies. The seasons change and circumstances vary, but these remedies can always be used with certainty and with safety. Eruptions, rashes, and all descriptions of skin diseases, sores, ulcerations, and burns are presently benefited and ultimately cured by these healing, soothing, and purifying medicaments. The Ointment rubbed upon the abdomen checks irritation in the bowels, averting and curing diarrhœa and other disorders of the intestines frequently prevailing through the summer and fruit seasons. Heat lumps, blotches, pimples, inflammations of the skin, muscular pains, neuralgic affections, and enlarged glands can be effectively overcome by using Holloway's remedies according to the instructions accompanying every packet.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

ALBERT COLLEGE, Framlingham.

London Matriculation Examination, 1883.—S. Waine, 8th in Honours, with Prize, 1882; J. T. Little, 27th in Honours; R. D. Mothersole; First Division. Inclusive fees, £30 to £37 10s per annum.

THE REV. Dr. POLLOCK RECEIVES a Few RESIDENT PUPILS, to prepare for Sandhurst, Woolwich, and the Universities. At last Sandhurst Examination, a Pupil obtained 5,136 marks.—Neville Hall, Middleham, Bedale, Yorkshire.

MILITIA COMPETITIVE EXAMINATION.—LIEUTENANTS of MILITIA PREPARED, by the undersigned. Only a very limited number received, the object being to give individual attention and ensure success. Instruction, 5 hours daily.—Apply to Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

THE GRANGE, COWES.—The Rev. ARTHUR WATSON, M.A., Graduate in Honours, Second Scholar and Prizeman of Caius Coll., Camb., PREPARES PUPILS for the Public Schools, Naval and other Examinations. In June a candidate took the 1st place for Naval Cadetships. Terms inclusive, according to age.

TO RETIRED OFFICERS.—A Safe Investment of £1,000 to £1,500, with 10 per cent. guaranteed, and which will bear strict investigation, may be heard of from "BETA," Office of this Paper. The Investor may receive employment at an additional salary, if qualified for it.

HINDUSTANI, SANSKRIT, and BENGALEE.—MILITARY OFFICERS and OTHERS are prepared in the above Languages by Mr. D. N. DAS (Gold Medallist of Calcutta), B.A., late Scholar, Clare College, Cambridge, Professor of Sanskrit in the City of London College.—Address, 28 Camden Street, Oakley Square, N.W.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens, W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, EIGHT obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) TEN passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

ARMY EXAMINATIONS.—Special Preparation, by JOHN GIBSON, M.A. (First-class Classics, Camb., 1874, formerly Master at Westminster), assisted by Two Resident University Graduates and Visiting Professors. In June, 1882, out of 4 Pupils sent up, 2 passed, and a third scored over 4,100 marks at his first trial. In November, 1882, out of 4 Pupils sent up, one took the 14th place on the list, and another scored over 4,300 marks. All the Pupils sent up were First trial Candidates, and 2 of the successful ones had only read 2 months with Mr. Gibson; the other, 4 months. In the last 2 Preliminary Examinations, 5 passed, out of 7 sent up.

N.B.—The next Preliminary Guide, containing the Answers to the Questions set in the February Examinations, will be published about the middle of February. Address, Bromley, Kent.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

THE ROYAL ACADEMY, Gosport.
PATRONS.
Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Class will be formed in January for special preparation for the next Examination for Naval Cadetships.—Rev. EDWARD BURNEY, M.A., Head Master.

ARMY, *viâ* Sandhurst, Woolwich, or Militia.—PROSPECTUSES, together with reliable Information of Tutors recently successful, sent (gratis), by Messrs. ASKIN, 38 Sackville Street, London, W. References kindly allowed to the Chaplain-General to the Forces and others.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

KELLY COLLEGE, Tavistock, Devon. ELECTION of FOUNDATIONERS. FOUR VACANCIES. Priority, after Founder's Kin, to Sons of Deceased Naval Officers. Examination, March 20.—Apply to the HEAD MASTER.

THE LONDON INTERNATIONAL COLLEGE, Spring Grove, near Isleworth, W. The HALF-TERM BEGINS on MONDAY, March 5.

Preparation for Woolwich and Sandhurst; a Leaving Exhibition tenable at either.

Apply to the Head Master, H. R. LADELL, M.A.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

MILITIA COMPETITIVE EXAMINATION ONLY.—A Few Candidates desiring special individual attention are Prepared by Major COWPER, assisted by an Officer of equal experience, who has taken high honours in Fortification, Surveying, &c. At the last Four Examinations (the average number sent up for each being between 3 and 4), Pupils passed at their first trial 1st, 10th, 21st, 30th, 33rd, 34th, and 37th on the List.—10 Clifton Villas, Maida Hill, London, W.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S.E.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of Pupils to PREPARE for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to TWELVE. Five Pupils out of Six were successful at the last Sandhurst Examination (July, 1882).—Terms, References, and other information, sent on application.

MADAME ISABEL BIZET MICHAU receives LADIES and GENTLEMEN for PRIVATE INSTRUCTION in the Valse, Highland Schottische, &c., by previous appointment, at her Residence, 59 Baker Street, Portman Square. The Young Ladies' Classes at Kensington and Baker Street are held as usual.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell......	23rd
J. E. Cullinan......	12th	C. L. Crutchley......	31st
C. W. Garraway ...	16th	B. T. Mahon.........	38th

—Apply to D. C. FEENY, B.A.

LIEUTENANTS of MILITIA, Candidates for Line Commissions, are PREPARED for the Preliminary, the Further Examination, also for the Military Competitive Examination, by Lieutenant-Colonel COATES, Reserve of Officers, formerly of the Royal Military Academy, Woolwich, and Acting Brigade-Major at the Cape.

Colonel Coates has had much experience in coaching, and was, until quite lately, instructing at a large Army Coaching Establishment. His fees are about one-third less than those usually charged; and as he limits the number of his Pupils to Four, great individual attention is insured.—Apply to Colonel COATES, Shepton Mallet, Somersetshire.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.
Patron—Her Most Gracious Majesty the QUEEN.
Chairman—Major-General J. T. BOILEAU, R.E., F.R.S.

The Daughters of all Officers in her Majesty's Army, inclusive of the Royal Marines, and of officers who have sold out or otherwise retired from the Service, provided those children were born prior to such retirement, are eligible. The ages of admission are from 10 to 15. Each donation of £5 5s entitles to one life vote. Each subscription of 10s 6d entitles to one vote at all elections during the year. Further CONTRIBUTIONS to meet the current expenses are earnestly solicited by the Committee.

By order, G. W. FORSTER, Secretary.
Office, 22 Cockspur Street, London.

TO PARENTS and GUARDIANS.—A highly educated English GENTLEWOMAN, living in the best part of Berlin, DESIRES to RECEIVE a FEW YOUNG LADIES, of good position, into her house. They would have all the advantages of Education which the German capital now so fully affords, combined with English home life and comforts. Quite young children, requiring a mother's care, could also be taken charge of. Highest references given and required.—Address, in first instance, "LEX," Messrs. Reynell and Son, 44 Chancery Lane.

MANITOBA and the CANADIAN NORTH-WEST, through which runs the

CANADIAN PACIFIC RAILWAY.

FARMING and GRAZING LANDS for SALE.

THE MARINE STEAM-ENGINE, a Treatise for the use of Engineering Students and Officers of the Royal Navy. By R. SENNETT, Chief Engineer, R.N., First Assistant to Chief Engineer, H.M.'s Dockyard, Devonport; late Instructor in Marine Engineering at the R.N. Coll.

"Steam propulsion is not an old branch of engineering, and its perfection may be probably confided to the new class of engineers of superior training and mathematical knowledge whom the Admiralty are educating for the services, and for whom Mr. Sennett's book is mainly intended."—*Times.*

"It seems to us that Mr. Sennett has succeeded remarkably well in carrying out the object he proposed. His book cannot fail to be useful to all who have to do with the practical working of marine steam-engines."—*Saturday Review.*

"The author's object was to provide a text-book for students of marine engineering, which might also be found useful by naval officers who desire to obtain a knowledge of the machinery in the vessels they may be appointed to command. For this purpose the work is well adapted." — *English Mechanic.*

"For the first time the students of marine engineering and naval officers have now within their reach a text-book on the most important subject that can come under their notice. Mr. Sennett's work is eminently practical." — *Broad Arrow.*

"By his method of arrangement, the author has succeeded in providing a text-book suitable for the use of students of marine engineering and of naval officers. To the latter class, who may be in command, it is almost indispensable."—*Iron.*

THE VERSMANN'S

PATENT

GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address—

YOUTH'S FINE SILVER, flat crystal glass, 25s.
LADIES' GOLD LEVERS, in exquisitely chased cases, 70s.
GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

The Rev. Robert Cass, Settle, Yorkshire, writes, February 19, 1880:—The Lady's Gold Lever Watch received from you for 70s, in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

From Mr. J. J. Harris, Schoolmaster, 2-18 The Royal Irish Regiment, Aldershot, September 22, 1880:—"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by Regimental Clubs for treble the money."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co., Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

DR. J. COLLIS BROWNE'S

ORIGINAL AND ONLY GENUINE. **CHLORODYNE.**

From SYMES and Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1881.
To J. T. DAVENPORT, Esq.,
33 Great Russell Street,
Bloomsbury, London.

Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE.

Dr. J. C. BROWNE (late Army Medical Staff), discovered a remedy to denote which he coined the word CHLORODYNE.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

COUGHS, ASTHMA, COLDS,
BRONCHITIS,
EPILEPSY, SPASMS, COLIC,
PALPITATION, HYSTERIA, and is the true Palliative in
NEURALGIA, GOUT, CANCER,
TOOTHACHE, RHEUMATISM.
GREAT SPECIFIC for
DIARRHŒA,
CHOLERA, DYSENTERY.

IMPORTANT CAUTION. The immense sale of this remedy has given rise to many unscrupulous imitations.

N.B.—Every bottle of genuine Chlorodyne bears on the Government stamp the name of the inventor,

DR. J. COLLIS BROWNE.

Sold in Bottles, 1s 1½d, 2s 9d, 4s 6d, by all Chemists.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

·450, ·500, and ·577 bore DOUBLE EXPRESS £25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ... £28

An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s, £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

ADMIRAL SIR GEOFFREY P. HORNBY, after eight weeks' duty as Commander-in-Chief at Portsmouth, has found it necessary to issue orders regulating the uniform to be worn on stated occasions by Naval officers of the port; and he has also expressed a wish, which is tantamount to a command, that all officers serving under his orders will in future adhere to the printed instructions in the matter of wearing plain clothes. The regulations thus brought into force at Portsmouth have given a certain amount of dissatisfaction in Naval circles, as evidenced by the letters we have received on the subject. The writers of these letters, however, do not appear to us to take a correct view of the matter. The existing regulations on the subject of "Uniform" deal with it under two heads,—when it is to be worn, and what is to be worn. Under the first head, the Admiralty appear to us to have provided all that is necessary, the display proper to a great service, and the elasticity which at proper times can dispense with display, and allow comfort to be studied. It is written, "Every officer, from the time he joins the ship to which he is appointed to that of his being removed from her, shall wear the uniform established for his rank." Now, if this paragraph stood alone, it might be inconvenient. Provision has therefore been made by the Admiralty, first, for the case of the officer obtaining leave to absent himself from the ship and the port she is in; and secondly, it is provided that "permission may be given to officers (not being subordinate officers) to wear plain clothes when on ordinary leave." These regulations, taken together, appear to us to supply the rule and the exception,—the rule, to wear uniform; the exception, when permission may be given to wear plain clothes. But, as a matter of fact, uniform is seldom, if ever, worn by Ward-room Officers in any of our Naval arsenals, except when on duty. At other times, they insist on wearing plain clothes, and assert their right to do so, on the ground that the words in the instructions, "Permission may be given to officers to wear plain clothes," is equivalent to, "Officers are hereby permitted to wear plain clothes when on ordinary leave." And accordingly, they never wear anything else when on shore. This passion for plain clothes is one to be deprecated. In no other military nation does it exist. In a large, garrisoned seaport, such as Portsmouth, where officers and men of the Army, superior and subordinate officers of the Navy, and seamen, appear habitually in uniform, it seems to us absurd that an intermediate class, comprising the various ranks known as "Ward-room Officers," should arrogate to themselves the right of never appearing in uniform except when on duty, and deliberately neglect the plainest possible order to do likewise. Such a state of things should never be permitted to exist for a moment, and could assuredly not be connived at by any Commander-in-Chief who has the real interest of the Navy at heart. We are not blind to the great difficulty encountered by Admiral Hornby, we may even say the impossibility. of framing an order which would please everybody. To constrain the offenders, without bearing hard on those who do not offend, is no easy task. But the observance of these regulations does not force officers to wear uniform "from sunrise to sunset," as many complain it does. The wearing, or dispensing from wearing, uniform, appears to us to depend entirely on what an officer has to do. And we strongly advise all grades serving under Sir Geoffrey Hornby to lend that gallant officer all the assistance in their power to bring the Uniform question to a decided issue, and thus remove the numerous causes of complaint which have from time to time crept up. owing to the insufficiency of the regulations on the subject. So far as we can ascertain, Admiral Hornby has issued no order as yet to enforce uniformity and propriety throughout the district under his command in the matter of dress, and we feel convinced that all officers will admit that it is far preferable to render willing obedience to the expressed wish of a chief, than to be coerced into so doing. We now have to deal with the order issued by Sir Geoffrey Hornby, prescribing the exact uniform to be worn on particular and specified occasions. The rules which prescribe the particular uniform to be worn on various occasions are less happy than those we have just dealt with. Naval uniforms are, in the first place, too numerous, and yet Naval officers have not the articles of dress they really require. They work chiefly in the tropics, but they have no tropical uniform. Their great-coat is most unserviceable, and yet our home climate is most changeable. They not only have superfluous dresses, but parts of one dress may be worn with another. They have no names whereby to describe the combinations. Thus "undress" may mean a tail-coat, with epaulettes and gold-laced trousers, or trousers without gold lace. They may, indeed, be white, and so may the waistcoat. So, if signal be made for officers to dine with the Admiral in "undress," or in "tail-coat and epaulettes," four officers might arrive, each dressed differently, without having misconstrued the signal. In hot weather, the number might be multiplied, by some turning up in white trowsers, with blue or white waistcoats, according to fancy. The same may happen, if coats without epaulettes be ordered. Lately, this dress has been called "mess dress," although it is never worn at mess on board ship. What is the recognised mess dress of the Navy is not quite clear. In this matter, we think the custom prevailing on board the Royal yachts should be generally adopted throughout the Navy. But the Lords of the Admiralty are here at variance with the Crown, and have a "mess dress" of their own, having ordered a slightly different one to be worn at the Royal Naval College. On board the Royal yachts, jackets and gold-laced trowsers, with white waistcoats in summer, and blue waistcoats in winter, form the mess dress approved of by her Majesty the Queen. The Admiralty, however, have ordered the same dress, minus the gold-laced trowsers, with plain ones in lieu, to be worn at Greenwich and on board ships in commission. But for these dresses there exists no official descriptive title. Hence, officers never turn out with any uniformity, no matter where they are, or what the occasion. The nearest approach to uniformity we remember was in the Mediterranean, when Admiral Hornby commanded that Fleet. Then the mess dress adopted in the Royal yachts was ordered to be worn at dances, the opera, Military messes, and on guest nights on board. This dress was also used at the Royal Naval College some years ago, when Admiral Sir Astley Cooper Key was the President of the College. It was found a very befitting dress, especially when the Naval men joined in the dances of the Royal Artillery Mess at Woolwich, as it corresponds more with the Military mess dress than any other in the Naval officer's wardrobe. It was also approved of by the late Board of Admiralty, when their Lordships went to the Mediterranean, and ascertained for themselves how very popular it had become among the officers of the Fleet and their friends on shore. It is more becoming in many ways to smart, good-looking young men than the tail-coat, and, we think, should be generally adopted, under Admiralty order, as the mess dress of the service. Regarding other combinations, the recent Circular issued by Admiral Hornby supplies five different combinations, which appear to us sufficient for all purposes. It is a pity that they are needed, and had we our way, we would abolish all combinations but the old "iron-bound suit," the mess dress, and the working dress. The others are throwing a needless expense upon Naval officers. The five combinations devised by Admiral Hornby are as follows:—1. A "gala dress," called full dress. 2. "Undress," for courts-martial and ceremonious visiting dress. 3. An "evening dress," to be worn at small dinner parties. 4. "Mess dress," that ordered in the Royal Yacht. 5. "Mess undress," which is that worn at College and on board ship every day at mess. Should any Naval officer be able to propose anything more concise, while covering as much ground, we have no doubt that Admiral Hornby would gladly consider its details. We hope, however, that the subject of Naval uniform having now been prominently brought under the notice of the Admiralty, no time will be lost in taking steps to set at rest, once and for all, this much-vexed question. In our opinion, the full dress should remain. The mess dress should consist either of jacket and epaulettes and gold-laced trowsers, or of jacket and gold-laced trowsers, or simply of jacket and plain trowsers, according to the nature of the entertainment. The "swallow-tail" should be abolished, as an intermediary dress of no value, but of some expense. For the tropics, the frock-coat should give place to a patrol jacket of light texture. Buttoned up, it would hide soiled linen; and open, it would expose a clean shirt. Under both circumstances, it would look neat. But, above all things, side-arms, when in uniform, should always be worn, except when in mess dress, and the question of plain clothes should be definitely settled by an Admiralty Order, stating clearly when they can be indulged in, and no longer leaving the permission to wear civilian apparel to the caprice of the commanding officer.

THE Army Estimates for 1883-4 have appeared this week, and though a slight increase is shown in the total expenditure, the difference in the cost of the Regular and Auxiliary Forces for the coming financial year varies comparatively little from that of their maintenance in 1882-3. The entire sum required amounts to £15,606,700, which is greater than the corresponding amount last year by £148,600. The above figures do not, of course, include the cost of the late expedition to Egypt, which, if added to the expenditure of the past year, would display a decrease in the Estimates for the coming twelve months of nearly £2,500,000, in comparison with the amount spent in 1882-3. The estimated numbers show an increase of 4,727 of all ranks, the establishment being 137,632, against 132,905 in 1882-3. This apparent augmentation of strength is, however, largely caused by the Permanent Staff of the Auxiliary Forces being included in the estimated numbers of the Army establishment, instead of those of the forces to which they are attached for duty, and the actual increase of regimental strength is only 2,829 in the home establishment. This number includes an augmentation of 2,499 in the Infantry of the Line, 136 in the Commissariat and Transport services, 90 in the Cavalry of the Line, 78 in the Army Hospital Corps, and 53, 25, and six in the Artillery, Engineers, and Foot Guards, respectively. Including the Auxiliary Forces, the total armed strength of the Empire at Home and in the Colonies is estimated at 575,310, as against 492,656 from latest returns. The Army Reserve (1st Class) is put down as consisting of 33,500 men, against 19,687. The 2nd-class Reserve is to have a strength of 9,693, as compared with 9,000 in 1882-3. The Militia is estimated at 142,874, the numbers in the past year having been 117,823, The Yeomanry is to be 14,404 strong, against 11,267; and the Volunteers, including their Permanent Staff, are to amount to 247,921, compared with 207,336, as per returns on November 1 last. To the above numbers may be added the strength on the Indian Establishment, 61,641—a slight decrease from the 62,779 of last year—and the entire force under the British Crown stands at 636,957. With regard to the financial differences in the past and present estimates, we find, first of all, a sum of £148,000 put down as a provision for the training of the Irish Militia, which for the past three years has, on account of the state of the country, not been called out. Whether the political prospect will justify the Government in taking the proposed step, remains to be seen; but prolonged inactivity must have the effect of reducing the force to a merely nominal item, and if it is to be retained as an integral portion of her Majesty's troops, some provision for its instruction is necessary. The large numerical increase in the First-class Army Reserve necessitates, of course, a corresponding augmentation in the cost of its maintenance, and the item accordingly stands at £278,000, against £229,500, showing an increase of £48,500. The item of deferred pay naturally increases also in proportion to the number of men joining the Reserve, and accordingly shows £10,000 in excess of the corresponding amount last year. The sum set aside for the purchase of horses amounts to £76,500, which, compared with the same service in 1882-3, exhibits an increase of £15,800. This is, according to official explanation, in order to provide for the sale of horses at an earlier age than heretofore. Gunpowder, small-arm ammunition, torpedo vessels, &c., show an increase of £95,500, but this is more than counter-balanced by a decrease of £115,000 for Naval armaments not now included in the Vote, so that under the head of "Warlike Stores" there is a net decrease of £20,000. Commissariat, Transport, &c., are to cost £421,900, compared with £394,300—an increase of £27,600. This increase is ascribed to increase of establishment, formation of additional Transport Companies, &c. Under the heading of "Works," we find an increase of £23,700, the respective amounts being £739,400, against £715,700. Leap year, with its extra day in 1884, causes an increased expenditure of £31,000. Increased pay for service and miscellaneous wages, &c., amounts to £20,000 more than last year. Against the above, the principal points of augmented expenditure are to be placed the large decrease noted above in the cost of Naval armaments, and the still larger diminution of non-effective pay, which amounts this year to £2,942,972, showing a decrease of £130,000. How far the anticipations of the Ministry as to recruiting in all branches of the service will be realised, remains to be seen. There is, in consequence of the large increase in the Army Reserve this year, a much greater need of men to take the place of those retiring; while, in the face of the late modifications as to age of enlistment, and the falling-off of last year's supply of recruits, it would appear doubtful whether the material required will be forthcoming. The scheme propounded for regiments on home service is as follows:—The twelve regiments first on the Roster for service abroad are to have an establishment of 950 rank and file, the next four 850, and the succeeding fours 750 and 650 respectively, while the 48 battalions most recently returned from abroad are to consist of 520 rank and file. Time only will show whether these anticipations will be justified by the result. The threatened reorganisation of the Cavalry forms no part of the present Estimates, and is postponed for later consideration; while the Volunteers are apparently as little likely to reach 248,000 in numbers as they are to return more than 50,000 non-efficients, as the Government professes to anticipate.

THE Superseded Colonels have found a worthy champion in Lord Powis. His Lordship put a couple of questions to the Under-Secretary of State for War in the House of Lords the other evening, asking for information as to the working of the Warrant in respect to selection for General's rank. The subject is one of such vital importance to the Army, that we had hoped to find some proper explanation given as to the reasons which have induced the authorities to act in such a high-handed manner with regard to a number of most deserving soldiers. The reply furnished by Lord Morley was disappointing in the extreme. Lord Morley stated that it would be inconvenient to discuss the qualifications of those who might or might not be promoted. No doubt it would. Still, the superseded Colonels have a right to expect that their claims may be fairly considered, and it is to their representatives in Parliament that they look to see full justice done them. The supersessions referred to by Lord Powis were so wholesale, that the public cannot but view the matter with suspicion. The officers who have been passed over have held rank in the Army for many years. They have all seen active service, they have filled regimental commands and Staff appointments, and have risen, presumably by merit, to the highest positions on the list of Colonels. Having reached the head of the list, they naturally expected that they would succeed in due course to General's rank. Yet when the time for promoting them arrived, they were refused promotion, and as yet no reason has been assigned for their being passed over. All the War Office, through its representative, can say is that "the responsibility for the appointments rests with the Commander-in-Chief and the Secretary of State for War, whose reasons for making them cannot be publicly canvassed. Such a state of affairs is scarcely likely to remove discontent. The case of the superseded was bad enough before. The only effect of Lord Morley's explanation will be to make the officers more dissatisfied than ever. The prizes of the service are so few, and the risks so many, that if this sort of thing is to go on, officers will soon begin to ask themselves whether the Army is, after all, a profession worth following. We are ready to give the authorities credit for a conscientious desire to promote the best interests of the Army. But are they not carrying the selection craze too far? As matters now stand, an officer may endeavour by every means in his power to qualify himself for the higher grades, and yet he may have to suffer the mortification of having a junior promoted over his head, simply because the fortunate junior possesses more influence, or is better known than himself. It has to be remembered that there are in the Army, as in all other callings, a certain number of men whose one aim and object in life it is to make friends. There are others who spend the greater part of their service at foreign stations, and who, being, as it were, out of the world, lose the opportunity of ingratiating themselves with those "who will be of use hereafter." The former have everything in their favour. They can attend at the War Office constantly, and push their claims. When a war breaks out, they are on the spot, and by means of the influence they possess, they succeed in securing appointments in the field. These appointments give them a claim to still further favours; and so they go on. The officer who is condemned to do purely regimental work from one year's end to another is seriously handicapped. He can look for none of the privileges which the Staff officer enjoys, and, in these days of short service, he runs far greater risks of incurring displeasure. He is, comparatively speaking, an unknown man. When his term of regimental command expires, he is, perhaps, appointed to a Regimental District, but here, again, he has great difficulties to contend against. The authorities, by their action in the case of the officers referred to by Lord Powis, have established the belief that the regimental officer is considered at the War Office the inferior of the Staff officer. Now, it is evident that, Staff appointments being limited, it would be impossible for every officer to work his way on to the Staff; nor, indeed, is it desirable to underrate the value of regimental work. This, however, is what the authorities have done. We happen to know the reasons why Colonels Appleyard, Dalyell, Colvile, Bowles, Chippendall, Pearson, and Bancroft were passed over, and we have no hesitation in saying that if the War Office follows in other cases the precedent it has established in those of the officers in question, the Army will very soon be irretrievably ruined. The charges trumped up against the superseded officers have been most trivial. In only two instances has there been anything at all to justify the action of the War Office. Lord Morley made out that the selections had been made by the Commander-in-Chief and the Secretary of State for War. His lordship might have gone further, and added the words "by order of the latter." Seeing what the Duke of Cambridge has done for the Army, and with what even-handed justice patronage has invariably been bestowed by his department, when he has been allowed to work untrammelled, the Army refuses to believe that his Royal Highness would have been party to such a proceeding. The suggestion really emanated from Mr. Childers, and he is the person who is directly responsible for the wrong which has been perpetrated. The Horse Guards had but to carry out his instructions. Of course, it sounds well for Ministers to stand up in Parliament and tell the country that under their *régime* the War Office intends to have only thoroughly efficient soldiers in the higher ranks of the Army. They know what Mr. John Gullible Bull's characteristics are; they know how well clap-trap pays. But it is, after all, clap-trap, and nothing more. The fact of an officer being selected is no criterion of his military capacity, as was lately shown; and because another man is passed over, it does not follow that he is, professionally speaking, a failure. There are always influences at work, and the strongest-minded Minister who ever held office in Pall Mall would find it difficult to resist the temptation of favouring those with influence. The outside public may take in all they are told; the Army is able to judge for itself. It knows pretty well what the respective merits are of those who are chosen, and those who are left behind; and experience has proved that when one officer is "selected," there is, in nine cases out of ten, a reason independent of his professional qualifications for his being picked out. This is really what selection means. We have always viewed the idea with disfavour. We confess, however, that we never expected to find such a barefaced example of the evils of the system as that which was furnished by the latest promotions to the General Officers' establishment.

LORD BELMORE will on Monday bring to the notice of the House of Lords the fact that Naval Officers are in receipt of pay which does not enable them to maintain their position in society as officers and gentlemen. The inadequacy of the pay of Naval Officers is one of the indisputable facts which no First Lord of the Admiralty has ever had the moral courage to face. Small additions have, from time to time, been granted, but the increase has never been commensurate with the requirements for maintenance. If the present rate of pay received by officers serving in our home ports is adequate remuneration for the services they render to the State, it is evident that those officers who are employed abroad on foreign stations, where the necessaries of life are far more expensive than in England, are not adequately remunerated, since they receive no higher pay than do the officers who are employed at home. We have known a lieutenant, who was just promoted, have to exist in London on the small sum of 4s. a day for six months, before he could get employment. Another, on half-pay too, preferred walking home barefooted from a dance than risk ruining his shoes in the rain, as he had not the means to replace them. Numerous other instances of hardships endured could be adduced. Want of space precludes our doing so. The highest rate of pay in each branch is pleasant to look at; but when it is known how long it takes to reach the top of the tree, and the small number that attain the same, the whole is seen to be illusory. Lieutenants receive the same sea pay as at the time of the Crimean Campaign; Captains and Commanders have been granted small additions, but not until the necessity became too glaring. A Lieutenant arrives at that rank at the age of 24 or 25, after serving five years as a Sub-Lieutenant, on 5s. per diem. If he does not obtain the command or second-in-command of a ship, or become a gunnery, torpedo, or navigating officer, his pay remains at 10s. per diem. This is a very small income for a man of 25 years of age, and for a man of 35, a mere pittance. He must take up one of the foregoing appointments, otherwise promotion, which may occur at 37 or 38, will not fall to his lot. If he assumes command or senior Lieutenant's duties, the additional pay acquired thereby is swallowed up in keeping the vessel in order. The intervals of half-pay, at rates ranging from 4s. to 8s. 6d., reduce the average income; and many Lieutenants accept of necessity appointments which do not count for promotion, preferring them and full pay, small as it is, to idleness and a pittance barely sufficient for existence. The average income in this rank rarely exceeds £150. A clerk, on entering the Admiralty, receives £200, which steadily increases, without the drawback of half-pay. A Lieutenant, if made a Commander at the age of 37 or 38, has no chance of becoming a Captain, as he cannot expect promotion under ten years, when he will be 48; and as Commanders must retire at 50, it would be useless to give him a step. His pay as Commander in command is 23s. 9d., for about six years; the remaining four years are spent on half-pay, averaging 9s. per diem. If not in command, he receives 20s., which has to cover his personal expenses, as well as the cost of adorning the ship, and providing necessaries not allowed by Government. When in command, he must maintain a separate table, and is liable, in a lesser degree, to the same expenses as a Captain. His average income for ten years is under £300, while a clerk at the Admiralty, if an "Assistant-Principal," at the same age as a Commander, receives £700 or £800. Officers fortunate enough to attain the rank of Captain hold the same for 16 years, more than half of which time they are unemployed, the average of half-pay being 14s. 6d. per diem, and full pay £700 per annum. For the first five years after promotion, they are awaiting employment, and receive half-pay of 12s. 6d., little enough to maintain themselves on; but when, as in some cases, they have others to provide for as well, the hardship is materially increased. When given a command, the expenses of outfit, mess stock, &c., are necessarily large, and have to be provided at a cost which would be reduced, were ready-money payments possible. Excepting special appointments, the average income in this rank is less than £500. We will now refer to other branches of the Naval service. Since the abolition of Purserage, when the Paymasters were placed on fixed salaries, no increase of pay has been granted them,—the maximum and minimum rates remain almost the same; the intermediate rates have, by "crafty shuffling" in office, been readjusted, without any noticeable increase to the actual cost. Assistant-Paymasters do not attain the higher rank until the age of 37, seven years later than was the case prior to the Childers scheme of 1870. The present conditions of pay and service are less favourable, and they are longer now in reaching the higher rates than under former regulations; those lately promoted can hardly expect to attain the maximum. An improvement in their pay could be effected by making all junior service count, on promotion, for full and half-pay, instead of in the meagre proportion allowed at present. Assistant-Paymasters, on assuming that rank, receive only 5s. per diem; that rate was fixed in 1855, and has remained unaltered. They are the worst off of all junior commissioned officers. The Medical and Engineer branches possess what the Executive and Accountant officers do not,—"a market value." The pay of the Medical Branch has lately been increased, and consideration accorded to claims which were advanced by supporters of the profession. We only hope that their advocates will obtain further concessions, that the very best men our hospitals produce may be induced to join the Navy. Since 1877, the pay of the Engineer branch has been increased, but not appreciably for the rank of Chief Engineer. With under five years' service in that grade, but including junior service allowed, the pay of a Chief Engineer in the Navy is only £237 a year. It then advances at the rate of a shilling a day, after five years' service, until, after 23 years' service in that rank, he receives £400 a year. This may be fit pay for engine-drivers, but it certainly is not for Chief Engineers. Similar observations may be made in regard to the pay granted to Engineers. The same suggestion applies to them as to Paymasters with regard to counting junior service when promoted. With the increase in their professional duties, and the ability required, of this important branch, we feel sure that they will receive proper attention. The Navigating Officers deserve consideration, although their days as a separate branch are numbered. Their case has often been brought before Parliament, but without success; a lingering death seems all that will be accorded them. They labour under great disadvantages. If their position cannot be altered, their pay should be improved. If it is necessary to maintain a costly Fleet, for which the nation does not grudge the money, surely the taxpayers will not object to improve the pay of those who have the care of it? Since the introduction of steam, men-of-war make shorter passages, there is greater wear-and-tear to uniforms, especially of Executive officers, necessitating more frequent expenses in their renewal, than when sailing ships made long sea voyages; and with an enormous increase in the cost of living, the Naval officer of to-day has to meet heavier demands on his income than one who served thirty years before. The professional standard has greatly advanced; the duties of the seaman have been supplemented by the requirements of steam, gunnery, torpedo, and other sciences, and every Executive officer has to master them. Engineers have complicated and ponderous machinery of immense value to deal with, and are called to aid the Executive in torpedo artillery. Paymasters have had their responsibilities largely increased, and are selected for duties, other than that of accountant, which are of great importance to the service, and speak for the value of the branch. Officers of the Navigating Branch have a world-wide reputation; as surveyors they have performed most difficult tasks with admirable ability, and as officers of Dockyards and in the conduct of Fleets their skill is unquestionable. In the present Session of Parliament, we hope that Honourable Members will willingly support in the Lower House any just scheme for improving the pay of Naval officers which may be brought forward by Lord Belmore in the Upper House.

The case of Surgeon-Major Thorburn, which has been widely commented upon by the Indian Press, seems to us to require explanation, for it is difficult to understand on what principle the Military authorities have acted in deciding the officer's fate. Dr. Thorburn appears to have been wrongfully accused of certain transactions prejudicial to his character as an officer and a gentleman, in connection with a race-meeting in India. These transactions were made the subject of a Court of Inquiry, when, after careful investigation, the Doctor was honourably acquitted. The proceedings were subsequently forwarded to the Commander-in-Chief in India, who, by virtue of the powers entrusted to him, recommended that Dr. Thorburn should be called upon to quit the service. The Doctor came to England, and in due course waited upon Dr. Crawford, the Director-General of the Army Medical Department, who informed him of the decision at which the Military authorities had arrived, telling him at the same time that he considered that he retired without a stain on his character. Now, it is perfectly clear that Dr. Thorburn was either guilty or not. If he was guilty, how came it that the Court of Inquiry, after nine days' careful investigation, exonerated him from all blame? If he was innocent, on what grounds did the Commander-in-Chief in India base his decision, which throws an officer of eighteen years' service friendless on the world, with an injured reputation? The case is a very extraordinary one, and we cannot but consider that the treatment which Dr. Thorburn has received is such as to render it most desirable that some further light should be thrown on the matter. It is so easy for charges to be trumped up against an officer on the Turf, that the service cannot but regard with the utmost anxiety the ruling of the authorities in the present instance, establishing, as it has done, a precedent which may prove most damaging to the interests of the officers of the Army as a body. If Dr. Thorburn was guilty, he deserved to be punished. But it has yet to be shown that he was guilty, and, after the finding of the Court of Inquiry, it is only right that the service should know on what evidence it was that the Commander-in-Chief in India felt himself compelled to reverse the decision of a body of gentlemen assembled for the purpose of examining witnesses and forming an unbiassed opinion. The action of the Commander-in-Chief in India is clearly a slight on the conduct of the Court of Inquiry. There is no reason to suppose that the members of the Court of Inquiry were actuated by any unworthy desire to justify Dr. Thorburn's conduct; and yet, if they were not, it is difficult to believe that Sir Donald Stewart would have allowed himself to be a party to an act of injustice to an officer who had served his country honourably and well for a period of eighteen years. We take this case up on public grounds, for the officers of the Army have a right to demand that those in authority will protect them against slanderous tongues, when attempts are made to damage their characters. If this case rests where it does now, it will be a common thing for "sharpers" to vent their spleen on unoffending officers, when money is lost on a race-course, and even bring pressure to bear in high quarters, after an investigation in which they have failed to establish their charges. It would be a pity for the opinion to gain ground that the Military authorities were on the side of traducers, or will act on secret evidence. Yet, there is no gainsaying the fact that in many quarters there is a most uneasy feeling with regard to this latest Turf scandal, and letters which have reached us from disinterested parties serve to show that in India the opinion largely prevails that Sir Donald Stewart has been induced to arrive at a hasty judgment. It would be well, therefore, for the Horse Guards authorities to satisfy themselves that Sir Donald Stewart has acted without prejudice, and that no outside influence has been made use of to cause him to set aside the verdict of the Court of Inquiry, arrived at after due deliberation. The members of the Court of Inquiry are surely as sensible of their good name as the Military authorities are of the honour of the service. Sir Donald Stewart has, however, by recommending Dr. Thorburn to be removed from the Army, as much as inferred that he has reasons for questioning the integrity of the gentlemen who were called upon to legislate in this case in accordance with the recognised rules of Military procedure. This raises, of course, many important questions. We have simply to deal with the military aspect of the case, and we incline to the belief that Dr. Thorburn has reason to feel himself aggrieved, seeing that he has been compelled to leave the service, with a stain on his character, without even being allowed the court-martial for which he had prayed. He has been condemned, in fact, by the ruling of one man, who, for aught we know, may have been biassed against him. Such injustice ought not to be tolerated in this enlightened nineteenth century.

Admiral Lord Alcester is reported by the *Times* as having arrived in London from Malta on February 28, but the Admiralty official announcements state that the gallant Admiral has been directed to proceed to Marseilles in the *Carysfort*, on being relieved by his successor, the Lord John Hay, who is timed to reach Malta on March 4. The *Times* has been misinformed, as Lord Alcester has not joined the Spiritualists, and travelled home so quietly that he has nowhere attracted the slightest attention. We can imagine the sardonic smile on the countenance of the gallant and noble Admiral, as he reads the announcement of his reception at the German Embassy.

At the last Levée, we observed Sir Charles Adair, the Deputy-Adjutant-General of Royal Marines, present, and three of his sons, all of whom are at present serving, the eldest, Captain W. Adair, being Adjutant of the Royal Marines; Lieutenant C. Adair, a Gunnery Lieutenant, R.N.; and Lieutenant H. Adair, R.A. It is not often a father has such a pleasant task to perform, while still himself in the prime of life.

Experiments are about to be made in France with shell-firing machine-guns. The fact that 22 of the revolving cannon adopted are necessary to protect their large ships, has taken the French Admiralty by surprise. Hence the forthcoming experiments, whose object, we understand, will be to ascertain whether a better gun cannot be secured for the use of the French fleet than the one at present being supplied.

The English Admiralty is about to try machine-guns throwing a 6-lb. shell; the French Admiralty one throwing a 4-lb. shell; the Italian Admiralty one throwing a $2\frac{1}{2}$-lb. shell. It will be interesting to compare results.

Notwithstanding the efforts of the Admiralty, it seems now certain that a portion of the very modest repairing programme in the last Navy Estimates is not likely, as usual, to be carried out. We are now within a few weeks of the end of the financial year, when we were promised that the repairs to the *Bellerophon* and *Shannon*, ironclads, *Turquoise*, corvette, to the *Forward*, *Frolic*, *Goshawk*, *Express*, *Merlin*, and *Swinger*, gun-vessels and gunboats, should be completed, and that the repairs to the *Emerald*, corvette, *Pelican* and *Cormorant*, sloops, should be begun. Little of this is likely to be realised, we fear. The *Shah* and *Raleigh*, swift, unarmoured frigates, are, in addition, untouched, their repair not even, it would appear, thought of. This is the efficient condition of the Navy.

The Italian Admiralty attach very great importance to the experiments made with torpedo-boats, on the occasion of the late Naval Review at Spezzia. It is a fact, to which no attention appears to have been paid in this country, that, when the *Dandolo* and *Duilio* steamed out into the bay and commenced firing, they were within a very short time enveloped in such a dense cloud of steam and smoke, that two torpedo-boats succeeded in approaching the ironclads unperceived to within 200 mètres. They were, consequently, at a distance at which they could discharge their torpedoes, although the manœuvre was executed in broad daylight. The experiments which took place during the night gave still more extraordinary results. All the torpedo-boats were able to perform the task set them, and one of them approached the *Venezia* to within 10 mètres.

The promotions made by the Admiralty from the Lieutenants' List during the past year give an average seniority of twelve years to each promotion, and fourteen years to the senior and eight years to the junior, a special surveying promotion. These and other facts connected with the present position of the Lieutenants of the Royal Navy form the subject of an article which will shortly be contributed by Lieutenant Sleeman to *Colburn's Magazine*.

Captain Loftus Jones is now named in Naval circles as the most likely officer to be selected for the command of the *Neptune*, since Captain Gordon's refusal of the offer so kindly made to him by the Admiralty. The *Neptune* herself is in a bad way. She is much over-masted, considering that her angle of vanishing stability is only 56°. Her topmasts are so long, that it took two days to get the maintopmast in its place. Her ports are so big, that the crews in her turrets would be all killed by machine-gun fire; and last, but not least, writes a correspondent, the bolts connecting the keel and kelson are eaten through by galvanic action between the copper sheathing and the iron beneath. The *Neptune* is now being bored all over, and looks outside like Jacob's coat of many colours. Such is the ship the Admiralty are going to add to the Channel Squadron. "If they make her sail, she will probably turn turtle like the *Captain*, when the cry at the Admiralty will again be, 'Who would have thought it possible?' leaving the eleemosynary subscription of the country to support the widows and children of her ill-fated crew. She was designed by Sir E. J. Reed, was built by Dudgeons, who failed to launch her, and broke their back in the attempt, as well as that of the ship. She was completed by the Messrs. Samuda, and was sold by them, through Sir E. J. Reed, to the Government in 1878, for over £600,000. Mr. Samuda, M.P., and Sir E. J. Reed, M.P., greatly displeased their constituencies by subsequently supporting Lord Beaconsfield's Eastern policy. At present, the *Neptune* cuts a queer figure. She has been supplied with a mainsail which she could never carry, nor by any possibility set, as the funnels are within a few feet of the main mast; and the Dockyard people talk of making her safe by removing her royal yards!" We do not envy the gallant officer who will be given the command of the *Neptune*. He will have an anxious time of it.

Rear-Admiral Sir F. W. Richards is spoken of as likely to receive the command of the Detached Squadron in May. The *Bacchante*, *Shah*, and *Triumph* are being got ready for commission as soon as the new financial year is entered upon. The *Bacchante* will probably be the flagship of the new Flying Squadron.

Another edition of the "Active List" of Flag Officers and Captains of the Royal Navy has been issued by Messrs. Griffin and Co. This is just one of those works from which neither the author nor the publishers can derive profit of a pecuniary nature, and yet it is one of great use to Naval men, and to them so interesting that it is worth the while of a Naval publisher to bring it out. The last edition was corrected up to January, 1879. In the present edition, many names will be found to have been added, and dropped out in the usual record of services. Some very timely remarks on the working of the Retirement Scheme of 1870, as well as the names of officers coming on for retirement during the next eleven years, will be found in the preface. The age-retirement tables are given in a new form, the reason stated being a desire to leave the tabulated form contained between pages 42 and 51 in the 1879 edition untouched, in order that its prophecies may stand intact for future verification. The time and labour expended over the book must have been considerable. In 1884 there will be retired Admirals Hillyar, McClintock, Macdonald, Chads (if not previously promoted), and Rice; also Captains Bradshaw, Thomson, East, and Carter. These retirements will promote Captains Jago, Brown, Tryon, Heneage, and Sir Walter Hunt-Grubbe to flag rank.

Should the damage sustained by the *Iris* when aground be found to be too great even for the enterprising Malta Dockyard officials to repair—and they would undertake to repair the Ark, if she turned up—the *Mercury* or *Volage* will take her place on the Mediterranean station.

The new breech-loading guns are not a success. The drill is both clumsy and complicated, and even dangerous. We should much like to know who is responsible for the mounting of these guns, which is obsolete.

Last week, a deputation from the Financial Reform Association waited on the Chancellor of the Exchequer in reference to the "free breakfast-table" question. One of the spokesmen, Mr. Broadhurst, Member for Stoke-on-Trent, stated that "he considered a reduction should be made in our expenditure, especially in the direction of the retired Army and Navy Lists." Possibly, the "honourable Member" is one of those generous beings who, clothed in the "broad-cloth of prosperity" at the expense of the sinews of the working-man, would like to see our ships and regiments officered for nothing, and retiring allowances spurned, the honour of serving being a sufficient reward. Perhaps the next time he meets Mr. Childers, he will call attention to the Higher-Division Clerks of the Civil Service, who "live at home at ease," and receive far better pay and pensions than Naval and Military officers, who spend the greater portion of their time either in ships or at places where comfort is not a leading feature. In a Radical Ministry, Mr. Broadhurst would be a "shining light."

The Italian Admiralty are arming their torpedo boats with a two-barrel machine-gun of the English Admiralty pattern.

The Parliamentary Secretary of the Admiralty, in answer to a question in the House of Commons, has stated that 280 merchant steamers are registered at the Admiralty as available to be transformed into fast cruisers on the outbreak of war, but declined to enter into any explanation of the plan adopted by the Admiralty to arm these vessels. When we first announced the fact that such a plan was in existence, the Navy was incredulous, and refused to believe it possible.

Mr. Gourley will, on Monday, ask the Secretary to the Admiralty if, in view of the fact that her Majesty already possesses three yachts in full commission, in addition to the *Victoria and Albert* (one of them, the *Osborne*, being of large tonnage), he will consent to postpone the proposed expenditure of £45,000 for repairs to the *Victoria and Albert*. Whether the estimate for the repairs is for the hull only, or if it includes new boilers, overhauling of machinery, cabins, and other equipments; also, regilding of the hull. Whether, before sanctioning the outlay, at a time when the revenue is declining, he would recommend the sale of one or more of the four yachts. And, further, if he will grant a return showing the original cost of all the four vessels, together with the amounts expended upon them for repairs and maintenance since they were built, and how often the two larger yachts have been employed in conveying her Majesty across the Channel during the past ten years.

The reply given by Mr. Chamberlain in the House of Commons to the question put to him by Mr. Macliver in regard to the Eddystone Lighthouse, to the effect that "telegraphic communication would not have prevented the delay in relieving the imprisoned keepers, because it was not attributable to want of knowledge on shore," holds out no hope that telegraphic communication will be laid between the main land and outlying lighthouses. This we regret, as the improvement, first advocated in these columns, is one of paramount necessity, and should be adopted. We are glad to see that the Earl of Hardwicke and the Earl of Mount Edgcumbe in the House of Lords, and Mr. Macliver in the House of Commons, have put questions on this subject, both as to the correctness of the report and the desirability of telegraphic communication. Lord Sudeley, in a measure, confirmed the report, and said that the question as to telegraphic communication was under consideration.

Commander Purvis, who lost his foot at Kassassin, has now entirely recovered, and is able to get about nearly as well as ever with his wooden substitute. The Admiralty have granted this gallant officer a pension of £200 per annum for wounds. He will not be retired, and we hope soon to be able to congratulate him on receiving a home appointment.

The Royal Marines Corps appear to have gained another friend in Viscount Lewisham, his lordship having asked the Secretary to the Admiralty whether he had considered if, in the interests of the corps, it would be advisable that a General officer of that force, who should alone be responsible for all things relating to his branch of the service, and who should have direct communication with the Civil Lord, should have a seat at the Admiralty; and further, if he had considered whether, when officers of the Royal Marines are under the Naval Discipline Act, they should have the same rights and privileges as when under the Army Discipline Act? To which Mr. Campbell-Bannerman replied, that "the subject of the first question had been considered, and it did not appear either necessary or desirable that an officer of the Marines should have a seat at the Board of Admiralty. The Deputy-Adjutant-General is now in a position fully to advise the Board on all matters relating to the internal organisation and discipline of the corps. The subject of the second question, which was prominently brought to notice during the operations in Egypt, had also been considered, and the decision arrived at will be expressed in the Bill which it is intended to introduce for the amendment of the Naval Discipline Act." Thus, for the present at least, the Marines Corps has no prospect of being directly represented at the Board of Admiralty. It is, of course, well known that the Deputy-Adjutant-General is the adviser of the Admiralty on matters connected with the corps; but a General officer having a seat at the Board could do more than advise, he would be in a position to urge, and would have the weight of a vote when opinions might differ.

Admiral Sir W. Houston Stewart, K.C.B., Naval Commander-in-Chief at Devonport, visited the Royal Marine Barracks at Stonehouse on Tuesday last, and inspected the officers and men of the Division in naval gunnery at the Gun-drill Battery on the Long-room Hill.

The Parliamentary Secretary of the Admiralty, in reply to a question addressed to him in the House of Commons on Monday, stated that the issue of the Egyptian war medal to the Navy has now commenced, and will be carried on with as little interruption as possible. The delay has arisen from the fact that, under the arrangements hitherto in force, medals were supplied to the Admiralty by the War Office, and thus the Army obtained precedence in the issue. In future, the Royal Mint will furnish medals directly to the Admiralty, so that this complication will be avoided. We wish the same reform were made in the matter of the supply of ordnance for the Fleet.

The exhibition in aid of the Egyptian War Fund at Knightsbridge is daily receiving fresh objects of interest. The latest addition is the celebrated Bible which turned the course of a rifle bullet, and saved the life of Private Roome, Highland Light Infantry. This is the centre at present of attraction to the crowds which visit the exhibition daily.

This copy of the letter addressed by the Secretary of State for War to the Generals selected for the good-service pension, shows plainly why those officers consider that they were very hardly used when they were deprived of their pensions on compulsory retirement for age or non-employ, in 1881. Now, they have nothing to show for "distinguished service" but the letter "R." in the column of "Inactives," in the *Army List*. The "Distinguished Generals" were made to pay, by loss of good-service pension, for the increase of retired pensions all round:—

> "Financial Secretary's Department, War Office.
>
> Sir,—I have the satisfaction to inform you that her Majesty has been graciously pleased, on the recommendation of his Royal Highness the Field-Marshal Commanding-in-Chief, to nominate you as one of the officers to receive a reward for distinguished or meritorious service; and that an authority will be sent to the Paymaster-General for issuing to you the sum of one hundred pounds a year, from ——. I have the honour to add that, with a view to make this mark of her Majesty's approbation of your conduct in the service as public as the names of those officers who formerly received garrison appointments, your name will be inserted in the *Army List* as one of those officers who have been selected to receive a reward for distinguished or meritorious service.—I have the honour to be, Sir, your obedient servant, FRED. STANLEY.
>
> To Major-General ——, &c."

Lieutenant-Colonel G. W. A. FitzGeorge, 20th Hussars, has accepted the post of "Director of Contracts with Commanding Officers," on the Board of the "Auxiliary Forces Uniform and Equipment Company," to which we have lately referred as about to be started, under most distinguished patronage.

All interested in shooting were gratified to learn, by the words which fell from the Duke of Cambridge on Wednesday, that, after so many records of disappointment, the National Rifle Association has at last made a steady advance, and has been enabled to obtain a net cash surplus of £1,382. But, beyond this fact, the proceedings at the United Service Institution on the occasion of the general winter meeting were not particularly interesting, and might be considered by the public at large to have been somewhat dull. The Duke of Cambridge had little information to give the meeting beyond the ordinary stereotyped sentences, and, but for his announcement of the addition to the handsome donation of Mr. Mullens, his speech would have been devoid of interest. A challenge to discussion seemed to be thrown down to the "back-position men," when the statement came that the new rule as to position, adopted at the last winter general meeting, had proved, as the Council had reason to believe, far from unpopular, and it was not to be expected this would pass unnoticed. We agree with the Council in their statement that the prize-list of last year was one of the best lists of any Wimbledon meeting; and all Volunteers will coincide in the feeling of pleasure with which his Royal Highness looked forward to giving the American team a most hearty welcome, when they visit us to fire the return match. The final statement which the President of the Association made, with reference to the request of the Yeomanry to be allowed to compete in all Volunteer competitions, and in which he announced that the Council had decided to accede to the request, "as a tentative measure," was very well received; and it was evident from this, and from the statement made subsequently by a member that he should like not merely the Yeomanry, but the Regulars as well, to shoot for her Majesty's prize, that shooting Volunteers are not afraid of healthy competition. The discussion which followed would have been decidedly tame, had it not been for the speeches of Serjeant Gratwicke and Mr. Lowe. The first-named gentleman occupied half-an-hour in detailing some fairly good suggestions, and Mr. Lowe was to the front with his "Two Rifles" suggestion, in which, though he was unsuccessful, he made some very good points.

It appears that the French Circular of January 5, which aimed at reducing the effectives no less than 32 per cent., has been cancelled. The circular in question, due to motives of economy, filled the country with alarm, and was violently blamed by the most ardent supporters of the Government. It reduced squadrons and battalions to a strength, or rather a weakness, which was simply ridiculous; and this reduction was extended even to those regiments lying along the eastern frontier, and consequently charged with the duty of protecting the country in the event of any sudden aggression on the part of Germany. No further furloughs are to be granted, but it is not stated to what extent furloughs were granted before the circular was cancelled and stayed the evil. In the meantime, no officer has yet been appointed to succeed the late General Chanzy in the command of the 6th Army Corps. The 13th Army Corps is also vacant.

The *Progrès Militaire*, under the heading of "Forty Months' Service," says that the various corps have been invited to send home on leave a fifth part of their men, *id est*, 20 per cent. of their privates, corporals, and serjeants. In this way, the French Army will be reduced by 50,000 men. The *Progrès Militaire* says, in an indignant tone, that everyone is demanding the reason of this general dislocation, since the War Estimates of 1882 were calculated for the full effective. This journal then points out the damage which will be caused by this decision, both as regards drill and discipline, while the officers are discouraged at seeing the fruit of their labour thus suddenly destroyed. The *Progrès* protests against the fatal system of furloughs, and would prefer the introduction of the three years' service system, bad as it is, to that now in vogue.

On January 8, Lieutenant-General Sir William Jervois closed his administration of the affairs of South Australia, and left the colony in the mail steamer *Clyde*, to assume the Government of New Zealand. Before his departure, Sir William made the usual farewell speech, in which some latitude has always been allowed; but, unfortunately, he stepped beyond the bounds of discreetness. Adopting the political views and the arithmetic of a certain South-Australian newspaper which had never been very friendly to the Ministry now in power, Sir William touched on the financial condition of the colony. The figures used by him, and the results which he drew from them, were not so accurate as they might have been. The inaccuracy thus endorsed and proclaimed gave great offence to the Ministers, who at once saw whence the borrowing had come, and more coolness than need be was shown by them at the moment and spot of his embarkation. Still, before stepping on board the *Clyde*, he uttered a few parting words. "I shall now go," he said, "to another colony, where, no doubt, I shall find much to interest me, and where I shall find a loyal people; but I am certain that wherever I go, I cannot possibly be treated more loyally or receive greater consideration than has been shown me in South Australia. With these words, imperfectly expressed, I now wish you a hearty farewell, and may God bless you all; may God bless the province of South Australia!" That the irritation is not deeply seated and will not be permanent, an incident connected with Lady Jervois may be taken, let us hope, as a proof. A diamond brooch, and earrings to match, delicately and elaborately mounted in silver, were presented to her, and she assured the ladies forming the committee of presentation that the four years passed by her in South Australia had been the happiest of her life.

One of the only acts of General Thibaudin during his short spell of power at the War Office, in addition to defending the unpopular bill of Proscription against the Princes, was that of transferring General Brincourt from Montpellier to another military district. The crime of General Brincourt was having told off a number of soldiers to be present at a performance which the Republicans said was nothing more nor less than a Royalist manifestation. The only way of accounting for this exaggerated amount of susceptibility is by supposing that the French Republic must be in a very precarious position, and have "its skin off," as our Transatlantic cousins would say. The performance in question was of the most childish description, and no more calculated to pervert a Republican private or endanger a constitution than Punch and Judy. A local paper says that General Thibaudin was not sorry to have the opportunity of coming down upon General Brincourt, who, during the last autumn manœuvres, captured his division, and thus put him to shame. The journal in question makes out that General Brincourt rather despised his adversary, and foretold that he would act like the Comagny of the Army of the East. It must be remembered that General Thibaudin, after he broke his parole in 1870, served under the name of Comagny, and was, in a great measure, responsible for the disaster which overtook the army commanded by Bourbaki. It is rather strange that General Brincourt's Chief of the Staff, Colonel Hubert Castex, should also have made himself personally objectionable to the War Minister, by writing a pamphlet, some years ago, it is true, in which he condemned, in no measured terms, the conduct of those officers who broke their parole during the Franco-German war.

Those of the Purchase Captains to whom exceptionally hard terms have been offered, are hoping that their case will be reconsidered by the new War Minister. Except upon the principle that while there is life there is hope, we doubt their expectation being realised. Till a strong man who will think and act for himself becomes War Minister—we do not say that Lord Hartingten may not prove to be such—the War Office will be guided in such matters by civilian officials, whose advice has already been taken, and has been given against the officers of the Army in the interests of economy. The class most severely hit are those Captains who have been compulsorily retired under the last Warrant, because they were 42 years of age. The dictum that from him that hath not shall be taken even that which he hath, has been carried to its extreme in their case. By the action of the Government in 1870, they lost their over-regulation money; by the action of the War Office in 1881, they have lost their profession, and are placed upon a reduced pension, because they were on half-pay when Purchase was abolished. The military Members of the House of Commons ought to note such cases as this.

On Sunday, June 18 last, the Corps of Commissionaires, after their annual inspection, went to Marlborough House Gardens, by special invitation from the Prince and Princess of Wales. When the veterans marched along Pall Mall, the powerful and harmonious band of the corps was headed by a man whose commanding stature, portly figure, gorgeous uniform, towering bearskin, and over-topping plume, proclaimed him *facile princeps* among drum-majors. Since then, he has got the mournful distinction of being the only one left. The Army reformers, whose microscopic eyes are ever seeking pretexts for granular alterations, have, in their unquestioned power, decreed that drum-majors, trumpet-majors, bugle-majors, and pipe-majors shall be no longer. For these old, familiar, and (to ordinary mortals) unobjectionable titles, we are to substitute serjeant-drummers, serjeant-trumpeters, &c. It does not appear why, on the same pretext, serjeant-majors should not be altered into serjeant-serjeants! Are all these "major" titles abolished, as a counterpoise to the creation of the equally unreal designations of those officers who are called in the service "mud majors," and whose hybrid rank is simply the result of a disengenuous evasion of the plain consequences of inexcusable miscalculation? And here we may notice another of the granular reforms,—that of removing chevrons from the left arms of those non-commissioned officers who had worn them till lately. Are the pennies saved by this flint-skinning intended to compensate for the pounds expended in making minor Lieutenant-Colonels and Major Captains? It seems reasonable that the rank of non-commissioned officers should be distinguishable from either side. This might be effected, without much expense, by cutting all the present chevrons down the middle, and sewing the halves one on each arm! But if this be needless, the chevrons might be worn inside the coat, or cheaper still, not worn at all. When, in mercy to our long-suffering Army, shall we see the end of these reforms and reorganisations?

The question of the Princes still continues to trouble France, and the Republicans themselves must regret having raised so terrible a tempest about an imaginary peril. The French opponents of the Proscription Bill point out that one of its consequences will be to change the character of the Army, and to make it political, instead of military. The French Radicals not only denounce the Princes; they denounce the Staff Corps, as forming a corporation in constant revolt against the men and the measures of the Republic; they denounce whole regiments like the 12th Chasseurs, most of whose officers, according to *La Justice*, are Royalists, and belong to the cream of the Faubourg St. Germain. On its side, *La Lanterne* denounces the Commanders of the 3rd, 4th, 5th, and 11th Army Corps as tainted with Orleanism. No less than fifty Generals deserve to be shot, and all the Colonels with aristocratic names should be at once driven from the service. Such is the tone of the French Radical press, which makes us doubt whether we are very far removed from that Reign of Terror which sent to the scaffold the Venerable Marshal Lucner, and such gallant soldiers as De Biron, De Custine, De Beauharnais, Chancel, Konchard, &c. One of the cries against the Princes is that their promotion has been too rapid, and that they have not gone through the customary preliminaries. As regards promotion, the Duc de Chartres, who won his epaulettes in 1870 fighting with the Army of the Loire, under the assumed name of Robert le Fort, was thirteen years passing from the rank of Captain to that of Colonel. In the same space of time, the Duc d'Alençon has not managed to win his majority. If we turn from the case of the Princes to that of the brother of the President of the Republic, what do we find? We find that Paul Grévy, who was a Major in 1870, has for several years been a General of Division, without having in any way distinguished himself. As for not having passed through a military school, why the Orleans Princes above mentioned were in exile when they should have been studying at St. Cyr, and they were forced to commence their military education in Italy and in Spain. However, they hold their commission by a title which the Republicans should respect, a parliamentary title. Marshal MacMahon was driven from office upon a military question. He preferred to throw up his post as President of the Republic, rather than remove some suspected officers from the command of their Army corps. The present military question may well get M. Grévy into such trouble that he, too, will have to lay down office in despair.

Major-General H. G. Woods, C.B., has been appointed to command the Belfast District in Ireland from April 1 next, vice Major-General J. R. S. Sayer, C.B., appointed to command the Western District.

We see that Marshal Canrobert has left Nice for Paris, to take part in the deliberations of the Superior Council of War. Should the Radicals get the upper hand in the French Parliament, the gallant old Marshal, who is execrated by them, will soon be put on the shelf.

The intention of Mr. Caine, M.P., to apply for a Committee to inquire into the subject of "Drunkenness in the Army," is surely a good one. No one who has the interests of our soldiers really at heart will feel disposed to quarrel with any attempt on the part of well-intentioned Members of Parliament to mitigate the evils of drunkenness. It is the opinion of many reformers that no intoxicating drinks should be permitted to be vended, either in barracks or elsewhere, and that military canteens, as far as the sale of ale and porter is concerned, should be abolished. We know what rapid strides the Blue-Ribbon movement is making throughout England, and how it has taken hold of the Army, and all officers as well as soldiers should be thankful that it is so. In the opinion of many officers, some alteration is necessary in the mode of disposing of the money stopped from soldiers who are fined for drunkenness. At present, the "fines fund" is used for rewarding good and sober men on their discharge from the service; but it is well known by both officers and men that many recipients of this gratuity are no more entitled to it than they would be worthy to be made Bishops. Instances are occurring every day, in which soldiers are discharged the service with three or more good-conduct badges, who have received a sovereign for each badge taken from the pockets of their weaker-headed comrades, and who have been picked up in the streets an hour or so after leaving their regiment in a state of intoxication. One instance in particular, showing how unfair the distribution of this money often is, may be mentioned. A non-commissioned officer was sent from the head-quarters of his regiment to the depôt for discharge. This man had only received the good-conduct medal on the eve of his departure from his regiment; and he, moreover, was in possession of four good-conduct badges. Now, it was well-known throughout the corps that this man was a hard drinker; and although he was never seen by his officers in a state of drunkenness, yet there was little doubt but that he seldom went to bed sober. The day on which he reported himself at the depôt, he was observed by the officers and men of another regiment which was on parade, to be rolling across the barrack-square in a state of drunkenness. Instances of the misdirection of the money from the "fines fund" might be multiplied at leisure. A more satisfactory method of expending the money would be, if it could be applied, in providing greater comforts for soldiers in barracks. Might it not be expended in supplementing the soldier's breakfast meal with something to make the lump of dry bread more palatable? One way of diminishing drunkenness in the Army would be by increasing the food ration, and also by providing rational amusements in barracks during the winter season.

The *Gaulois* of Paris treats us to an anecdote which is eminently French. The writer says that during the fighting round Metz in 1870, the Chasseurs of the Guard surprised the Saxons at breakfast in the Château of Ladonchamps, and that one of the French soldiers had his arm smashed by a shell, and almost severed from his body. Insensible to pain, this hero was looking for an ambulance when a bullet struck his *Eugénie* (*id est*, Chassepôt). Upon this, the Chasseur became wild with rage. "The savages!" he cried. "Wounded me; that was nothing! But touch my Eugénie!" And he at once returned to the front. An hour afterwards, he came back in high spirits, and smoking an enormous pipe, which he had, no doubt, taken from a Saxon. Then, showing his rifle, which was covered with blood up to the guard (*sic*), he said, "I have got rid of my arm, which bored me; but I am satisfied, for I have revenged Eugénie!" A military paper has the good sense to poke a little fun at this extraordinary anecdote, which is worthy of the celebrated Baron Manchausen.

The sum of 65,000,000 marks, voted by the German Parliament between 1872 and 1875 for the purpose of rebuilding and strengthening the fortifications of Strasburg and Metz, has now been expended, and a further grant of about half a million of marks will be required to enable the completion of the same. The special features of these works are the numerous armour-plated caponniers and turrets, which are to be found at every exposed point. While the former are protected by rolled-iron plates of English manufacture, the latter are constructed on the Gruson system, *i.e.*, revolving turrets cased in chilled-iron armour of great thickness, manufactured near Magdeburg. Each Gruson turret contains two guns, the only mark presented to an enemy's fire being an arched roof, composed of large slabs of iron, which are not secured to backing by bolts, as is the case with rolled plates, but are joined together by means of slots, and thus form a compact mass several feet thick. The turrets for coast defence at Wilhelmshaven, Danzig, and other places, are constructed on the same plan, but of larger dimensions.

"The Autobiography of the Late Sir Archibald Alison" (Blackwood and Sons, 1882), shows how, with judicious care, and loving regard for his memory, the life and thoughts of an eminent man, mixing much with, and writing freely about, people famous in war, politics, and letters, may be given to the world within fifteen years of his death, without wounding the susceptibilities of any living person. The opinions and feelings of the historian of so many campaigns regarding our living Generals, or those recently deceased, must be interesting to all military readers, and therefore we quote a few of them. Of our last Commander-in-Chief, Sir Archibald writes :—

"During the season of 1850 I was introduced to Lord Hardinge. He had been gratified by my well-deserved notice of him in the account of the battle of Albuera ; and he was desirous of enlisting my services in a cause which he had now much at heart, viz., the awakening of the nation to a sense of its danger, in the event of a rupture with France, from the defenceless state of the Empire. This subject, on which the public at that period evinced an apathy that is now scarcely conceivable, occupied his attention, to the exclusion of almost every other. His official position as Master-General of the Ordnance gave him the means of ascertaining facts regarding it which no other person enjoyed, and Lady Hardinge told me that he could not sleep at night for thinking of it. He told me that at that time, if England should be invaded, he could not collect above 10,000 men to defend London, after providing for garrisoning the maritime fortresses ; and that he had only forty guns which he could bring into the field, the most of which had not been repaired since Waterloo, and would infallibly go to pieces if driven in wet weather through a clay field. He earnestly besought me to turn my attention to that subject, and furnished me with the official details necessary for doing so. I need hardly say that I shared his apprehensions, and concurred in his views on the subject, which he assured me were entertained by the Duke of Wellington in an equal degree. In consequence, I wrote an essay for *Blackwood* on the subject, in which Lord Hardinge's statistics were engrossed. It is curious now, as containing an authentic proof of the delusion under which, from the influence of Cobden, Bright, and the Manchester school, the nation laboured at that time, and the mortal peril into which it was brought in consequence, and from which we were delivered only by the good providence of God. Lord Hardinge has borne so important a part in British history, that some account of him will not be unacceptable. His appearance was not striking ; his figure rather little, than otherwise ; and his air far from having the martial aspect of his rival in Indian fame, Lord Gough. But his manner was kind, and little acquaintance was required to learn that this was not the result of merely external courtesy, but flowed from genuine benevolence of heart. In conversation he was quick, and in the expression of opinion, vigorous and decided,—a peculiarity common to him with the Duke of Wellington, and one very characteristic of intellectual power."

A railway train has been adopted in Spain, intended for the newly-organised railway detachment. Consisting of two engines and 24 carriages, it contains a complete equipment for the reception, for a lengthened period, of the detachment itself (eight officers and 136 men), is capable of transporting besides about 100 men, and forms altogether a well-found movable war depôt with workshops, materials, &c. A light armour protects the carriages, which are provided with loopholes. The train is armed, in addition, with four guns.

THE REORGANISATION OF THE CAVALRY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—There seems to be little doubt that a reorganisation of Cavalry will shortly take place, and though some may regret any departure from the existing state of things, still, it cannot be denied, after what occurred last autumn, that some change is necessary. When three regiments were put under orders for Egypt, the whole of the remainder were rendered more or less inefficient, owing to the large contributions in officers, men, and horses which they were called upon to send, so as to bring up the 4th and 7th Dragoon Guards and 19th Hussars to war strength. Exactly the same thing took place when the King's Dragoon Guards and 17th Lancers were sent to South Africa, therefore it is impossible to escape from the conclusion that "something must be done." Whenever this change may be made, it is devoutly to be hoped that if those who make it are not soldiers themselves, they will allow themselves to be advised by those who are ; and this I write in reference to a scheme which appeared in the *Times* of Feb. 12, which can hardly have been drawn up by anyone well acquainted with the history or feelings of cavalry. The author of this scheme alludes to the desirability of keeping up regimental numbers, but he does not hesitate to change the nature of regiments ; he makes Hussars (formerly light Dragoons, not Dragoons, as he states) into heavies, and heavy Dragoons into Lancers. While in no way questioning the advantage of retaining old numbers and old titles, there cannot be any doubt that both these could be given up with infinitely less regret than would be felt, were a regiment made to change its nature. I think we may be sure the framers of the scheme of reorganisation will do their utmost to make the necessary changes, while doing as little as possible to impair regimental feeling, and therefore they will steer clear of such a cardinal mistake as the conversion of light cavalry into heavy, or *vice versâ*, merely for the sake of preserving a number. If it is found that any change of nature has to be made, let it be done as sparingly as possible ; and it only seems fair to old regiments, with a long list of honours, that their age and services should hold them safe from change. If conversions are necessary, their younger and less distinguished brethren should be the victims.—I am, &c., Nemo.

Lieut. Victor Balck, of the Royal Swedish Nerikes Regt., and well known in England as the President of the Swedish Royal Gymnastic Club, was married to Miss Anna Forsberg, of Stockholm, on Feb. 24. The *élite* of Stockholm were present at the wedding to do honour to Lieut. Balck and his fair bride, both being great favourites in Swedish society. Cards of invitation to the wedding were sent to Lieut.-Col. Cleather, Inspector of Gymnasia, and all the English officers who accompanied him to Sweden last year.

The Army.

2nd Life Guards. Col. Ewart, C.B., left London on Saturday evening in the suite of the Prince of Wales, *en route* for Berlin, for the silver wedding of the Crown Prince and Princess of Germany.

Royal Horse Guards (Blue). The *Times* says :—"The action brought by Col. Burnaby, of the Royal Horse Guards, against Major-Gen. Owen Williams, M.P., lately commanding the regiment, which is set down for hearing before the Queen's Bench Division of the High Court of Justice, will not be tried. It will be recollected that Gen. Williams addressed a letter to the Horse Guards alleging that Col. Burnaby was the writer of a scurrilous paragraph relating to him which had been sent to the editor of a weekly paper for publication. Col. Burnaby denied the authorship, and, in accordance with the regulation that an officer whose character has been impugned shall submit the matter to superior military authority, placed the case before the Horse Guards for such investigation as they might think proper. The Field-Marshal Commanding-in-Chief, however, did not think it was a question which could be satisfactorily dealt by a military tribunal, at the same time intimating that Col. Burnaby should take such other steps as he might be advised for the vindication of his character. Col. Burnaby thereupon commenced an action for slander, to which Gen. Williams pleaded, first, that his communication to the Horse Guards was privileged, and, secondly, justification. He has now, however, written that, while he considers he had, at the time, reasonable cause for attributing the authorship of the offensive paragraph to Col. Burnaby, he fully withdraws all imputations upon that officer. The Duke of Cambridge, on being referred to, has stated that the abandonment of the proceedings would be honourable to both parties, and Lord De L'Isle, who has been acting in the matter on behalf of the past and present members of the Royal Horse Guards, has received the following letter from the Adjt.-Gen. on the subject :—'Dear Lord De L'Isle,—H.R.H. the Field-Marshal Commander-in-Chief is of opinion that Lieut.-Col. Burnaby would act in the interests of the Army in accepting the withdrawal of the letter signed by Major-Gen. Owen Williams, with reference to the accusation made against Lieut.-Col. Burnaby, *re* the anonymous paragraph, and that no imputation rests upon Lieut.-Col. Burnaby's honour with reference to the whole transaction.—Believe me, yours faithfully, Wolseley.' The legal proceedings have consequently come to an end."

7th Dragoon Guards. On arrival home from Egypt, the regiment will be stationed at Shorncliffe.

6th Dragoons. The Marquis of Hartington, replying to Col. Colthurst, on Thursday, stated that the families of the soldiers of the Inniskilling Dragoons had not been sent out to Natal, not only because the accommodation was insufficient, but because of the great uncertainty which existed as to the length of time during which it might be requisite to keep the regiment in the colony. He trusted it would not be necessary to detain the regiment in Natal much longer.

9th Lancers. Capt. Lord William Beresford, Military Secretary to the Viceroy of India, proceeds on six months' leave in March. He will probably accompany Lady Ripon to England. Major and Pymr. M'Farlan is proceeding to England, preparatory to retiring from the service.

10th Hussars. Lieut. Alexander arrived home from India on Sunday in H.M.S. Euphrates.

11th Hussars. One of the last surviving officers who had served with the regiment in the Bhurtpore Campaigns in 1825-26, died last week in Major F. R. H. Lowrie, a veteran whose name had long since dropped out of the *Army List*. The deceased, who was educated at the Royal Military College, Sandhurst, got his first commission in 1822, in the days when the Duke of York was Commander-in-Chief. After a short service with an infantry regiment, he exchanged into the 11th Hussars, and purchased his lieutenancy in October, 1825, serving in the campaign under Lord Combermere, and taking part in the siege and capture of Bhurtpore, for which he had the medal, with clasp. Purchasing his troop in 1839, he exchanged in the following year into the 79th Highlanders, and went with that regiment to Gibraltar, obtaining his majority by purchase in 1842, and retiring by sale in 1846. The deceased, who was a well-known resident at Ealing, had many tales to tell of his past military life, and the days when he served under Col. Childers and Lord Cardigan, and was especially brimful of anecdotes of the last-named cavalry leader.

17th Lancers. Lieut. Anstruther-Thomson arrived home from India on Sunday in H.M.S. Euphrates.

ROYAL ARTILLERY.

Capt. M. O. Hopkins and Lieuts. F. B. Jackson, P. H. Slee, and C. E. Coghill arrived home from India on Sunday, in H.M.S. Euphrates.

Capt. A. N. Rochfort has been appointed an A.D.C. on the Personal Staff of the Viceroy of India, in succession to Lieut. E. L. Brett, of the Scots Guards, who recently succumbed to an attack of typhoid fever, contracted during the campaign in Egypt. Capt. Rochfort has been for some time acting as an extra A.D.C. on Lord Ripon's Staff.

"Gunner" writes :—"Being naturally anxious to form an idea as to my prospects in the service, I have been studying the Royal Warrant of March 11, 1882, but some points seem involved in such obscurity that I must ask you to allow me the use of your columns, in the hope that some of your readers may be able to assist me in understanding them. 1. Up to what age, or within what period, is a half-pay major eligible to be brought back to his regiment? Article 9 says that 'a captain shall not be eligible for promotion to a regimental majority after the age of 40 years' (42 in certain exceptional cases). Several captains in the Royal Artillery have been promoted to half-pay majorities at the age of 42, and have been brought back to full pay in their proper turn. Is there anything in the Warrant to justify this, or is there any reason to suppose that an officer is more fit for a regimental majority because he has passed a few weeks or months on half-pay, than he would be if he continued to serve as a captain? Again, why should these officers be senior (as majors in the Army) to those regimentally above them, only because the latter have probably worked harder in their youth, and obtained their commissions at an earlier age? 2. Is the retirement for age of majors (Article 100 to be equally inoperative,—*i.e.*, does promotion to a half-pay lieutenant-colonelcy, under Article 78, make an officer eligible for appointment to that rank on full pay, in spite of his being over age? 3. Does brevet rank bring an officer under the conditions of retirement laid down for the higher grade?"

"Looker-on" writes :—"An article which has appeared in your paper, with regard to the part played by artillery in war and the efficiency of that arm, has induced me to write on the subject. It was clear to me, after the experience of the campaign in Egypt and the small influence of artillery on the result, that an idea would arise that guns with an Army are only an incumbrance, and that the other arms could do very well without them ; but the campaign in Egypt was altogether exceptional, and cannot form a safe precedent. We cannot always fight a rabble composed of Egyptian Fellaheen, who well supported their reputation of being the worst soldiers in the world ; but when fighting an enemy worthy of our steel, it will be seen whether artillery can be dispensed with as useless or not. As to the Egyptian War, the result would probably have been the same without artillery, and with half the number of infantry armed with 'Brown Bess' and a bayonet at the end of it ; also, the battle of the war being a surprise at dawn (rendered possible by the absence of picquets and outposts), there was no opening for artillery. There is a great deal said about the moral effect of artillery being its strong point, the actual effect being trifling ; but with the latter assertion I do not agree, when artillery is properly used and the material is good. The small proportion of casualties at Gravelotte (only six per cent. of the whole) caused by guns is often quoted, but the practice must have been decidedly bad. The French guns were often badly placed, fired at very long ranges, and they ran short of ammunition during the battle ; also, on both sides, the projectiles were not by any means the best for the field, the Germans using only common shell with percussion-fuzes, while the French fuzes were bad. Nevertheless, the artillery exercised a great influence on the result of most of the battles of the Franco-German War. Even if it were allowed that artillery frightens more than it hurts, it has an advantage over infantry fire, which sometimes does neither the one nor the other, as has appeared on several occasions lately. There are, of course, circumstances in which field artillery can do little more than frighten, and infantry would not even do that,—for instance, firing at troops lying down behind shelter-trenches or other cover when these cannot be enfiladed ; but if the guns have the effect of frightening the enemy, unsteadying their aim, and saving the infantry from loss, their fire is not wasted, nor is their presence with the Army in proper proportion to strength an unnecessary encumbrance. (This proportion being generally about three guns per thousand men.) Properly handled, placed in good position, and not used at absurdly long ranges, but always brought as close as practicable, it has been and will again be found, when occasion arrives, that the effect of artillery is very material indeed, as well as moral ; and that wounds and death, as well as confusion and depression of courage, are the results of a concentrated and well-directed artillery fire. What is commonly called science is certainly not of much use to a soldier, and it is no more required in the Artillery than in the other arms on the day of battle. Skill in handling and placing the guns, courage, prescience, and determination being what are wanted in an officer, coolness and a quick sight are also especially useful for an Artilleryman. Possessing these, science can, of course, do no harm ; but without them, it is useless as a qualification for commanding men in war. Science, however, is very necessary in some of the departments connected with artillery, but the name of Scientific Corps, as applied to the whole service, conveys a wrong impression, and has probably been one of the causes which have hitherto tended to exclude Artillery officers from General commands in the field of troops of all arms, an exclusion which happily no longer exists."

ROYAL ENGINEERS.

Capt. W. B. Hurst arrived home from India on Sunday, in H.M.S. Euphrates.

We regret to announce the death in Paris, where he was on leave of absence, of Major W. P. Jones. The deceased was attached to the Home District.

1st, or Royal Scots. The 2nd Batn. was to have moved yesterday from Fermoy to the Curragh.

7th Royal Fusiliers (City of London Regiment). Lieut. Rhodes, 2nd Batn., arrived home from India on Sunday in H.M.S. Euphrates.

10th Lincolnshire Regiment. Col. Hinxman, half-pay, late 60th Rifles, who acted as assist-adjt. and qrmr.-gen. in the Western District during the absence of Col. W. F. Butler, C.B., in Egypt, has been appointed to the command of the Regimental District at Lincoln, in succession to Col. Appleyard, C.B. Capt. Warton, 2nd Batn., has been appointed garrison instructor at the Cape. Lieut. and Adjt. W. H. Coode, 2nd Batn., second son of Gen. Coode, of Devonport, was on Friday week shot dead on the parade-ground, Benares, whether accidentally or intentionally is unknown. The deceased, who was 24 years of age, entered the Army four years ago.

15th East Yorkshire Regiment. The *Bombay Gazette* says :—"An appointment will fall vacant this year in the Bombay Presidency which is a good deal sought after, as the holder of it is virtually his own master, the duties are pleasant though arduous, and the emoluments are good. It is that of Assistant-Adjutant-General for Musketry, which Col. Gillespie, Bombay S.C., the present incumbent, will vacate on Oct. 2 next, on completing his five years' tenure of the office. Col. Gillespie is now in England on furlough, and Major Thomas, East Yorkshire Regt., is acting for him. We believe that Major Thomas will succeed permanently to the vacancy in October, and the appointment would be in every way a good one, as he has a thoroughly practical knowledge of musketry in all its branches. The mention of the East Yorkshire Regiment reminds us that that corps has an unusually large number of officers on its rolls who have qualified for, and obtained, Staff employment. Col. Burnett is Assist.-Adjt.-Gen., Bombay Army, and has passed through the Staff College; Major Dundas, D.A.A.G., Bombay District, has also passed through the Staff College; Major Thomas is A.A.G. for musketry; Capt. Johnston is Staff officer, Colaba; Lieut. Wood is A.D.C. to Gen. Wood, C.B., commanding Northern Division; and Lieut. B. Hamilton is acting as A.D.C. to his Excellency the Governor. This seems to show that when officers take the trouble to qualify themselves, they are not often left unprovided for." Lieut. Davies, 2nd Batn., has been granted leave from India to England for six months, on medical certificate.

17th Leicestershire Regiment. Capt. Mayne, 2nd Batn., arrived home from India on Sunday in H.M.S. Euphrates.

19th Yorkshire Regiment. Lieut. Newnham is a candidate for the S.C.

20th Lancashire Fusiliers. Lieut. Deane-Freeman, 1st Batn., arrived home from India on Sunday in H.M.S. Euphrates.

21st Royal Scots Fusiliers. Lieut. Gaisford, 2nd Batn., arrived home from India on Sunday in H.M.S. Euphrates.

22nd Cheshire Regiment. Lieut. Goldsmid, 2nd Batn., a probationer, wing-officer 40th Bengal N.I., is about to be admitted to the Bengal S.C., from Nov. 18, 1881. Lieut. Grove, 2nd Batn., has resigned his probationary appointment for the S.C.

23rd Royal Welsh Fusiliers. The 1st Batn. arrived at Dum Dum on Jan. 16, having completed a march of 760 miles. Lieut. Morris has been appointed officiating station Staff officer at Darjeeling, vice Capt. Burnaby, 70th Regt., who has joined the garrison class at Lucknow.

29th Worcestershire Regiment. The command fell vacant yesterday, on the expiration of Col. Davis's term of appointment.

43rd Oxfordshire Light Infantry. Lieut. Plowden and Lieut. Eccles proceed home from India next month, to join the depôt for two years.

44th Essex Regiment. Capt. Stock has been selected for the adjutantcy of the 4th Batn., vice Major Bald, whose period of service in the appointment expires in May.

51st King's Own Light Infantry. Major Græme has been appointed Superintendent of the Lucknow Gymnasium. Lieut. Strachey, a probationer, wing-officer 11th Bengal N.I., is about to be admitted to the Bengal S.C., from Sept. 22, 1881. A most extraordinary score has come to us from India. In a match played recently at Moradabad, between two companies of what used to be known as the 51st Regt., one Pte. Davis made 50 runs in eight hits! This astonishing feat was performed in the following proportions:—One hit for eight, one for seven, five for six each, and one for five.

60th King's Royal Rifle Corps. Lieut.-Col. Algar took over command of the 4th Batn. in India, from Lieut.-Col. Henderson, on Jan. 17, on exchange from the 2nd Batn. in England.

63rd Manchester Regiment. Lieuts. Quin, Wilson, and Dawson are candidates for the S.C.

64th North Staffordshire Regiment. A court of sworn private inquiry before Col. Forbes, special resident magistrate, is being held at Athlone relative to the death of the late Lieut. Tothill. It will be remembered that on the morning of July 1, 1882, Lieut. Tothill's servant, on entering his master's quarters in the castle at Athlone, was horrified to find him seated in an easy chair dead. A six-chambered revolver lay at his feet, the contents of two barrels of which had penetrated the skull. An inquest was subsequently held on the remains before Mr. Burke, coroner for the county Roscommon, and a jury, when an open verdict was returned. At the inquiry, which is strictly private, a quantity of evidence has been taken. It is rumoured that the authorities have reason to believe that the death of this promising young officer was neither the result of accident nor suicide. Hence the cause of the inquiry.

74th Highland Light Infantry. At Windsor Castle, on Saturday, 24th ult., the Queen conferred the Victoria Cross on Lieut. W. M. M. Edwards, for the conspicuous bravery displayed by him during the battle of Tel-el-Kebir on Sept. 13, 1882, in leading a party of the Highland Light Infantry to storm a redoubt. Lieut. Edwards, who was in advance of his party, with great gallantry rushed alone into the battery, killed the artillery officer in charge, and was himself knocked down by a gunner with a rammer, and only rescued by the timely arrival of three men of his regiment.

77th Middlesex Regiment. Capt. Westmacott arrived home from India on Sunday in H.M.S. Euphrates.

81st Loyal North Lancashire Regiment. Lieut. Litton arrived home from India on Sunday in H.M.S. Euphrates.

84th York and Lancaster Regiment. Brevet Major Kirkpatrick has accepted an adjutancy of Auxiliary Forces.

86th Royal Irish Rifles. Mr. W. Seed, Reserve of Officers, lately of the regiment, has accepted the post of Chief Inspector of Police at Gibraltar. Lieut. Seed has for some years past been at the head of the police in the colony of Fiji.

94th Connaught Rangers. The regiment was to have left the Curragh yesterday.

96th Manchester Regiment. The following correspondence will be read with interest by all friends of the regiment:—"Alexandria, Oct. 13, 1882.—Sir,—I have the honour to report, for the information of his Excellency the General Commanding-in-Chief, the head-quarters and five companies of the 2nd Batn. Manchester Regt., under the command of Lieut.-Col. Barnard, embarked here this day on board the s.s. Adjutant, and that the remainining three companies embarked yesterday on board H.M.S. Euphrates, for India. I inspected this battalion in marching order on the 13th instant; its general appearance, the cleanliness of the men, their steadiness on parade and precision in drill, also the completeness of equipment, and the manner in which it was fitted, were most satisfactory, and reflects great credit on Lieut.-Col. Barnard and all ranks. This regiment, although unfortunate in not having taken any part in the recent campaign, has performed arduous duties in Alexandria, where it was broken up, detachments occupying dirty police posts, and often only getting one night in bed, yet they never lost their smart appearance. There was almost an absence of crime, and the duties were strictly and well carried out. There is evidently an excellent system and a good *esprit de corps* in this battalion.—I have the honour, &c., (Signed) G. H. Harman, Major-Gen."—"Adjutant-General,—I have much pleasure in submitting this favourable report on the 2nd Batn. Manchester Regt., lately embarked at Alexandria.—(Signed), G. J. Wolseley, General Commanding-in-Chief. Oct. 17, 1882."—"Horse Guards, Nov. 3, 1882.—Sir,—By direction of the Field-Marshal Commanding-in-Chief, I have the honour to transmit to you the accompanying copy of a report of the 2nd Batn. Manchester Regt., previous to its leaving Egypt, and to request that you will be so good as to forward it to the officer commanding, and, at the same time, inform him that his Royal Highness considers the report to be most satisfactory, and has desired that the expression of his approval may be conveyed accordingly.—I have, &c., (Signed) J. T. Hawley, D.A.G.; Gen. Sir D. M. Stewart, G.C.B., &c., Commanding-in-Chief, Bengal Army."

98th North Staffordshire Regiment. Major M'Causland arrived home from India on Sunday in H.M.S. Euphrates.

104th Royal Munster Fusiliers. Capt. Evans is a candidate for the Pay Department, and has joined on probation.

Rifle Brigade. The 2nd Batn. will leave Cork for the Curragh on Tuesday next.

Medical Department. Surg.-Major A. Minto arrived home from India on Sunday in H.M.S. Euphrates.

Veterinary Department. Mr. Greer asked on Monday, in the House of Commons, whether it was the intention of the Government to act wholly or partially on that portion of Col. Harrison's report referring to the readjustment, relative rank, and improvement of the position of the Veterinary officers generally. The Marquis of Hartington said the subject to which this question referred was under consideration, although not directly in connection with the report by Col. Harrison. The Committee went somewhat beyond its instructions.

The Auxiliary Forces.

MILITIA.

"X. C." writes:—"It is much to be regretted that so comparatively few Militia officers are able to avail themselves of those excellent institutions, the Schools of Instruction. One reason is that very many of us cannot spare the time over and above that devoted to the month's training, and to others the expense is a serious consideration—a month in London, especially during the season, in the quarter convenient for Wellington Barracks, entailing an outlay by no means covered by the allowance granted—which, it must be remembered, is withheld altogether, in the case of those qualifying for field rank. I beg to suggest that each year a captain and subaltern in every regiment should, in order of seniority, be excused a training, and attend a school-course as alternative, receiving the full training pay and allowances. No extra expense would be entailed on the public, while in a few years the result in the increased efficiency of the force would be most sensibly felt. In fact, nothing would more conduce to the better officering of the Militia than if this plan were made the rule of the service, and commencing with those of each rank first for promotion, a school-course, made compulsory on all in turn unless otherwise properly qualified."

YEOMANRY CAVALRY.

Middlesex. The annual regimental dinner was held on Thursday evening at St. James's Hall, Regent Street, under the presidency of Qrmr. Bartley, there being about 200 members and visitors present. Mr. Dupont, proposing the toast of the evening, was happy to say that the Yeomanry were now being brought to the front much more than was the case a few years ago. At the next Wimbledon Meeting they would be able to compete on an equal footing with the Volunteers, and they would then be able to show the world that they could not only wield the sword, but could shoot straight as well. In the Transvaal War, the Boers proved that they could both ride and fire to perfection, and it was men of that stamp who were required in that regiment. He considered the Middlesex the finest corps of Yeomanry Cavalry in the Empire, and on that account he had great pleasure in proposing its further success and prosperity. During the dinner the band of the regiment performed a selection of music, under the direction of Mr. Graves.

THE VOLUNTEERS.

The complete returns of the Force for the last official year have just been presented to Parliament, and the results are generally considered to be gratifying, as, though there is a slight falling-off in enrolled strength, the percentage of efficients is the largest that has ever been attained. The total enrolled strength is 207,336, of whom 199,374 are efficients, or a per-centage of 96·16, as against 96·08 in the previous returns; 5,692 officers (328 of whom passed the examination in tactics) and 11,929 serjeants have earned the extra grant for proficiency; and 175,878 of all arms were present at inspection. The efficients of each arm are as follows:—Light horse, 210, out of 260; artillery, 36,591, out of 38,261; engineers, 8,551 out of 8,896; mounted rifles, 38 out of 52; and rifles, 153,984 out of 159,857.

Friday's Gazette.

ARMY.

WAR OFFICE, Pall Mall, March 2, 1883.

Staff.

Lieut.-Col. and Col. J. J. H. Gordon, C.B., Bengal S.C., has been appointed to command a Brigade of the Bengal Army, with the rank of Brigdr.-Gen., in succession to Major-Gen. W. Gordon, C.I.E., who vacated that appointment on promotion (Nov. 28, 1882).

Lieut.-Col. and Col. Lord R. D. Kerr, C.B., from half-pay, to be Inspecting Officer of Auxiliary Cavalry, vice Col. the Hon. C. W. Thesiger, whose period of service in that appointment is about to expire (April 3).

Lieut. W. A. Gough, the Oxfordshire Light Infantry, to be Aide-de-Camp to Brigdr.-Gen. W. Arbuthnot, commanding the Cavalry Brigade in Egypt (Feb. 19).

Commissariat and Transport Staff.

Lieut. J. C. Oughterson, the Royal Irish Regt., to be a Deputy-Assist.-Comy.-Gen. on probation, with the temporary rank of Capt. in the Army (July 7, 1882).

Capt. F. S. F. Stokes, Royal Irish Rifles, to be a Deputy-Assist.-Comy.-Gen. on probation (July 14, 1882).

Lieut. W. H. Cole, the Prince of Wales's Leinster Regt. (Royal Canadians), to be a Deputy-Assist.-Comy.-Gen. on probation, with the temporary rank of Capt. in the Army (July 15, 1882).

Veterinary Department.

Vet.-Surg. C. W. Gillard to be Vet.-Surg., 1st Class, in recognition of his services during the recent campaigns in Afghanistan and South Africa (Feb. 15).

The under-mentioned Vet.-Surgs. to be Vet.-Surgs., 1st Class, in recognition of their services during the recent campaign in Egypt (dated Feb. 15):—H. Thomson, I. Matthews, and G. J. R. Rayment.

SOLDIER CADETS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—In your leader of the 10th February, you were pleased to call attention to the falling-off of the recruits for the Land Forces of her Majesty's Army, and although not agreeing with the *Standard's* alternatives (embodied in its article of the previous week), viz, the lowering of the age at enlistment, or doing away with the Reserve, you hinted that some measures might be devised so as to popularise the service, and attract young men to make it their profession for a time under the new rules of short service, modified by recent and current warrants. As an officer of 30 years' service and upwards, I beg to submit the following scheme:—Assuming we have 50 regimental Line Districts' Territorial Depôts (actually there are more), let there be permanently on the establishment of each depôt a company of young soldier cadets, 100 strong, attested at the age of 17 years, to serve until 19 years as cadets; and on attaining 19 years, to be re-engaged for the additional soldier service with the colours. The instruction of these cadets should be exhaustive in field-firing and gymnastic exercises, also all military manœuvres, &c., excluding heavy fatigues, guards, sentry-go, and all other duties or employments except school attendance. Such a scheme, I am confident, would introduce rapidly into our small Army a state of efficiency at present wanting. For these young men, on arriving at nineteen years of age, would join the home battalions for a year or more, and replace the older men drafted abroad or to the Reserve. It would not be advisable to grant deferred pay until they arrived at men's standard—nineteen years of age. Their pay might be a trifle less, and the difference saved expended in providing an evening meal suitable for growing lads. The canteen, to them, should be put out of bounds, and games and other useful amusements substituted. It is evident that from such a system we might, in time, look to obtain a number of well-disciplined, zealous non-commissioned officers.—I am, &c.,

An Approving Field-Officer.

VOLUNTEER DISCIPLINE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Volunteer Commanding Officers ought to take steps to check the growth of an abuse which is fast becoming a recognised institution among metropolitan regiments, but would not be tolerated for a moment in a less known provincial corps. I refer to the "dances"—orgies, I should call them—which it is usual for many corps to countenance on the occasion of their annual prize distributions. These "entertainments" are quite out of place in a force like the Volunteers, where discipline can only be enforced by means of a certain moral persuasion. Having attended several prize distributions lately, I regret to find that these "balls" seem to have become a practice in some of our best known regiments. Yet the scenes I have witnessed have been most distressing. There are some men, I am told, who would not continuue to be Volunteers unless they got their annual "dance." As an old Volunteer, I unhesitatingly assert that such men would be infinitely better out of the service than in it. The men who would leave a regiment because a "dance" had been discontinued are simply the black sheep, and black sheep are no good anywhere, and they assuredly are a source of weakness rather than strength in such a force as the Volunteers. In my own regiment we held a "dance" for some years, but it was discontinued, on account of the injury it did to the discipline of the regiment. From what I have seen around me, I feel sure the time has arrived for Volunteer commanding officers to put their feet down firmly, and discontinue such "entertainments' 'for the future. They are not in accord with the severer discipline for which the Volunteers are now principally remarkable. They might have done very well in the old days of "gentleman" regiments, in which Jack was as good as, if, indeed, he did not consider himself much better than his master; but they are out of character now, and can be defended on no grounds.—I am, &c.,

A Red Volunteer Captain.

Several additions have been made to the Egyptian War Exhibition at Humphrey's Hall, Knightsbridge. The Prince of Wales has lent two guns from the entrenchments at Tel-el-Kebir, the Admiralty a Gatling gun which was used from the rigging of the Condor, Lord Methuen a rope shield for the protection of gunners, and Mr. Charles Godfrey a bugle found in the Egyptian lines. There have also been added to the exhibition ambulance waggons, field medical cases, and litters for carrying the sick. The exhibition continues to attract many visitors.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 65 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The House is capable of containing 70 widows, and the Committee appeal to the public for funds to enable them to admit the additional number, the present subscriptions being insufficient.

The funded income of the charity yields only £830, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

EGYPTIAN WAR FUND.

NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

PATRON.
Her Most Gracious Majesty the QUEEN.

Subscriptions are earnestly requested. Remittances can be sent to Lady Jane Taylor, 16 Eaton Place, S.W.; or to Cox and Co., Craig's Court, S.W.

Application for assistance to be made to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, London, S.W.

TO MESS PRESIDENTS AND OFFICERS' MESS COMMITTEES.

THE GROSVENOR GALLERY RESTAURANT,
NEW BOND STREET.

The MANAGER desires to bring to the notice of Mess Presidents who are about making arrangements for Annual Regimental Dinners the great advantages offered for such meetings at his Establishment.

The Cuisine Department and Wine Cellars are under his personal supervision, and the utmost care is taken to make every such gathering a success.

Full particulars may be obtained from W. A. BURROWS, Manager, 136 New Bond Street, London, W.

HOTCHKISS AND CO.,
21 RUE ROYALE, PARIS;

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures at their wholesale-trade Prices, which are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have taken this course of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

SPECIAL NOTICE.
TO THE NOBILITY AND GENTRY.

WM. PUGH (many years coat-cutter at Messrs. Poole's, Saville Row), having succeeded to the old-established first-class business of Jackson and Co., 5 CORK STREET, BOND STREET, respectfully solicits the patronage of the Nobility and Gentry.

Best trade only, at fixed, fair prices, and 10 per cent. allowed for prompt cash.

N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready-money entitles them to.

WILLIAM PUGH (from Poole's), 5 CORK STREET, LONDON, W.

AYALA & Co.

Army & Navy Gazette.
LONDON, SATURDAY, MARCH 3, 1883.

WE trust Lord Hartington may be induced to give attention to the case of the Purchase Subalterns, who unquestionably have a grievance, and one which it would not cost any very large sum honestly to redress. Briefly stated, the matter stands as follows:—On the abolition of Purchase, subalterns—cornets, ensigns, and lieutenants—held commissions of the value of from £450 to £700,—we leave out purposely the over-regulation prices. By the retired-pay scale, no provision is made for any increase of pension in the case of such officers, although Purchase captains are allowed both an increase of pension and a higher grade of honorary rank—lieutenant-colonel in place of major—on retirement. In addition to this apparent injustice, the Purchase Subalterns are only entitled to the same terms of pension, &c., as those who have joined the Army since the abolition of Purchase, and whose commissions have cost them nothing. We need not ask,—Is this treatment fair? for no one could pretend to think that it is. The question is,—How can the difficulty be best overcome? To return such officers, either at once or on retirement, the regulation value of their subalterns' commissions is, of course, out of the question, on account of the expenditure which such a proceeding would necessarily involve. The only reasonable plan, it appears to us, lies in the suggestion that the retired pay of the officers should be increased by an addition of five per cent. on the value of the commissions held by them at the time of the abolition of Purchase; thus, a pension of £200 a year, for an officer who was a Line Infantry Lieutenant on November 1, 1871, would be from £235 to £240 a year. It is clearly wrong for the State to do what it has done hitherto,—accept the services of officers under certain conditions, set aside those conditions to satisfy its own ends, keep their money, allow them no interest, and when they retire, give them only the same rate of pension as other officers who entered the Army under different conditions, and who possess no vested rights. Such a course of action can be defended on no grounds. There are some, no doubt, who will consider the grievance of the Purchase Subalterns a very paltry one. It should, however, be remembered that the officers of the Army did not express any desire to have the Purchase system removed. They themselves were perfectly satisfied with things as they found them when they entered the service; indeed, they expressed as forcibly as they could their disapproval of Lord Cardwell's measure. The Government were determined to abolish Purchase, and through their mouthpiece, Lord Cardwell, they promised the House of Commons that no officers should be left in a worse position by its abolition than they were before. But the Purchase Subalterns are in a much worse position, for their purchase-money has been confiscated, and they get no equivalent of any kind. The non-purchase man draws precisely the same rate of pay as the one who has purchased, he gets his promotion on the same terms, and on retirement he draws the same pension, whilst he has spent nothing. This is certainly not as it should be, and as the expense of doing justice would not be great, we hope that the new Secretary of State for War may see his way to reopening the question. The plan proposed by us would be a very simple one, and as it would entirely dispose of the grievance of which complaint has been so repeatedly, and, be it said, so reasonably made, we appeal to Lord Hartington's sense of fairness to set matters right for a class of men who have been hard hit by the acts of a predecessor in office, and who have hitherto been systematically refused that redress which they have a right to demand.

We think it only right to point out that the reports as to the sweeping reorganisation of the Royal Artillery, which have been widely circulated for some time past, are quite premature, and that nothing has yet been done to carry the scheme into effect. That some such changes will, in course of time, have to be introduced must be patent to all who have studied the organisation of the so-called Regiment of Artillery. As yet, however, no steps have been taken by the War Office in the matter, and Artillery officers need have no apprehensions on the subject for the present.

The recent circular regarding the wearing of decorations in plain clothes makes no mention of medals. Now, in plain English, the term "decorations" includes both "orders" and "medals," but on turning to the Queen's Regulations, section 12, paragraph 48, we find that in official language the word "decorations" applies to orders only. Now that the authorities have recognised the agitation in favour of the wearing of decorations, we trust that officers will not have the bad taste to feel squeamish about appearing in evening dress with miniature medals on their breasts. They have the matter now in their own hands, and, as the Army could not fail to be benefitted considerably by officers showing themselves proud of the distinctions they have won, we appeal to them to set aside all feelings of false delicacy, and give evidence that they appreciate the honours conferred upon them by their Sovereign.

Some correspondence has appeared in one of our daily contemporaries recommending that a clasp should be granted for the action at Kassassin. It is really too much to expect that a clasp should be issued to commemorate every little affair in which troops are engaged. If we go on at our present rate, we shall have in our next campaign to provide a yard or two of medal ribbon to which to attach the clasps which will be earned by those who are fortunate enough to pass through the campaign unscathed.

Lord Hartington stated in the House of Commons on February 20, in answer to Mr. A. Connor, regarding the Royal Barracks, Dublin, "that no sanitary defects could be found in the barrack drains, but steps were taken to secure more perfect ventilation." Whence does the Secretary of State derive his information? The fact is, there is no reliable plan of the drains to be found, and the authorities have not the slightest idea where the drains are, *i.e.*, the old drains. A short time ago a non-commissioned officer in one of the regiments stationed at Dublin complained of a bad smell in his quarters, the floor was taken up, and a foul drain discovered immediately beneath it! and this is not an isolated case. The floor of one of the officers' ante-rooms was taken up for renewal, when it was discovered that the boards rested on the soil, and this is probably the case with the rest of the barracks. After a floor has been washed with soap and water for many years, imagine what state the soil must be in, with no ventilation between it and the boards! A few years ago, Messrs. Guinness, it is stated, offered to take these barracks, and build others on any site the Government might select. In heaven's name, why was the offer refused? We may also take this opportunity to mention that there are no closets in the officers' quarters. This, of course, is of little consequence, and Lord Hartington will, no doubt, say that he considers it conducive to health for an officer, especially if he be ill, to have to walk 60 or 80 yards through the pelting rain or snow in the middle of a winter's night!

It seems probable that the command at Woolwich will be conferred on Major-General Smyth, Royal Artillery, a most scientific officer, at present a member of the Ordnance Select Committee.

The Horse Guards letter of February 15 to the Commander of the Forces in Ireland relative to the exemplary manner in which the troops have done their duty during the last two years of agitation is very amusing; amusing because the letter might just as well have been addressed to the commander of the forces in Timbuctoo, as to the Commander of the Forces at present serving in Ireland, for the simple reason that nine-tenths of the men who performed the "very arduous and special duties" are now with the service battalions of their regiments abroad. But what is the Army coming to, when it is deemed necessary to compliment the men for simply doing their duty? We can remember periods in the history of Ireland when the British soldier had quite as disagreeable work to do as he has had in recent years, yet it was never thought necessary to bestow upon him either flattery or praise. It would appear also that his Royal Highness Commanding-in-Chief is much gratified at being able to state that no instance has been brought to his notice of any officers or men having failed to carry out their difficult duties in a most satisfactory manner. But has there ever been a time when the Commander-in-Chief has had to find fault with either officers or men in this respect? It has never been the custom of his Royal Highness to compliment men before for simply doing their duty, and we are under the impression that the letter we have alluded to received its inspiration from another quarter. If this state of things goes on, we shall soon expect to hear the British soldier praised and thanked for doing the most trivial duties, such as going on guard or falling-in on parade.

When the 65th and 81st Regiments return to England from India, the regiments heading the roster for relief will be the 89th, 44th, and 70th. These, with the 54th, have all completed eleven years' foreign service. The 81st, 89th, and 65th have been out twelve years.

Dr. Cameron will on Monday ask the Under-Secretary for India whether it is true that a regiment of Bengal Cavalry, infected with glanders, and without a veterinary-surgeon, was sent to Egypt; that the horses were not medically inspected before embarkation from India; that some died or were destroyed for glanders on shipboard before the regiment reached Egypt; that many were destroyed while in Egypt, and a troop had to be placed *hors de combat* at Suez, the horses of other regiments being placed in great peril of infection; that on the return voyage to India, and subsequently, many more of these Bengal Cavalry horses have been destroyed for glanders; and that an officer of an infantry regiment died at Lucknow of glanders, as well as two natives, these persons having been on board ship with these horses returning from Egypt, and there becoming infected; and whether it is the fact that, with more than 7,000 animals despatched with the expeditionary force from India to Egypt, there were only two veterinary officers, while the proportion in the Imperial Army is one veterinary-surgeon to 250 or 300 animals.

Mr. P. A. Taylor will on Tuesday ask the Secretary of State for War whether every recruit on entering the Army is compelled to be vaccinated, without reference to any objection he may entertain to the operation, to the fact of his having been previously vaccinated, or to his having had the small-pox; and, if so, whether recruiting officers have orders to explain this fact before enlistment.

Now that the retirement of General Officers is dependent on their employment or non-employment, and, therefore, on the vacation of their appointments, at the regulated time, by those who are fortunate enough to be employed, we would call the attention of Lord Hartington to the fact that there are General officers whose appointments seem to be unlimited as to time. For instance, Lieutenant-General C. B. Maitland, C.B., has been Lieutenant of the Tower of London since July, 1876, and Lieutenant-General C. Foster has been a Member of the Council of India for some years; Generals Sir J. M. Steele and Sir D. Lysons, and Prince Edward of Saxe-Weimar are holding appointments which, strictly speaking, ought to be filled by officers of Lieutenant-General's rank; in India, Lieutenant-Generals Sir M. Biddulph, Sir R. Bright, and Lieutenant-General Payn are holding Major-General's appointments; at Jersey a Lieutenant-General combines the duties of Governor with Colonel on the Staff, and at Guernsey a Major-General who is past the limit of age is also Governor and Colonel on the Staff. Such things are not permitted in the Navy. It is manifestly unfair to retire an Army General officer for non-employment whilst these anomalies exist.

Captain Aylmer asked the Secretary of State for War the other evening, "Whether, seeing that 25 regiments are without Paymasters, owing to the difficulty in inducing volunteers to serve in the Pay Department, he was prepared to put the Department on the same footing as other Departments,—viz., with one of its own officers at its head, to represent it at the War Office?" Sir A. Hayter replied:—"The question of representing the Army Pay Department at the War Office by one of its own members has been, with other questions, under the consideration of a Committee appointed by the Secretary of State for War. The Report of this Committee has just been concluded, and will shortly be laid before the Secretary of State for his decision. It would be premature to anticipate his decision on this particular point." This question of a head to the Department at the War Office, selected from amongst its own officers, has been so frequently urged in these columns, that it is unnecessary to reiterate the reasonableness of such an arrangement, further than to point out that the largest Department in the Army, except the Medical, has no one to look after its interests, and that probationers are not likely to come forward, after the way in which the Department has been treated in the distribution of honours for Egypt.

Provision is made in the Estimates for 1883-4 for 31,000 men in the First-class Army Reserve, an advance of 5,000 men over the preceding year.

In the interest of the Yeomanry service generally, it is to be hoped that this arm may be properly represented at the forthcoming Brighton Review. The War Office ought to offer liberal inducements to the regiments of Yeomanry Cavalry to take part not in the field-day only, but also in the march. The Yeomanry naturally feel that while the authorities are continually exerting themselves to benefit the Militia and Volunteers, nothing is ever done for them. If the force is not worth consideration, it should be disbanded. How often do we hear of a Yeomanry regiment being brigaded with the Line for drill and instruction? Yet the other branches of the Auxiliary Forces are continually being brigaded. The composition of the force (Home District) to assemble at Brighton on Easter Monday is somewhat amusing:—(1), Cavalry, 50; (2), Artillery, 1,005 and 16 guns; (3), Engineers, 1,436; (4), Infantry, 14,596! How an instructive sham-fight can be carried out, with Cavalry to Infantry (alone) as 1 to 292, it is difficult to imagine! And yet there are any number of Yeomanry available, if their services were demanded.

We notice the new Army Estimates provide for the maintenance of two infantry battalions in Nova Scotia and one Cavalry regiment at the Cape. It will be remembered it was proposed to reduce the Halifax garrison from two battalions to one.

The military position of Prince Napoleon is rather a peculiar one. He was a General of Division, but in 1872, when he was suspected by M. Thiers of plotting against the security of the Republic, and was unceremoniously turned out of France, his name was struck off the Army List. A few years later his Imperial Highness, having been elected by the Republicans of Ajaccio to represent them in the Parliament of Versailles, he was allowed to return to France and to take his seat in the Assembly. He then protested against having been deprived by an arbitrary Ministerial decision of his rank in the Army, and the matter was referred to the Council of State, which has not yet delivered judgment. Seeing the manner in which the War Minister defends the idea that rank in the Army is property of which no citizen can be deprived without having committed some specific crime, it is hard to see how Prince Napoleon should have been left so long out in the cold. However, he may console himself by reflecting that his great uncle, before he obtained the rank of General at the siege of Toulon, was three times deprived of his military rank, and for very serious offences.

Purchase Lieutenants, Cornets, and Ensigns at present serving with regiments must indeed have lost all hope of ever having their case recognised, when out of some 1,400 officers interested only 38 have responded to a movement started in May last by a gentleman of experience, who has devoted much time and energy to their cause. They should remember that nearly ten years passed before the Purchase Captains obtained recognition in the shape of increased compensation, through the Warrant of 1881.

We believe the reason for the appointment of Major J. E. Collins, from the Shropshire Light Infantry, to the Hampshire Regiment, is in consequence of none of the Captains of that latter corps having passed the examination for Major. We wonder how long this extraordinary state of affairs is to be allowed to continue to the detriment of the Subaltern officers, and how far this exists in other regiments in the service.

The Navy.

◆

ADMIRALTY, February 23, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Commander Frederick de Veuillé Sanders has this day been placed on the Retired List of his rank.

Staff Surgeon Archibald Grant Colquhoun has been promoted to the rank of Fleet Surgeon in her Majesty's Fleet, with seniority of February 17, 1883.

The following notification is substituted for that which appeared in the *London Gazette* of February 23:—

ADMIRALTY, February 21, 1883.

Fleet-Surgeon Doyle Money Shaw, C.B., has been promoted to the rank of Deputy-Inspector-General of Hospitals and Fleets in her Majesty's Fleet with seniority of the 16th inst.

ADMIRALTY, February 24, 1883.

Royal Marine Light Infantry.—Major John Cairncross to be Lieut.-Col., vice Ley, retired (January 25, 1883).

ADMIRALTY, February 26, 1883.

Royal Marine Light Infantry.—Mr. Charles Edward Lloyd to be Lieut. (September 1, 1881).

ADMIRALTY, February 28, 1883.

Royal Marine Light Infantry.—Captains Cyril Frampton to be Major, vice Cairncross, promoted (January 25, 1883), and Charles Harrington Scafe (G) to be Major, vice Carlyon, retired (February 10, 1883).

ADMIRALTY, March 1, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Captain Samuel Philip Townsend has this day been placed on the Retired List of his rank.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer Henry Onions has been placed on the Retired List of his rank from the 28th ultimo.

APPOINTMENTS.

Lieutenants—Gerald Elias, Cecil H. Wright, Leslie C. Stuart, and Charles H. Moore, to the Opal, commissioned; Charles H. Adair, to the Duncan, additional, for service at the Royal Naval Barracks and in the Trent; A. W. E. Prothero, to the Repulse, for gunnery duties; Walter L. Bignold, to the Northampton; Alaric W. J. Portal, to the Minotaur, vice Stuart, as part complement.

Sub-Lieutenant—A. L. Duff, to the Opal.

Navigating Lieutenant—Henry C. Roche, to the Opal.

Paymasters—Henry J. Colling, to the Opal, commissioned; Clement P. Penny, to the Lord Warden, vice Colling; Thos. R. B. Rogers, to the Seagull.

Assistant-Paymasters—Charles Vawdrey, to the Indus, vice Campion; James H. T. Campion, to the Opal, commissioned.

Engineer—John Dinwiddie, to the Indus.

Gunners—James Kelly, to the Opal, commissioned; G. J. Fleece (a.), to the Vernon, additional, to qualify for torpedo duties; Arthur Hicks, to the Indus, additional, for the Express; Frederick Garland, to the Indus, additional, for the Swinger.

Boatswains—Henry T. Atkins and J. V. Luter, to the Opal, commissioned; Harry Jenman (a.), to the London, for service with steam launch.

Carpenters—Philip H. Beale, to the Opal, commissioned; Robert Harvey, to the Britannia, vice Johns; Allen Evans, to the Euphrates, vice Childs.

Coastguard.

Chief Boatmen—Francis Ellis, Barton, to be chief boatman-in-charge, Fosdyke, vice Colburn, promoted; Thomas Smith, Mouth of Boyne, to be chief boatman-in-charge, Portrane, vice Bew, removed.

Commissioned Boatmen—James Ford, Warbarrow, to be chief boatman, Abbotsbury, vice Ash; Henry C. Troke, Budleigh Salterton, to be chief boatman, Challabòro, vice Collis; William Bell, Howth, to be chief boatman, Arklow, vice Walsh, removed; William Fleming, Baldoyle, to be chief boatman, Bray, Dalkey District, vice Pine, promoted; Frederick Hext, Leigh, to be chief boatman, Beaulieu River.

ARAB, Com. Stopford, has returned to Persian Gulf.

BRITON, Capt. Andrew S. Kennedy, was inspected by Rear-Admiral Salmon, after conveying King Cetewayo to Port Durnford. The Commander-in-Chief expressed himself highly pleased with the state in which he found this ship and with the smartness of her crew, which is only what was to be expected with so efficient an officer in command as Capt. Kennedy, who has been ably seconded, we hear, by his 2nd lieutenant and gunnery officer, Lieut. Almack, who has for some months been acting as 1st lieutenant of the ship.

CARYSFORT, Capt. Stephenson, C.B., is ordered to convey Lord Alcester to Marseilles, on the arrival of the Lively with the new Commander-in-Chief at Malta.

CHAMPION, Capt. Pasley, was at Singapore up to Jan. 27, and would await arrival of the Himalaya.

COCKCHAFER, Lieut. and Com. G. W. Hill, arrived at Gibraltar on Feb. 27.

CROCODILE, Capt. H. Hand, left Port Said on Friday last.

DRAGON, Com. Bolitho, at Malta, preparing for further service on the East Indies Station; was to leave Malta for Aden on Feb. 27.

DRYAD, Com. Johnstone, left Trincomalee on Jan. 29 for Zanzibar direct, and will there await further orders; has since arrived.

ECLIPSE, Capt. Garforth, left Bombay on Feb. 2 for Bushire, to assume duties of Senior Officer's ship, Persian Gulf Division.

ESPOIR, Lieut. and Com. E. H. Gamble, arrived at Gibraltar on Feb. 27.

EURYALUS, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., Commander-in-Chief on the East Indies station, would leave Trincomalee on Feb. 3, for Rangoon, returning in March.

FOXHOUND, Lieut. and Com. McQuhae, was at Labuan on Jan. 15, and would visit Sarawak, and then return to Labuan and Singapore.

GANNET, Com. Bourke, was expected at Valparaiso from Santa Maria Island about Jan. 20.

HARRIER, Lieut. and Com. Willcox, is cruising for the suppression of the slave trade in the Mozambique Channel and neighbourhood of the Comoro Islands.

IRON DUKE, Capt. St. John, late flagship on the China station, is to be paid off at Devonport on March 15, and will be placed in the Fourth Division of the Steam Reserve.

JUMNA, Capt. U. C. Singleton, left Suez on Friday last.

LIVELY, Com. A. A. C. Parr, flying the flag of Vice-Admiral Lord John Hay, Commander-in-Chief of the Mediterranean Station, left Gibraltar for Malta on Feb. 27, and was expected to arrive there on March 4.

NORTHAMPTON, Capt. Digby, flagship of Vice-Admiral Sir J. Commerell, K.C.B., V.C., Commander-in Chief of the North-American and West Indies station, was at Port Royal up to Feb. 8, and was about to cruise with the Tenedos, Garnet, Fantôme, Griffon, Flamingo, Firebrand, and Foam, returning to Port Royal about Feb. 19. The Urgent was at Bermuda, but was about to return to Jamaica, in tow of the Dido.

OSPREY, Com. Dowding, is cruising in the Red Sea.

RANGER, Com. W. Darwall, left Trincomalee on Jan. 31 for Colombo, and will remain in Bay of Bengal until relieved by the Tourmaline.

SAPPHIRE, Capt. J. R. T. Fullerton, left Plymouth Sound on Saturday afternoon for the China station, to relieve the Encounter. The Sapphire calls at Madeira, St. Vincent, Tristan d'Acunha, and the Cape of Good Hope. The following are the dates and places to which letters should be addressed for the Sapphire:—Madeira until March 2; St. Vincent until March 6; Simon's Bay, Cape of Good Hope, until March 25.

SAPPHO, Com. B. F. Clark, was at Panama on Jan. 20, and was to leave on the 26th for Galapagos Islands, to join the Commander-in-Chief.

SULTAN, Capt. Walter Hunt Grubbe, K.C.B., left Malta on the 7th and arrived at Gibraltar on Feb. 20; called in at Port Mahon, Minorca, for four days' Whitehead torpedo practice. Leaves on the 26th to join Channel Squadron at or off Lisbon.

SWIFTSURE, Capt. H. C. Aitchison, flagship of Rear-Admiral H. M'L. Lyons, Commander-in-Chief of the Pacific station, was at Chimbote on Jan. 12, having left Callao on the 8th. He would leave on the 12th ult. for Payta, and then continue his cruise to Galapagos, Honolulu, and Esquimalt.

THETIS, Capt. Curtis, is refitting at Coquimbo.

TOURMALINE, Capt. R. H. Boyle, was at Bombay on Jan. 25 to Feb. 2, making good defects.

UNDINE, Lieut. and Com. Cutfield, is cruising for the suppression of the slave trade in the Mozambique Channel and neighbourhood of the Comoro Islands.

WOODLARK, Com. Nesham, attached to the Persian Gulf Division, would meet Eclipse at Bushire about Feb. 7, and proceed to Bombay, to give leave, refit, &c., on being relieved by Arab.

In consequence of a statement received from Consul-General Stanley as to the condition of the graves of our countrymen in the Crimea, a public meeting will be held at the United Service Institution.

The *Egyptian Gazette* announces that it has authority to state that the petition against the withdrawal of the British troops from Egypt will not meet with favour in official circles, and will not influence the British Government. The journal adds that the petition only tends to create ill-feeling between natives and Europeans.

The charge of the Highland Brigade at Tel-el-Kebir is being painted by Mr. De Neuville. He would be much assisted by the loan of photographs of participators in the action, and by particulars of any exceptional incidents. These should be addressed to him, care of the Fine Art Society, 148 New Bond Street, not later than the 8th inst.

It is certain the Queen's Physician, Dr. Fairbank, has written strongly recommending LENTILLA, or TONIC DAILY FOOD. It cures indigestion, heartburn, constipation, liver and stomach complaints, &c., besides having such wondrous nourishing properties. Makes soup, puddings, porridge, biscuits, custards, &c. Tins, 1 lb., 1s 6d; $\frac{1}{2}$ lb., 10d. Barrels, 28 lb., 30s; 14 lb., 16s. Of all Chemists.—Proprietor, H. J. DEACON, Beckenham, Kent.

GREEK IRONCLADS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In the *Army and Navy Gazette*, Feb. 10 (table, page 109), it is stated that two ironclads are in course of construction for Greece. 1. Can you inform me if these are two of the four mentioned in *Whittaker's Almanack* for 1883 (page 445), for which a sum of money was voted by the Greek Government? 2. Where are these ironclads being built, and by whom? 3. In Mr. Brassey's "British Navy" (Vol. I., page 583), he states that the Greek Government have ordered several torpedo boats in England. I find that you make no mention of these in your list. Has this order been cancelled, or is the non-insertion an oversight on your part?—I am, &c., Z.

[1 and 2. The corvettes mentioned in the table on page 109 of the *Army and Navy Gazette* of Feb 10 are not ironclads, but unarmoured cruisers. Guns, two $9\frac{1}{2}$-in. and two $5\frac{1}{2}$-in. Krupp each; speed (estimated), 14 knots; material of hull, iron and wood. The ironclads, for which a sum of money was voted by the Greek Government, have not yet been ordered. A commission of Greek officers has visited England, and obtained from the Admiralty the designs for the above ironclads. The plans have been forwarded to Athens for approval. It is reported that the order need not necessarily be placed with English firms, and several foreign shipbuilders are now in England endeavouring to secure the contract. 3. A number of the torpedo boats referred to in Sir T. Brassey's "British Navy" have already been built in England and France. Their non-insertion was not an oversight; but, as it would have been impossible to give an accurate statement of all the small boats building for various Governments, they were purposely omitted. About 20 boats are now finished, including the torpedo mooring steamers of the Argy type. In 1880, the Greek Government purchased the Psara, an iron screw yacht of 1,100 tons (formerly the property of Lady Burdett-Coutts), and converted the same into a torpedo depôt-ship on the Hecla plan. She carries four torpedo launches.—ED. *A. & N. G.*]

THE SOLDIER'S RATION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The introduction of short service into the Army, and the consequent youth of most of the men serving with the colours, necessitates, in my opinion, a change in the treatment of our soldiers. I allude to the increase required in the free ration issued at present, which consists of $\frac{3}{4}$ lb. of meat and 1 lb. of bread. I do not mean to imply that the above ration is all our men have to eat. They supplement it by a compulsory deduction from their pay —generally 3d. a day—which is spent in food and tea and coffee, and also by further purchases out of their own pockets of bread, cheese, &c., from the canteen. The food procured by these three methods is not enough for growing lads, and unless the free ration is increased, a larger forced deduction from the men's pay must be made. The regulations sanction 5d. a day being thus compulsorily deducted, but the soldier cannot afford so much. In olden days, this food may have been sufficient. Most of the men had done growing, and the oldest men, for want of appetite, left bread, &c., which the youngest consumed. On board our troopships, where the purchase of food is difficult, the rations issued leave our young soldiers in what an old serjeant described to me as "a half state of starvation." Another soldier, who did not suffer from sea-sickness, said he liked rough weather; he got plenty to eat then.—I am, &c., DRILL-INSTRUCTOR.

"A. L. D." writes:—"It may not be generally known that the extra-duty allowance of a captain who is adjutant in a battalion of the Line is only 2s. 6d., while that of a subaltern remains at the old rate of 3s. 6d. per diem. Now, I fail to see why the older and more experienced officer should receive a lower rate of pay than his junior in rank, unless the duties to be performed by the one are less onerous and responsible than those to be performed by the other. But if, as I believe to be the case, the duties are the same for a captain as adjutant as for a subaltern, then why this cutting-down? Perhaps, attention being drawn to this subject through the columns of your paper, some satisfactory explanation may be rendered in the matter, which at present seems to be needed."

The Veloplastic Company, Limited, has been incorporated with a capital of £100,000. This company has been formed for the purpose of acquiring the valuable patent rights secured by certain Letters Patent, under the Great Seal of the United Kingdom, for the invention of improvements in the process and apparatus for manufacturing material imitating leather fabrics and the like, and also wood, stone, or other surfaces, embossed or otherwise figured, and also in the manufacture of imitation leather and other fabrics, together with certain improvements and additions to the said inventions provisionally secured; and also all the trade secrets in connection with the said patent rights.

ARMY AND NAVY CO-OPERATIVE MEMBERS ARE SUPPLIED AT

DEATH.

GREIG.—At 30 Imperial Square, Cheltenham, on February 27, John Greig, Esq., F.R.C.S.E., Inspector-General of Hospitals, Bengal Armys late of Edinburgh, in his 79th year. Friend, will kindly accept this intimation.

Advertisements.

WANTED, for the PERMANENT STAFF of the 3RD BATN. ROYAL SCOTS FUSILIERS, THREE SERJEANTS. Must be at present serving on their Army engagements; be good drill-instructors, and able to perform the duties of colour-serjeant.—Apply, and send testimonials, to the ADJUTANT of the above Battalion, Dumfries, N.B.

DIRECTOR.—WANTED, a DIRECTOR, for a most VALUABLE MINE. Fees, £2 2s per Board Meeting.—Address, IRON, at Horncastle's, 61 Cheapside, E.C.

ROYAL UNITED SERVICE INSTITUTION.

FRIDAY, March 9. The Chair will be taken at Three o'clock. Instead of the Lecture by Colonel HERBERT STEWART, C.B., A.D.C., 3rd Dragoon Guards, on "The Future of Cavalry" (unavoidably postponed), a Lecture will be delivered by Major C. G. EDWARDS, (2nd West York Yeomanry Cavalry), on "The Yeomanry Cavalry considered as an Auxiliary and a Reserve Force."

To be followed by a Discussion.

By Order of the Council,
BOUGHEY BURGESS, Captain, Secretary.

THE VINE CLUB.

PATRONS.

THE LORD ROBERT BRUDENELL-BRUCE.
COLONEL CARRICK-BUCHANAN (of Drumpellier), C.B.
GENERAL SIR HENRY DE BATHE, BART.
THE EARL OF ELLESMERE.
VICE-ADMIRAL H.S.H. PRINCE LEININGEN, G.C.B.
COLONEL SIR ROBERT LOYD-LINDSAY, V.C., K.C.B., M.P.
GENERAL LORD WOLSELEY OF CAIRO, G.C.B., G.C.M.G.

COMMITTEE.

(Nominated by the Patrons.)

The Club is started as a Grill Club, and to enable its Members to obtain from the Proprietors, for their own home consumption, Wines, Spirits, and Liqueurs, at the actual, wholesale, cost price.

This last is an entirely new feature, the advantage of which must be apparent to every wine consumer.

Members may introduce Ladies into the Club between noon and 5 p.m., and they may be served with Refreshments, in a Room set apart for the purpose.

Special arrangements will be made for the supply of Naval and Military Messes.

For Rules, Application for Membership, &c., apply to

CHARLES A. PRITCHARD, Secretary, (pro tem.)
Temporary Offices, 20 Regent Street, Waterloo Place,
London, W.

INSTITUTION of NAVAL ARCHITECTS. SESSION 1883.

The MEETING will be held on MARCH 14, 15, and 16, in the Hall of the Society of Arts, John Street, Adelphi (by permission of the Council).

The Right Hon. the Earl of RAVENSWORTH, President of the Institution, will occupy the Chair.

For cards of admission apply to the SECRETARY, 5 Adelphi Terrace, Strand, W.C.

TO be SOLD, at TATTERSALL'S, on MONDAY, March 19, the Property of an Officer, an ARAB HORSE (entire), quiet with troops, and suitable for an Infantry Charger. A BLACK GELDING, broken as a charger, quiet in harness and a good fencer. Both these Horses went through the Egyptian Campaign, and are believed to be perfectly sound.

INDIA.—SOME GENTLEMEN having from £200 to £300 available, are sought for to ASSOCIATE in forming a TRADING and NAVIGATION COMPANY for N.E. India, in co-operation with one who has been twenty years' resident there. Profits equal to 30 per cent. can be shown to be easily possible.—Address, SYNTENG, Messrs. Deacon's, 154 Leadenhall Street, E.C.

TO CAPITALISTS and INVESTORS.—To form a Syndicate to raise £16,000, and Purchase a valuable and already made business, which requires some additional capital, and from want of which good orders are obliged to be refused almost weekly. If formed into a Limited Liability Company, some of the present proprietors would probably subscribe to some extent. The business is in England, and the supply of the commodity practically inexhaustible. If carried on as a private partnership, it might afford pleasant occupation to gentlemen of business habits. No special knowledge of the business necessary.—Address, "L. M. N.," at Brown's Advertising Offices, 4 Little George Street, Westminster Abbey.

ARMY TUTOR WISHES to DISPOSE of his CONNEXION. Large house, in one of the best Suburbs, at a very low rent. Capital opportunity for a Retired Officer. Satisfactory reasons for disposal.—Address, "T. P.," East Strand Post Office.

THE PARASCHO CIGARETTES.

THE PARASCHO CIGARETTES are now being made from the New Crop of Yenijeh Tobacco, and will be found to possess in perfection the peculiar and delicate aroma for which these Cigarettes have become so famous. The Parascho Cigarettes are made only from the finest Yenijeh (Turkey) Tobacco, and are rolled in the best paper procurable, free from Nitre, and made specially for the Parascho Cigarettes. The Parascho Cigarettes will be found different from and superior to all others. The Parascho Cigarettes are pronounced by connoisseurs to be "the only Cigarettes worth smoking."

The Parascho Cigarettes are supplied to the leading members of Fashionable Society, Clubs, and Messes.

The Parascho Cigarettes are made in eight different sizes, and are put up in boxes, each containing 50, 100, and 250 Cigarettes. The Parascho Cigarettes may also be had in sample boxes, containing 24 Cigarettes (accompanied by a detailed Price List), on receipt of 2s 6d in stamps, or postal order.

THE PARASCHO CIGARETTE DEPOT, 65 Park Street, Grosvenor Square, London, W.
And may be had from all the leading Tobacconists.

ALDERSHOT BREWERY COMPANY, Limited.

PROSPECTUS.

THIS Company has been formed for the purpose of acquiring the valuable patent rights secured by certain Letters Patent, under the Great Seal of the United Kingdom, for the invention of improvements in the process and apparatus for manufacturing material imitating leather fabrics and the like, and also wood, stone, or other surfaces, embossed or otherwise figured, and also in the manufacture of imitation leather and other fabrics, together with certain improvements and additions to the said inventions provisionally secured; and also all the trade secrets in connection with the said patent rights.

Any extensions of the said rights for the British Colonies have also been secured by the Company.

The advantages secured by this process are:—

1. That the articles manufactured are exact fac-similes. Thus in the case of leather skins, silks, and such like goods, it is by sight impossible to detect the reproductions from the originals.

2. No pressure being required in the manufacture of this material, the employment of expensive steam machinery and dies is entirely avoided, and it can, therefore, be made at a cost which must, for many purposes, ensure its replacing not only all the more expensive materials now used, but also most existing imitations.

3. Leather skins, being limited in size, seams and joins have of necessity to be made in upholstering large articles, whereas by this process the fac-simile leather can be made in such dimensions as will obviate any join whatever.

4. Unlike leather this material is not injured by grease, and is less liable to suffer damage by stains of every description. It is not so subject to injury from friction, and the colour being the same throughout, any accidental abrasion would be much less visible.

5. The most expensive silks and damasks can be reproduced for wall-hangings, at a price in many cases of one-seventh the cost of the original, whilst they will prove far more durable.

6. The above-named articles can be made in a great diversity of colours, every colour being permanent, and not liable to fade under the influence of strong light.

The following are some of the many uses to which it is particularly adapted:—

1. General Upholstery, including the Covering of Seats and Cushions in Railway and other Carriages, Tram Cars, Steamboat Saloons, Waiting Rooms, &c., and, in fact, for most purposes for which leather is now so much in demand.

2. The manufacture of nearly all articles known in the trade by the name of "fancy leather goods"—covering dressing-bags, mill rollers, bookbinding, wood carving, and other works of art.

3. For copying oaken and other wooden wall panels, and in lieu of expensive leather and tapestry hangings, &c.

4. For floor-cloth—and unlike ordinary oil-cloth, the colour being uniform throughout, the material is not subject to the uneven wearing away of the surface colour.

Careful estimates have been made with reference to the cost of the materials used in the manufacture of the goods by this process, and it is found on comparing it with the cost of other articles used for similar purposes, that a very large profit can be made on the cost of production, after selling the same to the public at a low price.

The machinery and plant acquired by the Directors is equal to a present daily production of upwards of 2,000 yards of fac-simile leather or other fabric, and arrangements having been made for suitable premises, the Company is in a position to commence at once manufacturing.

The Directors feel assured that there will be a very large demand for the fabrics and articles of Veloplastic manufacture, and they have great confidence in the financial prospects of the Company; and estimate that the profits to be derived from an energetic working of the business will ensure very handsome returns to the Shareholders.

Samples of the different fabrics and articles produced by this process can be seen at the Offices of the Company.

The Vendor, who is also the promoter of this Company, has fixed the purchase-money at £50,000. £25,000 is payable in cash and £25,000 in shares, and he is to provide for payment of all expenses incidental to the formation of the Company up to the allotment of shares.

The above-mentioned Letters Patent and the following contracts can be seen at the Offices of the Company:—One dated December 8, 1882, made between Henry Loewenberg, of the one part, and John Melville, of the other part. One dated January 24, 1883, made between John Melville, of the one part, and Henry William Paul, as Trustee on behalf of the Company, of the other part.

OXFORD and CAMBRIDGE UNIVERSITIES' BOAT-RACE, March 15, 1883.

SOUTH-WESTERN RAILWAY.

TICKETS of admission to view the Race from the Barnes Railway Bridge, price 10s each, including Railway Fares between London, Kingston, Shepperton, Hounslow, or intermediate Stations, and Barnes, can now be obtained at this office on personal application or by letter. In the latter case, a remittance in payment for the tickets required must accompany the application. Tickets can also be obtained on personal application at the Company's West End Office, 30 Regent Circus, Piccadilly; at their Central Office, 9 Grand Hotel Building, Charing Cross, and at their City Office, Exeter Building, Arthur Street West, London Bridge.

For the accommodation of the holders of these Tickets only, a Special Train for Barnes Bridge will leave Waterloo Station on the day of the Race, at a time to be announced by advertisement in the daily papers, and will return from the Bridge with Passengers for London only, about 10 minutes after the conclusion of the Race.

Early applications are desirable, as the number of Tickets will be strictly limited.

FRED. J. MACAULAY, Secretary.

Waterloo Bridge Station, London,
February 22, 1883.

WORCESTER.—To be LET or SOLD, the prettiest place within miles of Worcester, BARBOURNE HOUSE, one mile from Worcester Cross. This large, beautiful, and most complete FAMILY RESIDENCE, £120 per annum.—Apply to EVERILL and DAY, 51 Foregate Street, Worcester.

HANOVER SQUARE CLUB.—This Club will henceforth be conducted in accordance with the spirit of a Members' Club, without the contingent personal liability. In order to complete the full establishment, the Committee have decided to admit the requisite number of Members without Entrance Fee. The Club contains 40 bed-rooms. Town subscription, £8 8s; country, £5 5s; foreign, £2 2s.

IMPORTANT TESTIMONY

IN FAVOUR OF THE

SPECIAL DEVON TRICYCLE.

Seaton, September 27, 1882.

SIR,—Having had a good trial of the SPECIAL DEVON TRICYCLE, over very rough and very hilly roads, I must tell you that I am much pleased with it. It is an easy one to ride, and the swing frame is a wonderful assistance for hills. It is very strong and comfortable.—Yours faithfully, A. H. TRAHERNE.

The Manager, Exeter B. and C. Co.

I may add that, being lame, I cannot get any exercise by walking; but the exercise I get on the machine has not only restored my health, but I am able to go out into the country when and where I like.—A. H. T.

TO MILITARY and NAVAL OFFICERS.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Field-Marshal his Royal Highness the Duke of CAMBRIDGE will preside at the 19th ANNUAL GENERAL MEETING of this Institution, to be held at the United Service Institution (by the kind permission of the Council), on MONDAY, March 12, 1883, at 12 o'clock, noon.

By order,
G. W. FORSTER, Secretary.

Offices, 22 Cockspur Street, S.W., March, 1883.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

NOTICE is Hereby Given that the ANNUAL MEETING of this Institution, to be held on Monday, March 12, 18 3 at twelve o'clock, noon, will, at its close be constituted a SPECIAL GENERAL MEETING, for the purpose of confirming the following alterations to Fundamental Law No. 6.

That in place of the scale of payments for the purchase of Presentations in the Royal School as given in Fundamental Law No. 6, the following scale shall be substituted, viz:—

			£	s.	d.
If 10 y'rs of age	£435				
		Difference for 1 month	4	1	8
,, 11 ditto	386				
		ditto	4	3	4
,, 12 ditto	336				
		ditto	4	6	8
,, 13 ditto	284				
		ditto	4	10	0
,, 14 ditto	230				
		ditto	4	11	8
,, 15 ditto	175				

That the payment for a Life Presentation shall be £956, and for a Perpetual Presentation, £2,066.

By order,
G. W. FORSTER, Secretary.

March, 1883.

J. AND W. TOLLEY'S

EXPRESS RIFLES.

·360 bore DOUBLE EXPRESS... ... ... £20
·450, ·500, and ·577 bore DOUBLE EXPRESS £25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ... £23
An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s, £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

THE VERSMANN'S

PATENT

GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter, therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address—
The Versmann's Moss Litter Company,
LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

COCKS' ORIGINAL READING SAUCE

IS THE BEST & MOST ECONOMICAL SAUCE ever Manufactured for Soups, Fish, Chops, Steaks, &c.

COCKS' READING SAUCE induces Appetite, accelerates Digestion, whilst its delicious flavour is unequalled.

The Genuine is protected by Trade-Mark, viz:—Charles Cocks, Signature, on a White Ground, across the Reading Arms.

HOLLOWAY'S PILLS are admirably adapted for the cure of diseases incidental to females. Many from delicacy bear in secret, for women are subject to complaints which require especial remedies, and it is now an indisputable fact that there is none so suitable for such complaints as Holloway's Pills. They are invaluable to females of all ages, young or old, married or single. They purify the blood, regulate the secretions, correct all suspended or altered functions, clear the complexion, and brighten the countenance. The first approach of disordered action should be met with appropriate doses of these Pills; whilst taking them no restriction need be placed over the patient. They contain nothing which can prove injurious to the system. They act by purifying the blood and regulating every organ.

NAVAL CADETS, ASSISTANT CLERKS
HOPE HOUSE, SOMERSET PLACE,
SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

THE REV. Dr. POLLOCK RECEIVES a Few RESIDENT PUPILS, to prepare for Sandhurst, Woolwich, and the Universities. At last Sandhurst Examination, a Pupil obtained 5,136 marks.—Neville Hall, Middleham, Bedale, Yorkshire.

MILITIA COMPETITIVE EXAMINATION.—LIEUTENANTS of MILITIA PREPARED, by the undersigned. Only a very limited number received, the object being to give individual attention and ensure success. Instruction, 5 hours daily. Officers prepared for the Promotion Examination.—Apply to Captain H. C. KING, 13 Blomfield Street, Westbourne Terrace, W.

THE GRANGE, COWES.—The Rev. ARTHUR WATSON, M.A., Graduate in Honours, Second Scholar and Prizeman of Caius Coll., Camb., PREPARES PUPILS for the Public Schools, Naval and other Examinations. In June a candidate took the 1st place for Naval Cadetships. Terms inclusive, according to age.

HINDUSTANI, SANSKRIT, and BENGALEE. — MILITARY OFFICERS and OTHERS are prepared in the above Languages by Mr. D. N. DAS (Gold Medallist of Calcutta), B.A., late Scholar, Clare College, Cambridge, Professor of Sanskrit in the City of London College. — Address, 28 Camden Street, Oakley Square, N.W.

WICKWAR COLLEGIATE SCHOOL, near CHARFIELD, GLOUCESTERSHIRE.
HEAD MASTER—LAWRENCE PRESTON,
1st B.A. London University, and F.G.S.,
formerly Assistant-Master at Cheltenham College.

This School affords (on very moderate terms), efficient Preparation for Professional or Commercial Pursuits and all Public Examinations. Thorough groundwork. Individual attention. Exceptional advantages for delicate or backward boys. Very healthy locality. Superior educational home for boys whose parents reside at a distance or abroad.—For prospectuses, &c., apply to the HEAD MASTER.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

KELLY COLLEGE, Tavistock, Devon. ELECTION of FOUNDATIONERS. FOUR VACANCIES. Priority, after Founder's Kin, to Sons of Deceased Naval Officers. Examination, March 20.—Apply to the HEAD MASTER.

THE MILITARY and ROYAL NAVAL CLUB,

His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Nomination to a Naval Cadetship for the June Examination has long been given to the School, and will be competed for after Easter. Any Pupil joining at that time will be eligible. There are Special Classes preparing for Naval Cadetships for Woolwich, Sandhurst, the Militia, and all Competitive Examinations.—Apply to the Rev. EDWARD BURNEY, M.A., Head Master.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ROYAL INDIAN ENGINEERING COLLEGE, Cooper's Hill, Staines.

This College has been recently placed on a new basis, and the advantages afforded by it as a training institution for those who purpose adopting the Civil Engineering profession in India or elsewhere, are now offered to all persons desirous of following the course of study pursued there.

A number of Students, not exceeding 60, will be admitted to the College in September, 1883. Candidates for admission must, on July 1, 1883, be over 17 and under 21 years of age, and must give satisfactory proof of their having received a fair general education.

The Secretary of State for India will offer 13 appointments in the Indian Public Works Department for competition among the students entering the College in September, 1883, at the termination of their prescribed three years' College course, that is, in the summer of 1886. The Secretary of State for India will further offer two appointments in the Indian Telegraph Department among the same students after two years' course of study, that is, in the summer of 1885.

In the event of there being more candidates for admission than the College can receive, the preference will be given to qualified candidates according to dates of application for admission.

For all further particulars, apply by letter only to the Secretary, Public Works Department, India Office, S.W.; or to the President, Royal Engineering College, Cooper's Hill, Staines.

JULAND DANVERS, Secretary,
Public Works Department.
India Office, October 25, 1882.

MALVERN COLLEGE, LIMITED.
Head Master, Rev. C. T. CRUTTWELL, M.A.
The NEXT TERM commences on FRIDAY, May 4. New Boys to arrive May 3. Entrance Examination, May 4, at 9 a.m.
Apply to E. B SCALLON, Esq., M.A., Secretary.

MILITARY EDUCATION in FRANCE.

A limited number of CANDIDATES PREPARED for all Army Examinations, by a very successful Tutor. Last year all Militia Officers sent up passed their "Further." A Special Class for the Military Competitive.—Address, "MILES," care of Messrs. Clowes and Son, 13 Charing Cross.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

MILITIA COMPETITIVE EXAMINATION ONLY.—A Few Candidates desiring special individual attention are Prepared by Major COWPER, assisted by an Officer of equal experience, who has taken high honours in Fortification, Surveying, &c. At the last Four Examinations (the average number sent up for each being between 3 and 4), Pupils passed at their first trial 1st, 10th, 21st, 30th, 33rd, 34th, and 37th on the List.—10 Clifton Villas, Maida Hill, London, W.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence January 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

THE MARINE STEAM-ENGINE, a Treatise for the use of Engineering Students and Officers of the Royal Navy. By R. SENNETT, Chief Engineer, R.N., First Assistant to Chief Engineer, H.M.'s Dockyard, Devonport; late Instructor in Marine Engineering at the R.N. Coll.

"Steam propulsion is not an old branch of engineering, and its perfection may be probably confided to the new class of engineers of superior training and mathematical knowledge whom the Admiralty are educating for the services, and for whom Mr. Sennett's book is mainly intended."—*Times.*

"It seems to us that Mr. Sennett has succeeded remarkably well in carrying out the object he proposed. His book cannot fail to be useful to all who have to do with the practical working of marine steam-engines."—*Saturday Review.*

"The author's object was to provide a text-book for students of marine engineering, which might also be found useful by naval officers who desire to obtain a knowledge of the machinery in the vessels they may be appointed to command. For this purpose the work is well adapted." — *English Mechanic.*

"For the first time the students of marine engineering and naval officers have now within their reach a text-book on the most important subject that can come under their notice. Mr. Sennett's work is eminently practical." — *Broad Arrow.*

"By his method of arrangement, the author has succeeded in providing a text-book suitable for the use of students of marine engineering and of naval officers. To the latter class, who may be in command, it is almost indispensable."—*Iron.*

Compiled by Captain W. H. JAMES, P.S.C., late R.E. Price 2s 6d. To be obtained of all Booksellers, or from Messrs. HARRISON and SONS, Pall Mall, S.W.

2/- TEA OF EXTRAORDINARY QUALITY,

As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS

A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves.

COOPER COOPER and CO. sell their Teas for ready money only. They hav thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co., thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

SPECIAL ESTIMATES AND TERMS FOR CASH.

THE
GENERAL AGENCY AND EXCHANGE,
LIMITED,
VICTORIA HOUSE, 111 VICTORIA STREET, S.W.
(Corner of Francis Street, next door but one to the Army and Navy Co-Operative Society.)
TELEPHONE No. 3102.

Established in 1879, for the benefit of Members of the Army and Navy Co-Operative Society, but now open to the Public generally, HOUSE and ESTATE AGENTS, AUCTIONEERS, STOCK, SHARE, and MORTGAGE BROKERS, GENERAL AGENTS. The Electric Telegraph News Company has placed two of its Machines in the Company's Offices, whereby a continuous telegraphic record is obtained throughout the day of fluctuations in prices in every description of Stocks and Shares and of the latest General News. The information thus obtained is open to the use of all clients and Subscribers of the General Agency and Exchange, Limited. For those Clients desirous of purchasing or selling Stocks and Shares, their time, trouble, and expense of going into the City is saved, and instant execution of orders at the prices of the moment is ensured.

SALE and EXCHANGE ARTICLES of all KINDS, the same being placed on view at the Showrooms, thus leading to a more ready sale.

Monthly Sales by Auction are held, at which any articles remaining unsold may be disposed of, without additional expense to the sender.

The *Service News and General Agency and Exchange Circular*, published on the 15th of every month, is the best medium for Letting or Selling Property, and for those seeking Houses or Estates; also for the Sale or Exchange of Articles.

All information can be obtained on application to the Secretary, Major W. N. G. JOHNSON.

Army Service Corps—Head Quarters, Winchester House, St. James's Square, S.W.

It deserves to be noted that Sub-Inspectors of Army schools are now the worst paid officers in India. They have no prospects beyond pension, and the Government allows them no office allowance, although the clerical duties of their appointment necessitates the employment of a clerk, whose remuneration they have to meet from their scanty pay. Their English pay is exchanged at 2s. the rupee, and they get no addition in the shape of tentage, batta, gratuity, or other allowances, such as are included in the pay and allowances of lieutenants, ridingmasters, quartermasters, and paymasters. They are educated men, badly paid.

The Calcutta correspondent of the *Pioneer* writes:—"The rumour which a home paper has started about Sir Donald Stewart's meditated retirement from the appointment of Commander-in-Chief in India, owing to the state of his health, is not supported by the 'Chief's' appearance, for his Excellency never looked in better health. There is as much prospect of his retiring as of the Cathedral steeple moving to the James and Mary Sands."

Amusements.

The period before Easter is rarely marked by novelties in the dramatic world, and apart from morning performances, there is now little for critical commentary.

At Toole's Theatre, Mr. Byron's effective three-act drama of "Uncle Dick's Darling" has been advantageously revived. The piece was originally produced at the Gaiety, on December 13, 1869, when Miss Neilson represented the heroine, Mary Belton, Mr. Henry Irving acted the pompous Chevenix, and Mr. John Clayton the worthy blacksmith Joe. These parts are now effectively sustained by Miss Florence West, a young actress of decided promise, Mr. John Billington, and Mr. E. D. Ward. As Dick Dolland, the noble-hearted "Cheap Jack," Mr. J. L. Toole resumes his original character, and plays with more force and finish than ever. Mr. Horace Lennard's new farce, called "Namesakes," has proved a marked success; and in the musical farce, "Guffins's Elopement," Mr. Toole now obtains no less than six encores nightly for his quaintly humorous song, "The Speaker's Eye." The present programme is very attractive.

At the Olympic, Miss Geneviève Ward has revived for morning performance Mr. Charles Reade's one-act drama, now called "Nance Oldfield," first played at the St. James's Theatre, in March, 1855, under the title of "Art." Miss G. Ward effectively impersonates Ann Oldfield, the famous actress of the seventeenth century, formerly acted by Mrs. Seymour.

"The Silver King" was on Tuesday afternoon played at the Princess's before an audience exclusively composed of members of the histrionic profession, Mr. Wilson Barrett having gracefully issued invitations. On this occasion the general public was not admitted, and the crowds collected in Oxford Street to witness the popular favourites of the London stage pass into the theatre, would have more than sufficed to fill that night every play-house at the West-End.

A complimentary benefit to Mr. William Holland attracted a huge attendance to the Gaiety on Wednesday afternoon, a varied and attractive entertainment being given by some of the most popular members of the musical and dramatic profession. At the end of the farce of "Peacock's Holiday," Mr. William Holland made a concise speech, thanking the public on behalf of the directors of the Alhambra company, and announcing that the new edifice would be completed before Christmas.

Mr. F. C. Burnand's new three-act burlesque drama of "Bluebeard" will be brought out at the Gaiety on Monday evening, March 12.

Next week will close the career of "Dora" and "Love and Money" at the Adelphi, and end the managerial experiment of Mr. Charles Reade.

Certain structural alterations being required, the Lyceum Theatre will be closed from Monday, March 19, to the 23rd, inclusive. The morning performances of "Much Ado About Nothing" will be resumed on Saturday, March 24.

H.M.S. NEPTUNE.

A most extraordinary discovery has been made in connection with the Neptune, sea-going, full-rigged, first-class double turret-ship, at Portsmouth, and Mr. F. K. Barnes, Surveyor of Dockyards, was sent down from the Admiralty on Monday, to make an examination of the ship and report upon her condition. The Neptune was formerly named the Independencia, was purchased from the Brazilian Government in the spring of 1873 for £600,000 odd, and is of 9,310 tons displacement and 8,000 horse-power. On arriving at Portsmouth, her armament of Whitworth guns was changed to guns of the service pattern, her rigging and masts were altered, and numerous other departures from her original trim and equipment were made. She has never yet been in commission, but as it was intended to despatch her to strengthen the Channel Squadron, she was recently docked for the usual scrub down. This docking has been the means of disclosing a serious state of affairs as regards the condition of her hull. Below the water-line the vessel is sheathed with wood, upon which copper is fastened for the purpose of preventing fouling; but the sheathing appears to have been so imperfectly fitted, that the sea water has penetrated between it and the iron plating, so that galvanic action has set in between the copper plating and the iron skin. The heads of the iron bolts are eaten away, and, judging from the exudation of rusty water from all parts of the bottom through the copper, it would seem that the iron plating of the ship must be seriously affected. Nor is this all, for having settled down on the blocks, it was found that the ship was slightly "hogged," and it is probable that the keel-plates have, in parts, been seriously weakened when she was aground in the Thames. The Neptune is over-sparred, and, as the unanimous testimony of officers who took part in the bombardment of Alexandria is that the ironclads engaged would have been better without masts, it is probable that the masts of the Neptune will have to be removed, and that she will be converted into a seagoing turret ship for the defence of the Channel. The alteration would also improve her angle of vanishing stability, which is now 56 degrees.

SHIP'S STORES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The recent court-martial on the officers of the Clyde having given rise to a good deal of correspondence concerning the establishment of paint, &c., allowed to H.M.'s ships, may I, as an executive officer of many years' experience, express my opinion that the allowance is ample for all reasonable purposes, provided it is supplied punctually and applied by skilled hands. The first proviso, viz., "punctual supply," is a mere matter of detail, easily effected, with ordinary care to keep up stock in all the dockyards, especially in those abroad; but the second is a genuine want, felt especially in small vessels, which do not carry a painter. Every one knows that there is as much difference between paint well mixed and paint badly mixed, as there is between a blue-jacket's duff and a plum pudding compounded by the chef of a London club. Bad mixing is absolute waste, and is almost invariably the cause of the allowance proving insufficient. Most officers have their own particular recipe, but unless it is scientifically mixed and skilfully put on, they might as well, or even better, throw their paint overboard. Careful painting being essential to the preservation, as well as to the respectable appearance of Her Majesty's ships, I would suggest that all, however small, should have some person on board who understands the subject. This might easily be effected by allowing one of the crew (if possible, one of the carpenters) to qualify under the master-painter of the dockyard where the ship is fitting out, or at such other time and place as would be most convenient to the service) in all essentials for mixing and laying on paint, but not for fancy work. For this he might be given extra pay of 3d. or 4d. per diem—an allowance which, I feel certain, would be more than made up by increased efficiency and saving of waste.—I am, &c., CAPTAIN, R.N.

[Paint can now be procured ready mixed, of far better quality and cheaper, than the ingredients supplied to the Service by the Admiralty. We fear our correspondent has had but small experience of large ships, or he would not say their allowance was sufficient.—Ed. *A. & N. G.*]

Throat Irritation.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use Epps's Glycerine Jujubes. In contact with the glands at the moment they are excited by the act of sucking, the Glycerine in these agreeable confections becomes actively healing. Sold only in boxes, 7½d, tins, 1s 1½d, labelled "James Epps and Co., Homœopathic Chemists, London." A letter received:—"Gentlemen,—It may, perhaps, interest you to know that, after an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment) in almost all forms of throat disease. They soften and clear the voice.—Yours faithfully, Gordon Holmes, M.D., Senior Physician to the Municipal Throat and Ear Infirmary."

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, February 20, 1883.

The following returns show the total number of officers and men on the sick list, out of the entire Army of Occupation in Egypt, on February 16, 1883:—

	Total Force.	In Hospital.	Percentage.
Artillery, Cairo	843	86	10·2
Cavalry ,,	1,109	141	12·7
Engineers ,,	211	10	4·7
1st Brig. (Gen. Earle)	3,016	261	8·6
2nd do. (Gen. Graham)	2,922	236	8·1
Service Corps	813	47	5·8
	8,914	781	8·7
Alexandria	2,190	188	8·6
Ismailia	95	8	8·4
	11,199	977	8·7
Officers	364	19	5·2
Men	10,835	958	8·8
	11,199	977	8·7
Horses	2,216	159	7·2
Mules	712	14	1·9
	2,928	173	5·9

The above figures show a continued improvement all round, an improvement which we must not expect to continue. An average of 8 to 8½ per cent. in hospital is, under all the circumstances, as much as can be hoped for during the present, perhaps healthiest season of the year. In a month, the trying *khamseem* winds will commence, and the weather until next October will be trying, so that the present low sick list can hardly be hoped for. The returns of the Cairo hospital give one rather significant result. The average entries into hospital for the first eighteen days of February are 23, and that these are pretty regular may be seen from the fact that, with the exception of one day, the highest recorded entry is 30, and the lowest 10, but on that one day, which happened to follow two exceptionally warm days, the entries were 55. Those two days were certainly not as severe as we may expect to have for six months at a stretch, and it is useless to close our eyes to the lesson which the fact teaches. I consider that a grave mistake is being committed in keeping so large a force at Cairo. During a considerable portion of the summer, the capital is vacated by all Europeans, except those whose avocations compel them to remain; they are generally persons who are able to remain indoors in their houses or offices during the greater part of the day, and existence is only bearable by keeping the buildings closed thoughout the heat of the day. Large numbers of soldiers cannot live under these conditions. On the other hand, Alexandria is comparatively healthy; it is, moreover, far more necessary to impress the rabble of the seaport with a sense of our power than the quiet Cairene. Everything points to Alexandria as the proper place for the greater portion of our force. Is that the reason it is kept in Cairo? Another mistake, both political and sanitary, is that other portions of the country have not been occupied temporarily by our troops. Towns like Damietta, Tantah, Zagazig Mansourah, Zifta form great centres; and though there is little disaffection, the presence of a few companies would do much to restore confidence both among natives and Europeans, for, as a general rule, it may be said in favour of "Tommy Atkins" in Egypt, that the more he is known, the more he is liked, and, battle-fields apart, the less he is feared. So much for the political effect. In a sanitary sense, the change could hardly fail to be beneficial to the troops. During all but the hot summer months, the villages (as they are called) are always the healthiest part of Egypt, and even in summer many of them are better than Cairo. But, besides this, mere change of air, which is always a valuable specific, is particularly so in Egypt. An unhappy youth who was once going up to Khartoum, made inquiries as to the climate from one who had been there. "Well," was the encouraging reply, "if you change your house every week, you run a very good chance of living several months." In this pessimist view of the climate of Upper Egypt, there was at least this grain of truth, that frequent change, even from one part of a town to another, gives you a better chance of health, and a change from Cairo to the healthy smaller towns of Lower Egypt, would, *a fortiori*, be beneficial. To sum up, the worst climate in Lower Egypt during the summer is Cairo. The quietest part of Egypt is Cairo, and from these two data, the advisability of keeping nearly all our troops there is not obvious. Of course, the change would involve expense and trouble. As to the former, I would say that Tommy Atkins is valuable material, and, looking at it from a pecuniary point of view only, should not be wasted. As to the latter, I do not think that the chiefs of the "Army of no occupation" need grudge it. It will be noticed from the above sick returns that the mules have gone off strike, and are again up to the mark. The following are among the officers returned as sick on February 18:—

Name and Regiment.	Illness.	Date of Entry.
Capt. Mowbray, Royal Highlanders	Phthisis, Pul.	Jan. 2, 1883.
Capt. Griffiths, Highland L.I.	Cong. of Liver	Jan. 9, ,,
Lieut. Scott Elliot, Cam. Highlanders	Enteric Fever	Jan. 11, ,,
Capt. Allsopp, Royal Artillery	Enteric Fever	Jan. 14, ,,
Lieut. Burney, Berks	Enteric Fever	Jan. 19, ,,
Capt. Cautley, South Staffordshire	Enteric Fever	Jan. 23, ,,
Surg. Osborne, A.M.D.	Enteric Fever	Feb. 1, ,,
Capt. Mortimer, A P.D.	Pl. Pneumonia	Feb. 5, ,,
Capt. Harden, Sussex	Bronchitis	Feb. 9, ,,
Lieut. Enthoven, R.A.	Enteric Fever	Feb. 12, ,,
Rev. Male, A.C.D.	Pneumonia	Feb. 13, ,,
Major Darley, South Staffordshire	Dislocation	Feb. 16, ,,
Lieut. M'Cracken, Berks	Simp. Contd. F	Feb. 17, ,,

The military news from the Soudan is not reassuring. How far the facts are understood in England, I do not know. I have myself the smallest possible opinion of British intelligence as regards what are somewhat generally classed as "foreign parts." I should not be surprised to learn that the general opinion in England was that the Soudan was "a province of Egypt beyond Cairo." I am, therefore, going to adopt a very rough-and-ready method of giving a faint idea as to what "the Soudan question" really means. I have before me a map measuring exactly two feet four inches in length (not including the margin. Of these 28 inches, one inch and a half represent the Mediterranean coast, another inch and a half the distance from the sea to Cairo, seven inches more south bring you to the second cataract—the limit reached by the traveller who goes "up the Nile,"—and the remaining 18 inches represent the rest of Egyptian territory vaguely defined as the Soudan. To define it somewhat more precisely, and yet roughly, a straight line from the sea to Egypt's southern boundary would measure 2,000 miles, half-way along which is Khartoum.

In two forts south of Khartoum, named Baru and Obeid, were, until recently, about 6,000 Egyptian troops, hemmed round by about three to four hundred thousand rebels armed with swords and spears. At Khartoum were, and still are, about 10,000 Egyptian troops under a General who has previously held the responsible position of Master of the Ceremonies to the Khedive. There is no particular reason to suppose that the 10,000 were burning to relieve the 6,000: but even if they were, the fact that the rebels had filled up all the wells between Khartoum and the two forts made it impossible until the beginning of the rainy season in April. The 6,000 had, therefore, to do the best they could for themselves, and they have done it, by making an unconditional surrender. Colonel Hicks and seven English officers have now been sent to Khartoum to assist their Master of the Ceremonies, or rather, his successor, a certain Albanian, named Alaiddin Pasha, who is to replace him. What the result will be, it is difficult to say. While some are cheerful, and say that the presence of English officers will work wonders, others take a gloomy view, call the whole thing a mistake, say that the Soudan has to be reconquered, and that Egyptian soldiers cannot do it. England, however, is very determined. "The Soudan does not enter into the sphere of our operations." Clearly not; but suppose Egypt, which is the "sphere of our operations," enters into the Soudan. What then? May the Egyptian Army claim a corner in the *Gazette?* Under Sirdaar Evelyn Wood are two brigades, the one containing English officers, the others purely Egyptian. In command of the former is General Grenfell, 60th Rifles, late A.A.G. The brigade numbers four battalions, the first under Chermside, of the R.E., with Turner, of the 53rd, as second-in-command; the second, under Holled Smith, of the 60th Rifles, with Marriott, of the Marines, as second. Colonel Shakespeare, not yet arrived, commands the third, which is meanwhile in charge of Captain Haggard, of the King's Own Borderers; the fourth is, I believe, to be formed under Captain Hallam Parr. Besides these, Colonel Taylor, of the 19th Hussars, commands the Cavalry, and Colonel Duncan, R.A., the Artillery. A few days ago, there was a great *tamasha* in the parade-ground at Abbassiyeh, 3,000 troops were drawn up forming three sides of a square, looking wonderfully well for young recruits. Into the middle of them rode the Sirdaar, from the ranks was singled out one unhappy private named Osman, and then Osman, looking very sorry for himself, and thinking his last hour was come, was placed in the middle of the square. On to a rostrum mounted Sirdaar Sir Evelyn, three interpreters stood round him to bawl his translated utterances to the three sides of the square. The miserable delinquent, Osman, had been guilty of tendering a bribe of £9 to the medical officer who examines recruits, the desire of the said Osman being that, in consideration of the said sum, the said doctor should declare the said Osman unfit for service. Did the doctor spurn the bribe? No, "Siamo in Egitto!" and he was an Egyptian; he pocketed the £9, and declared the recruit fit to serve. *Hinc illæ lachrymæ!* The offence being duly recounted, Sirdaar Sir Evelyn expatiated on the enormity of the offence from an English point of view; flung the astonished recruit his £9, and then ordered him under arrest for bribing an official. No wonder the soldiers went away with a cheer; this is the sort of justice they can understand. Said an old Egyptian to me, "Have you any more Sir Evelyn Woods? We could manage with a dozen!"

Major-General the Hon. J. C. Dormer, having obtained leave of absence from the 17th to the 25th inst., has gone up the Nile. Lieutenant-Colonel Ardagh, D.A.A.G., has gone to Alexandria on duty. Assistant-Commissary-General Ronald Taylor has left for Ceylon. Captain H. G. Newcombe, R.A., is appointed Brigade-Major, R.A. Captain A. B. Green, R.E., is appointed Brigade-Major, R.E. The (53rd) 1st Battalion Shropshire L.I. have left for Malta. The 7th Dragoon Guards, and No. 12 Company, Commissariat and Transport Corps, leave to-morrow. Surgeon-Major Rogers, having arrived from England per H.M.S. Tamar, is posted to the Cairo district for duty. Leave of absence in extension is granted to Surgeon-Major Walsh, A.M.D., from February 8 to date of embarkation for Egypt; and Surgeon Addison from February 4 to May 3, on medical board.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

We have had splendid weather during the week, which has been fully taken advantage of for out-door exercises, especially route-marching. This latter exercise will be discontinued in a few days, when spring drills will be commenced. There is every sign of an early spring, and should the weather continue favourable, some divisional parades in the Long Valley may soon be looked for. As a drill-ground, the Long Valley proper is much improved by wet weather, and is in a better state for manœuvres immediately after much rain than at any other time, being then free from dust, and the sandy soil cool and firm to the tread. It is the adjacent commons, moors, and bottoms which become morasses, and the various approaches to the Long Valley almost impassable, after continuous rains. Several cases of diphtheria have occurred in the Permanent Barracks. The patients have been removed to an isolated building, and the most stringent measures taken to prevent the spread of this fell disease. The next examinations in Part II. of the Musketry Syllabus of November last, for troop and company certificates, will be held on the 28th inst. and subsequent days. The names of all officers and non-commissioned officers desirous of being examined are to be forwarded to the Deputy-Assistant-Adjutant-General for Musketry by Monday next. The following officers commenced a course of garrison instruction here on the 1st inst.:—No. 1 Class, Major Miles, Garrison Instructor, West Infantry Barracks—Captain Peckham and Lieutenant Paterson, 3rd Hussars; Captain Holland and Lieutenant Pocklington, 15th Hussars; Lieutenant Doyle, 85th; Captain Whalley, 39th; Captain Railston and Lieutenants Thuillier and Fetherstonhaugh, 26th; Captain Bowles, Rifle Brigade; Captain Stokes, 83rd; Captain Spurgin, 21st; Lieutenant Barry, 87th. No. 2 Class, Major Anstruther, Garrison Instructor, South Camp—Lieutenant Lysons, V.C., 90th; Captain Hannay, 93rd; Lieutenant McCalmont, 6th; Captain Hogarth, 25th; Lieutenant Stoughton, 14th Hussars; Lieutenant Davis, 96th; Lieutenants Lynch and Bray, 66th; Captain Garfit, 67th; Captain Le Marchant, 39th; Captain Cotton, 99th; Captain Dickenson, 60th. Assistant-Commissary-General E. Grattan, commanding the Transport Companies, is under orders for Jamaica. Captain K. R. Todd and Lieutenant H. G. C. Swayne, R.E., are under orders for Egypt and India respectively. Lieutenant A. E. Sandwith, R.E., proceeded to the School of Musketry, Hythe, on the 1st inst. Surgeon-Major Maunsell, A.M.D., and Captain of Orderlies Joseph have arrived here for duty. It has been notified by the Secretary of State for War that pensioners temporarily employed as hospital stewards, compounders, &c., are entitled to lodging, fuel, and light allowances, at the rates allowed for non-commissioned officers, 2nd class; and no allowances are in future to be issued to men appointed to such temporary employment, without the special sanction of the Secretary of State for War in each case. Several patterns of a new brass valise device are now being tried by regiments here, and will shortly be reported on. They are intended as distinguishing symbols for regiments, under the Territorial system, and are affixed to the back of the valise, in the same manner as the old numerals. This is an improvement on the present mode of marking the valises by stencilling. Detachments, consisting of one corporal and four privates, of the Commissariat and Transport Corps, and two serjeants and 16 privates, A.H.C., left the Camp on Friday, to embark at Portsmouth Dockyard, in the Nepaul, for Bermuda and Barbadoes. The first detachment of Foot Guards at the Camp this season—consisting of 15 officers and 150 men—arrived on Wednesday last, for musketry practice. They are quartered in the North Camp, and attached to the 3rd Brigade. The weather being now in every way suitable for such sport, the Divisional Drag Hounds met on Monday at Guildford Park Farm, and on Thursday at Well. The Beagles of the 87th were also out twice during the week. The following officers commenced a course of instruction at the Army Veterinary School, on the 1st inst.:—Lieutenant-Colonel Eardley-Wilmot and Major Home, Bengal Infantry; Captain Lloyd, Bengal S.C.; Lieutenant J. Oswald, 16th Lancers; Major G. C. H. Parlby, Captain J. E. Josselyn, and Lieutenant C. H. Blount, R.A.; Captain G. Winter, 26th; Captain A. Dumaresq, Commissariat and Transport Staff; Major P. Aubertin, 2nd Dragoon Guards; and Lieutenant C. W. W. de V. Beauclerk, 15th Hussars. Major Kirkpatrick, 84th Regiment, has been appointed to the Adjutancy of a Volunteer battalion. No war games were played during the week. It is not probable that there will be any more of these divisional exercises in minor tactics for the present, the classes of Garrison Instruction having commenced. Lieutenant Viscount Cranbourne, Herts Yeomanry Cavalry, joined the Auxiliary Cavalry Class on the 1st inst. Lieutenant F. Houlton, North Somerset Yeomanry Cavalry, has been excused attendance at the present class. It is high time we had a new post-office at Aldershot Camp. The portion of a hut at present used for this purpose, in K lines, South Camp, is most unsuitable, and much too small, half the building being occupied as private quarters by the Postmaster. Much additional labour has been thrown on this office lately by the new regulations for the payment of pensions. Scores of pensioners in Government employment at the Camp draw their pay here. The Money-order Office is an ill-lighted, ill-ventilated den, and it must be injurious to health to be employed in it. The Telegraph Office is just as bad, if not worse, and is always in a very dirty state, as, indeed, are all the offices. Even the one letter-box is not what it should be, being evidently not large enough. A few days ago, a short time before the evening clearance, the box was so full that a letter was with difficulty thrust into it, and any person so minded could easily have helped himself to as many letters as he pleased, the orifice being wide enough to admit of this being done. The want of room, and the bad light and ventilation, may, perhaps, account for the absence of ordinary activity on the part of the officials. Those who do much business at the Camp Post Office would need to be blessed with a good stock of patience. The following detail proceeded to the School of Musketry, Hythe, on the 1st inst., for a course of instruction:—3 serjeants, 15th Hussars; Lieutenant F. Healy and 4 serjeants, 39th; 3 serjeants, 85th; Lieutenant Lowry and 3 serjeants, 84th; Lieutenant C. S. Kincaid, 87th. Football matches are in full swing here just now, some corps using Rugby rules, others Association. Indeed, the 87th Fusiliers play this game in a manner peculiar to themselves, and which is more Irish than nice. On Monday, a match was played between the officers of the Royal Engineers and those of the 84th, on the ground between the two Camps, which is now in fine condition. The game was hardly contested, and finally won by the Scientific Corps. At the Divisional Steeplechases, on the 12th and 13th prox., the Aldershot Steeplechase, of 75 sovs., added to a sweepstakes of 5 sovs. each, 2 sovs. forfeit, for hunters, the property of, and to be ridden by, officers, is open to officers of the Army and Navy on full pay or Staff employ. This is the only race open to the Army at large, and comes off on the second day. The following officers have been examined in subjects (*c*) and (*d*), for promotion, in accordance with Sec. 4, Para. 28, Q.R., and have been found qualified:—For the rank of Major:—Majors F. W. Hemming, 5th D.G.; C. Egerton, 39th Dorset Regiment; V. S. Bagot, 3rd Rifle Brigade; Captains A. Browne, R.H.A.; W. H. N. Locke, 1st Battalion 15th Yorkshire Regiment; J. D. Coghlan, Commissariat and Transport Staff; H. H. Prior, 100th Leinster Regiment; C. D. Cooper, 103rd Royal Dublin Fusiliers; C. R. Prideaux-Brune, 3rd Rifle Brigade. For the rank of Captain:—Lieutenants P. B. Hanham, K. Montgomery, and E. A. Fanshawe, R.A.; and G. N. A. Proby, 103rd Royal Dublin Fusiliers.

THE EGYPTIAN EXPEDITION.

The following copy of Treasury Minute, dated Feb. 17, 1883, was on Wednesday issued as a Parliamentary paper:—"The Chancellor of the Exchequer states to the Board that her Majesty's advisers have had before them estimates of the cost of the Egyptian Expedition to the Imperial and also to the Indian Exchequer. From these estimates it would appear that the charge for Army services to the Imperial Exchequer is about £1,640,000, of which £900,000 has been voted already, and that in like manner the charge for Navy services is about £1,776,000, of which 1,400,000, has been already voted. Thus the total charge for the Imperial Forces is about £3,416,000, of which £2,300,000 has been voted already, leaving about £1,116,000 to be provided, of which £1,078,000 will come into course of payment before the close of the current financial year. The charge to the Indian Exchequer is estimated by the Government of India at £1,142,000. The Chancellor of the Exchequer is of opinion that provision should be made for the Imperial expenditure under the form of supplementary estimates to be presented by the Secretary of State for War and the Lords of the Admiralty respectively. He states further that her Majesty's advisers have decided to ask Parliament to grant £500,000 during the current financial year, as a contribution towards the charge incurred by the Government of India in conducting its share of the expedition. A further sum of £30,000 is included in the Admiralty estimate as the cost of transporting Indian troops back to India. He recommends that a letter should be written to the Secretary of State for India in Council, intimating to him the decision of her Majesty's advisers, and stating the manner in which it is intended to give effect to that decision. My Lords take note of the communication made to them by the Chancellor of the Exchequer, and they desire that an estimate be prepared for presentation to the House of Commons for a vote of £500,000, in the year ending March 31 next, as a contribution in aid of the expenditure incurred by the Government of India upon the Expedition to Egypt. This vote will be accounted for by the Treasury."

A supplementary estimate was issued on Wednesday of £728,000, being the further amount that will be required in the current financial year to meet the expenses of the expedition to Egypt.

THE OPERATIONS IN EGYPT.

GRATUITIES TO THE ARMY AND NAVY.

The following important special War-Office Circular has just been issued respecting the gratuity to be given to the troops on the termination of the operations in Egypt:—

1. A gratuity will be issued to the European troops engaged in the recent operations in Egypt. Every officer, warrant officer, non-commissioned officer, and private who landed in Egypt between July 16 and September 14, 1882 (both dates inclusive), will be entitled to participate in the grant.

2. The gratuity will be issued according to the rank or relative rank of the recipient upon the scale shown in the list herewith.

3. The amounts due to officers will be paid to them by the agent of the corps or department to which they belong, and charged against the public in his accounts, the charges being supported by a certificate, signed by the officer commanding the corps or department, that each officer was actually in Egypt between the dates in question.

4. Warrant officers, non-commissioned officers, and men will be settled with by the paymaster or other officer paying the corps or battalions with which they were serving in Egypt, the charge being supported by a similar certificate to that required in the case of officers, and by proof of payment.

5. Each paymaster and other accountant will transmit to the War Office, as soon as may be practicable, a list of such warrant officers, non-commissioned officers, and men as may be entitled to the grant, but whom he is unable to settle with, owing to death, discharge, transfer to the Reserve, or any other cause.

Table for Distribution of Gratuity on Termination of Operations in Egypt.

1. Staff.—General, amount of gratuity, £1,000; Chief of the Staff, £500; Lieutenant-General, £304; Major-General, £152; Brigadier-General, £114; Deputy-Adjutant and Quartermaster-General, £102; Colonel on the Staff, £102; Military Secretary, £102; Deputy-Judge-Advocate-General, £114; Assistant-Adjutant and Quartermaster-General, £34; Brigade-Major, £24; Deputy-Assistant-Adjutant and Quartermaster-General, £24; Aide-de-Camp, £24; Staff Captain, £24; Staff Lieutenant, £15.

2. Regimental.—Colonel, Lieutenant-Colonel Commanding, and Lieutenant-Colonel, amount of gratuity, £34; Major, £32; Captain, £24; Lieutenant, £15; Riding-master and Quartermaster, £24—if less than 10 years' service, £15.

3. Departmental.—Chaplains' Department—1st Class Chaplain, amount of gratuity, £34; 3rd Class Chaplain, £32; 4th Class Chaplain, £24. Commissariat and Transport—Commissary-General, £152; Deputy-Commissary-General, £34; Assistant-Commissary-General of over five years' service as such, £34; Assistant-Commissary-General, £32; Deputy-Assistant-Commissary-General, £24. Medical—Surgeon-General, £152; Deputy-Surgeon-General, Brigade-Surgeon, Surgeon-Major (after 20 years' service), £34; Surgeon-Major, £32; Surgeon, £24. Ordnance Store Department—Commissary-General, £152; Deputy-Commissary-General, £34; Assistant-Commissary-General, £32 and £34; Deputy-Assistant-Commissary-General, £24. Veterinary Department—Principal Veterinary-Surgeon, £34; Inspecting Veterinary-Surgeon, £32; First-class Veterinary-Surgeon, £24; Veterinary-Surgeon, £15. Pay Department—Chief Paymaster, £34; Staff Paymaster, £32; Paymaster, £24.

4. Warrant Officers, Non-commissioned Officers, and Men.—Warrant Officers, amount of gratuity, £8; Staff Serjeants, as under—Quartermaster-Serjeant, Serjeant Instructor of Musketry, Serjeant Instructor of Fencing, Serjeant Instructor of Gunnery, Armourer Serjeant, Paymaster Serjeant, Orderly-room Serjeant, Farrier Quartermaster-Serjeant, 3rd Class Master Gunner, 2nd Class Staff Serjeants (Ordnance Store Corps, Commissariat, and Transport Corps), Staff Serjeant Army Hospital Corps, £6; Colour-Serjeants, Battery Serjeants-Major, Troop Serjeants-Major, Company Serjeants-Major, 3rd Class Staff Serjeants (Ordnance Store Corps, Commissariat and Transport Corps), £5; Serjeants, Artificers having that rank, £4; Lance-Serjeants, Corporals, Bombardiers, Second Corporals, Artificers ranking as Corporals, £3; Lance-Corporals, Privates, Boys, Drummers, &c., Artificers not holding higher rank, £2.

The following special Circulars have been issued by the Admiralty and the War Office, in regard to the gratuities awarded to the officers and men of the Naval and Military Forces that took part in the recent operations in Egypt:—

Admiralty, March 1, 1883.

Sir,—I am commanded by my Lords Commissioners of the Admiralty to enclose for your information and guidance a list of the ships, to the officers and crews of which, while engaged in the operations in Egypt, between the dates specified in the enclosures, my Lords approve the payment of special gratuities.

2. The scale of payment for each rank or rating is shown in enclosure A (Parts I. and II.), and my Lords desire that immediate payment be made accordingly to each person now on board her Majesty's ship under your command, who served on board either of the ships specified in enclosure B, within the periods named, or who formed part of the Marine Battalion serving on shore. The fact of men and others having so served is to be substantiated by inspection of their certificates, on which are to be noted "Egyptian grant paid." No remittances are to be forwarded to men who may not be actually on board her Majesty's ship under your command.

3. These payments are, if practicable, to be made before March 31, 1883, and the payments are to be supported by lists in the enclosed form C, and verified by the signatures of the officers and men.

4. The payments are to be shown in the cash accounts for the month of March, 1883, classified under Vote 1 G.G.

5. You are to report by telegram on the 31st inst. to the Accountant-General of the Navy the total amount (in pounds) paid by you to that date under these instructions.—I am, Sir, your obedient servant,

The Commanding Officer, H.M.S. ——. G. Tryon.

A.—Part I.

Scale for officers and men employed afloat.—Commander-in-Chief, £923 7s.; other flag officers (each), £230 17s.; captain (except such as were employed for transport service), £114 6s.; commander (except such as were employed for transport service), £57 3s.; lieutenant commanding, staff captain or staff commander commanding, and navigating lieutenant commanding, £38 2s. each; inspector-general or deputy-inspector-general of hospitals and fleets when embarked with a fleet, inspector of steam machinery afloat when embarked with a fleet, staff captain, secretary to Admiral of the Fleet or Commander-in-Chief, paymaster-in-chief, in the event of such officer being employed afloat, £22 10s. each; senior lieutenant of a rated ship, not bearing a commander under the captain, staff commander, fleet surgeon, paymaster over 15 years' seniority, chief engineer over 15 years' seniority, secretary to an admiral or to a commodore first-class not commanding-in-chief, £17 10s. each; lieutenant, navigating lieutenant, captains of Marines (Artillery or Light Infantry), whether having higher brevet rank or not, staff surgeon, secretary to commodore second class, paymaster under 15 years' seniority, chief engineer under 15 years' seniority, chaplain, £15 each; lieutenant or quartermaster of Marines (Artillery or Light Infantry), naval instructor, sub-lieutenant, chief gunner, chief boatswain, chief carpenter, surgeon, navigating sub-lieutenant, assistant-paymaster-in-charge, assistant-paymaster, engineer, assistant-engineer, gunner, boatswain, and carpenter, £10 each; midshipman, pilot, clerk, master-at-arms, chief gunner's mate, chief boatswain's mate, admiral's coxswain, chief captain of the forecastle, chief quartermaster, chief carpenter's mate, chief yeoman of the signals, skilled chief carpenter's mate, naval schoolmaster, chief torpedo artificer, chief engine-room artificer, head schoolmaster, writer, first, second, and third class, old system, ship's steward, first, second, and third class, writer first class, new system, engine-room artificer, ship's cook old system, ship's cook first class, chief bandmaster, and all chief petty officers, serjeant-major and quartermaster-serjeant of Marines (Artillery or Light Infantry), £6 each; naval cadet, assistant-clerk, ship's corporal, first and second class, gunner's mate, boatswain's mate, captain's coxswain, captain of the forecastle, quartermaster, yeoman of the signals, coxswain of the launch, captain of the maintop, captain of the foretop, captain of the quarter-deck men, captain of the hold, sailmaker, ropemaker, carpenter's mate, caulker, skilled carpenter's mate, torpedo artificer, blacksmith, armourer, plumber, painter (1st class), leading stoker, sick-berth steward, ship's cook (2nd class), bandmaster, tindal and head krooman in rated ships, and all first-class petty officers, serjeant of Marines (Artillery or Light Infantry), £5 each; coxswain of the barge, coxswain of the pinnace, captain of the mast, second captain of the forecastle, second captain of the maintop, signalman, second captain of the foretop, second captain of the quarter-deck men, captain of the mizzentop, sailmaker's mate, coxswain of the cutter, skilled shipwright, cooper, caulker's mate, painter (2nd class), plumber's mate, writer (2nd class—new system), musician, sick-berth attendant, and persons acting as such in ships where this rating is not allowed, tindal and head krooman in other than rated ships, and all second-class petty officers, leading seamen, corporal of Marines (Artillery or Light Infantry), £3 10s. each; shipwright, stoker and coal trimmer, yeoman of store-rooms, second captain of the hold, 2nd and 3rd class signalmen, sailmaker's crew, blacksmith's crew, tinsmith, armourer's crew, carpenter's crew, carpenter's crew (2nd class), plumber's crew, writer (3rd class, new system), stoker (2nd class), cooper's crew, able seaman, bandsman, tailor, shoemaker, butcher, lamp trimmer, flag-officer's steward, cook, and domestic, captain's steward, captain's cook, ward-room steward, ward-room cook, ship's steward's assistant, ordinary seaman, dock and victualling-yard apprentices, second-head krooman and second tindal, private of Marines, drummer and bugler of Marines (Artillery or Light Infantry), gunner of Marine Artillery, gun-room steward, gun-room cook, assistant-sick-berth attendant, engineer's cook, engineer's servant, captain's servant, commander's servant, secretary's servant, warrant officer's cook, cook's mate (old system), cook's mate (1st and 2nd class), barber, bandsman (2nd class), ordinary seaman (2nd class), ward-room servant, captain's cook's assistant, ward-room cook's assistant, ward-room officer's servant, gun-room servant, warrant officer's servant, and all 1st, 2nd, and 3rd-class domestics, seedie, krooman, ship's steward's boy, signal boy, band boy, boy writer, boys (1st and 2nd class), £2 each.

Part II.

Scale for Royal Marine Battalion serving on shore.—Lieutenant-colonel, £34; major, £32; captain having higher rank by brevet, £28; captain, £24; first lieutenant, £15; second lieutenant, £13; staff serjeant, £6; brigade and colour-serjeant, £5; serjeants, £4; bombardier and corporal, £3; gunner, R.M.A., private, drummer, bugler, &c., £2 each.

B.

List of ships engaged in operations in Egypt.—Achilles, July 12 to Sept. 14; Agincourt, July 16 to Sept. 14; Alexandra, July 11 to Sept. 14; Beacon, July 11 to Sept. 14; Bittern, July 11 to Sept. 8; Carysfort, July 20 to Sept. 14; Chester, July 16 to Sept. 14; Cockatrice, Aug. 26 to Sept. 14; Condor, July 11 to Sept. 14; Coquette, July 11 to Sept. 14; Cygnet, July 11 to Sept. 14; Decoy, July 11 to Sept. 14; Dee, Aug. 7 to Sept. 14; Don, Aug. 7 to Sept. 14; Dragon, July 11 to Sept. 14; Eclipse, July 24 to Sept. 14; Euphrates, Aug. 6 to Sept. 1; Euryalus, July 22 to Sept. 14; Falcon, July 28 to Sept. 14; Hecla, July 11 to Sept. 14; Helicon, July 11 to Sept. 14; Humber, July 11 to Sept. 14; Inconstant, July 19 to Sept. 14; Inflexible, July 11 to Sept. 14; Invincible, July 11 to Sept. 14; Iris, July 11 to Sept. 14; Malabar, July 23 to Sept. 9; Minotaur, July 15 to Sept. 14; Monarch, July 11 to Sept. 14; Mosquito, July 11 to Sept. 14; Northumberland, July 16 to Sept. 14; Orion, July 25 to Sept. 14; Orontes, July 18 to Sept. 14; Penelope, July 11 to Sept. 14; Ready, July 11 to Sept. 14; Ruby, July 25 to Sept. 14; Salamis, July 16 to Sept. 14; Seagull, July 11 to Sept. 14; Seahorse, Sept. 5 to Sept. 14; Sultan, July 11 to Sept. 14; Superb, July 11 to Sept. 14; Supply, July 22 to Sept. 14; Tamar, July 17 to Sept. 14; Temeraire, July 11 to Sept. 14; Thalia, Aug. 19 to Sept. 14; Tourmaline, July 20 to Sept. 14; Wye, Aug. 18 to Aug. 31.

SURGEON-MAJOR THORBURN'S CASE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I beg you will give insertion to what follows, in the interests of justice. I found myself convicted of turf dishonesty in November, 1881, on secret evidence. The race took place in the preceding August. I tried in vain at the time to discover what the nature of the evidence was. I took every step possible, both as a civilian and as a military man, to clear my character during the seven months the matter remained unnoticed by the military authorities. When they did take action, the following correspondence took place, which I enclose. After sending in my defence, I was ordered home on duty, but insisted on a court of inquiry, as this was the first opportunity I had of clearing my character, and of facing this secret evidence on which the Commander-in-Chief had acted. A court of inquiry was then ordered, and after some nine day's thorough investigation, during which time the alleged money connection between me and the supposed misconduct of the rider of my pony, was proved to have been wrongly represented to the Calcutta Turf Club by the secretary, and the misconduct of the rider was allowed by the court not to be established. The court exonerated me fully; each member of it shook hands with me at its conclusion. The president asked me whether I would like him to write to Calcutta, to have the sentence reversed. But I thought it best that the Commander-in-Chief should himself publicly exonerate me. The president remarked that he would not hear any one accuse me of dishonourable conduct in his presence. I heard no more of the affair for two months after this court, when I received a registered confidential letter from Simla, stating that Sir Donald Stewart considered, from reading it, that the same evidence convicted me which the five members of the court who patiently heard the evidence held to completely exonerate me. This letter contained my travelling orders to start immediately for England, and also the information that the papers relating to the case had all been sent home. On arriving in England, I was informed by the Director-General, Army Medical Department (who shook hands with me, and said that he would not do so if he thought me guilty), that the fiat of the Commander-in-Chief in India was final, and that I must retire from the service, and that there was no use in doing anything, as the case was closed. On his advice I applied for half-pay, and I appealed to the Duke of Cambridge, who "permitted me to retire on a gratuity." I appealed to the Secretary of State for War, when I received the following letter:—

"Army Medical Department, War Office, Jan. 16, 1883. —Sir,—With reference to previous correspondence, I am directed to inform you that your case, having received the fullest consideration, the Secretary of State has decided that you cannot be allowed to withdraw your application to retire, and that, consequently, your retirement from the service on a gratuity of £2,500 will be notified in an early *Gazette*. I am to add that the only alternative to your retirement in the above manner, would be removal from the service.—I have the honour to be, Sir, your obedient servant, T. CRAWFORD, D.G.

"Surg.-Major D. A. S. Thorburn, A.M.D."

I wish now to make public the fact, on which I think the case hinges, that the official action taken against me was taken in consequence of the submission to the Commander-in-Chief of a Calcutta Turf Club report, which I was falsely accused by the Calcutta Turf Club of "drawing up" ("forgery"). This document was introduced to the Court thus:—Question by the Deputy-Judge-Advocate: "Did you ever see the document which, in your letter of Jan. 27, you described as the report of the Calcutta Turf Club before that document was forwarded to you from Army Head-quarters with the Adjutant-General's Memorandum, No. 1,199, dated Jan. 23, 1882? How did you come to describe it as the Calcutta Turf Club report?" Answer by Gen. Cureton: "I had never, to the best of my knowledge, seen it before. The letter came from the Surgeon-General to the Adjutant-General, and I was directed to submit a report of the case. The whole of the paper is in one hand and forms one document, and bears the signature of Mr. Dickson. On this paper I am ordered to report, understanding from the signature it to be from the Calcutta Turf Club. I submitted a report regarding it as ordered. "Then when you wrote your letter of Jan. 27, 1882, you were conscientiously of opinion that the document in question emanated from the Calcutta Turf Club, and was their report?—Undoubtedly." I then asked Gen. Cureton when he first knew the document to be a forgery, and what he did for his sake and my sake when he found it out. He refused to answer. I felt sure there was something wrong, as the Deputy-Judge-Advocate had informed me before the court sat that the document was allowed to have been written by the Lucknow stewards. And I accordingly stated, in my report on the proceedings of the court to the Commander-in-Chief, that Gen. Cureton had aided and abetted a "forgery" unintentionally, if he could prove it so. As I believe this statement influenced Sir D. Stewart's "confidential decision," I am justified in begging Dr. Crawford, D.G., to state publicly who wrote that document, of which Mr. W. Dickson, secretary of the Calcutta Turf Club, whose name is at the end of it, denies the authorship, in an official letter which I hold. Dr. Crawford forwarded it to the Commander-in-Chief, and now that I publicly call upon him, he is in honour bound to explain how this document was furnished, whose hand wrote it, and whether any of the Lucknow stewards were in any way connected with it; and also to inform me why I, a senior medical officer, who have been thanked by former Commanders-in-Chief in India for zeal, energy, and devotion to my work, who have been mentioned in despatches from Afghanistan, and whom Surg.-Gen. Clutterbuck stated, at the court of inquiry, he had never had to find a fault with, should be removed from the service, publicly disgraced, and utterly ruined, after having been exonerated by all the members of the only court who inquired into my case? If I have done wrong, why is it not stated, and why refuse a court-martial? I publicly call on the authorities to state a single fact against me. The head of my own department could not do so, who had the whole case in his office. He shook hands with me, and said he believed me innocent. I appeal to Englishmen and ask them whether Sir Donald Stewart has acted fairly to me in turning me out of the service by a confidential reversion of the opinion of five officers who for nine days carefully considered the case. I offered to stand cross-examination on all points at the court of inquiry,—I am, &c.,

DAVID ARNO SMET THORBURN,
late Surgeon-Major, A.M.D.

ARMY NOTES.

H.R.H. the Prince of Wales will, by command of the Queen, hold a Levée at St. James's Palace, on behalf of her Majesty, on Monday, March 12, at 2 o'clock.

The following letter, dated Horse Guards, War Office, S.W., February 15, 1883, has been addressed to the Commander of the Forces in Ireland:—"Sir,—During the last few years, throughout which very arduous, and in some cases very special duties have devolved on her Majesty's troops quartered in Ireland, his Royal Highness the Field-Marshal Commanding-in-Chief has not failed to observe with much satisfaction the uniform good conduct of officers and soldiers of all ranks; and has received from the civil authorities frequent testimony of the marked forbearance which the troops have exhibited under circumstances calculated to provoke acts of retaliation on their part, especially when employed on protection duty in aid of the civil power; a service to which his Excellency the Lord-Lieutenant in recently expressing his thanks, has alluded to in terms of the highest praise. Protracted service of such a nature has severely tested not only the general discipline of regiments under arms, but also the temper and disposition of the men, and the tact and discretion of the officers; and his Royal Highness is much gratified in being able to state that no instance has been brought to his notice of any officers or men having failed to carry out their difficult duties in a satisfactory manner. I am to request that you will make known the gratification of the Field-Marshal Commanding-in-Chief to the troops under your command, and inform them that his Royal Highness has brought their good service to the notice of her Majesty through the Secretary of State for War.—I have, &c. (signed), WOLSELEY, A.G."

The regimental savings' bank balances of officers promoted from the ranks serving in India, are to be remitted to England at the rate of 2s. 0½d. the rupee, on their transfer, whenever it may take place, from the Indian to the British establishment. So long as they are serving in India, any sums withdrawn from their savings' bank balances must be withdrawn in India and in Indian currency.

The most important measure likely to be brought before the Canadian Parliament by the Government this Session will, it is said, be an act to consolidate and amend the Militia laws.

It is understood that Col. J. V. Hunt, C.B., Deputy-Commissary-General, Bengal, will succeed the retiring head of his department, Col. Mylne.

Cols. R. A. Moore and C. E. Bates, of the Madras S.C., have been admitted to the colonel's allowance.

"Purchase Officer" writes:—"In your issue of February 10 appears a paragraph relative to the new regulations applicable to many senior officers desiring to commute the whole or part of their pensions for the education or getting out in the world of their children, and in another paragraph a list of officers who were captains under the Purchase system, and who were compulsorily retired with the rank of lieutenant-colonel at £259 per annum. This is a leaf out of the German book. The German officer is compelled before marriage to get a certain sum secured upon his wife, and as he gets as a lieutenant about £70 a year, and as a captain about £120, the deficiency has to be made up probably on her part; and as selection generally stops his promotion as captain or major (if he be without interest), for selection is favouritism in the broadest sense, we may expect to see many others presented with the barren rank, and sent off with the annual sum you mention. Had the value of the commission been paid in full at the time of the abolition of Purchase, and the difference (about £1,200) in grades from colonel to captain not been withheld, there would have been no necessity for any humiliating declaration having to be made, and there would have existed no grievance of any sort. Why not remedy the mistake towards, and promulgate the future conditions of retirement for the information of men about to commence?"

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS. —The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

Reviews.

◆

Colburn's United Service Magazine.—With the reduction in price from half-a-crown to a shilling, this oldest of magazines shows every sign of renewed vitality, as its articles on military and naval subjects seem to become more interesting and valuable each number that appears. In the one for the present month, there is an excellent paper on the French Navy. The authentic and very entertaining "Records of the Household Cavalry" are continued; a very readable and romantic story, "For a Woman's Sake," begins; and another instalment of the biographical sketch of Robert Surcouf appears. We have only room for an extract or two from the records of the Life Guards, who a couple of centuries ago seem to have had a pretty lively time of it, between escorting Royalty over bad roads, conveying treasures, and hunting for highwaymen. Probably attending the Court at Oxford or Newmarket was, on the whole, easy duty for the Horse Guards, and from the following extract it will be seen that horsetaming was not exactly an unknown art in 1684:—"By a letter from Newmarket, 'we have an account' that when the Court was there, her Majesty was pleased to divert herself with seeing a mare (which belonged to a gentleman of her own troop of Horse Guards) show several tricks, as telling of money; then, turning her loose, she will walk on three or four legs, as he tells her; she will pick up a glove in her mouth, and give it to her master, as he sits on her back; when he pleases, she will lie down and he on her back; and if he alight off her, she will lie still till he gets on her again, though he go from her; and many more tricks too tedious to relate. His Majesty has likewise seen her, and ordered the owner to teach the mare more tricks, and if he can, to teach her that she will do them at the bidding of another person. His Majesty will give him a great reward for her, intending (as is thought) to make a present of this horse to some beyond sea." Very pleasant must also have been that review of the Guards in Hyde Park before the Moorish Ambassador, on January 25, 1684, who, having witnessed what English soldiers could do, set his own followers to exhibit their skill in the saddle with their weapons, "some of the performances being throwing of lances, which, with incredible swiftness and dexterity, they would catch again before they fell to the ground." Then there was in the same year a grand fête, given by the French Ambassador, at his residence in St. James's Square, where we learn that the performance of the musicians and trumpeters of the Life Guards caused general exhilaration. It is added here that, "Possibly a portion of the exhilaration was due to the "erection of two scaffolds in the square at 6 in the evening, on which arbours were placed that concealed the sources from whence plenty of wine flowed for the use of the populace; and at night ten pillars, each supporting four vases of inflammable matter, illuminated the area. In addition to these, a stage 18 ft. long by 16 ft. wide and 12 ft. high, covered with deep blue drapery, adorned with golden *fleur-de-lis*, was erected, at the bottom of which was a representation of the sea, with boys bearing the French standard and sporting with dolphins, and at two of the angles were figures of Discord and Envy." "On the stage already described was a second, 8 ft. high, covered with dolphins supporting a figure of Fame. A variety of brilliant and excellent fireworks terminated the pleasures of the evening." From the foregoing, it is evident that people did enjoy themselves in the days of the Merry Monarch, though it was scarcely fair for the populace to pull down an arbour and make a bonfire of it—as they did on this occasion—because the wine cisterns had run dry. Altogether, this is a capital number.

The first number of *The National Review*, which has enlisted under the Conservative banner and in defence of Conservative principles, is now published, and seems to have made ample preparation for any literary combat it may be called upon to sustain. *The National Review* is edited by Alfred Austin, and the contents-bill of this first number discloses the names of several writers who have long since secured high literary reputations. Mr. Austin contributes a paper which is entitled, from a phrase of Lord Beaconsfield's, "Above all, no Programme." The Earl of Carnarvon contributes an interesting article on the position of literary matters on March 1, 1711, the day on which the first number of the *Spectator* was published. The contributor takes the opportunity of lauding this periodical, and tells of its career during the entire period which elapsed from its birth up to the present day. In March, 1711 and 1714, the *Tatler* existed, also the *Spectator* and the *Guardian*. "They were all great works, but the greatest was the *Spectator*. It is alone now read, and generally known and quoted, and its pure English, sound morality, true wit, and genial, good-humour are the foundation stones of periodical literature. I know not that, 170 years after, and with our far greater resources, we have anything better to show. Perhaps the most remarkable characteristic of the *Spectator* is the gentle satire with which it touched the faults and foibles of the day, and it is this which distinguishes it from its successors, however gifted." Canon Gregory reviews the work of the Church during the present century at considerable length. This is followed by a powerfully written paper, entitled, "Conservatism in Art," which is contributed by W. G. Courthope. "Berkeley's Life and Letters" are commented on by Arthur Balfour, M.P., and "Radicalism and the People," by W. H. Mallock. The concluding papers are an important one from M. Ferry, on "France and Judicial Reform in Egypt," and a still more important one on "Irish Legislation and its Results." The conductors of the *National Review* have made, in the pages of its first number, a powerful bid for popularity and success. Judicious selection, able treatment, and complete absence from unworthy bias, form the leading characteristics of this new periodical.

We cannot say much in favour of the March number of the *Cornhill Magazine*. A new serial, "By the Gate of the Sea," has been commenced; and another, "No New Thing," has accomplished its 28th chapter. The other articles in the number are comprised of one with a by no means favourite title, "Boys." Another, named "Wild Shooting," which reintroduces the reader to scenes of travel and adventure with which he is probably perfectly familiar. Then comes "Al Hariri," to understand which requires deep study. "Pictures for the People" concludes the number.

Blackwood for March is an excellent number. It opens with a sketch of "Jonathan Swift" and his works, which can scarcely fail to interest every reader. Of course, it contains a version of "The Story of Stella," but throws no new light on the subject. Swift's patriotic feelings, as described in Mr. Froude's work on "The English in Ireland," are quoted in *Blackwood*. That historian remarks that Swift, who was, in the best and noblest sense, an Irish patriot, poured out tract after tract denouncing Irish misgovernment, each of them composed with supreme literary power, a just and burning indignation showing through the most finished irony. "In those tracts, in colours which will never fade, lies the picture of Ireland as England, half in ignorance, half in wilful despair of her amendment, had willed that she should be." "The Progress of the New Dominion" is an ably written and instructive article. "Contemporary Art" brings under consideration the works of Rossetti and Tadema, Linnell and Lawson. The twelfth part of "The Ladies Lindores" is contained in this number, and we are, no doubt, soon to see the beginning of the end. In all probability, when this attractive serial is complete, it will be regarded as nearly, if not entirely, the best of Mrs. Oliphant's works, notwithstanding a few minor faults which it possesses. Some readers will probably complain that the story is spun out too much, and that the "Ladies" fail in creating any strong interest. There are characters, however, in sketching and sustaining which we see the authoress at her best,—for instance, those of "Rolls" and "Baubie," "Lord Lindores," "Mille Fleures," and the impulsive Rintoul.

Among several other attractions offered by *Temple Bar* for March is a most interesting sketch of "Sims Reeves," contributed by Lady Pollock. This eminent tenor's career is sketched from a very early period, and ample justice done to his great deserts, without a single passage of unfair laudation. Lady Pollock does not pass over the fact of the constant disappointments which have more than irritated his patrons, as well as the public. Lady Pollock thus refers to it:—"The apparently uninterrupted prosperity of the singer may have surprised the reader, for do we not know that the gods are chary of their gifts? And is not the magic lore which shows us the good and wicked fairy ever contending at the baptism of genius a true representation of human life? Have we not marked a thousand times how it happens that just as the cup full of blessings is bestowed upon the favourite infant by a fair enchantress, there rolls up to the gate a fatal, perfidious car, and out comes a withered witch, who flings into this cup of benedictions the one sour grain which is just enough to mar them. Such a grain there has been to trouble the career of Sims Reeves, and while the one fairy endowed him with the finest of vocal chords, and with a heart and brain to direct them, the other pronounced this sharp malediction, 'He shall have an irritable mucous membrane.'" Sims Reeves was 30 years of age when this malady became developed. The attack is always sudden, and in a few hours a strange irritation in the larynx is perceived, the bronchial passage is inflamed, and the beauty of the voice is veiled. The pecuniary damage done to this great tenor between 1852 and 1882 has amounted to the sum of £70,000. In the face of this fact, how absurd and unjust to attribute this inability to sing, to vanity and self-sufficiency!

NAVAL PAYMASTERS.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

SIR,—I was very glad to see your remarks in the *Army and Navy Gazette* relative to Mr. Moore, paymaster, Royal Navy (and not Lieutenant as stated by the *Broad Arrow*), Lord Alcester's secretary, not having been granted a C.B. for his services in Egypt; and I was equally surprised to see that Mr. Dewar, the very senior Paymaster on the List, and who was present in the flagship at the bombardment of Alexandria, and, I believe, afterwards landed to organise the Naval commissariat arrangements, had also been omitted from this honour, while every other head of a department on board the Alexandra was at once rewarded by honours or promotion. These omissions are a great injustice, not only to these two officers, but to the whole class of Paymasters; and it is certainly most unfair that this invidious distinction should have been made by excluding the Paymaster of the Navy from any reward for the Egyptian campaign, as, unlike other officers, they have no promotion open to them. While on this subject, I should like, with your permission, to say a word as to the Naval Paymasters' grievances generally, as it is often thought that, because we do not publicly complain, we, as a body, are quite satisfied with our present position and prospects. Not at all. We have many reasons for complaint, and, as a class, are now worse off than any other branch of the service. Our grievances are, viz.:—1. We have no grade on the Active List higher than "paymaster," on which list an officer remains from the day he is first promoted until he retires. There should be the higher grades of "staff paymaster" and "chief paymaster" (as in the sister service), and thus the Admiralty would have the opportunity of encouraging and promoting the zealous and deserving officer. 2. A limited number of good-service pensions should be awarded to some of the senior paymasters; at present paymasters are not accorded this boon. Surely some of these officers must deserve this reward as well as other branches of the service? 3. Our Greenwich-Hospital pensions are fewer in number and less in amount than other branches receive. We should have one pension of £80 and three at £65, in addition to the thirteen at £50 a year, as paymasters are excluded from the "Naval pensions." 4. The senior 20 paymasters ("chief paymasters," as I would call them) should be employed "at home," as the senior officers in other branches of the service are, and not, as at present, the senior paymaster on the list sent away in a sea-going ship to take his turn among officers considerably his juniors. 5. Occasional C.B.'s, or other honours, should be awarded when really deserved. At present, paymasters appear to be the only class of officers who are debarred these rewards. 6. To encourage zeal and efficiency among the assistant-paymasters, one or two of really the most deserving and efficient of these officers should be annually selected for promotion, instead of, as now, keeping the zealous and careless officers in the same position till they get respectively to the top of the list (after being 15 years on it). At present, the Admiralty have no opportunity of rewarding merit and efficiency among this class of officers. I am prepared with the details of the plans for carrying out these suggestions, but I will not trouble you with them in this letter; but I am convinced that the changes would encourage zeal and emulation in an important branch of the Navy, and be simply an act of justice and equal treatment, which we have a right to expect, the same as deserving officers of other branches of the service. The Naval world is moving on, but the Paymasters alone seem to be standing still.—I am, &c., ONE OF THE AGGRIEVED.

MODELS FOR MILITARY LECTURES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—During a course of lectures recently given in Manchester to officers and serjeants of the 1st Manchester R.V., I was so successful in the use of a billiard-table as a model, that acting on the suggestion of several officers of the garrison, both cavalry and infantry, who were present, I venture to send a short account of the simple means used. By the aid of some large meat dishes and plates of different sizes, turned face downwards, with a piece of thin, green, cashmere cloth thrown lightly over them, an excellent representation of hills and slopes, stretching towards the centre of the table, was obtained, giving in miniature a great variety of undulating country. Everything was done on a rough scale of one foot to about one thousand yards. For a base, I took a stretch of hills of 4,000 yards, *i.e.*, 2,000 yards on each side of the centre pocket (taking the table lengthways), behind which I supposed a division to be bivouacked. I was able on the table to show a complete system of outposts, covering front and flanks of the position to be occupied by the division. Picquets, supports, and reserves, all posted at their proper relative distances from each other, and from the position to be guarded against surprise, were all represented by small pieces of wood painted red (allowing 2¼ miles as the distance for the supports to be from the position to be protected); while every other sentry-post, double and single, together with visiting and reconnoitring patrols, was shown each in their proper place by means of small tin soldiers. "These tin soldiers only were out of proportion to the rest of the model, too large;" but the lectures being given for company officers and serjeants chiefly, these details were important. All three kinds of woods were shown, with sentries, picquets, supports, detached posts, patrols, &c., applicable to each case, viz.,—the small wood, whose outside edge can be reached by the cordon of sentries; the large forest, whose edge on the enemy's side cannot be reached; and the wood, whose edge does not come up to the sentry-line. The large forest alone was off the billiard-table, on the right flank, placed on a small table covered with green cashmere cloth. The woods were composed of artificial moss, tied on to narrow strips of cardboard, about a quarter of an inch high, and hedges, plantations, &c., about one-eighth of an inch high. For roads, strips of thick brown paper, not quite so thick as cardboard, the same as used for putting under carpeting. A box of very small bricks showed villages, detached buildings, farms, &c.; and thin blue tissue paper a river on the left flank and a stream through the forest. The cost of the entire model, including four yards of green cashmere cloth, and tin soldiers enough, both cavalry and infantry, to show all the sentries and patrols for a whole battalion of infantry and two troops of cavalry, moss, &c., was under 10s.; and the damage possible to happen to the billiard-table absolutely *nil*, a few plates, some card-board, and artificial moss being all that was put upon it. I have, at some length, I fear, described the above model, which took about two hours to put up. Other representations of ground, &c., occupied by advanced troops, were equally successful, and did not require so much time. Next winter I hope to have a boarding made to cover the billiard-table, which can be removed bodily. This would not interfere with the table so much, and the necessary space and room provided for a billiard-table would still be available for the short time required for instruction round the model. The billiard-table quoted is in general request nightly for its legitimate purpose, but the fact that I was requested to leave this last model standing for a week has emboldened me to send you a description of it, in the hope that this simple and inexpensive way of getting a model and utilising the necessary space and lighting allowed for a billiard-table may prove of some use to others.—I am, &c.,

H. R. GALL, Captain,
2nd Batn. Manchester Regt. (Adjt. 6th L.R.V.)
Manchester, Feb. 9.

GOOD SERVICE PENSIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In your last issue, I read an article on the subject of the non retention of good-service pensions by officers after retirement. The rule laid down in the case of retired Indian Artillery officers is, I think, peculiarly hard, and I bring it to your notice, in the hope that you will call attention to the subject. Several of these officers were entitled, under the Warrant of 1878, to pensions of £1,000 per annum. Those who held good-service pensions forfeit their pensions; but these are not made available for other officers. The retired officers have, I consider, no claim, as they knew the conditions of their retirement before sending in their papers, but I think the pensions ought certainly to be given to others.—I am, &c.,

A RETIRED INDIAN GUNNER.

THE SO-CALLED TERRITORIAL SYSTEM.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I feel sure you are no admirer of the cruel treatment that most of our Infantry regiments of the Line have recently experienced at the hands of would-be reformers, who never possessed in their own breasts any sentiment akin to *esprit de corps*. Our numbers, which in order marked the seniority of the regiment, and many of our ancient titles, formerly won through the gallantry of those who went before us, have been swept away under our eyes; in some instances even Royal blue facings have been stripped off and replaced by, perhaps, green or drab. Of course, *esprit de corps* is dead amongst our rank and file, and fast dying amongst the officers, the old ones of whom are disheartened and disgusted, and the young ones, daily joining now, have small chance of cultivating the sentiment; and yet the old Duke of Wellington tells us of what inestimable value this fine feeling is, and what a trump-card it was to him with regiments in the field; and even Lord Wolseley, in our own day, sings its praises as highly as possible in his "Soldier's Pocket-book," which is now one of the text-books recognised by authority for the unfortunate British officer to acquire professional knowledge from in his examinations before promotion. I have lived all my life in Buckinghamshire, and I want to ask you why my county has recently been entirely dissociated with the Army, and even the Militia, as the following circumstances will show you:—The 14th (Buckinghamshire) Regt. have been turned into Yorkshiremen, and their depôt placed at York. The 85th Bucks Volunteers (King's Light Infantry) have now to rejoice in the sobriquet of "The King's Shropshire Light Infantry," with depôt at Shrewsbury. The Royal Bucks King's Own Militia, with blue facings, changed to white, are sent away from the old county to Oxford, being ordered to call themselves the "3rd Batn. of the Oxfordshire Light Infantry." Indeed, we live in wonderful times. Bucks is now represented by no regiment of the Line or Militia. Although it is composed exclusively of agriculturists, who are known to make the best soldiers we possess, it is exceptionally loyal and Conservative in feeling; and when I look around me here in Cork and Buttevant, &c., and see the attenuated battalions which the state of this country does not recommend, I feel we certainly should do our best to obtain some decent recruits, and my own county would find a good share of them, if properly attended to. The regiments in this command have recently been furnishing drafts, varying from one to two hundred strong, for their linked battalions abroad; and I think the British public would open their eyes wide, if they saw the appearance these corps now present. They are little over 300 strong, and, with detachments deducted, they could scarcely bring out half that number from headquarters ready for action on an emergency.—I am, &c.,

Fermoy, Ireland, Jan. 9. BUCKS.

Tuesday's Gazette.

ARMY.

WAR OFFICE, PALL MALL, January 25, 1883.

The Queen has been graciously pleased to give orders for the appointment of Field-Marshal his Imperial Highness Frederic William Nicholas Charles, Crown Prince of Prussia, K.G., to be an Honorary Member of the Military Division of the First Class, or Knights Grand Cross of the Most Honourable Order of the Bath.

WAR OFFICE, PALL MALL, February 27, 1883.

1st Life Guards—Lieut. D. V. Pirie, from the 4th Dragoon Guards, to be Lieut., vice R. Brooke, resigned.

2nd Dragoon Guards—Lieut. W. Howard, from the 16th Lancers, to be Lieut., vice J. C. de V. Tattersall, promoted.

7th Dragoon Guards—Capt. and Brevet Major M. C. Day has been seconded for service as an Adjutant of Auxiliary Forces (Feb. 2).

8th Hussars—Lieut. P. L. Clowes to be Capt., vice W. S. D. Abbott, retired (Feb. 21).

12th Lancers—Serjt. James H. Ensor, from the 8th Hussars, to be Lieut., vice the Hon. G. W. H. Vernon, promoted.

19th Hussars—Capt. H. M. A. Warde has been seconded for service as an Adjt. of Auxiliary Forces (Feb. 2); Lieut. H. O'C. Henchy to be Capt., vice H. E. Reynolds, resigned (Jan. 10).

ROYAL ARTILLERY.

Cols. R. J. Hay and J. Spurway have been placed on the Unemployed Full-Pay List, under the provisions of Article 79 I of the Royal Warrant of March 11, 1882; Lieut.-Col. and Col. J. F. Betty, upon the Seconded List, having completed five years' service as Regtl. Lieut.-Col., has been placed on half-pay (all dated Feb. 20); Capt. E. C. Trollope retires from the service, receiving a gratuity; Lieut. W. M. Thomas resigns his commission; Capt. S. C. Pratt, upon the Seconded List, to be Major; Capt. W. H. F. Sorell to be Major, vice Brevet Lieut.-Col. E. Broadrick, retired; Lieut. S. C. Hickman to be Capt., vice W. H. F. Sorell (all three dated Feb. 14).

The under-mentioned Gentlemen Cadets, from the Royal Military
Academy, to be Lieuts. (Feb. 14):—Charles Edward Baynes, vice A.
H. Browne, placed upon the Seconded List; William Alleyne
Macbean, vice J. W. B. Meade, placed upon the Seconded List;
Malcolm Sydenham Clarke Campbell, vice C. B. Fuller, deceased;
Francis Richard Drake, vice G. W. R. Howard-Vyse, pro-
moted; Charles Cunliffe Owen, vice E. U. Blackett, promoted;
Walter Henry Robinson, vice W. G. de Jersey, promoted;

Obituary.

◆

Vice-Admiral Joseph Martin Mottley died on Thursday, at his residence, Slindon House, Bognor, aged 82. He entered the Navy in 1812, and was soon engaged on active service, having been employed on shore at the destruction of the batteries in the Gironde at the close of that year and beginning of the following year. He obtained a lieutenancy in 1829, and commanded the batteries on the north coast of Spain during the Civil War, and he was frequently engaged with the Carlist forces in 1836-7. He was employed as lieut. of the Revenge at the battle of St. Jean d'Acre in 1840, for which service he obtained a medal. His subsequent promotions were—commander in 1843, captain in 1857, rear-admiral in 1875, and vice-admiral in 1879. He was placed on the Retired List in 1870. Admiral Mottley was twice married—first to a daughter of Mr. William Stone, of Chatham Dockyard, and, secondly, to a daughter of the late Mr. Simon Little.

MEMORIAL BRASSES.—Messrs. JOHN HARDMAN and Co., who pay special attention to Military Brasses, have lately executed for her Majesty the Queen several important works for St. George's Chapel, Windsor. Designs are prepared for approval, with estimate of cost. —Offices, 13 King William Street, Charing Cross.

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "WRIGHT, SOUTHWARK," are on each wrapper, and branded on each tablet, without which none is genuine.

NAVAL UNIFORM.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The Naval world at Portsmouth has been much exercised of late by the question of uniform. Not content with revising the late Commander-in-Chief's orders on this subject, Admiral Sir G. Hornby has ordered all Naval officers to wear "jackets and gold-lace trousers" on guest night at mess dinners, both ashore and afloat; and they are also ordered to wear this "Hussar" costume at small dances. The Admiralty regulations permit jackets to be worn on board, but it is a novel reading of the instructions "that they are to be worn on shore." However, Admirals and such like can do as they please, and read the instructions upside down, if they like, whilst woe betide the junior officer, unless he is one of the specially-favoured clique, who even presumes to consider that he has carried out the spirit of the instructions, if he fails to observe the actual letter! On Wednesday last, the Commander-in-Chief at Portsmouth expressed a wish, which is tantamount to an order, that all officers inside the Hilsea Lines should be constantly in uniform. This is really playing fast and loose. No wonder that the officers of one ship respectfully requested their captain to interceed with the Admiral, "so that they might be permitted to comply with the Regulations." If the Admiralty are not capable of regulating the uniform of the Navy in plain, common-sense language, Naval officers must appeal to the House of Commons, for life is not long enough to be continually worried by the different whims of Commanders-in-Chief, who appear to have the power to order their inferiors to wear any conceivable combination of the several articles of costume comprising the seven or eight different "rigs-out" that Naval officers have to provide themselves with. Example is contagious, and if no notice is to be taken of the irregularities at Portsmouth, an increased impetus will be given to the custom of each ship having her own uniform, according to the views of her captain, and we may again see red waistcoats and white cocked hats *de rigueur*, whilst "smart" officers will still insist on buttoned-up frock-coats and sword-belts, with the temperature at 100° in the shade.—I am, &c., A NAVAL OFFICER.

[We have received other letters on same subject, in same vein, which we do not publish, as it would be uselessly filling our space. We refer the writers to our editorial columns, and shall be glad to insert their criticisms on our own views.—ED. *A. & N. G.*]

ENGINEERS, R.N.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—An article appeared in your issue of Jan. 20 on the subject of the position, &c., of Engineers, R.N., in which you state that the system of messing them with the gun-room officers has worked well in the Nelson. Now, from personal experience, I can assure you that you have been misinformed as regards this statement. During the voyage out from England, the engineers and gun-room officers were constantly at loggerheads. On more than one occasion, the gun-room officers were "planked" by the engineers, one midshipman losing three months' time for having offended the engineers. Since the Nelson's arrival on the Australian station, matters have improved; but the bad feeling still exists between the two sets of officers, and occasionally brings forth disputes of a more or less serious nature. The experiment of messing the gun-room and engineer officers together can hardly be called a success, so far.—I am, &c., Y. Z.

The following official intimation will be read with interest in the engineer branch of the Navy:—"The Chinese Government have applied, through the Foreign Office, for the services of an engineer officer of the Royal Navy as Professor of Naval Engineering in the Naval College attached to the Arsenal at Foochow, and the Admiralty have no objection to the appointment being accepted by any chief engineer or engineer, either active or retired, who is possessed of the necessary scientific and practical knowledge, and is, in all respects, qualified to fill it with credit. Copies of the draft of the provisional agreement which it is intended shall be signed by the selected candidate and the Chinese Minister in this country are posted at the Commander-in-Chief's office and the Steam Reserve office, where they can be seen by officers desirous of becoming candidates for the appointment. Should an officer on the active list be selected, he will be allowed his half-pay while holding the appointment with their Lordships' consent."

Another armour test was made on the Nettle at Portsmouth on Wednesday. In this instance, the plate was manufactured by Sir John Brown and Co., on the Ellis principle. It is a sample of about 300 tons' weight of armour, intended for the Warspite, building at Chatham. Though of the uniform thickness of 10 in., the peculiarity of the plate lay in the fact that the steel surface varied from 3¼ in. to 2¾ in., so as to enable the plate to be tapered from 10 in. to 7 in., for the protection of the water-line of the ship, without diminishing its power of resisting shot. The dimensions of the plate were 8 ft. by 6 ft., and the test, which was conducted by Com. Drury, in the presence of Mr. J. Barnaby, Inspector of Armour Plates, consisted in firing three shots at it from the 18-ton gun. The first round produced a hair crack 16 in. long, taking the direction of a concentric ring round the point of impact. The second shot struck the plate near the right edge, 2 ft. below the first, and produced several surface cracks. The last round struck near the left edge, where the steel face was the thinnest, causing further cracks, developing those produced by the second shot, and making a through fissure extending parallel with the lower edge. The heads of all the shots remained imbedded in the plate, so that the precise depth of the indentures could not be ascertained, but they were supposed not to be more than 4 in. deep.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, March 3, 1883. Letters on business and Remittances should be made to Mr. RICHARD JAMES WOOD.

SPECIAL SUPPLEMENT TO THE

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,205.—Vol. XXIV.] SATURDAY, FEBRUARY 24, 1883. [REGISTERED FOR TRANSMISSION ABROAD.] GRATIS.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

A LETTER from Egypt dated February 5 informs us that Messrs. Cook and Son's steamer Behera arrived at Luxor from Cairo, with 119 invalids, under medical charge of Brigade-Surgeon Tippetts, on February 3. Captain Gordon Money, 79th Highlanders, senior officer, the Rev. Father Windle, R.C., Chaplain, Mr. Thompson, 7th Dragoon Guards, Mr. McCracken, 49th Regiment, and two other officers accompanied the detachment, which comprised men of all arms, from Helwan, Abhasiyeh, Kasr el Nil, the Citadel, &c. Officers and men had derived much benefit from the excursion, and the arrangements on board had given every satisfaction. The weather was delightful. By order of the excellent Mamour of Luxor, the establishments which might have exercised a pernicious influence on the health of the troops, and the peace of the town, were closed. When there are no means of intoxication at hand, British soldiers are as quiet and well behaved as any troops in the world. On the day of their arrival, the soldiers landed, and were allowed to wander over the ruins of the temples at Luxor. Mustafa Aga, the old and excellent Consular Agent of Great Britain, and his son, Achmet Effendi, did their best to enable the officers to pass their time to advantage. In the evening, there was a fantasia for them and some visitors from France at the French Consular Agent's. The officers and some of the men crossed the river, and visited Medinet, above the Colossi; and on Saturday and on Sunday, 40 men were selected to make an excursion to the most interesting ruins on the western side of the Nile, whilst the officers and others went to spend the day at Karnak. Father Windle chanted Mass in the Catholic church, to a Coptic congregation of the Roman rite. It may be fairly said that all the men do not feel equal satisfaction at the opportunity afforded them of improving their minds and regaining their health, by the most liberal arrangement ever made by any Government for soldiers. The pot of beer and the can of grog are needed, to crown the capital of their social enjoyment; but a very large number do greatly appreciate what is done for them, and the party from the Theban side were enthusiastic in their expressions of wonder at the ruins. Those who liked to pay for them had donkeys sent over, and a troop some thirty-five strong or more streamed over the fields to Medinet, in high spirits. A considerable number, however, are suffering from ailments which do not permit them to ride. On Monday, the Behera left Luxor at 11 o'clock, on her return voyage. She was to arrive at Keneh in the evening. There she would be met by El Masr, the largest of Messrs. Cook's steamers, and a concert and fireworks were to be in readiness, after an entertainment, prepared by Mr. Cook, who was on board the Masr, for the soldiers, who have every reason to be grateful to the firm of which he is a member. Mr. Cook telegraphed to General Conolly and Dr. Russell, who are at Luxor, to invite them to go down in the Behera, and return in the Masr; and the former left with the officers and troops, in order to be present at the festivities.

Cairo, February 11, 1883.

Return of sick for week ended February 9, 1883:—

	Total Force.	Sick.	Percentage.
Artillery, Cairo	869	111	12·8
Cavalry ,,	1,111	172	15·5
Engineers ,,	217	15	7
1st Brigade ,,	3,041	267	8·7
2nd ,, ,,	3,032	256	8·4
Service Corps ,,	670	30	4·5
	8,940	851	9·5
Alexandria	2,202	181	8·2
Ismailia	96	9	9·4
	11,238	1,041	9·2
Officers	365	21	6
Men	10,873	1,020	9·3
	11,238	1,041	9·2
Horses	1,993	145	7·4
Mules	722	42	5·8
	2,715	187	6·9

This shows a steady improvement all round, except in the mules, who are apparently beginning to think they have borne their full share of work.

The following are among the officers in hospital, February 12:—

Name and Regiment.	Illness.	Date of Admission.
Major Sinclair, Staff	Bronchitis	Jan. 31, 1883
Capt. Cautley, Staff	Enteric Fever	Jan. 23, ,,
Major Grattan, Sussex	Influenza	Feb. 7, ,,
Capt. Harden, Sussex	Bronchitis	Feb. 9, ,,
Lieut. Enthoven, C Bty. 3rd Brig. R.A.	Simp. Contd. F.	Feb. 10, ,,
Surg.-Major Mackinnon, A.M.D.	Sprain	Feb. 12, ,,
Capt. Mowbray, Royal Highlanders	Phthisis, Pul.	Jan. 2, ,,
Capt. Griffiths, Highland L.I.	Cong. of Liver	Jan. 1, ,,
Lieut. Scott Elliot, Cam. Highlanders	Enteric Fever	Jan. 9, ,,
Capt. Allsopp, Royal Artillery	Enteric Fever	Jan. 11, ,,
Lieut. Burney, Berks	Enteric Fever	Jan. 19, ,,
Surg. Osborne, A.M.D.	Enteric Fever	Jan. 31, ,,
Capt. Mortimer, A.P.D.	Pl. Pneumonia	Feb. 5, ,,
Deputy-Assist.-Comy.-Gen. Gaussen	Ague	Feb. 7, ,,
Capt. Reid, Cameron Highlanders	Simp. Contd. F.	Feb. 11, ,,

Arrivals reported and posted as follows:—Surgeon-Major W. D. Wilson, to Citadel (in charge), Gordon Highlanders; Surgeon A. V. Lane, to Citadel Station Hospital; Surgeon A. H. Anthonisz, to Abbassiyeh (in charge), South Staffordshire Regiment; Surgeon E. R. Power, to Helwan (in charge), G Battery, B Brigade, Royal Horse Artillery.

Leave of absence has been granted to Surgeon-Major T. F. O'Dwyer, Army Medical Department, from February 13 to March 5, to proceed up the Nile; Lieutenant Ind, N-2, Royal Artillery, from January 23 to April 22, in extension, on the recommendation of a medical board; Lieutenant D. W. Stewart, Gordon Highlanders, from January 8 to August 8, with permission to proceed to India at his own expense; Lieutenant J. Craig, N-2, Royal Artillery, till April 29, on the representation of a medical board.

Lieutenant F. M. Beaumont, King's Royal Rifle Corps, is attached for topographical duties to Lieutenant-Colonel Ardagh, Deputy-Assistant-Adjutant-General. Lieutenant J. H. Verschoyle, Duke of Cornwall's Light Infantry, is appointed Garrison Adjutant at Alexandria, with status of Captain on the Staff. Lieutenant Welche, 19th Hussars, proceeds to England, invalided.

The Tamar will embark troops at Alexandria on the 14th or 15th inst. The Egyptian Army, commanded by General Sir Evelyn Wood, Pasha Ferik and Sirdaar, V.C., K.C.B., G.C.M.G., &c., entertained Cairo with athletic sports on Monday last. The Egyptian "Tommy Atkins" has many amiable qualities, but a sense of fair-play has not been inculcated in his mind by previous training, so that when in the tug-of-war the gendarmes seemed to be getting the best of it, fifty friendly arms were at once brought to the assistance of their brethren, and they appeared hurt and conscious of injustice when made to do it all over again. The second time, the gendarmes had learnt the lesson, and the weight came from the other side. A third time, by dint of threats, fair-play was enforced, and the gendarmes were triumphant, receiving from Lady Wood their four piastres per man with a delicious expression of astonishment, whether at their luck or our stupidity, I will not say. But on the whole, the men were a success, and the presence of English officers will undoubtedly do much to raise them to the level of human creatures.

YOUNG NELSONS' EDUCATION.

The gallant officers and distinguished gentlemen who have endeavoured to grapple with that most difficult of subjects, "young Nelsons' education," seem, somehow, to be successful only in seizing the bull by the horns and tail, leaving the unfortunate, but very essential part, the body, struggling between the two extremities. The Britannia beginning and the Greenwich end of young Nelsons' education are perfection itself, when compared to the system of training (if it can be called system) during those valuable years which lie between. Those most important years are spent in a constant struggle between ship's duties and educational efforts. Both are attempted, but neither is properly done. Young Nelson and his instructors get wearied and worried, and the commanding officers unite in declaring that "midshipmen are no use, in these days." Can we not picture to ourselves an oft-repeated scene? Young Nelson has joined his first ship. A table full of youngsters, in the steerage of a large corvette, some fresh from the training-ship, some of three or four years' standing, some sleepy after useless night watch in harbour, some absent on duty,—all agreeing in one thing, and one thing only, viz., a deep-rooted conviction that they ought to have their "watch below," like any other man, without being bothered with mathematics. Gun drill is going on overhead, some Marines are filing stanchions in the immediate vicinity, and the cooper is heading up a cask in the nearest hatchway. The distracted Naval Instructor is raising his voice, in the vain endeavour to fix the attention of some weary youngster to a rudimentary problem in algebra; but, with x still in the distance, all chase after him is ended by the entrance of the messenger,—"Please, Sir, the Commander wants Mr. Knownothing to go in his cutter for beef." A somewhat similar scene occurs in the afternoon. Mr. Foresight, the Gunnery Lieutenant, is endeavouring to gather young Nelson and his messmates under his wing, for the short two hours per week allotted for that much despised subject, "gun drill." When the report is made,—"All present, Sir, except Mr. Alsleep, who is taking the wardroom officers ashore in his cutter, and Mr. Leafstop, away in the launch for holystones." However, an attempt is made to begin, when the inevitable messenger comes,—"Please, Sir, the Commander says the guns are not to be cast loose, as the ship's side has just been painted green and gold." And what is the result? After six months' endeavour to do his duty, against powers that are stronger than he, the Instructor's patience is exhausted. Human nature can stand it no more. His zeal evaporates, and matters are allowed to slide. As long as a fair show can be made in the progress books, and, with a little management, in the half-yearly reports, all is well. Young Nelson himself becomes contented. He finds that the attempts to acquire knowledge are so uncommonly painful, that at his age ignorance is bliss. Captain Trimsail, he discovers, takes no interest in him; while Commander Brassrags is quite content, so long as his cutter is clean and his watch-bill correct. Eventually, young Nelson reaches Greenwich, and knowing rather less than he did when he left the Britannia, finds that he has to cram. A few pounds judiciously expended enable him to emerge from the educational machine with a 3rd-class certificate,—a confused idea of a variety of subjects, and a total ignorance of any foreign language. Young Nelson's head, after this very unsatisfactory process, naturally requires relief. This he obtains by throwing his books away for ever, and soon, during a four years' commission under a tropical sun, his superficial knowledge quickly evaporates. Young Nelson, at this stage of his career, begins to speculate on the best method of obtaining his promotion to the higher ranks of his chosen profession. He observes, with much natural acuteness, that the gallant Admiral who periodically inspects his ship, and upon whose report so much depends, knows nothing about the gun, ram, and torpedo, but is very particular concerning the whiteness of the deck, and the smartness with which the royal yards are crossed. "Here, then," says young Nelson, "is the royal road. Animated with the laudable desire of pleasing my superiors, I will devote my life and energies to the study of those two most interesting subjects,—the ornamentation of my ship and the promotion of the activity of my men." Such zeal could not be overlooked. Young Nelson rises rapidly, and as a Post-Captain, no doubt he will join the ranks of those who, unable to see that a mathematical education is a mental gymnasium that enables men to take a wider grasp and more reasonable comprehension of even the practical questions of a Naval life, are for ever echoing the cry,—What is the use of x-chasing, for a Naval officer? We venture to think that until some well-considered scheme of winter college sessions and summer training-ship cruises for seamanship, gunnery, and steam instruction is systematically carried out,—young Nelson being considered as a student, and not a ship's officer, until he is at least 19 or 20, and that then he should go to sea with his education in general subjects complete, join a general mess (that venerable institution, the gun-room, where bad living and bad language are so generally to be found, being abolished),—until then, we must expect to have our Fleet officered by gentlemen who, though of undoubted ability, determination, and pluck, are, as a body, unquestionably more ignorant than they should be of the use of the gun, ram, and torpedo, and of the tactics that must be adopted in a modern Naval war. There are still many in power who, with the editor of the *Times* as their mouthpiece, are sleeping peacefully in a certain well-known paradise, as regards our Naval supremacy. Although we have fewer ships, inferior guns, and, according to Professor Soley, officers less satisfactorily trained than our nearest European neighbour, yet, they say, with strong arms, stout hearts, and a full national purse, our Navy is equal to any emergency. They forget that in a duel, the man who has the best pistol, and who has been thoroughly trained to use it, has a far better chance of his life than his opponent, however strong, rich, and brave he may be. If, through unpreparedness and self-confidence, our Navy is over-matched in the next great European struggle, we shall have to learn the bitter lesson that ironclads, and Nelsons to command them, are not to be made in a day.

MR. KINGLAKE AND "THE LADY-IN-CHIEF."

In the concluding chapters of the Seventh Volume of Mr. Kinglake's "Invasion of the Crimea," the author draws attention to the fearful sickness and mortality which existed throughout the whole of the English Army. Prior to February 22, 1855, the state of the sick list disclosed appalling features. On that day, our Army had lying disabled in either sickness or wounds no less than 13,640 men; but during the eight weeks that followed, the decrease which took place in the admissions to hospitals became so great, that during the last month of the occupation of the Crimea, in 1856, it might be indicated, without very large error, by a ratio of ten to one. Mr. Kinglake alludes to the maladministration in the English hospitals which at one time existed, and attributes it to the sheer non-existence of any sufficient State engine, built up in good time for the purpose; and accordingly, the real work in hand was not so much to reform, but rather all at once to create. "But happily, after a while, and in gentle, almost humble, disguise, which put foes of change off their guard, there acceded to the State a new power." When the intelligence reached England of how our troops had fought on the banks of the Alma, the hearts of many women in England, in Scotland, in Ireland were stirred with a heavenly thought, impelling them to offer and say that if the State only were consenting, they would go out to tend our poor soldiers; and so it happened that the honour of welcoming into our public service this new and gracious aid belonged to Mr. Sidney Herbert. Fortunately, he had formed a strong belief in the advantages our military hospitals would gain by accepting womanly aid; and acting on it, he at once sent to the East some chosen bands of ladies and salaried attendants, for whose reception proper provision was made, and, moreover, enjoined the principal medical officer at Scutari to point out to these new auxiliaries how best they could make themselves useful, and of all things to receive with attention and deference the counsels of "the Lady-in-Chief." And thus it was, the author points out, that under the sanction of a Government acceding to the counsels of one of its most alert and sagacious Members, there went out angel-women from England, resolved to confront that whole world of horror and misery that can be gathered into a military hospital from camp or battle-field; and their plea, when they asked to be trusted with this painful mission, was simply the natural aptitude of their sex for ministering to those who lie prostrate from sickness or wounds. Using that tender word which likened the helplessness of the down-stricken soldier to the helplessness of infancy, they only said they would "nurse" him. Having sketched in some eloquent passages the great services performed by Miss Stanley and the Sisters that followed her, as also the ceaseless devotion and energy with which the instructions given by the medical officers were obeyed, Mr. Kinglake thus introduces "the Lady-in-Chief," whose accession bore date November 4, 1854, and who, with 10 Roman Catholic nuns, 8 Protestant Sisters, and 20 nurses, took up her quarters in the barrack hospital at Scutari:—

> "If the generous women thus sacrificing themselves were all alike in devotion to their sacred cause, there was one of them, 'the Lady-in-Chief,' who not only came armed with the special experience needed, but also was clearly transcendent in that subtle quality which gives to one human being a power of command over others. Of slender, delicate form, engaging, highly-bred, and in counsel a rapt, careful listener, so long as others were speaking, and strongly, though gently, persuasive whenever speaking herself, 'the Lady-in-Chief,' the Lady Florence, Miss Nightingale, gave her heart to this enterprise in a spirit of absolute devotion, but her sway was not of the kind that many in England imagined."

According to Mr. Kinglake, this lady exercised a powerful influence over every one who came within its reach. She it was who came to the rescue of Mr. Macdonald, of the *Times*, who sat in the public places in Scutari, oppressed with a heavy burden of coin, and a full command of all the markets, but still proved inadequate to solve the problem of how those large resources, eager for employment, should be administered. She it was who disclosed to Mr. Macdonald that the report of the medical officers at the hospital at Scutari that "nothing was wanted" was a mere sham, inasmuch as at that time a regiment of British soldiers, on its way from Gibraltar to the seat of war, had reached the Bosphorus, and was going on to meet the rigours of a winter in the Crimea, without having been supplied with any addition to the light clothing appropriately worn in hot countries. She it was who here saw through the red-tape, which rather than be intruded upon would plead ignorance to any dereliction of duty, and at once appealed to the sympathisers of "the *Times* Fund," referring them to the "audacious surgeon" of the 39th Regiment who clamoured aloud on behalf of his men:—

> "It was thus that, under the sway of motives superbly exalted, a great lady came to the rescue of our prostrate soldiery, made good the default of the State, won the gratitude, the rapt admiration of an enthusiastic people, and earned for the name she bears a pure and lasting renown. She even did more. By the very power of her fame, but also, I believe, by the wisdom and authority of her counsels, she founded, if so one may speak, a gracious dynasty that still reigns supreme in the wards where sufferers lie, and even brings solace, brings guidance, brings hope into those dens of misery that, until the blessing has reached them, seem only to harbour despair. When into the midst of such scenes the young, high-bred lady now glides, she wears that same sacred armour—the gentle attire of the servitress—which seemed 'heavenly' in the eyes of our soldiers at the time of the war, and finds strength to meet her dire task, because she knows by tradition what the first of the dynasty proved able to confront and vanquish in the wards of the great barrack hospital."

Mr. Kinglake next invites attention to the untiring zeal of our Medical officers, and points out how their power to heal and to cure was greatly strengthened by the authority of the Lady-in-Chief, the force of whose actual sway caused order to spring out of chaos. While the internal administration of our great barrack hospital at Scutari was manifesting signs of decided improvement, our male rulers were making every effort to secure promptitude in matters of hospital business; so that there was undesignedly constituted an interesting trial of both brain-power and speed, between the sex which had hitherto engrossed the whole public service, and the one newly coming to share in some of the toils of State. In concluding his observations on "the care of the sick and wounded" during the winter troubles, Mr. Kinglake writes:—

> "But whilst dwelling on those happy changes which raised our hospital management to an almost unknown height of excellence, it less becomes our people to harbour a sense of complacency than to think of the lives—the lost lives—that timely care might have saved. A sustained though painful remembrance of those trials, those wants, under which our troops suffered and died, would, perhaps, afford some ground for hoping that, in wars yet to come, the due penalty of State incapacity may not again have to be borne."

TURKISH OFFICERS IN GERMANY.

The Sultan of Turkey is doing his utmost to consolidate the good understanding which has sprung up between his Empire and that of Germany. It is his earnest desire to strengthen the bond of union which already exists between the two Empires, and, not content with handing over the reorganisation of the Turkish Army to German officers, he has recently obtained the sanction of the Emperor of Germany to forty Turkish officers being trained each year in the German Army. Another object of the Sultan, says the *Berliner Tageblatt*, is to prove to Mussulmans that, not only can they be commanded by Christian officers to great advantage, but also that good Mahommedans can just as well command Christian soldiers, and that the difference of creed in no manner interferes with the performance of military duties. The detachment of Turkish officers sent this year to Berlin includes representatives of each branch and arm of the Turkish service. Each year a further detachment of young officers will leave Turkey for the same destination. As yet but two officers of the Turkish General Staff, eight of the Infantry, three of the Cavalry, and four of the Artillery, have been detailed for duty with the German Army, but the number will by degrees be increased to forty. Prior to these officers leaving for Berlin, they were received in audience at the Palace, and the Sultan presented each with a present of five Turkish pounds. In further proof of the paramount influence of Germany at the present moment in Constantinople, the German papers cite the following facts:—At the same time that the foregoing steps were being taken, Colonel von Schilgen, who is serving with the Turkish Army, was promoted to the rank of General, and there are at this moment no less than nine German officers serving in the Ottoman Army, in which they hold the rank of Pasha; while another German officer, Baron von Drigalsky, is attached to the household of the Sultan. In addition to these, there are officers of various other nationalities serving in Turkey,—amongst others, Hungarian, French, and English. The Hungarians, who joined the Ottoman service in 1848, have nearly all adopted the Mahommedan faith, and have thereby lost all influence with the Government, having, as it were, effaced themselves. Besides these, is the Chief of the Constantinople Fire Brigade, Count Seczenyi Pasha. The English officers are said to have been under a cloud since Baker Pasha left the country. The only exceptions are General Borthwick and Admiral Hobart, two Pashas who have maintained their influence with the Sultan throughout, and are at the present moment looked upon as two of the staunchest pillars of the Ottoman State. French interests are represented by Pachas Dreysse and Vitalis. Of these, Pasha Dreysse holds the highest rank in Turkey of all foreign officers in the Imperial Ottoman Service, namely, that of Mushir, or Field-Marshal and Inspector of the Army. The tact and *savoir-faire* of Dreysse Pasha are so well known, that he has made for himself a world-wide reputation. Not to offend Turkish susceptibility, he has never worn the uniform of a Mushir, but, instead, a fancy uniform of his own design. Neither does he draw the pay he is entitled to from his rank, being content with the numerous presents his Imperial master and protector chooses from time to time to bestow upon him. With the forty Turkish officers ordered to Germany, things will be different. They will all be attached to various regiments of the Prussian Army, will do regular duty, and will draw their pay and allowances like other officers. Four of these Turkish officers have been appointed to the 10th Prussian Jäger Battalion. At the same time, the report reaches Berlin that the Sultan has accepted in principle the plan for the radical reorganisation of the Turkish Army drawn up by Kaihler Pasha, and the German officers serving under him. This will have the effect of placing the defensive forces of the Turkish Empire on a level with those of the other Military Powers of Europe.

Reviews.

◆

Thirty-eight Years in India. By William Tayler. (W. H. Allen and Co.)

Although Mr. Tayler's first volume, *Thirty-eight Years in India*, rapidly passed into a second edition, it did not create the same amount of interest as has been accorded to its successor. The reason is obvious. In the first portion of his work, he wrote pleasantly and confidentially, as if he were addressing most intimate friends on ordinary topics. In the present volume, he has a much higher duty to perform. He has to vindicate himself, and at the same time crush the host of calumnies that have for a lengthened period been levelled at his official reputation. This is a task of no ordinary magnitude, and yet the author approaches it with an amount of ease and confidence sufficient to enlist the sympathies of his readers, and disarm even the "captious critic." A considerable portion of this volume, written, as it is, with the author's usual vivacity of description, will be chiefly valued as leading up to the great event of the work,—his self-defence. It will be for an unprejudiced and justice-loving public to study carefully all the circumstances of the case, and then say whether Mr. Tayler is not right in declining to continue still longer the victim of what has years since been fully recognised as a gross miscarriage of justice. The story of the political conspiracy which was brewed at Patna is a very old one indeed, but one which succeeded in arresting the attention of Sir John Kaye, Colonel Malleson, Sir Herbert Edwardes, and other historians, although it has signally failed to procure for a most distinguished public servant the most scanty justice. Early in the summer of 1855, Mr. Tayler held the appointment of Official Commissioner at Arrah, and subsequently received from Mr. Halliday, the Lieutenant-Governor, a highly flattering letter, appointing him to the Patna Commissionership. Thence sprang all the evils. The first unfortunate disagreement between Mr. Tayler and the Lieutenant-Governor arose from the former's proposed system of national education. As the subject is one intimately connected with his administration in Patna, he sets forth all the particulars in detail (p. 197), to which we must refer the reader. It is sufficient for the present to mention that feelings of jealousy were aroused, unpleasant correspondence indulged in, and the relations between Mr. Halliday and Mr. Tayler painfully strained, the rather absurd result being that "the Commissioner" found himself acting under the orders of a Governor who had the strongest personal interest in securing his removal from Patna. Mr. Tayler thus pictures the situation:—

> "It was during this most painful and embarrassing crisis that the Mutiny broke upon us, at a moment when the Lieutenant-Governor was annoyed and prejudiced by the calumnies of others, and when I was deeply hurt and indignant at my treatment, feeling conscious that in all I had attempted I had been actuated by conscientious motives."

The thirteenth chapter of Mr. Tayler's volume is headed "The Patna Conspiracy," and presents a point at which it becomes necessary for the author to enter upon a narrative of his administration of Patna in 1857. In a few preliminary observations, he submits to the general reader a correct idea of the important city and district under his immediate control, so as to enable him to estimate the extent of the Commissioner's responsibilities, and the perilous character of his duties. At first, it was considered by Mr. Tayler, as well as by Mr. Halliday, that Patna might possibly escape the contagion of disaffection, but this unwise confidence was soon dispelled. On the morning of June 7, 1857, Mr. Tayler received a letter from the Assistant-Adjutant-General at Dinapore, informing him that there was excitement in the lines, and warning him to be on his guard. On the evening of the same day, the commander of the police brought to him a letter which had been delivered by two Sepoys from Dinapore. The letter was addressed by their body to the Patna police, stating that they were coming down that night, and begging the latter to be ready with the treasure. Here, indeed, was a critical position, one which required cool judgment and consummate tact to grapple with. The misdelivery of the letter saved the Christians, who would have been massacred, had it reached the person for whom it was intended. The curtain which hitherto effectually concealed the mischief that was brewing was by this event withdrawn, and it became obvious that there was an understanding between the regiments and the Patna police. There are not many who will hesitate in admitting that Mr. Tayler proved himself equal to the occasion, particularly when it is shown that his dispatches narrating this event to Mr. Halliday, who was distant more than 400 miles, were received with something like derision, the only reply being, "I could not satisfy myself that Patna was in danger, and the mutiny of the Sepoys is inconceivable." Mr. Tayler, however, commenced active operations. He disarmed the city, as far as possible, forbade the inhabitants to leave their houses at night, and, what was of the last importance, placed the Wahabee leaders in a precautionary confinement. Events now marched quickly on. Serious *émeutes* occurred in the city. An English officer was murdered in the streets, and several notorious rebels were executed. At length, the event which Mr. Halliday pronounced to be "inconceivable" became fully accomplished. The Dinapore regiment mutinied, and, escaping unhurt, arrived at Arrah, and placed it under siege. With a view to rescuing the garrison, Major Eyre proposed to march down to Arrah, and wrote to ask Mr. Tayler's opinion on the subject. That officer was aware that Major Eyre's force amounted to only 150 men, and also knew that he had not heard of the disaster that had just occurred; and therefore suggested, in reply, the more prudent course of dropping down by his steamer to Patna, then enlisting some additional men, and marching up to Arrah. This proved, no doubt, to be an important letter; but as it was one only containing advice from one civilian to another, it was sent open to the General at Dinapore, that he might pass his own orders. At the same time, contemplating the terrible condition of the outlying Christians in the province, and carefully considering their utter helplessness in the event of Major Eyre's defeat, Mr. Tayler called in the officers from the two stations of Gya and Mozufferpore. And what were the consequences of these counsels and actions? Mr. Tayler laconically relates them:—"A few days afterwards, Major Eyre's glorious victory and the relief of the Arrah garrison were announced, and Mr. Halliday, accusing me of 'panic,' dismissed me from my appointment." Having described the events which led up to his dismissal from office, Mr. Tayler proceeds at considerable length to consider the "controversy" which ensued, in all its bearings, and to place on record all the charges, great and small, which the Lieutenant-Governor at the time recorded to his prejudice, as justifying his summary removal from the high office which he held, and then to exhibit the evidence recorded on the opposite side on each and all of the points referred to. A careful and conscientious comparison of these statements will, no doubt, enable the public to form a just conclusion on the subject in all its branches, previous to Mr. Tayler's return from India. Even a cursory examination of the facts elicited on both sides can scarcely fail to impress the reader, not so much with wonder at the meagre nature of the evidence on which the Commissioner of Patna was sent to execution by the Lieutenant-Governor, as with wonder at the undeniable fact that nearly a score of years have passed by, during which Mr. Tayler constantly courted inquiry, but in vain, and that he is now obliged, as a last resource, to resort to his by no means feeble pen. We have not space to enter minutely into the correspondence and other documentary evidence relied on by either of the controversialists, but will merely select two pieces of cogent evidence which will be sure to impress the most thoughtless reader. The first is a letter addressed to Mr. Tayler as far back as 1868, by Sir Herbert Edwardes, after his examination of the Wahabee conspiracy, and is as follows:—

> "The centre of this truly bitter and formidable political conspiracy was Patna. You lived there, and knew what was going on, you acted on your knowledge, and paralysed the whole of the Wahibi sect, by seizing their leaders at the very moment when they could and would have acted against us. The Bengal Government was determined not to believe in the Wahibi conspiracy, and punished you for your vigour. Time has done you justice, shown that you were right, and hanged or transported the enemies whom you suspected and disarmed."

The other piece of evidence is a copy of Lord Derby's remarks in the House of Lords, 1857. His lordship said:—

> "Then there is another gentleman whose conduct has not received the sanction of the Government,—I mean Commissioner Tayler, of Patna. His conduct has been disproved by the Government, but the papers seem to me to show that he had a more enlarged view of the crisis, a keener sense of the danger, and a better idea of the remedy, than the Government itself."

In concluding this notice of Mr. Tayler's second volume of *Thirty-eight Years in India*, we must not omit to draw the attention of those readers who do not care a pin's head for "Patna" or "Arrah," or Tayler or Halliday, to the clever delineations of society in India, and the excellent etchings which illustrate them, that are to be found in abundance in this volume.

A Summary of Tactics. By Captain H. F. Morgan. (Marcus Ward and Co.)—In these days, when examinations in tactics have been introduced for the Auxiliary Forces, as well as the Regular Army, any work on the subject of tactics will necessarily command a sale. Captain Morgan has performed a valuable service in compiling this volume, which abounds in useful information, all summarised in such a way as to show the student at a glance the meaning of technical terms, and enable him to overcome the many difficulties which surround him, in his desire to post himself in the duties which would devolve upon him, if employed with an army in the field or a force engaged in peace manœuvres. We most strongly recommend the work to the notice of all those preparing for examination, as from its conciseness it cannot fail to prove most valuable.

Hints to Young Officers of the Volunteer Force. By "Centurion." (London: W. J. Johnson.)—Seeing that many gentlemen who accept commissions in the Volunteer Force have but the slightest acquaintance with Military etiquette, and have rarely ever seen such a work as the "Dress Regulations of the Army," this little book may be recommended, for it will give young military aspirants an insight into many subjects on which they are usually ignorant. Not only does "Centurion" tell his readers how they are to dress, but he also devotes chapters to "Camping," "Schools of Instruction," "The Inspection of a Company," "The Issuing of Orders," and other matters which may seem unimportant in themselves, but a knowledge of which will assist a young officer in holding his own when he puts aside his civilian garb for the panoply of war.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Since I last wrote, there has been a vast improvement in the weather, and the ordinary routine work of route-marching, regimental drills, and instruction of recruits has been possible. Some little musketry practice has been going on, but only for 3rd-class shots and recruits; the annual course for regiments will not commence till April 1. The Reservists who arrived from Egypt lately have been leaving the Camp in batches during the week for their homes, on six weeks' furlough, pending final relegation to the Reserve. Any man unable to obtain employment during that period can rejoin the colours for a further term of service; and if married, his wife will be taken on the strength; and indeed, under present circumstances, those who do return will be welcome. The Division is, at the present time, very weak, and duties of all kinds press heavily. The two Cavalry corps forming the Cavalry Brigade, 3rd and 15th Hussars, would not together make one efficient regiment for an ordinary field-day; and the six battalions which form the three Infantry Brigades could barely muster 3,000 bayonets. The 85th Shropshire Light Infantry is the weakest regiment in the command (having a company detached at Portland for duty), and cannot number more than 350 of all ranks at Aldershot. The number of men on furlough, and the Division being five battalions under its ordinary winter establishment, will account for this state of affairs. The 2nd Brigade has consisted of only one battalion, the 84th York and Lancaster, for some months past. Various regiments have been named lately as intended for Aldershot, but these announcements are unreliable, nothing in this direction having been as yet definitely arranged. Twenty-three rank and file of the Ordnance Store Corps arrived on Wednesday from Woolwich for duty. Fifty mules from the Commissariat and Transport Corps were conveyed by special train on Tuesday from the Camp to Nine Elms, for sale. A war game was played on Thursday, by eight officers of the 26th Cameronians, assisted by two officers each from Cavalry and Artillery. Twenty-eight subalterns of Militia, candidates for commissions in the Line, will undergo examination here on the 8th and 9th prox. It has been notified, under authority of Horse Guards' letter, dated 15th inst., that the regimental quartermaster-serjeant ranks regimentally senior to all other non-commissioned officers in the regiment ranking as quartermaster-serjeant, and that non-commissioned officers ranking as colour-serjeants, whether company colour-serjeants or others, rank according to dates of promotion or appointment. Until the publication of this order, the seniority of regimental quartermaster-serjeants, colour-serjeants, orderly-room clerks, and paymaster clerks holding similar rank, has been an open question. This decision now sets the matter at rest. The Bowyers' Prize of 25 guineas will be shot for at the Army Rifle Meeting at Aldershot, in August next, at moving objects, at unknown distances. The members of the field-sketching and reconnaissance classes, which were formed early in December last, have returned to regimental duty, on completion of the course. Fresh classes have been formed, each consisting of one officer (competent to act as instructor) and four non-commissioned officers from each regiment of Cavalry and Infantry, and are struck off all duty for this purpose. The instruction is carried out under the supervision of the Garrison Instructors. Lieutenants H. Jenkinson and A. B. Denne, R.A., have been posted to batteries at Aldershot. Lieutenant-Colonel A. M. Rawlins, R.H.A., will shortly proceed to India. An Officers' Whist Club has been formed at the Club-house. There was no promenade concert at the Club on Wednesday, owing to the theatricals. A range-finder, the invention of a London optician, especially adapted for infantry, is now being tried here, along with the Weldon range-finder. The Army Athletic Meeting will be held at the Camp on two days in June next. The following officers of Yeomanry Cavalry have been ordered to join the School of Instruction for Auxiliary Cavalry Forces at Aldershot on the 1st prox., for a course of instruction, Commandant and Instructor, Captain E. Hegan, 5th Dragoon Guards:—Lieutenants D. W. Shaw, Ayrshire; T. Bate, Denbighshire; J. A. Campbell, Lanarkshire; W. L. Pilkington, Lancashire Hussars; H. T. Barclay, R. A. Falkner, and W. J. Martin, Leicestershire; C. B. Wright, South Notts; Captain H. Bromley, Sherwood Rangers; Lieutenants R. Hardy, Staffordshire; E. A. Sassoon, Middlesex; Major W. S. G. Langton, Lieutenants N. McLean, F. Houlton, F. J. W. Bennett, and C. G. Hill, North Somerset; Lieutenants S. H. Lambert, Bart., J. B. E. Bourne, and E. M. Everitt, Warwickshire. The non-commissioned officers of Yeomanry Cavalry attending the school at present will shortly rejoin their corps, on completion of the course. On Saturday night, or early on Sunday morning last, the North Camp Military Church, used by both the Church of England and Roman Catholic denominations, was burglariously entered, and the communion services of both persuasions carried off. The thieves also drank a quantity of the sacramental wine. The building being of wood, and no sentry over it, entrance was easily effected. The act is believed to have been the work of professional burglars. No arrests have yet been made. A court of inquiry on the matter was held on Monday. This is the church at which the Empress Eugénie is a constant worshipper at the 10.15 a.m. Roman Catholic service on Sundays. Performances were given by the Officers' Dramatic Club at the Club house on Tuesday and Wednesday evenings. On Sunday afternoon last, about the time of church-going, it was reported to the military police that a fire had broken out in All Saints' Military Church, Permanent Barracks. The fire alarm was at once sounded. The fire, which was caused by the overheating of the apparatus for warming the church, was soon got under. The promptitude of the fire brigade on this occasion is worthy of all praise. By their timely arrival, they were the means of preventing what might have been a serious conflagration. A new Veterinary Class will be formed at the Veterinary School here on the 1st prox. It has been notified that officers wishing to join are to forward their names without delay to the Assistant-Adjutant-General's Office. An Aldershot Brewery Company has recently been started here; chairman of the board of directors (who are all soldiers), Lieutenant-Colonel G. W. A. FitzGeorge, 20th Hussars. The sale of beer and porter on the Camp is said to amount annually to £80,000. There is no other local brewery. It is stated that there is a desire at the War Office that the military should deal locally, wherever practicable, and the object of this company is to supply pure malt liquor at fairly remunerative prices. Lieutenant-Colonel W. W. Taylor has proceeded to the Depôt of the 87th Royal Irish Fusiliers, at Armagh. Major F. A. Dashwood has rejoined the battalion from the Depôt. Captain H. C. Bowles has been posted to the 4th Battalion Rifle Brigade, in India, from the 3rd Battalion.

NAVAL EXAMINATIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I have before me the table of marks obtained in the last examination for Naval Cadetships, and have compared the results with those of the previous June. It appears, that in November, 11 who obtained more marks than some of the successful candidates, failed in one or more subjects, whereas last June this did not occur in a single instance. The cause is certainly, in four cases out of the 11, to be attributed to the arithmetic paper alone, in one to the arithmetic and algebra; and I think, having had an experience of 20 years in preparing boys for the Naval and other examinations, I may truly say that the arithmetic paper was too difficult for young boys. The fact that last June 87 per cent. of the marks were obtained by the 24 successful candidates, and only 71 per cent. by the 33, or 75 per cent. by the first 24, speaks for itself. I should imagine that the boy who failed with 1,032 marks must have been fair in mathematics, for though his failure is due to his obtaining only 100 for arithmetic, yet he obtained full marks for algebra, and 128 for geometry, and in the optional mathematics 213 out of 300,—a number only exceeded by three candidates, with 267, 247, and 214 marks respectively. The boy who was successful with 847 marks, exactly qualified in geometry, obtained eight above the minimum for algebra, and 64 only for optional mathematics. Though comparisons are odious, it seems to me that the rejected candidate, with 1,032 marks, was the better one of the two. These statistics may interest some of your readers, and induce the examiners to remember the age of the candidates, at least in the qualifying portion of the examination.—I am, &c.,

SCRUTATOR.

Epps's Cocoa.—Grateful and Comforting.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Made simply with boiling water or milk. Sold only in packets, labelled—"James Epps and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence.

ARMY NOTES.

Their Royal Highnesses the Duke and Duchess of Connaught and suite left Charing Cross by the 8.5 mail train on Sunday evening for Paris.

Major Gildea had been appointed hon. secretary to the Army Coffee Tavern Association, vice Lieut.-Col. F. Duncan, R.A, appointed to a command in Egypt. The council has resolved to place on record its unanimous appreciation of the valuable services so zealously and cheerfully rendered by Col. Duncan.

The *Times*' correspondent writes from Cairo:—"The organisation of the Egyptian Army is proceeding very satisfactorily. All rumours as to recruits suffering any other hardships than such as arise out of their unavoidable withdrawal from the fields are unfounded. Great difficulties naturally exist in inducing the men to obey the elementary rules of cleanliness and discipline; but the patience, forbearance, and conscientious desire to secure the well-being of their men on the part of every officer, from Sir E. Wood downwards, excite the admiration of foreigners, and seem to be already producing a beneficial effect on the soldiers themselves. At the same time, the task is an extremely difficult one; and if in England we hardly expect to manufacture a soldier within three years, at least this time must be allowed before the raw Egyptian recruits can be left as the sole guardians of order. The army of occupation might, however, be safely reduced to 6,000, its mission here being to emphasize the existence of available force rather than to employ it. It is much to be regretted that detachments are not sent during the present fair season to the more important villages. As a general rule, the objection to a British occupying force is greatest where the experience of one has been least, and it would be a mistake if the Army left Egypt before a larger proportion of the population recognise that the British are no longer enemies, but peaceful residents, increasing the profits of the bazaars."

The *Irish Times* says:—"It is announced by a service journal that Lieut.-Gen. Sir Beauchamp Walker's appointment—that of Director-General of Military Education—is a seven years' appointment. This is not the case. Gen. Walker was appointed for five years only, the Royal Warrant distinctly laying down that 'the appointments in the Department of the Director-General of Military Education shall be considered Staff appointments, and shall be held subject to the conditions which are applicable to appointments on the General Staff of our Army.' Now, appointments on the General Staff are five and not seven-year appointments, so that Sir Beauchamp Walker would have left the War Office on Jan. 19 but for the fact that the Secretary of State for War, after considering his claims, decided that it was to the advantage of the public service that he should be given an extension of his term of office."

The Russians are said to have opened a mercantile office in Cabul.

The organ of the Russian general staff, the *Russki Invalide*, describes the Egyptian war in its military summary for 1882. It says:—"The first thing that strikes one is the immense transport power possessed by England;" and it adds that the infantry "showed at Tel-el-Kebir that it still preserved the spirit of the good old times, and that, in spite of the breechloader, the bayonet is still the most decisive weapon of war." From a "Continental point of view, however, the war was not so satisfactory. The difficulty the Government experienced in raising attenuated regiments to their proper strength, and the numerous cases that occurred of mere skeletons of detachments being sent to the seat of war, showed that at the very utmost England could not land more than 40,000 troops on the Continent of Europe without considerable difficulty, and that even this could not be effected without leaving England completely bare of an army."

It is stated that the Bombay Government have followed the action of the authorities in Bengal with regard to the introduction of new facing-cloths for the Native Army, and that it has been proposed to adopt white facings for all regiments in that Presidency, except the 5th, 9th, and 10th N.I., which will adhere to "black," and the 4th Rifles, 27th, 29th, and 30th (Belooch regiments), all of which will retain their "red" facings.

A new General Order has been issued on the subject of recruiting for the Bengal Army, of which the following is an abstract:—The enlistment is forbidden of men belonging to the menial castes—namely, Khutteeks, Mehtars, Chamars, Dhanootes, Pasis, Lodhs, Gararias, Baniahs, Kaiths, Kurmis, Bhaths, and other castes inferior to these. Only five regiments—namely, the 11th and 19th Bengal Lancers, and the 20th, 21st, and 26th Bengal Infantry, will be permitted to enlist Afreedies. These Afreedies are to be kept together in one troop or company. Punjabi Hindoos or Moonahs may be enlisted in the Sikhs or Dogra troops or companies, to the extent of one-tenth of the normal strength. Men enlisted in the districts of Delhi, Gurgaon, Jhajjar, Karnal, Rohtak, and Hissar are to be classed as Hindostanees, and not as Punjabees. The Goorkha regiments are to be mainly composed of the four classes of Goorungs, Magars, Khawas, and Thakoors. Assam regiments may enlist any class of Goorkhas, but are not permitted to obtain recruits from any part of Nepaul west of Khatmandoo. Regiments enlisting hillmen—namely, Gurtawalis, Newars, and Kumaonis—should do so in communication with the Resident in Nepaul, or the Commissioner of Kumaon; but the enlisting of Goorkhas under the name of hillmen is forbidden.

"Half-pay" writes, in reference to the discussion on public schools and Army examinations, "It might interest the services to know that one of the successful public schools at the last examination for entrance to the Royal Military Academy, Woolwich, was the United Services College, whose pupils took 1st and 17th places, without the assistance of a crammer. A pupil direct from it also took the 15th place among the candidates at the last Sandhurst entrance examination. The United Services College was set on foot by some 200 officers of the Army and Navy, about eight years ago, and has proved a most successful experiment, combining efficiency with economy."

Tuesday's Gazette.

◆

ARMY.

WAR OFFICE, Pall Mall, February 20, 1883.

8th Hussars—Capt. W. S. D. Abbott retires from the service, receiving the value of his commission.

12th Lancers—Lieut. the Hon. G. W. H. Vernon to be Capt., vice W. Colquhoun, seconded (Feb. 6).

Regimental District.

Lieut.-Col. and Col. R. D. Barrett, from half-pay, to be a Lieut.-Col., to command the 19th Regimental District (the Princess of Wales's Own Yorkshire Regt.), vice Col. R. Mockler, whose period of service in that appointment is about to expire (Feb. 23).

Line Battalions.

The Royal Scots (Lothian Regiment)—Supernumerary Capt. H. W. Tombs to be Capt., vice S. B. Moore, appointed Adjt. 3rd Batn. (Jan. 26).

The Northumberland Fusiliers—Lieut. J. R. C. Colvin has been appointed a probationer for the S.C. (Nov. 1, 1882).

The Prince of Wales's Own (West Yorkshire Regiment)—Capt. E. E. S. Schuyler has been seconded, for service as an Adjt. of Auxiliary Forces (Jan. 1). Lieut. W. C. Loudon has been appointed a probationer for the S.C. (Nov. 17, 1882).

The Bedfordshire Regiment—Lieut. J. C. B. Craster has been appointed a probationer for the S.C. (Nov. 11, 1882).

The Gloucestershire Regiment—Lieut. N. Irving-Noble has been appointed a probationer for the S.C. (Dec. 5, 1882).

The East Surrey Regiment—Lieut. L. R. H. Roberts resigns his commission.

The Duke of Cornwall's Light Infantry—Lieut. E. H. Studdy to be Capt., vice L. B. Beaumont, retired (Feb. 7).

The Hampshire Regiment—Major J. E. Collins, from the King's (Shropshire L.I.), to be Major, vice J. S. White, seconded from Dec. 2, 1882, for service as an Adjt. of Auxiliary Forces.

The Prince of Wales's Volunteers (South Lancashire Regiment)—Lieut. M. Z. Darrah has been appointed a probationer for the S.C. (Nov. 1, 1882).

The Sherwood Foresters (Derbyshire Regiment)—Capt. F. E. Trower has been seconded for service as an Adjt. of Auxiliary Forces (Jan. 19).

Princess Charlotte of Wales's (Berkshire Regiment)—Capt. J. C. M. Pigott has been seconded for service on the Staff (Jan. 27).

The King's (Shropshire Light Infantry)—Capt. J. K. Kirkwood to be Major, vice J. E. Collins, transferred to the Hampshire Regt.

The Prince of Wales's (North Staffordshire Regiment)—Capt. L. R. M. Maxwell, from the Princess Victoria's (Royal Irish Fusiliers), to be Capt., vice J. Reeves, who exchanges; Lieut. T. M. Hawtayne to be Adjt., vice Lieut. E. W. Newland, who has relinquished the appointment (Jan. 1).

The York and Lancaster Regiment—Col. L. S. Warren, having completed five years' service as a Regimental Lieut.-Col., has been placed on half-pay (Feb. 16); Capt. and Brevet Major W. J. Kirkpatrick has vacated the Adjutancy, on completion of five years' tenure of that appointment (Feb. 2); Capt. T. Horton to be Adjt., vice Capt. and Brevet Major W. J. Kirkpatrick (Feb. 23).

The Highland Light Infantry—Capt. R. G. Wardlaw-Ramsay retires from the service, receiving a gratuity; Lieut. R. E. Gooldtires Adams to be Capt., vice H. L. Lopes, deceased (Dec. 11, 1882).

The Royal Irish Rifles—Lieut. J. S. Brown to be Adjt., vice Capt. W. B. Marling, who has resigned the appointment (Dec. 16, 1882).

Princess Victoria's (Royal Irish Fusiliers)—Capt. J. Reeves, from the Prince of Wales's (North Staffordshire Regt.), to be Capt., vice L. R. M. Maxwell, who exchanges.

Princess Louise's (Argyll and Sutherland Highlanders)—Capt. the Hon. W. F.-W. Elliot to be Major, vice G. N. Stevenson, retired (Jan. 31).

Staff—Lieut.-Col. W. R. Lascelles, the Rifle Brigade (the Prince Consort's Own), to be an Assist.-Adjt. and Qrmr.-Gen., vice Col. G. F. C. Bray, whose period of service in that appointment is about to expire (April 1).

Medical Department—Brig.-Surg. C. M. Jessop, from half-pay, to be Brig.-Surg., vice J. S. Comyn, M.B., granted retired pay (Jan. 26).

Memoranda.

Hon. Lieut.-Col. F. S. Goad, late Major 107th Foot, has been permitted to commute his retired pay (Feb. 2).

Hon. Lieut.-Col. E. J. Y. Armstrong, late Major the Lincolnshire Regt., has been permitted to commute his retired pay (Feb. 3).

Major W. Everett, the Duke of Wellington's (West Riding Regt.), to have the local rank of Lieut.-Col. whilst employed as her Majesty's Consul at Erzeroum.

Indian Staff Corps.

The under-mentioned officers have been transferred to the Unemployed Supernumerary List:—Cols. C. Thompson, Bombay (Jan. 30), and J. A. M. Macdonald, C.B., Bombay (Feb. 11).

Reserve of Officers.

Lieut. W. R. Ludlow, Capt. 1st Volunteer Batn. the Royal Warwickshire Regt., resigns his commission; Lieut. W. H. Bleck, 1st Essex A.V.C., to be Lieut.

(Where not otherwise specified, the foregoing commissions and announcements bear date February 21, and the current year must be understood.)

INDIA OFFICE, February 20, 1883.

The Queen has approved of the restoration of the under-mentioned officers from the Half-Pay List to the Effective List:—

Bengal Infantry.

Major C. O. W. Apperley (Dec. 13, 1882).

Bengal Medical Establishment.

Surg. C. H. Beatson (Dec. 22, 1882).

Lieut. A. L. Sinclair, Bombay S.C., adjt. 27th Bombay N.I., has been given an appointment on Sir E. Wood's staff. Up to the present, 26 officers of the English Army on the Active List, including two of the Royal Marines, have accepted appointments in the new Egyptian force.

There must be a good deal of expenditure by the Admiralty that needs explanation, if the figures given by Mr. Henry Watt, master mariner, of Liverpool, are accurate. He says that there is a great waste of money in repairs. In 1877, there was an estimate of £21,000 to repair the Enchantress, a wooden ship 14 years old, though a new iron vessel might have been built for £30,000. "The dockyard blue-books now show that the repairs cost £30,099, to which has to be added 33 per cent. for charges, making, in round numbers, £41,000. To repair and fit out the training-ships Eurydice and Atalanta we spent £62,846. Four new and much better iron or composite vessels might have been had for the same sum. By Mr. Campbell Bannerman's Return, No. 307, of 1882, the Garnet, Opal, Sapphire, and Turquoise have served only one commission of about four years, and require, on the average, about £35,000 each to repair them. Some of this class were built in private yards, and it is well known they are a failure in design, both as to hull and engines; hence the excessive cost for maintenance." But Mr. Watt has a still more striking comparison:—"The Nautilus, a wooden sailing training-brig, of 501 tons displacement, built in 1879, cost, with charges as above, £21,250. The writer built for his own use, in 1881, a sailing vessel of iron, of 1,000 tons displacement, of the best description, and fitted with steam gear to work the anchors and cargo, for £7,800." It would be interesting to know what superiority on the part of the Nautilus made her worth £13,000 more than Capt. Watt's ship of double her tonnage.

Capt. A. Dupuis, R.N., has been appointed to the command of the Serapis, in succession to Capt. G. Twiss, and will take over the command of the vessel at Portsmouth, where the Serapis has just arrived from India.

Amusements.

◆

At the Olympic Theatre, under the title of "Meg Merrilies, or the Gipsy's Prophecy," Miss Geneviève Ward has presented an American version of David Terry's once popular drama of "Guy Mannering," originally produced at Covent Garden on March 12, 1816, when the exquisite music composed by Sir Henry Bishop gave the piece special advantages, and its popularity was extended through many succeeding seasons. With the excision of the musical element the play loses all the attraction it formerly possessed, and when the intensity of purpose displayed by Miss Geneviève Ward as Meg Merrilies is duly acknowledged, and the cleverness of the assumption by Mr. Vernon of Dandie Dinmont is placed on record, the limit of praise suggested by the revival is fairly reached. Mr. E. Lyons caught effectively some of the peculiarities of Gilbert Glossin, but Mr. Hilton utterly failed in realising the mingled humour and pathos of the faithful pedant, Dominic Sampson. Mrs. Leigh Murray, Miss Lucy Buckstone, and Miss Kate Lee were included in the cast. Few seem to remember that a much better version of Scott's novel was written by Mr. J. R. Planché, and produced at the old English Opera House, now known as the Lyceum, on May 30, 1821, under the title of "The Witch of Derncleugh." In this adaptation, the famous Fanny Kelly represented Meg Merrilies, and T. P. Cooke the smuggler, Dirk Hatteraick.

A morning performance at the Gaiety Theatre on Tuesday introduced a clever actress to a metropolitan public. Miss Lingard, of English birth, and who has attained much popularity on the American stage, has also for some time figured conspicuously as a theatrical star in the Australian colonies. An adaptation of the well-known novel by Alexandre Dumas the Younger, familiar as the "Lady of the Camélias," and here presented under the title of "Camille," was chosen for the occasion. The *débutante*, with much advantage derived from personal appearance, is manifestly a well-trained exponent of characters demanding force and earnestness of expression. Her elocution was excellent, and her success was decided. The support afforded was in every respect adequate, Mr. J. H. Barnes very effectively portraying Armand Duval, while Mr. E. F. Edgar as M. Duval, Mr. Temple as Gaston, Mrs. Leigh as Madame Prudence, Miss Bella Howard as Olympe, Miss Phyllis Broughton as Nanine, and Miss Connie Gilchrist as Nichette, were included in the cast.

Those who desire to see a really good drama, well played and well mounted, cannot do better than book seats at the Princess's, where "The Silver King," by Messrs. Jones and Herman, is still drawing crowded houses. Mr. Wilson Barrett never does things by halves, and on the present occasion he may fairly be said to have excelled all previous efforts, having produced a piece which will hold the boards for some months to come.

About Easter, more comic opera may be expected. Offenbach's posthumous "La Belle Lurette" will be produced at the Avenue; and at the Strand Theatre, "The Magic Thimble," for which Mr. Harry Paulton has supplied the libretto, is to be placed in immediate rehearsal. The composer is "Florian Pascal," the pseudonym, it is understood, of the son of Mr. Joseph Williams, the well-known music publisher of Berners Street, Oxford Street, whose songs have lately obtained considerable popularity.

The tenth season of French plays will be commenced at the Gaiety on Monday, June 4, and will be continued for six weeks.

The Carl Rosa English opera season at Drury Lane will begin on Easter Monday, March 26, with Goring Thomas's "Esmeralda."

The usual "Moore and Burgess" Minstrels' entertainment at St. James's Hall, Piccadilly, is now supplemented by the Martinetti Troupe, who appear during the second part of the programme in a lively pantomimic ballet.

With this week has terminated the season at Mr. Charles Hengler's well-managed equestrian establishment in Argyll Street, Regent Street. The esteemed proprietor of "Hengler's Grand Cirque" took his benefit on Wednesday, when a varied entertainment was given, both in the afternoon and in the evening.

A German official report lately published in the *Marine Feordnung's Blatt* states that it is the opinion of German naval authorities that for the future an effective blockade has become impossible. The reasons given are that a fleet would always be obliged at sunset to gain the open sea, and to remain sufficiently far off to prevent torpedo-boats issuing from the harbour coming up to the vessels in the darkness; and not even a single ship could be left on guard in sight of the port without the risk, almost amounting to certainty, of being sunk during the night; whilst the port would remain open not only to light and speedy cruisers, but to any ship whose entrance might be desired. Under such circumstances, the probability of a few torpedo-boats lying hidden along the coast would, it is thought, be sufficient to paralyse the action of the most powerful squadron, and to prevent the possibility of any serious operations. This opinion has now been adopted by Mr. Nathaniel Barnaby, C.B.

Admiral Acton, the Italian Minister of Marine, has laid before the General Budget Committee the documents relating to the contract for the construction of the ironclad Italia. In these it is stated that the Government did not think it expedient to give the commission to a French house, but preferred the more prudent course of entering into a contract with English firms, who, moreover, undertook to supply iron plating which would possess quite as much resisting power as any armour that could be provided by the most eminent French ironmasters.

Rear-Admiral Sir W. N. W. Hewett, K.C.B., Commander-in-Chief in the East Indies, was at Rangoon on Monday last, and is expected to arrive at Calcutta on the 26th inst.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—Saturday, February 24, 1883. Letters on business and Remittances should be made to Mr. Richard James Wood.

THE reply of the First Lord of the Admiralty to the Earl of Belmore relative to the pay of Naval Officers cannot be viewed with satisfaction. Whatever attention successive Boards have paid to the matter, their concessions have not been productive of much advantage, being so small and infrequent as to have lost their value, and hardly to be appreciated. Lord Northbrook says that since 1856 the position of all branches has been improved, but with all deference to his Lordship, we demur to that. Can he point out that the substantial pay of Lieutenants has been increased? Certain allowances have been given for additional qualifications, which every one cannot acquire. Provision was made in the Estimates of 1882-3 for 52 Lieutenants in command, 125 Senior Lieutenants, and 65 Gunnery Lieutenants, leaving 406 in receipt of only 10s. per diem; therefore the Lieutenants' pay of to-day is no better than it was a quarter of a century ago. A longer period is served as Sub-Lieutenant; and as the Lieutenant acquires seniority, the only advantage which the future holds out to him is retirement at the age of 45 on £300 a year, without he is lucky enough to obtain promotion. Whatever favourable comparison may be drawn between the prospects of those who enter the Navy and young men who aspire to the leading professions of civil life, the latter are not subject to the hardships and dangers of a sea-life or warfare; and the Lieutenant has to travel a rough road, with many risky episodes, before he attains a retiring allowance. A progressive increase of full pay according to actual sea-service would be just, and effected at small cost. Paymaster's pay, in 1855, commenced at 13s. 8d., the maximum rates being £1 12s. 11d.; the Childers scheme, 1870, increased them to 14s. and £1 13s. respectively, merely fixing the rates at equal shillings. Promotion in 1855 was at the age of 29, it happens now at 37. The small allowances for flag and depôt ships apply to only 20 officers. This branch does not labour under obligations for favours, but has from time to time been "heavier weighted" by responsibilites. Engineers below the Inspectorial grades have been granted small additions, and their allowances have been improved, but in no way commensurate with their increased duties. The Navigating branch have been under consideration for many years, and found too useful to be cleared off at once; they have been granted an occasional crumb, as an assurance that their existence is still remembered. The Medical officers we congratulate on having friends (not at Court) who will not take "No" for an answer. Evidently, Lord Northbrook obtained his information from those who do not know "where the shoe pinches;" let him seek for it outside the Admiralty walls, and he will then be convinced that Lord Belmore did not speak unnecessarily. A leading daily contemporary on Wednesday last viewed this subject in a way which commends itself to all unbiassed people, admitting that the question is one which has grown to be of national importance, and one which can no longer be kept within the four walls of either the Admiralty or the Treasury. Lord Belmore, viewing the matter from this stand-point, made a strenuous attempt to obtain from the First Lord of the Admiralty a promise of fair play and fair pay for the officers of the Navy. Lord Northbrook, however, declined to pledge himself to any reform in this much-needed direction. He sheltered himself under the fact that the half-pay and allowances of Lieutenants had been increased since he was at the Admiralty, in 1856, although he did not attempt to deny that the daily pay of the Lieutenant is the same now as it was in the year 1840. In the meantime, the wages of professional services or labour have increased, in many cases having been doubled and trebled, owing to the increased cost of living. Among the working-classes, this has been brought about by strikes; among the Civil servants of the Crown, by political influence and Parliamentary interest. The Naval Lieutenant alone is allowed to starve on a bare pittance. The Naval Surgeons, the Engineers, all grades, in fact, have been granted higher rates of pay, or are about to have the same granted, except the Lieutenant. Why is this? Because, Lord Northbrook informs us, the supply of cadets for the Navy is greater than the demand. "He has not found any indisposition on the part of fathers to send their sons into the Navy." Is this any reason why the faults of the fathers should be eternally visited upon those sons? A father sends his son into the Navy for various reasons. Some few fathers have great interest, and know that their sons are safe to pass rapidly into the higher ranks of the service. The greater number of fathers know nothing of the service. They send their sons into the Navy for two reasons. One is the desire to provide the son early in life with a profession, and thus get him off their hands. The other is the importunity of the boy to be rid of school life by going to sea. The lad has probably read Marryat's novels. He has formed an inordinate appreciation of the glories of a Naval officer's life. His brain has been turned by ideas of gallant deeds, prizes, prize-money, promotion, and fighting, like Midshipman Easy, under a petticoat. But neither father nor son ever dreams of looking at the reverse side of the picture, and of considering the position in life of the Lieutenant who, at the age of 35, has to maintain himself and family on an income which, counting full-pay and half-pay time, never exceeds the average of £150 a year. The boy was not a free agent when he entered the Navy. It is no excuse that fathers continue to send their sons into the service, to thus treat men who have learnt the mistake both they and their fathers committed, when it is too late to remedy it. It is, in reality, taking advantage of a popular fallacy to doom hundreds of honourable men to a life of incredible privation, misery, and destitution, and with them the daughters of our land whom they have wedded, and the innocent progeny of these ill-starred unions. The only remedy is a scale of progressive pay, as before stated. And we strongly recommend fathers of families to think twice, aye, thrice, before sending their sons into the Navy until the scale of pay they may hope to attain during the best years of their lives is made to correspond somewhat more than it does at present with the requirements of the age.

THE question raised by the declarations of members of the Government respecting the withdrawal of the Army of Occupation from Egypt is one of great importance. Lord Hartington's words have been taken as a formal promise that the British Army shall retire on a certain and not distant date, but Lord Granville's less oracular and more guarded words refer to conditions which may not be attained for some time to come, and which are, moreover, subject to control, should it be considered desirable to prolong the occupation. It is a very difficult matter to prove that order is established, and that guarantees have been provided for the working of the new Constitution, should it be thought necessary to argue that there are grounds for apprehension and doubt on these points. *Le Temps*, the organ of jealous and offended France, has girded at the British Government for the delays which have occurred in the reduction of the force of the Army in Egypt. We hope our contemporary will be candid enough to admit that its innuendoes and accusations were ill-founded. But, if some months hence, *Le Temps*, or any other organ, or if any foreign Minister, should call attention to the presence of a British Army in Egypt, and quote Lord Hartington's words, it is possible that explanations and excuses may be needed, if we desire to justify our continued occupation. It will not be in the power of any Government to refuse to receive them. It is unquestionable that there is a large party in Egypt—and we need not now specify how high its chiefs are, or of what elements it is constituted—which looks forward to the liberation of the soil from the liberating Army which overthrew the dictatorship of Arabi. It is also true that the foreign element, whose cry is, "Egypt for the Europeans!" desires, above all things, a prolonged, if not an indefinite occupation; and that there are Egyptians with financial interests at stake who would welcome a Protectorate or annexation, because it—either one or the other—"would send up Egyptians" to the celestial region where fortunes are floating for Bondholders in the money market. But the pledges of the Queen's Government to Europe do not permit them to gratify the wishes of the "Colonies" in Egypt, or to execute the mandate of the Stock Exchanges by any specific assumption of a Protectorate, or by a decree of annexation. The matter to be determined, then, is one of time. *Quo quousque?* We are not abusing the patience of any Power, or violating any law, or evading any promise, in keeping an Army in Egypt till the Army, the gendarmerie, and the police of the Khedive are in such a state of efficiency as to assure the maintenance of the authority of the Viceroy, and the preservation of law and order among his subjects. We must be judges whether and when that condition is established. When the last English soldier has left Egypt, there will begin the test-time of the new organisation, but on the British Government will devolve the full responsibility of the consequences of the experiment, though some of the consequences must be felt by Egyptians, if there be failure. We have reason to believe the best authorities think there is no prospect that in three, or in six, or in nine months there will be a disciplined army, gendarmerie, and police at the disposal of the Khedive. If that be so, the Division now in Egypt will have to put in another summer and autumn at Alexandria and Cairo, and the War Office must not overlook the fact, or neglect the necessary measures for the health of the men. The sickness which clings to the Army there may diminish, but it would be well, we think, to consider how far the Indian reliefs can be worked out in connection with a tour of duty in Egypt, so as to give a change of station to the battalions which have been so long in that country. From what we hear, the attractions of the Valley of the Nile have ceased to reconcile officers and men to service there, though they may go farther and fare worse. Until the Soudan rebellion be suppressed, Nubia and Upper Egypt must be exposed to alarm and disquiet; and the reports which have reached us of the conduct of the Turkish and Egyptian officers of the forces employed in making head against the Mahdé, give reason for serious apprehension that the British officers who have gone up to Khartoum may not be able to inspire their men with confidence and courage, or retrieve the disasters which have been caused by incompetence and cowardice. There must be a backbone left in the body politic.

As the Army Estimates are to be brought forward immediately "in Supply," it seems to us the proper moment to draw attention to the treatment which the Purchase Colonels have received from the War Office, under cover of the Warrant of June 25, 1881, by compulsory removal from the Army, under the age and non-employ clauses recently introduced. The Purchase Colonels purchased commissions under the rules and regulations of the Army which existed up to 1871, when Purchase was abolished. Their money was invested in the Army under State guarantee, and when Purchase was abolished by Royal Warrant, we are of opinion that Mr. Muntz's sensible proposal in Parliament—that the Regulation value of all commissions should be paid "down"—should have been adopted. If this course had been followed, the Purchase Officers would have had no just cause of complaint against the alteration of their terms of service, the inauguration of a new era, or the action of new Warrants regulating promotions and retirements under the non-Purchase rules and regulations. Unhappily, this payment of the "Regulation down" was not adopted, and in the end the Government had to pay both the regulation and over-regulation on all sales of commissions. Moreover, since 1871 there has been a continual sense of injury established amongst all Purchase Officers who are or were injuriously affected by the post-Purchase Warrants, continually changing their prospects. Eventually, the last step was taken against the Purchase Officers, by their removal from the Army by the Warrant of June, 1881. This was the last straw which has intensified the resentment of the senior officers, who were immediately brought under the action of this obnoxious Warrant. The Generals were more easily dealt with than the Colonels, because they forfeited the money invested in commissions, on their electing to become Generals by promotion. But even the Major-Generals were very hard hit by removal from the Active List for age or non-employ, as most of them had paid large sums of money for their commissions up to the rank of Lieutenant-Colonel, under Government rules, regulations, and guarantee, and never contemplated enforced retirement under new rules which struck them out of the profession almost in the prime of life. But in their cases, to soften the blow, larger pensions were given, with a step of honorary rank. But even then, the Government made the singular mistake of taking away the distinguished-service pension from those Generals to whom they had been awarded. This was plainly done on economic grounds, and had the effect of making the most distinguished officers pay for the increased pensions to those less distinguished. This was a skilful War-Office, "net-loss" calculation, which soldiers are so obtuse as not to understand. But the Colonels had *not* forfeited the money paid for commissions, or the vested rights in the commissions, for which they had served, when they were removed from the service for age and non-employ. The cases differ, therefore, very much from those of the Generals. The Purchase Colonels have remonstrated with the Secretary of State for War, ever since the issue of the Warrant of June, 1881, against removal under that Warrant without adequate money compensation. As the War Office authorities adhered to their decision, and shielded themselves under the Army Purchase Commission—which the officers do not recognise as an independent court of arbitration—the Colonels asked for an unprejudiced arbitration, before whom they could lay their claims for compensation on the general question of compulsory removal. This was not granted, though all the awards of the Army Purchase Commissioners were, we understand, vigorously contested. The result has been that the Purchase Colonels have printed their claims and cases, and now appeal to Parliament for redress. We have seen this pamphlet, which is in the nature of a private one, and is now, we believe, in the hands of a few Members of both Houses. We consider that the Colonels have made out a very strong case, and we fail to understand on what grounds independent arbitration was refused. The Colonels now "contest the power of Government to remove from their profession without adequate compensation, officers who paid for their commissions under Government rules and regulations, and thus inflict great and undeserved hardships and money losses on officers of high rank, who had purchased proprietary and vested rights in their commissions, and, moreover, gave long service, and thus further established their claims for equitable treatment." It is a curious fact, that very recently General Billot, the French Minister of War, laid down as an axiom in the French Chamber that French officers (who have never paid a shilling for commissions) had a proprietary right in their commissions, and that they could not be deprived of them, except for misconduct. This opinion was not contested or denied in the French Chamber. That compensation was at first contemplated in the case of the Removed Colonels is clear enough, as at page 15 of the pamphlet before us we find the following letter from the War Office, addressed to one of the Colonels:—

> "*War Office, September* 26, 1881.
>
> "Sir,—I am directed by the Secretary of State for War to acknowledge the receipt of your letter of 17th ult., addressed to the Military Secretary, and to acquaint you in reply that, inasmuch as *full compensation* will be granted to you for any pecuniary loss which you may sustain through the introduction of the rule, against which you appeal, of being obliged to retire at 59, instead of 63, *you will in no way suffer pecuniary loss through the action of the existing Warrant.*—I am, &c., E. Tudor Johnson,
> Acting Deputy-Accountant-General."

On June 9, 1882, the same Colonel is informed by the War Office that as the Army Purchase Commissioners have reported that he had not suffered any net loss (whatever that may mean), no addition could be made to his retired pay under Article 978-XII. All the Colonels now claim the regulation value of their commissions when Purchase was abolished, as proposed by Mr. Muntz, M.P., in addition to the pensions they have earned by long service. So much for the "net-loss" calculations of the War Office and Army Purchase Commissioners, which seem to have produced general dissatisfaction. A table of the awards of compensation by the War Office are given at the end of the pamphlet. This is a very curious list, including the magnificent compensation of £1 19s. per annum to a Colonel of the Guards, and £5 12s. to an Infantry Colonel who paid over £6,000 for his commission. We consider, after a careful perusal of the Colonels' case, that the whole matter was very insufficiently considered, when the vested rights of the Purchase Colonels were over-ridden by the Warrant of June, 1881. The report of Lord Penzance's Commission in 1876 warned the Government against applying compulsory retirements to Purchase Officers, which was called a very delicate question, requiring most careful handling. "Regulation down" in 1871 would have saved all this dire confusion, and would not, in the end, have cost more money.

The Civilian Administration of the Navy is one of those anomalies common to England, but to be found in no other country. Were a Naval man to ask Lord Wolseley whether he would not get on better at the War Office if he removed all the Military men at present serving in its various Departments, except the Commander-in-Chief, the Quartermaster-General, Adjutant-General, Director of Artillery and Stores, and the Military Secretary, and replaced them by Civilian Clerks, he would most likely be looked upon as a madman or a fool. And yet the Navy, notwithstanding that it is supposed to be the leading service, is governed in this manner. The Naval Lords and officers at the head of the Reserves and Transport Departments represent those military officers named, but at the Admiralty there is not a single Naval officer corresponding to the numerous military men employed in various capacities at the War Office. The whole of the Administration of the Navy is vested in Civilian hands. This is all the more remarkable, in that Civilians of necessity can know nothing of the Navy, of Naval matters, nor of the hundred and one requirements of a life spent on the ocean wave. Of Military matters, civilians do know something. Hundreds of thousands of Englishmen have passed through the ranks of the Militia and Volunteer forces, which are upwards of a quarter of a million. Hence it might be presumed that some excuse could be found for the civilian element preponderating in the government of the Army. But it does not. It is only at the Admiralty that it does. Here all questions as they arise are submitted to civilian clerks, who prepare them by collating all that has gone before on the subject, for the information of the Chief or Naval Lord at the head of the Department. In this manner, purely Naval questions, such as movements of ships, complements, signals, surveying, port orders, blockades, war operations, manning the Navy, organisation, reserves, uniforms, pilots, gunnery, appointments, promotion, services and claims of officers, were divided not long ago among three branches, worked exclusively by civilian clerks. How can it be expected that civilians should be able to deal intelligently with questions on any such matters? So long as they have only to do what has been done before, so long as their labour is one of mere routine, performed mechanically and with the regularity of a machine, of course the capacity of these civilian clerks suffices. But, when doubt arises, when reforms are needed or improvements sought to be introduced, when something out of the ordinary routine has to be faced and considered, as they cannot understand the subject, any more than the parrot who recites the Lord's Prayer, they cannot select the record or information which really bears on the knotty point in default. They are then likely to mislead the Chief or Naval Lord at the head of their Department, unless the latter does as that distinguished officer did, who vacated his seat on the Board in 1877 to assume a most important foreign command, that is, performs the clerk's work himself, and declines to sign any documents placed before him until he has himself gone thoroughly into the matter to which they relate. Now, had the Chief Naval men under him, these would have mastered the whole subject, and would explain in two words the nature of the case and the decision to be arrived at, in accordance with the regulations of the service. This would save many an unjust act from being perpetrated. We contend, therefore, that the branches at the Admiralty which deal exclusively with Naval matters should be filled entirely and exclusively by Naval men. In those branches which deal with questions of discipline, organisation, war operations, surveying, and training, executive officers should preponderate, while the remainder should be drawn from the Paymaster line. In those branches relating to manning, victualling, appointments, half-pay, &c., Paymasters should be freely employed. In this manner, all Naval questions would be dealt with by men who understood them. There would still remain plenty of work for civilian clerks at the Admiralty. The purchase of stores and provisions; legal matters; correspondence with the Treasury, Foreign and Colonial Offices, and Board of Trade, should be left in civilian hands. It is essentially civil work, and can be best performed by civilians, while Naval work can be best done by Naval men, as military work is by soldiers at the War Office. We are fully aware that the difficulties in the way of such a change as we propose are immense. Resistance will be encountered both from the Admiralty clerks and from the Civil Service, who will naturally object to give up any portion of the monopoly they now possess at the Admiralty. Politicians, who know that a body of Naval men working together at the Admiralty would have but one end in view—the efficiency of the service—would object to the change on the ground that it would at times be most inconvenient to have men in the branches of one of the great spending Departments unamenable to political influences, who would never swerve an inch to favour any measure of a political nature, brought in on a political emergency, to lighten the Estimates or otherwise. In a country governed as is this one of ours, the Government might at times feel itself hampered by the Admiralty making a determined stand in the interests of the Navy, and probably politicians of neither party would care to subject themselves to such inconvenience. But we look only to the efficiency of the Navy, in the interests of the great body of the taxpayers of the country. We see in such a change as we advocate, the only chance of making the administration of the Navy what it ought to be, and the service thoroughly efficient. It should at all times be capable of ministering to the requirements of the British Empire, requirements so vast as to be very seldom fully appreciated, even by those called upon to watch over and safeguard British interests in all quarters of the globe; but which, nevertheless, are daily becoming more widely known and better understood.

War between France and Madagascar seems imminent. The French fleet are at Nossi Bé. Madagascar is arming. There is no English man-of-war on the coast. The question is now being asked, "Has the English Government come to an understanding with that of France, whereby the French are to seek compensation in Madagascar for what England has obtained in Egypt?"

Vice-Admiral H.R.H. the Duke of Edinburgh will, we are given to understand, shortly present, as Honorary Colonel of the Royal Marines, some seventy or eighty officers of the corps to her Majesty the Queen.

Admiral Lord Alcester, having handed over the command of the Mediterranean Fleet to his successor, Vice-Admiral the Lord John Hay, left Malta on Sunday last in the *Carysfort* for Marseilles, where he landed on Wednesday, under a salute of 21 guns from the forts. The crews of the French men-of-war in harbour cheered Lord Alcester as he left the *Carysfort*, and the British ensign was hoisted at the hotel he stopped at. Lord Alcester left Marseilles the same evening for England. The Admiralty yacht *Enchantress* left Portsmouth on Thursday for Cherbourg, where Lord Alcester will embark, landing this day at Portsmouth. By command of the Queen, Lord Alcester will proceed to Windsor.

Captain John Fisher, C.B., is, we hear, likely to succeed to the command of the *Excellent*, on Captain Codrington taking up his duties at the Admiralty as Director of Naval Ordnance.

Mr. Hopwood, M.P., has given notice that on going into Committee of Supply on the Naval Estimates, he will call attention to certain inequalities and defects of administration affecting the Corps of Royal Marines, and move:—"That the Military and Naval value of the Corps of Royal Marines deserves to be adequately represented on the Board of Admiralty, so that the just claims of the corps may be recognised, and defects in its administration remedied." We wish him success, but fear he will not get more satisfaction than did Lord Belmore, namely, that of advocating a good cause. We shall, however, be favoured with the views of the Admiralty on the subject.

Admiral of the Fleet Sir Thomas Symonds is apparently unaware of the fact that the French Minister of Marine has announced in the Assemblée Nationale that the French Admiralty have decided not to construct, or purchase, or arm any of their ironclads with ordnance exceeding 60 tons in weight. It is only on this assumption that we can account for Sir Thomas Symonds persisting in the statement that six French ironclads are to be armed with ordnance of from 100 to 76 tons. We have so often given the exact state and condition of the Navies of France and England in these columns, that we deem it our duty to remind the gallant Admiral yet once more of this inaccuracy, which can be set down by opponents as exaggeration indulged in to alarm the country. There is quite sufficient ground for sensible men to feel uneasy as to our future Naval supremacy, without in any way exaggerating facts.

The Admiralty have awarded to Captain Morgan Singer, R.N., the Good-service Pension of £150 a year rendered vacant by the retirement, on March 1, of Captain S. P. Townsend, R.N.

Gunnery Lieutenants who have reached ten or twelve years' standing have, apparently, a somewhat gloomy prospect before them. They are not, it appears, to be permitted in future to occupy the position of first lieutenant, either of ironclads or corvettes, as gunnery officers; nor are they to throw up their *spécialité* with the object of obtaining any such appointments; at the same time, since their juniors not unfrequently come in for such berths, it is not easy to see how they are to be appointed as second lieutenants; lastly, lieutenants have of late years been unofficially informed that in order to establish any substantial claim for promotion, they must have been senior lieutenant of an ironclad. Employment and promotion are thus practically barred to these officers—excepting, of course, the favoured few who may from time to time be selected for advancement through some special qualifications, or for war services. Of the two remaining alternatives—half-pay and retirement—the latter is, to say the least of it, discouraged, so that these fortunate individuals have to look forward to unlimited half-pay as their future lot in life. The day of the Gunnery Lieutenant is, in fact, over; the prestige which formerly attached to his office is fast waning, while the star of his brother-scientist, the Torpedo Lieutenant, is in the ascendant. One or two early—though by no means undeserved—promotions have been bestowed upon members of this latter branch; while the Gunnery Lieutenants are rapidly realising—though the Staff promotions still retain some show of vitality—that they are practically left out in the cold. This seems a pity, as they are certainly not unnecessary. But it is only one phase of the many-sided problem of which no one has as yet been able to furnish the solution, but which will have to be solved, sooner or later, by some more or less sweeping measure,—and the sooner, perhaps, the better.

In the special circulars which have been issued specifying the amount of gratuities which are to be paid to officers and men in both services for the Egyptian Campaign, it is noticeable that those who served on shore are awarded a higher scale than those who served only on board ship,—a measure which is, no doubt, just, as both officers and men on shore must have had greater wear and tear, and consequently more outlay, than those who were compelled to stick to their ships. There is, however, an anomaly in the two scales in respect to Serjeants and Corporals of Marines, inasmuch as a Serjeant of Marines afloat receives £5, while his brother-serjeant on shore receives but £4; a Corporal or Bombardier, afloat, £3 10s.; on shore, £3. Privates are paid the same either on shore or afloat, but all other ranks receive in excess for shore service, except, of course, the Naval officer landed for duty, who receives no more than he would have done had he remained on board.

The following are the conditions under which officers have been allowed to accept service in the new Egyptian Army:—"The Secretary of State for War and H.R.H. the Field-Marshal Commanding-in-Chief have approved of officers on full pay being seconded while serving under the Egyptian Government. Every officer, on taking over his duties in Egypt, must be capable of carrying on official correspondence and conversation in the French language. He will be required to pass a colloquial preliminary examination in Arabic within six months of his engagement, and a further examination after twelve months. Officers passing the second examination with 'honours' will receive a donation of £100. Agreement of regimental officers to be signed for two years' service in the Egyptian Army, under the following conditions:—(*a*.) An officer will be allowed to quit the Egyptian service at his own request, after giving three months' notice, receiving pay up to and including the date of his ceasing to do duty in Egypt. (*b*.) The Egyptian Government to have the right of dispensing with the services of any British officer at any time within his first six months' service, such officer receiving three months' pay from the date of ceasing to serve, provided his services have not been dispensed with for misconduct or debt, in which cases he will receive pay up to and including the date of his ceasing to do duty in Egypt. (*c*.) Should the Egyptian Government dispense with the services of any British officer who has already served six months in the Egyptian Army, and has passed the preliminary examination in Arabic, such officer will receive a gratuity of one year's pay, provided that the total period for which pay is drawn shall not exceed two years. (*d*.) Every British officer may, when the exigencies of the service permit, be granted two months' leave of absence a year, or four months in all in two years, without loss or reduction of pay. (*e*.) Pay at the following rates (sterling) will be issued monthly in arrear:—

	Per annum.
CAVALRY.	
1 Commandant	£750
1 Second-in-Command	550
ARTILLERY.	
1 Colonel Commanding	1,000
(He will command also the Batteries officered by Egyptians.)	
2 Commandants, each	600
2 Supplementary Officers	450
INFANTRY.	
1 Brigadier	1,200
4 Commandants, each	750
4 Second-in-Command, each	550
5 Supplementary Officers for Cavalry and Artillery	450

The sum of £20 will be granted to officers as 'passage money,' on joining and finally leaving the Egyptian Army for England; and £55, if the officer joins from or returns to India on completion of the engagement. All British officers will be mounted. They will provide themselves with horses, but forage will be issued in barracks for the same. No quarters are to be expected. Any officers accepting the above terms must agree to abide by the decision of Sir Evelyn Wood, or his successor, and forego any right of reference to International tribunals. Special arrangements as to agreement to be signed by Staff officers will be made hereafter."

The Belfast District, which has come to be regarded as the mere stepping-stone to some better appointment, has seen no less than six changes of General Officers in the past half-dozen years. When the command fell vacant in November, 1879, by the death of Major-General E. W. D. Bell, C.B., V.C., it was conferred upon Sir Evelyn Wood, as a reward for his South-African services. Within less than four weeks General Wood was promptly transferred to Chatham, Major-General Torrens, C.B., appearing on the scene as his successor in January, 1880. In October of the following year, General Torrens was transferred to Cork, and the Belfast District was then assigned to Major-General Sir John McLeod. The latter officer held the command for exactly six months, and when he accepted his present appointment in Ceylon, Major-General Sayer was appointed as his successor. The out-going commander has filled the duties for exactly twelve months, and to judge from precedent, Major-General Woods should look forward to a higher appointment in the course of next year. The district, as at present constituted, has existed since 1870, when Major-General Warre accepted the command. He was succeeded, in 1875, by Brigadier-General Elrington, who, however, threw it up in a few weeks, and made way for Major-General Bell. As a separate command, Belfast was suppressed at the time of the Crimean War, when the Irish Staff arrangements underwent many changes. Elderly officers will, no doubt, remember Ireland when it found employment for no less than six General Officers, and had district commands at Dublin, Belfast, Cork, Limerick, and Kilkenny, the latter being substituted for Athlone, which in the days of 1848 was a separate command.

The promotions which have been made in the Army Veterinary Department are well deserved, for nothing could be more satisfactory than the reports furnished by Lord Wolseley and Sir D. C. Drury-Lowe as to the working of the Veterinary arrangements in Egypt. Both Lord Wolseley and General Lowe say that there was not a hitch from beginning to end, so far as the Veterinary Staff were concerned, and it is due almost entirely to Lord Wolseley's persistent advocacy of their claims that Messrs. Thomson, Matthews, and Rayment owe their promotion. It may be remembered that Mr. Matthews was publicly thanked on parade by the Duke of Cambridge, before his regiment, the 4th Dragoon Guards, for the devotion he had displayed. It certainly is to be regretted that an officer with the claims of Veterinary-Surgeon Walker, who went out with the Household Cavalry, and acted for a long time as Inspecting Veterinary-Surgeon in the field, should have got nothing, only because there is nothing to give him.

It has been finally decided to abolish the appointment of Deputy-Quartermaster-General for the Intelligence Department, held by Lieutenant-General Sir Archibald Alison, previous to his departure for Egypt.

A correspondent, in the *Transvaal Advertiser*, asks:—"Whose duty is it to look after the military cemetery? There was some stipulation in the Convention with regard to the proper care and preservation of the graves of such of her Majesty's Forces as have died in the Transvaal. The place, which, until recently, looked very nice, now resembles an enclosed piece of veldt. If there is no other means of seeing the place kept in proper order, I should suggest a public subscription, and would willingly contribute my share." We may point out that a portion of the general cemetery at Pretoria was enclosed with a stone wall by the 1st Battalion 13th Light Infantry in 1877, and the military graves were kept in proper repair up to the time of the battalion leaving there. Since the departure of the 13th, nothing has apparently been done.

The "cramming" question is one which so seriously affects the prospects of so many young men, and the pockets of so large a number of military officers, that we are not surprised that our recent remarks should have been the means of calling forth a host of correspondence. We cannot, in the present crowded state of our columns, publish any number of letters which have been addressed to us, but the following from a well-known Field Officer and a devoted soldier, fully expresses the views of the majority of our correspondents:—

"Every one is glad you have taken up the subject of crammers and cramming. Numbers of officers are sadly crippled in their incomes owing to the enormous and extravagant sums of money they are compelled to pay to these crammers, who are rapidly making large fortunes from officers who can ill afford to pay them. As for the candidates for Sandhurst, their health is much injured, and, in some cases, their eyesight ruined, by the incessant work and toil they have to undergo, in order to prepare for these absurd examinations. I know myself of two young fellows who were obliged to leave their crammer, and go to the South of France, as their health was fast giving way under the 9 and 10 hours' daily work. One of your correspondents says 'he is surprised that 550 young fools should go up to compete for 50 commissions.' The reason of this is, that the 550 young fools do not know what to do, there are so few openings; and so their parents make an endeavour to get them into a profession which commences with mechanic's pay, and may end in compulsory retirement at 40. As your correspondent wisely remarks, the Army is indeed a rotten profession. The War-Office authorities have given notice that they intend to raise the standard in the ensuing examinations, so there is no chance for any but a book-worm to get into the Army in future."

The selection of General Boulanger as Chief of the French General Staff is welcomed by the *France Militaire* as a movement in the right direction. The journal in question expects of the General that he will at last carry out the provisions of the General Staff Law of March 20, 1880, by breaking with the traditions of the old General Staff Corps, and strictly applying the law, conformation with which has hitherto been only of a formal nature. As the lieutenant-colonels, majors, and captains of the old corps have to re-enter their respective regiments by March 20, 1884, General Boulanger will have fully a year before him to carry out the reorganisation of the General Staff service.

The retirement of Major-General C. R. O. Evans, Royal Artillery, which takes place this month, gives no promotion in the Royal Regiment.

The vacancy caused by the death of General Chanzy—who, by the way, is to have a statue in his native town—has at last been filled up. General Fevrier is to go from the 15th to the 6th Army Corps. As this latter corps lies along the eastern frontier, and will be the first to stand the brunt of war in the event of another German invasion, the command is a highly important one, and the only wonder is that it was left vacant so long.

For years past, the sanitary condition of the Royal Barracks in Dublin has been the subject of constant complaint. The authorities, however, still persistently refuse to do anything to improve the drainage of the barracks, and meanwhile typhoid fever is carrying off its victims week by week.

All the barracks in Paris are now connected by telephone with the Élysée, the private room of the War Minister, and the Governor of Paris.

From a statement given in the *Moniteur de l'Armée*, it appears that the total peace strength of the cavalry of the European armies is 17,814 officers, 358.898 men, and 301,504 horses; the war strength, 27,027 officers, 690,325 men, and 607,314 horses. The order in which the various countries follow according to numbers is, Russia, Germany, France, Austria, Italy, Turkey, Great Britain, and Spain. With the exception of the Austrian, French, and Spanish cavalry, the effective in case of mobilisation in the other armies is at least doubled, in Russia and Italy almost trebled.

The following Notices have been given on going into Committee on the Army Estimates:—Dr. Cameron—To call attention to the unsatisfactory condition of the Veterinary Establishment of the Indian Army, and the cruelties, losses, and risks resulting therefrom in the Afghan and Egyptian wars. Colonel Colthurst—To call attention to the unsatisfactory condition of recruiting, and to move "That in the opinion of this House, a careful inquiry, whether by Royal Commission or otherwise, is desirable." Sir George Campbell—To call attention to the defects of the equipment of the English troops in Egypt as compared to those sent from India; also to the present deficiency in the establishment of European soldiers in India; and to move "That experience shows that no system will provide adequately for the military requirements of the British Empire which does not provide for two distinct classes of soldiers, short-service men to stay at home and form a Reserve for defence, and long-service men to form a professional army to serve in India and distant foreign possessions."

It is said that but for the political business on hand—the getting rid of the Orleans Princes—General Campenon, who was War Minister under M. Gambetta, and who is considered a first-rate administrator, would have resumed his old post. However, when M. Jules Ferry invited him to join the new Ministry, he appears to have replied, in blunt, military terms,—"I don't care a d—— for the Princes, but I am not going to do a piggishness."

General G. Macdonald, Colonel of the 16th Regiment, who died the other day, was the oldest officer in the British Army, having been born as far back as October 10, 1784. He had, therefore, reached the great age of ninety-nine years, and it may be noted that he had survived three severe wounds received at the battle of Waterloo,—viz., one in the leg, one in the neck, and a bullet through the body, which wounded the lungs. He entered the Army September 5, 1805, accompanied the Expedition to Hanover in the same year, and was afterwards with our Army in Sicily from 1806 to 1810; in the expedition to Naples in 1810, including the capture of Ischia and Procida; operations against the French in Sicily during the year 1811; the campaign in 1812 in Spain, including the battle of Castalla and siege of Tarragona; and embarked for Canada in 1814, taking part in the operations before Plattsburg, and returning in time to share in the glories of the Waterloo Campaign. Despite these services, he did not obtain his majority until he had completed twenty-five years' service, and was not promoted a Major-General until two days after his completion of fifty years' service, the slowness of his advancement being due to the fact that he had not lodged any money for the purchase of his steps.

General Thibaudin, much to the disgust of the military world in general, has virtually driven the Duc d'Aumale, the Duc de Chartres, and the Duc d'Alençon from the French Army. This must be a great relief for the Republic, so desperately alarmed by the manifesto of Prince Napoleon, but it is difficult for a rather obtuse British intellect to comprehend the utility of this arbitrary measure, apart from the folly, or crime, of visiting the sins of a Bonaparte on the heads of the Orleans Princes. How far are the three Dukes above mentioned Pretenders? In the first place, the younger branch has renounced all claim to the throne until after the death of the Comte de Chambord; and should the Comte de Chambord die, then the Bourbon or Orleanist Pretender will be the Comte de Paris, who is a Colonel in the Territorial Army, and who has not been molested. It is said that the Duc de Chartres, who is devoted to his profession, intends shortly visiting Persia (should the War Minister give him leave), and studying from a military point of view the country where Russ and Briton will some day fight for the possession of India. As the Duc d'Aumale expected no more employment from the Republic, the decree, as far as he is concerned, is a *brutum fulmen*. The Duc d'Alençon, whose wife is the sister of the Empress of Austria, thinks of joining the Austrian Army, as the First Napoleon's son, the King of Rome or Duc de Reichstadt, was obliged to do.

The following is the text of the order in reference to wearing decorations in plain clothes:—"It is not in the province of his Royal Highness to issue any regulations controlling officers as to their dress when they appear in Society as private gentlemen, but I am authorised to state, for the information of any officers under your orders who may desire to be informed on this subject, that there is no objection to their wearing miniature decorations at dinners or evening parties, or on occasions of ceremony, and that it is expected that they shall do so when they are invited to meet Members of the Royal Family."

The *France Militaire* states that the French Army expects from the new War Minister the solution of several important questions which are pending. Amongst them are the introduction of three years' service, the abolition of one-year volunteers and the existing abuses in the exemptions, increase of the effective, the drawing-up of Military regulations, the law of promotion, the modification and equalisation of pay and pensions, and other minor reforms. A very heavy programme, for an energetic Minister.

According to the *Kamerad Kalender*, the Austrian Army includes 258 Generals, 389 Colonels, 1,322 Staff officers, 4,607 Captains, and 17,178 subalterns; together, 23,754 officers.

General Billot, the late French War Minister, recently stated before the Army Commission that, during the last ten years, £91,560,000 have been granted by the Chamber for replacing the war material taken by the Germans in 1870-71, of which £15,560,000 has not yet been spent. But at least another £12,000,000 will be required, so that the total expense under the above head will reach a sum of £103,560,000.

A correspondent writes that as it is now impossible to tell either the front or the back of one regiment from another at Aldershot, it is seriously proposed to put some conspicuous "territorial" badge on the battalion valises, *en derrière*, so that people may be able to track the solid charge forward or the strategic advance to the rear of particular counties. The coat-tails of the Army have been so much exhibited to our foes since 1870, this seems a desirable arrangement, and will probably be noted as another reorganisation.

In the *Fortnightly Review* for last month, in an article on "The Third Reform Bill," by the Rev. T. W. Fowle, the following passage occurs:—

> "Now, the Ministry is at this moment by common confession exceedingly strong, the Conservatives ascribing it to the victorious campaign in Egypt, while the Liberals, with surer instinct, prefer to ascribe the victorious campaign to the great Army reforms, particularly the abolition of Purchase, of Mr. Gladstone's first Ministry, of which, by a stroke of political justice, his second Ministry is reaping the fruits."

Most civilians hold decided opinions on all large questions of Army administration, and some, who (like the reverend writer whose words we have quoted) have evidently no knowledge of military matters, take every opportunity of expressing crude notions in dogmatic terms about subjects which can hardly be understood without long experience or careful research.

Some people in France have sought to excuse General Thibaudin for having violated his parole in 1870, on the ground that other officers did the same! The case of the War Minister, too, has been compared to that of General Ducrot, but General Ducrot simply undertook to go to Pont-à-Mousson. This he did, and, finding no train to take him on, he made his escape. This was rather close sailing, and the conduct of the General was not quite approved of by his comrades. After the war, General Ducrot, who had commanded a corps in Paris during the siege, offered to go to Berlin and stand a court-martial. Field-Marshal von Moltke replied that this was useless, and the family of General Ducrot have kept this letter. A military writer observes that if General Thibaudin was so anxious to fight, he should have imitated the example of General Saussier, who is now Commander-in-Chief in Algeria. That General asked to have his parole annulled, and to be confined in prison. He was shut up in Konigsberg, from which fortress he made his escape, at the risk of his life. We are led to believe that not only Germany, but Austria and Italy, are irritated at the reappointment of General Thibaudin. One of the Princes driven from the Army is brother-in-law of the Empress of Austria, and another a nephew of the King of Italy.

The recently-published Bengal *Army List* affords further proof, were any wanted, that the ever-increasing number of field officers in the Indian Army is likely before very long to cause serious embarrassment to the Government, and to necessitate the introduction of some scheme to induce surplus field officers to retire. In the Bengal Staff Corps there are 222 effective lieutenant-colonels, and during the course of the present year no fewer than 48 majors will be promoted, which will give a total of 270 lieutenant-colonels. There are 185 majors, and more than 20 captains will be promoted to that grade during 1883. But taking the numbers as they actually stand at present, we find there are 407 field officers in the Bengal Staff Corps, besides the colonels who remained local, and who number about 50.

The Army.

6th Dragcon Guards. Capt. M'George reverts to regimental duty from the 16th inst., on the completion of his term of appointment as adjt. of the Westmoreland and Cumberland Yeomanry Cavalry.

2nd Dragoons (Royal Scots Greys). The Ballincollig military barracks was the scene of a very melancholy and fatal accident on Friday night last. The victim was a serjeant named Shadrach Goold, who, it appeared, with two other men, had been told off for special duty in connection with some suspicious persons who had been seen about the barracks. The night was very dark, and it was impossible to distinguish objects at any distance, when Goold and his men concealed themselves beneath some bushes at a short distance from each other. They were still watching, when Lieut. Torrens, the orderly officer for the night, went on his rounds. Before leaving his quarters, the officer had loaded a small Colt pistol, which he placed in his right pocket, still holding it in his hand. He was crossing the space between where the main guard was stationed in the centre of the barracks and the gate at the east side, when Serjt. Goold ran against him. Concluding that he had been attacked, the officer quickly drew his hand from his pocket, quite forgetting, in the excitement of the moment, that he still held the pistol, and made a blow at his supposed assailant. In doing so, his hand touched the hammer, which fired the pistol, and the next moment Serjt. Goold fell dying into the arms of the officer who had thus unintentionally caused his death. The bullet had entered the left side close beneath the heart, and in a few minutes the unfortunate man expired. Lieut. Torrens is the possessor of a gold medal awarded for his bravery in saving the lives of a ship's crew. Goold was 28 years of age, and leaves a wife and four children. The inquest was held on Saturday. The jury found that death was the result of an accident, and attached no blame to Lieut. Torrens.

8th Hussars. Lieut. Mahon is *en route* to India in H.M.S. Euphrates.

9th Lancers. The announcement of the India Press that Capt. Lord W. Beresford, V.C., Military Secretary to the Viceroy, will come home this summer is, we understand, without foundation. Capt. M'Innis has been appointed station staff officer at Kussowlee. Lieut. Hopkins has returned home from India in H.M.S. Crocodile.

13th Hussars. Lieut. Smithson has returned home from India in H.M.S. Crocodile.

17th Lancers. The *Bombay Gazette* learns that Lieut.-Col. Boulderson will shortly avail himself of furlough to Europe, and Lieut.-Col. Cooke will command during his absence.

18th Hussars. Capt. Pryce has passed the necessary examination for promotion to the rank of major.

19th Hussars. The regiment was to have moved on Wednesday or Thursday from the Helwan Sulphur Baths, situate in the Desert near Cairo, to Abbassiyeh.

ROYAL ARTILLERY.

Major E. E. Ellis has been appointed an officiating assist.-qrmr.-gen. on the Staff of the Bengal Army.

Capt. R. A. Mundy completes his period of service as adjt. of the 3rd Brigade, South Irish Division, on the 18th inst.

The Government of India have issued final orders on the manufacturing of ammunition at Kirkee. Lieut.-Col. A. J. Wake (late Bengal), Superintendent Small-arms Ammunition Factory, has been relegated to duty under the Commander-in-Chief, and will be succeeded by Lieut.-Col. A. Walker (late Bengal), from the Dum Dum factory; and Major-Gen. Bayly, Inspector-General of Ordnance, Bombay, has been gravely censured for not bringing the state of the manufacturing departments to the notice of Government, and for having in some cases acted without the orders of Government. An additional Assistant-Superintendent of Factories for the Bombay Presidency is to be appointed. Meanwhile, Lieut. Fixott, the Assistant Superintendent at the Gunpowder Factory, will be attached to the Small-arms Ammunition Factory, Kirkee. Additional accommodation for the Kirkee factory is to be provided, and the following additional European establishment is to be entertained:—Laboratory Branch—One head overseer, conductor; one overseer, sub-conductor; two assistant-overseers, serjeants of the Royal Artillery. Small-arms Ammunition Factory, Inspection Branch—One head overseer; one assistant-overseer, serjeant of the Royal Artillery. The present Head Overseer at the Kirkee Factory is to be sent to Dum Dum for one month, to learn the duties in connection with the proof of ammunition. The *Times of India* says:—"The announcement that the services of Col. Wake have been placed at the disposal of the Commander-in-Chief brings to a close a very painful business. Col. Wake is the superintendent of the Small-arm Factory at Kirkee. For years past complaints had been made that the ammunition supplied from the Kirkee factory was not of the best. Amongst those who grumbled most loudly were the Volunteers, who professed to have found in Kirkee ammunition a good explanation of indifferent class-firing. The general public were perfectly well acquainted with the inferior nature of the ammunition. But it was not supposed to be their business, and the military authorities at Poona turned a very deaf ear to all complaints. It was not the fault of the ammunition, we are told, but the fault of the soldiers, who kept their guns dirty, or who did not shoot straight—the trite old story of petty departmental pride attempting to keep the truth from being discovered. At length, the story of the badness of the Kirkee ammunition came to the ears of the Supreme Government at Simla from—London. Some of the Kirkee ammunition had been taken to Natal during the Zulu War, and found to be bad. The English public are more easily aroused than the public of India, and when it was known that inferior ammunition had been served out to troops facing the enemy, there was a loud outcry for inquiry and punishment. The Supreme Government are in their resolution very justly indignant at the roundabout way in which the intelligence reached them. However, it is not the present Government of Bombay or the present military authorities who are to blame. The story of the Kirkee ammunition is only another illustration, if another be needed, as to how things were managed at Poona, in the good old days of Gens. Aitchison, Burrows, and Co. The Supreme Government, on receiving the complaint regarding the Kirkee ammunition from the Horse Guards, determined that the matter should be investigated. They sent Major Walker, of the Dum Dum Factory, to report on the matter. Of course, it is not pleasant to Bombay pride to have a Bengal officer reporting on the military factory, but Major Walker was in every respect competent to undertake the task deputed to him. He has had long experience in managing a Small-arm Factory, and is an officer of considerable scientific attainments. After many careful experiments, Major Walker came to the conclusion that the defect in the ammunition was not due to the powder, but to the dirty state of the lead used for bullets, to the wads not being properly fitted, and, as the report said, to 'inadequate supervision, inferior accommodation, inefficient subordinates, and unskilled artificers.' This charge, continues the *Times of India*, is grave enough in all conscience; but we are warned that, when the reports speak of the Kirkee ammunition being 'bad,' they do not mean bad in the common sense, but in the scientific or Pickwickian use of the word. The Kirkee ammunition is relatively bad by a certain percentage."

"Ubique" writes:—"As it now appears that the present organisation of the Royal Artillery is to last for at least another year, it is to be hoped that some arrangement will be made for striking acting adjutants of Divisions of Horse and Field Artillery off the strength of batteries, as in the Garrison Artillery. Acting adjutants hold a responsible position, having charge of the regimental documents; but as they are not assisted by an adequate staff of efficient clerks, as are adjutants of regiments of cavalry or battalions of infantry, they are obliged to exercise a most thorough supervision over all that passes through the divisional office. This allows them no time to look after their battery work, which suffers in consequence."

ROYAL ENGINEERS.

Capt. M. C. Brackenbury, who has just returned to India from short leave, goes to Rawul Pindee, as assistant-manager of the Punjab Northern State Railway.

We regret to learn that Lieut.-Col. Ardagh had been obliged to leave Cairo and go to Alexandria for a change, on account of the state of his health.

Mr. Greer asked on Thursday in the House of Commons whether it was a fact that, on Jan. 1, 1883, the approximate average service of the senior subalterns of the cavalry regiments was six years, eleven and a half months; infantry of the Line was eight years, nine and a half months; Royal Artillery was nine years, five months; Royal Engineers was twelve years; and if so, considering that the rate of promotion of subalterns to the rank of captain in the Royal Engineers is about three years slower than in the other combatant branches of the Army, and considering also that the senior subalterns of the Royal Engineers had already been superseded by about 600 officers of other branches of the service, whether it was the intention of the Government to take steps to place the subalterns of the corps in a better position as regards promotion. The Marquis of Hartington said there was no reason to doubt the accuracy of the facts set forth in the hon. Member's question. The question of accelerating promotion in the ranks of the junior officers was now under consideration. He had, however, to point out that slow promotion in the subaltern ranks did not injure Engineer officers to the same extent as those in other branches of the service, because whatever might be the current rate of promotion, every Engineer officer was entitled to be promoted to the rank of major after twenty years' service, and consequently he was saved the temporary or permanent retirement to which other officers were subject at forty years of age, and he would probably recover any supersession he might have suffered in consequence of the slow rate of promotion in the subaltern rank.

1st, or Royal Scots. The head-quarters and four companies of the 1st Batn. were inspected at Malta on Feb. 16, by his Excellency Sir Arthur Borton, K.C.M.G., K.C.B., prior to their embarkation for the West Indies. At the conclusion of the parade, his Excellency addressed them as follows:—"Royal Scots,—I take this opportunity of saying a few words to you before you leave, to bid you farewell. You have been serving with me ever since I have had this command, and are now the most seasoned and efficient soldiers in the garrison. I have always been much pleased with your smartness and good-behaviour, especially during the past two years, in which your conduct has been most exemplary. I am sorry now to bid you farewell, and in so doing I wish you prosperity and good-fortune wherever you may go." His Excellency then left the parade-ground, and Major-Gen. the Hon. P. R. B. Feilding, C.B., commanding the Infantry Brigade, spoke to the regiment as follows:—"This may be the last time that I shall be able to see you on parade, and I take the opportunity of saying a few words to you before you leave. You have served with me now for upwards of four years, and I naturally take a greater interest in your regiment than in most others, and I think I may be allowed to say what you thoroughly deserve. I am proud to speak thus, from having been associated with your regiment for so long, and I shall always look back upon the time with pleasure, not only on account of your clean and soldier-like bearing, and general good conduct, but also from my connection with one of the oldest regiments in the world. Your regiment has historical traditions, perhaps, unsurpassed by any other in the British Army; and since you have been here, you have upheld its reputation thoroughly. During the last two years, your conduct, cleanliness, smartness, and drill would compare most favourably with any regiment in the service. We have both experienced a great disappointment in not having been amongst those selected to take part in the recent Egyptian Campaign, and I am convinced that, had you been there, you would have done your duty thoroughly well, and added to the glorious traditions of 'The Royal Scots.' We can afford to forget the faults of some of you at the commencement of your service, who at first, perhaps, found discipline a little irksome, considering your exemplary conduct for the last two years. You have now learnt discipline, and I am sure that those men returning to civil life will benefit by the lesson, and will be helped into speedy employment by the good characters they carry away with them. Another thing I should especially wish to mention is the thorough order and cleanliness of your barracks. During 37 years I have been associated with many regiments, some of them noted for the cleanliness of their barracks, but I can say without hesitation that I have never yet met one that equalled yours. I attribute this to the system in the regiment, and which Col. White cannot but take a pride in, as he has so much contributed to the result. Those of you who have a year or so to serve in the West Indies, I bid beware of the drink, which is as cheap and as pernicious (if not more so) as it is here. You are about to have some hundreds of young and inexperienced men joining your ranks, and I would wish you to remember that the making of them greatly depends upon you. Remember that for every man in prison, the duty is harder on the remainder, and, therefore, whenever you see any of these young men in a grog-shop who do not know when to put the 'stopper on' for themselves, it behoves you to do it for them, remembering that by so doing you add to the comfort of the barrack-room and lighten your duties. Where there is no drunkenness, there is no insubordination. I am pleased to hear that there are about 100 men amongst you who have joined the temperance society, which fact, I have no doubt, is due to the admirable example of an officer in the regiment, whose name it is not necessary for me to mention. And now, in bidding you good-bye, I wish you every success in the country you are going to, and I trust you will maintain the good name you have so well earned in Malta. It will be a credit to yourselves and an honour to the Royal Scots."

2nd Queen's Royal West Surrey Regiment. Major Trench, 2nd Batn., has been confirmed in his officiating appointment as deputy-assist.-qrmr.-gen. on the Bengal Establishment. Capt. Whittle, 2nd Batn., is *en route* to India in H.M.S. Euphrates.

4th King's Own Royal Lancaster Regiment. Lieut. Penrose, 2nd Batn., is a candidate for the S.C., and has been appointed to the 23rd Bombay N.I., on probation. Lieut. Vigors has resigned his probationary appointment for the S.C., and joins the 2nd Batn., for duty.

5th Northumberland Fusiliers. Capt. and Adjt. Trafford, 2nd Batn., has been granted leave from India to England for 15 months, on private affairs.

7th Fusiliers. Capt. and Adjt. Gall, 2nd Batn., is *en route* to India in H.M.S. Euphrates.

8th King's (the Liverpool Regiment). Lieut. Holland, 2nd Batn., is *en route* to India in H.M.S. Euphrates.

9th Norfolk Regiment. Lieut. Thompson, 2nd Batn., has returned home from India in H.M.S. Crocodile.

11th Devonshire Regiment. Capt. Yule and Lieut. and Adjt. Park, 2nd Batn., have left England for India in H.M.S. Euphrates. Lieut. H. W. Yarde-Buller, 2nd Batn., has applied to resign his commission. A General Order, issued on Saturday, states that "her Majesty the Queen has been graciously pleased to approve of the Devonshire Regt. being in future permitted to bear, as a regimental badge, the castle of Exeter, with the motto, 'Semper fidelis,' in substitution for the rose and the present regimental badge."

12th Suffolk Regiment. Lieut.-Col. Pearson and Major Williams, 1st Batn., are *en route* to India in H.M.S. Euphrates.

13th Somerset Light Infantry. Lieut. West, 2nd Batn., has been granted leave from India to England for six months, on private affairs.

14th West Yorkshire Regiment. The 2nd Batn. left Nowshera on Jan. 29 for Sealkote, where the head-quarters arrived on Feb. 17.

15th East Yorkshire Regiment. Brevet Lieut.-Col. Jones-Vaughan, Lieut. Gosset, and a draft of 130 men are *en roate* to India in H.M.S. Euphrates. Major Smyth, 2nd Batn., succeeds to the commandantship of the Purundhur Depôt, Bombay.

16th Bedfordshire Regiment. Gen. G. Macdonald, colonel of the regiment, died on the 28th ult. at Torquay, in his 99th year. The deceased entered the Army as an ensign as far back as 1805, and in that year accompanied the expeditionary force to Hanover. In the following year he joined the army in Sicily, and was employed with it in various operations until 1810, in which year he went with the expedition to Naples, and was present at the capture of Ischia and Procida. He afterwards returned to Sicily, and was employed against the French Army in 1811. In 1812 we find him serving in Spain, taking part in the battle of Castalla, and in the siege of Tarragona. He subsequently embarked for Canada, and was present at the operations before Plattsburg. He afterwards served in the campaign in 1815, and was thrice wounded at the battle of Waterloo. He obtained a colonelcy in 1851, and was promoted to Major-Gen. in 1855, Lieut.-Gen. in 1863, and full Gen. in 1871. He was appointed Col. of the 16th Foot in 1863, and was placed on the retired list of Generals in 1877.

21st Royal Scots Fusiliers. Col. Winsloe, A.D.C., and Major Browne, 2nd Batn., are *en route* to India in H.M.S. Euphrates. Lieut. Gaisford, 2nd Batn., has been granted leave from India to England for eight months, on private affairs.

23rd Royal Welsh Fusiliers. The staff serjeants and serjeants, 23rd Regimental District, Wrexham, celebrated the anniversary of their patron saint, St. David, by a grand ball and supper on the 1st inst., to which about 180 Military and civilian friends accepted invitations, including some who had formerly served in the regiment. Supper was served at 10 o'clock, Serjt.-Major White in the chair, when all loyal and appropriate toasts were duly honoured, and comrades at Dum Dum and Pembroke were not forgotten. Mr. Jennings, bandmaster, Denbigh R.V., supplied the music, and dancing was continued with great spirit to an advanced hour, when this most successful social gathering came to a close.

24th South Wales Borderers. Lieut. Phipps, 2nd Batn., has been granted leave from India to England for twelve months, on private affairs. Lieut. Way, 2nd Batn., is *en route* to India in H.M.S. Euphrates.

25th King's Own Borderers. Lieuts. Blosse and Blakeney, 1st Batn., are *en route* to India in H.M.S. Euphrates.

30th East Lancashire Regiment. Major Clowes has returned home from India in H.M.S. Crocodile.

33rd West Riding Regiment. Capt. Preston has been detailed for duty with the depôt, for two years.

42nd Royal Highlanders (Black Watch). Capt. Fox has been appointed to be Deputy-Assist.-Adjt. and Qrmr.-Gen., to perform the duties of Assist.-Inspector of Gymnasia. The *Irish Times* says:—"Capt. Cumberland, who was severely wounded in the attack on Tel-el-Kebir, and has been for some time past under treatment in the Military Hospital at Netley, we are pleased to learn is making most satisfactory progress, and it is hoped that he will shortly be able to resume the active duties of his profession, when he will proceed to Ceylon to join the staff of Major-Gen. Sir J. C. M'Leod, K.C.B., as aide-de-camp."

43rd Oxfordshire Light Infantry. The fifteen months' leave from India to England granted to Lieut.-Col. Crozier has been extended to Oct. 31 next. Lieut. Eccles has returned home from India in H.M.S. Crocodile.

44th Essex Regiment. Major Hill, Capt. Morrell, and Lieut. Jones are *en route* to India in H.M.S. Euphrates.

ROYAL MARINES.

The reports from the different Marine Divisions show that the progress of the Marine Infantry men in big-gun drill has been most excellent during the past year, undoubtedly owing to the fact that the Government give each man a penny per day extra for proficiency in gun practice. At present it is estimated that 1,200 men from the three Divisions of Portsmouth, Chatham, and Plymouth have passed the required examination, and in three or four years' time it is believed that the three Divisions will be able to turn out at least 6,000 Marines who can do the duty of seamen-gunners.

"Veritas" writes:—"An Admiralty order has just restored an officer of the Staff Corps to his old position in the Royal Marines, the wording of the order being, 'On account of the different regulations, officers of Royal Marines are now allowed to join the Indian Staff Corps.' Allow me to draw attention to the fact that officers, under the present regulations, cease to belong to the Royal Marines after two years' probationary for the Staff Corps? Yet this officer has been nearly three years in India, having joined the Staff Corps in August, 1880. I submit that this is a lame excuse for a breach of faith with those who preferred remaining in the Royal Marines."

54th Dorsetshire Regiment. Lieut. Lushington has returned home from India in H.M.S. Crocodile.

56th Essex Regiment. Major Spencer proceeds home from India next month to rejoin his regiment, on vacating the appointment of Military Secretary to the Governor of Madras.

59th East Lancashire Regiment: We take the following notes from *The 5 and 9, Lilywhites' Gazette*, an excellent little regimental paper:—"It may be gratifying to the vanity of some of our readers to learn that General H.S.H. Prince Edward of Saxe-Weimar, K.C.B., commanding Southern District, on seeing the conducting party of the battalion sent down in charge of draft for embarkation at Portsmouth, addressed himself to the officer in command to the effect 'that he wished he had battalions under his command now of the same stuff as we were made of when we arrived home and were under his command,' and well we know it. The colours of the regiment are about to be thoroughly repaired. They are probably the last '59th' colours that will ever be issued to us. They were presented to the regiment in Ceylon by Lady Robinson in 1867, and were carried throughout the late Afghan Campaign, having been under fire at Ahmed Khel on April 19, 1880. The addition of the new honours, *i.e.*, Afghanistan, 1878-79-80, and Ahmed Khel will be included in these repairs. Lieut. White has proceeded to the depôt, Burnley, in relief of Lieut. Medhurst, who will take up the duties of Instructor of Musketry to the battalion, vacated by Lieut. Lake on admission to the Staff College, Sandhurst. We are glad to learn that there is every prospect of an active campaign being prosecuted in the coming season by Lilywhites' in the cricket field. Subscriptions have been raised; engagements made and a piece of ground on the Lines taken in hand. For this display of energy, we are indebted to Major Tidy, who, by tact and good management, has enlisted the sympathy of all, which augurs well for Lilywhite cricket in the future. Capt. Apthorp, Serjts. Woodcock and Hoare proceeded from Chatham on the 28th ult. to join the School of Musketry at Hythe. Serjt. Pemberton, now employed as Instructor in the Garrison Gymnasium, has passed the examination for a serjt.-instructor in the Volunteers. Lieut. Leonard, who served throughout the late Egyptian Campaign as a Deputy-Assist.-Comy.-Gen. in the Transport Corps, and who arrived at Tel-el-Kebir just as the last shots were being fired with a welcome supply of rum for the troops, has, we hear, sent in his name as a candidate for the new Egyptian Army that is now being formed under the Command-in-Chief of our late Brigadier, Sir E. Wood. Lieut.-Col. Ffolliott, late of the regiment, is, we hear, likely to obtain command of the First Volunteer Battalion which is about to be raised at the Cape. He has been acting Military and Private Secretary for some time past to Major-Gen. (Chinese) Gordon."

60th King's Royal Rifle Corps. Lieut. Stuart has been appointed interpreter to the 4th Batn. Qrmr. Cane has been granted leave from India to England for twelve months, on private affairs. Lieut. Stuart-Wortley, A.D.C. to

Sir E. Wood, who had been rather seriously ill, was reported convalescent when the mail of Feb. 27 left.

64th North Staffordshire Regiment. The *Irish Times* says:—"At the private sworn inquiry (before Col. Forbes, a special resident magistrate) being held at Athlone, relative to the death of the late Lieut. Tothill, evidence of a most important nature, implicating certain parties, is said to have been given. From the manner the bullet, or bullets, entered the skull, it is believed that it would have been impossible that death was the result of accident or suicide."

65th York and Lancaster Regiment. Col. Warren completes five years in command, and will be placed on half-pay from the 20th inst. Lieut. Stewart is a candidate for the S.C., and has been appointed to the 10th Bengal Lancers, on probation.

70th East Surrey Regiment. Lieut. Couper has returned home from India in H.M.S. Crocodile.

74th Highland Light Infantry. Lieut.-Gen. Pakenham, commanding the Western District, presented the Egyptian War medals to the officers, non-commissioned officers, and men at Devonport on Friday last. Addressing the regiment, Gen. Pakenham said:—"Col. Jago, officers, non-commissioned officers, and men of the Highland Light Infantry, it gives me, I assure you, the greatest pleasure to call the garrison together to-day for such an interesting ceremony as this. I consider it the greatest honour that I shall be allowed to hand you these medals. It will be one of the happiest recollections of my command here—which is about, I am sorry to say, to close—that I have had the honour to-day of calling you here to give you your Egyptian medals. I wish you all every joy in receiving them, and a very long life to wear them. The other day, one of your number received the Victoria Cross at the hands of our most gracious Majesty. Such a distinction is a great honour to the regiment. Then there is the case of another in your ranks to which I would refer—I mean the colour-serjeant who so gallantly conducted himself at the same time that Lieut. Edwards won the Victoria Cross. I refer to Colour-Serjt. Robinson, who deserves immense credit. And all the more do I think that he deserves such credit, when I know that he has been offered by H.R.H. the Field-Marshal Commanding-in-Chief, by her Majesty's direction, a commission in the Army for his conspicuous conduct. That offer he has declined, and I think wisely declined. But I do trust that his gallant conduct will not go unrewarded, and it certainly shall not do so, if I can help it. I trust some other position, which will suit him better, will be found for him, and thus show that the authorities know how to reward gallant deeds like those which he has performed."

75th Gordon Highlanders. Capt. Mathias has passed for promotion to the rank of major, obtaining the "special mention" certificate.

79th Queen's Own Cameron Highlanders. A correspondent writes from Cairo:—"The Egyptian medals for the regiment were presented to the regiment by Major-Gen. Sir G. Graham, V.C., K.C.B., at Cairo, on Feb. 21. Gen. Sir A. Alison had undertaken to perform this duty, but was compelled, by a sudden attack of severe indisposition, to relinquish it. In addressing the troops, after expressing regret at Sir A. Alison's absence, and referring to the gallant services of the Cameron Highlanders during the campaign, Sir Gerald Graham observed:—'There are some critics who profess to think little of the action of Tel-el-Kebir, because our loss was small. It is true that our loss was comparatively small, but the results were great, and I venture to think that history will judge by the results. It is related of a man, who afterwards became one of the greatest soldiers of his day, that, on his first battle-field, when viewing the heaps of slain on his own side, he exclaimed, with the confidence of genius, "Had I commanded, these brave fellows would still be in life!" You may be thankful that your commanders were as capable as they were brave, and that the battle—so ably planned, so nobly fought—was won with so little loss. But that loss should not be forgotten, as it is right that we should remember our losses as well as our gains. In going round the rooms of your barracks shortly after the new year, I noticed in one room, among traces of the past festivities on the walls, the name of "Donald Cameron." Now, who was Donald Cameron? He was the first man of the 79th who mounted the trenches of Tel-el-Kebir, where he was killed. It is well that you should remember your fallen comrades, even in your mirth. These men are dead, but their memories do not perish. They live in the history and traditions of the regiment, which links you with the past. Let those who come safely through the battle have honours such as the Queen bestows; but let those who are left on the field not be forgotten. Think of them as still belonging to your regiment, as silent contributors to its honour and glory.' Sir Gerald Graham then referred to the part taken by the Cameron Highlanders in the landing at Aboukir Bay, under Abercrombie, in 1801; to their services in the Peninsula, at Waterloo, in the Crimea, and in India, telling the men that they had shown themselves worthy descendants of the heroes of those fields, and concluded by reminding them that 'it was only by the strictest discipline in time of peace that such glorious results were achieved in war.' After a few appropriate words from Col. Leith, C.B., commanding the regiment, the presentation of the medals was proceeded with, Lady Alison herself pinning them on to the breasts of the officers, and of a great many of the non-commissioned officers and men who were selected for the distinction, in recognition of long and good-service or of gallantry in the field. The ceremony was witnessed by Lord and Lady Dufferin, Lord Napier of Magdala, Nubar Pasha, and a large concourse of distinguished guests of the regiment."

81st Loyal North Lancashire. Capt. and Adjt. Davidson has been granted leave from India to England for 15 months, on private affairs. Capts. Tennant and Crosbie have returned home from India in H.M.S. Crocodile.

87th Royal Irish Fusiliers. Capt. Money completed five years' service as D.A.A. and Q.M.G. of the Northern District on the 8th inst.

90th Cameronians, Scottish Rifles. Major Campbell is about to retire. Capt. Fergusson and Lieut. Hopkins have returned home in H.M.S. Crocodile.

95th Sherwood Foresters, Derbyshire Regiment. Majors De Salis and Seagram are *en route* to India in H.M.S. Euphrates. Capt. Smith-Dorrien has returned home from India in H.M.S. Crocodile.

96th Manchester Regiment. Lieuts. Dawson, Quin, and Wilson, with a draft of 133 men, are *en route* to India in H.M.S. Euphrates.

97th Queen's Own Royal West Kent Regiment. Major Smith has been granted four months' leave of absence, on the recommendation of a medical board.

98th North Staffordshire Regiment. Major M'Causland has been granted eight months' leave from India to England, on private affairs.

105th King's Own Light Infantry, South Yorkshire Regiment. The regiment proceeded from Cork to the Curragh on Tuesday.

106th Durham Light Infantry. Capt. FitzGerald has returned home from India in H.M.S. Crocodile.

Rifle Brigade. Capt. Bowles, 4th Batn., is *en route* to India in H.M.S. Euphrates.

Commissariat and Transport Staff. Col. E. A. C. Gordon, R.E., commanding the Chatham District, on Sunday last presented 42 Egyptian War medals conferred by her Majesty on the non-commissioned officers and men of No. 17 Company, which took a very active part in the late expedition under Lord Wolseley. The officers received their medals at Windsor shortly after the return of the troops from the East (Capt. Johnson and Qrmr. Battersby). The company was drawn up in review order in Upper Chatham Barracks, and Col. Gordon was received by Assist.-Comy.-Gen. G. H. Sanders on his arrival. Col. Gordon, in a soldierlike speech, addressed the company, and told them that one of the most pleasing duties a commanding officer had to perform was that of presenting to soldiers medals awarded to them by her most Gracious Majesty the Queen, as a token of her approbation of their services in the field. Each non-commissioned officer and man then filed past, and received his medal from the hands of the colonel commanding the district. Mrs. Sanders, the Misses Sanders, and numerous other ladies were present to witness the presentation.

Pay Department. The following particulars respecting the Pay Department appear in the Army Estimates for the year 1883-4:—Increase of cost, £12,297. The numbers of the various ranks are the same as last year, except that the number of Staff paymasters is increased from 79 to 82, and the number of Staff Officers of Pensioners reduced from 27 to 18. Allowance in lieu of servants: Increase, from £1,423 to £3,450. About half a dozen retirements appear to be provided for. It would seem from the above that, beyond granting servant's allowance to the majority of the department, there is no provision for any increase in the number of Chief Paymasters, or any intention of granting the other points urged in these columns.

Medical Department. One of the few surviving medical officers who took part in the Peninsular War has just passed away, in the person of Surg. J. Wyer, on the Half-pay List, whose death is announced as having taken place at Whitechurch, Dorset, in his 94th year. He entered the Army as hospital assistant in 1811, and was at once sent to the seat of war in the Peninsula, where he attended the wounded from Busaco. He served on the staff and with the 88th Regiment during 1812, 1813, and 1814, and received the war medal and five clasps for the battles at which he had been present. He also served in Canada, and was at the taking of Plattsberg, at the Cape of Good Hope. Mr. Wyer was in the receipt of a pension of £100 per annum. The following is a list of the candidates who were successful for appointment as surgeons in her Majesty's British Medical Service, at the competitive examination in London on Feb. 19:—D. Bruce, 2,630 marks; H. C. Gordon, 2,460; H. L. Bell, 2,447; J. Riordan, 2,435; H. A. de Lom, 2,415; R. H. Firth, 2,400; G. Nelis, 2,350; P. J. Gallwey, 2,280; R. R. H. Moore, 2,220; J. O'Shaughnessy, 2,170; J. R. S. Robertson, 2,170; A. E. Tate, 2,130; C. E. Faunce, 2,130; W. H. Lendrum, 2,090; H. J. Wyatt, 2,050.

The Auxiliary Forces.

MILITIA.

Royal Dublin Fusiliers. The officers of the 5th Batn. held their annual dinner a few evenings ago at the Antient Concert Rooms, Dublin. There were present:—Col. Vesey; Majors Lord Brabazon, Mansfield, and Darley; Capts. Mansel (adjt.), Kirwan, and Lambert; Lieuts. Finlay, Manly, Macnamara, Luscombe, and Dillon; the Rev. F. Sadleir, military chaplain to the troops at the Curragh; Surg. Stokes, and Capt. M'Auliffe, late qrmr.

A Parliamentary return has been published, showing the establishment of each regiment of Militia in the United Kingdom, the numbers present, absent, and wanting to complete, and the number of Militia Reservemen enrolled and effective at the training of 1882. The return is in continuation of Parliamentary command paper No. 2,499 of the Session of 1879. The total number of all ranks present at training was 80,991; the absentees numbered 11,103. The maximum establishment of all ranks for England and Scotland is given as 106,516. As regards Ireland, the establishment of Militia (not trained) is set down as 32,777. The total number of men of the Militia Reserve effective at inspection was 23,019; and the number of men enrolled for the Reserve during the year was 6,068.

The under-mentioned regiments are ordered to proceed to Aldershot this season, for the annual training:—2nd Derby, 2nd Middlesex, Oxford, Tower Hamlets, Royal Westminster, South Middlesex, and 1st and 3rd Surrey.

The preliminary 56 days' training of the recruits of the following regiments commenced last Monday:—Lancashire Artillery, at Liverpool; and Royal London, at Finsbury. The recruits of eleven regiments assemble next Monday, for the same period, as follows:—Artillery—Royal Sussex, at Lewes; Cornwall and Devon Miners, at Pendennis Castle. Infantry—2nd Cheshire, at Macclesfield; Sherwood Foresters, at Newark; 2nd Devon, at Plymouth; Huntingdon, at Huntingdon; Flint, at Mold; Norfolk, at Norwich; Tower Hamlets (King's Own), at Dalston; Cambridge, at Ely; and Royal Carnarvon, at Carnarvon.

Exclusive of the Irish Militia, the dates of training of which are now being arranged, the number of regiments to be trained in camp during the ensuing season is 50, seven in Scotland, and the remainder in England and Wales.

YEOMANRY CAVALRY.

Middlesex. A most enjoyable smoking concert was held at the Regimental Club, Albemarle Street, on Thursday evening.

THE VOLUNTEERS.

It is notified that her Majesty the Queen has been graciously pleased to approve of the 21st Middlesex (the Finsbury) R.V.C. being associated with the King's Royal Rifle Corps, instead of with the Rifle Brigade, as at present. Also, of the 2nd, 4th, 6th, and 8th Surrey R.V.C. being in future designated respectively the 1st, 2nd, 3rd, and 4th Volunteer Batns. Queen's (Royal West Surrey Regt.).

Friday's Gazette.

ARMY.

WHITEHALL, March 7, 1883.

The Queen has been pleased to give and grant to the under-mentioned officers in her Majesty's service her Majesty's Royal licence and permission that they may accept and wear the insignia of the several Classes of the Orders of the Osmanieh and Medjidieh, attached to their respective names, which his Highness the Khedive of Egypt, authorised by his Imperial Majesty the Sultan, has been pleased to confer upon them, in recognition of their distinguished services before the enemy during the late campaign in Egypt:—

3rd Class Medjidieh—Col. W. W. Corban, Princess Charlotte of Wales's Berkshire Regt.; Lieut.-Col. W. O. Barnard, the Manchester Regt.

4th Class Osmanieh—Lieut.-Col. D. M. Home, Royal Horse Guards.

4th Class Medjidieh—Capts. T. B. Hitchcock, the King's Shropshire Light Infantry; F. G. Slade and F. O. B. Foote, R.A.

3rd Volunteer Battalion, the Duke of Wellington's (West Riding Regiment)—The under-mentioned gentlemen to be Lieuts.:—William Whitaker Thompson and Walter Bairstow.

(Where not otherwise specified, the foregoing commissions and announcements bear date March 10, and the current year must be understood.)

DR. THORBURN'S CASE.

TO THE EDITOR OF "THE ARMY AND NAVY GAZETTE."

Sir,—I have read the letter of Dr. Thorburn in your issue of March 3, and also your admirable leader on the subject. It is a case which must prove of the greatest interest to every officer of the Army Medical Department, and also, I should think, to every officer and soldier in the British Army. The subject will, no doubt, be taken up by more able pens than mine, for daylight must now be let into it, and a full and searching investigation take place, which will be demanded by all lovers of truth and fair-play; but, pending this, I should just like to ask a question, on which, in my judgment, the whole case depends. Who is answerable for the mysterious document purporting to emanate from the Calcutta Turf Club, the authenticity of which is denied by that body? Where did it come from? Who concocted it? The secretary of that club, Mr. W. Dickson, denies its authorship. Yet on this document Dr. Thorburn is condemned and made to leave the Army, a disgraced man, with a ruined reputation. No doubt either Sir Donald Stewart, General Cureton, or Dr. Crawford will now make some public reply. Dr. Thorburn must be either innocent or guilty. I am not his judge, but it says much in his favour that he demanded a court-martial, which was denied him, and he was honourably acquitted by a Court of Inquiry, when it was granted him. If guilty, he was surely entitled to no consideration. Yet he was given £2,500, although he was deemed guilty of a dishonourable transaction, and he is now a member of two of the leading Military Clubs in London. If innocent, he is one of the most unfortunate and ill-used officers who has ever served her most Gracious Majesty, and is entitled to the sympathy of every right-minded man. Innocent or guilty, is the question which the British public will demand to know.—I am, &c.,

Miles.

ARMY CONTRACTS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I wish you would moot in your columns the subject of the supply to the canteens of Dover, Chatham, and Shorncliffe, of bread, potatoes, milk, and groceries; it is a subject worthy of being investigated, quite as much as the Clyde and other service scandals. Troops pay about 25 per cent. more for their goods than is necessary. Compare prices paid for potatoes, cheese, tea, &c., with prices paid by convict prisons, and I can assure you that the latter have far superior goods, and pay about 20 per cent. less. If contracts were made annually at the War Office for every district, I am quite certain that it would effect a saving of at least 25 per cent. to the troops. Just as well as it is done for meat and commissariat bread, so it could be done for groceries, potatoes, vegetables, bread, and milk. But at present some wholesale grocer takes the supply into his hands for everything, and charges the troops 3¼d. per 2-lb. loaf of bread, which the baker would gladly supply at 2¾d.; milk, 4d. a quart, which any milkman would gladly supply at 3d. per quart; potatoes, 8d. a stone, which a potato merchant would gladly supply at 6½d. per stone,—and so on through the chapter. These contractors are generally local men of importance, who have influence somewhere, and who manage to get all this in their hands.—I am, &c.,

A Soldier.

The Emperor of Germany has appointed the Prince of Wales a Field-Marshal in the German Army. His Majesty presented the Prince with the Marshal's bâton with his own hands. This appointment, it is said, is universally approved in Germany.

General von Kameke formally gave up his portfolio as German Minister of War on Wednesday. He had held this position for 10 years. The Emperor has bestowed on him the Cross and Star of Grand Commander of the Hohenzollern Order. It is reported that the ex-Minister will also be raised to the dignity of Count. Gen. von Blumenthal, who was offered the post, has refused, on account of age, he being 73 years old. The appointment has accordingly been conferred on Lieut.-Gen. Bronsart von Schellendorff, who is commander of the Second Division of Infantry of the Guard at Berlin.

Sir H. Fletcher asked in the House of Commons on Tuesday if the men of the Anglo-Indian regiments sent from India to Egypt last year retained their Indian pay and allowances till Oct. 10, 1882, whereas the officers were put on English pay, &c., on landing in Egypt. The Marquis of Hartington replied that both officers and men were put upon the British rate of pay from the day of their landing in Egypt.

EGYPTIAN WAR FUND.

NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

PATRON.
Her Most Gracious Majesty the QUEEN.

Subscriptions are earnestly requested. Remittances can be sent to Lady Jane Taylor, 16 Eaton Place, S.W.; or to Cox and Co., Craig's Court, S.W.

Application for assistance to be made to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, London, S.W.

TO MESS PRESIDENTS AND OFFICERS' MESS COMMITTEES.

THE GROSVENOR GALLERY RESTAURANT,
NEW BOND STREET.

The MANAGER desires to bring to the notice of Mess Presidents who are about making arrangements for Annual Regimental Dinners the great advantages offered for such meetings at his Establishment.

The Cuisine Department and Wine Cellars are under his personal supervision, and the utmost care is taken to make every such gathering a success.

Full particulars may be obtained from W. A. BURROWS, Manager, 136 New Bond Street, London, W.

HOTCHKISS AND CO.,
21 RUE ROYALE, PARIS;

ILLUSTRATED PRICE CATALOGUE POST FREE.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures at their wholesale-trade Prices, which are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have taken this course of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

LETTER HELD OVER:—The Distribution of Naval Gratuities.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 10, 1883.

ALTHOUGH the Army Estimates for the coming year show no preparation for a change in the organisation of our Cavalry Regiments, we may, nevertheless, take it for granted that such has been resolved upon, and will take place within a short time. The *Times* has already published two or three articles on the subject, setting forth views which are doubtless to some extent inspired. Our contemporary has also published a list of the regiments as it is proposed to amalgamate them. In this list appear such striking absurdities, that we feel it our duty to say a few words concerning them. First of all, it is proclaimed that "Dragoon Guards" are doomed, the name being considered inappropriate; but the *Times* takes care to hide from the public the origin of the term. Now, these regiments were formerly regiments of "Horse," and when, from motives of economy, they were reduced to the pay and status of "Dragoons," they were given the title of "Dragoon Guards," as an honorary compensation for the loss they sustained. As this title has existed for 137 years, we think it rather late to challenge its propriety! In the next place, the scheme propounded by the *Times* appears to be altogether based on the present system of numbers; but although regiments may be loathe to part with these, still we feel sure they would infinitely prefer doing so to being jumbled together, as far as we can see, without reference to any other consideration. For instance, the 3rd (Prince of Wales's) Dragoon Guards and the 3rd (King's Own) Hussars are linked together, the latter losing its title, and being made "Heavy." The same fate befalls the 4th (Queen's Own) Hussars, joined to the 4th (Royal Irish) Dragoon Guards, thus losing its English nationality into the bargain; while the 7th Dragoon Guards is made "The Queen's Hussars." The 5th Dragoon Guards is made Lancers, and called "The King's," but for what reason does not appear. Again, though the *Times* has often deprecated the indiscriminate distribution of distinctions, such as were showered on the 20th and 27th Regiments of Foot when the Territorial system was introduced, yet it proposes to call the 13th and 21st Hussars—both of them very modern additions to that branch of the Cavalry—"The Royal Hussars," though why they should receive that pre-eminent distinction we cannot conceive. Now, all this shuffling and complication is quite unnecessary. There are at present an even number of Heavy regiments and an even number of Light, but as there are five regiments of Lancers and thirteen of Hussars, it is necessary to turn a regiment of Hussars into Lancers, or *vice versâ*; and having regard to their relative numbers, the former alternative appears the more advisable. In going through the list, we find three regiments of Hussars bearing the appellation of "King's," viz., the 3rd, 14th, and 15th. Now, the last named is one of the oldest Hussar regiments in the service; the 14th is therefore the junior of the three, and is for that reason selected for transformation into Lancers. It also appears advisable to transfer one regiment from the Irish to the English establishment; this we prefer to do in a direct manner, by changing the nationality of the 5th Lancers, instead of adopting the circuitous plan advocated by the *Times*, which proposes to transfer two regiments, the 5th Royal Irish Lancers and the 6th Inniskilling Dragoons, to England, and one, the 4th Queen's Own Hussars, to Ireland. We place the following table before our readers, feeling satisfied that it will be better appreciated by those most concerned than that which our contemporary proposes should be thrust upon them:—

DRAGOON GUARDS AND DRAGOONS.

1st (King's) Dragoon Guards	The King's Dragoon Guards.
7th (Princess Royal's) Dragoon Guards	
2nd Dragoon Guards (Queen's Bays)	The Queen's Dragoon Guards (Carabiniers).
6th Dragoon Guards (Carabiniers)	
3rd (Prince of Wales's) Dragoon Guards	The Prince of Wales's Dragoon Guards.
5th (Princess Charlotte of Wales's) Dragoon Guards	
4th (Royal Irish) Dragoon Guards	The Royal Irish Dragoon Guards (Inniskillings).
6th (Inniskilling) Dragoons	
1st (Royal) Dragoons	The Royal Scots Dragoons.
2nd Dragoons (Royal Scots Greys)	

LANCERS.

5th (Royal Irish) Lancers	The King's Royal Lancers.
14th (King's) Hussars	
9th (Queen's Royal) Lancers	The Queen's Royal Lancers.
16th (Queen's) Lancers	
12th (Prince of Wales's Royal) Lancers	The Prince of Wales's Royal Lancers.
17th (Duke of Cambridge's Own) Lancers	

HUSSARS.

3rd (King's Own) Hussars	The King's Hussars.
15th (King's) Hussars	
4th (Queen's Own) Hussars	The Queen's Own Hussars.
7th (Queen's Own) Hussars	
8th (King's Royal Irish) Hussars	The King's Royal Irish Hussars.
18th Hussars	
10th (Prince of Wales's Own Royal) Hussars	The Prince of Wales's Own Royal Hussars.
13th Hussars	
11th (Prince Albert's Own) Hussars	Prince Albert's Own Hussars.
20th Hussars	
19th Hussars	The Imperial (?) Hussars.
21st Hussars	

For our own part, we fail to see that there is any necessity for interfering with the traditions of regiments; but since the reformers are bent upon carrying on their work of destruction, no arguments will, we fear, induce them to yield to public opinion, which is dead against the changes they have in contemplation. As the success of their latest scheme will depend entirely on the way in which it is carried into effect, it is as well to point out the mistakes that have been made, in order that they may be rectified before it is too late. The amalgamation of our Cavalry regiments, however it may be arranged, will cause intense dissatisfaction, while its advantages will be only problematical. There is an alternative which, judging from the failures in Infantry reorganisation, we would earnestly recommend to the authorities at the War Office—that of leaving the Cavalry regimental system undisturbed.

H.R.H. the Field-Marshal Commanding-in-Chief will hold a Levée at 1 o'clock on Wednesday next, at the Horse Guards, Whitehall, the number being limited to 150. Applications to attend should be addressed to the Military Secretary.

The Military Secretary will not hold a Levée on Tuesday next.

Although the Duke of Connaught returns to his Brigade command at Aldershot in April next, he has not abandoned his idea of visiting India.

Distinguished-Service Rewards of £100 per annum have been conferred upon Major-Generals W. G. Cameron, C.B., Hon. P. R. B. Feilding, C.B., and M. Walker, V.C., C.B., and Colonels E. H. H. Foster and J. Miller. General Cameron entered the Army May 24, 1844, served in the Crimea including battle of Alma and siege of Sebastopol (mentioned in despatches, and severely wounded), and in the Abyssinian campaign (mentioned in despatches). General Feilding joined the service August 8, 1845, and served in the Crimea, including battles of Alma, Balaklava, and Inkerman, and siege of Sebastopol (mentioned in despatches, and wounded). General Walker joined the service September 25, 1846, served in the Crimea, including battle of Alma (wounded) and siege of Sebastopol (mentioned in despatches), and in the China war of 1860 (mentioned in despatches); and Colonel Foster joined the service May 2, 1842, served in the Kaffir war of 1851-53. Colonel Miller joined the service November 8, 1842, served in the Sutlej campaign of 1845-6, in the Indian Mutiny campaign, and in the Abyssinian campaign (mentioned in despatches).

Sir Evelyn Wood has completed his selection of European officers for the new Egyptian Army, and the names of those who have accepted service under the Khedive are to be submitted to her Majesty, before steps are taken to second them in their regiments.

The number of Assistant-Adjutant-Generals borne on the establishment at head-quarters is to be increased by one—from four to five.

The Field-Marshal Commanding-in-Chief has issued a General Order praising the conduct of the troops quartered in Ireland for the manner in which they have carried out the arduous eviction duties upon which they have been engaged during the past two years. No mention is made, however, of any compensation to the men for extra wear to clothing replaced at their own expense, especially cavalry soldiers, who frequently for weeks together have been kept in the saddle all day, in pouring rain, when in aid of the civil power. If the authorities really approve of the conduct of the officers and men, why not grant compensation to the latter, and relieve some of the regiments in Ireland, who have been over a year at their present stations, to quarters where both men and horses would be less severely worked?

Colonel W. La Touche, Bombay S.C., has been selected to command the Police Force in Egypt, under Baker Pasha, with the rank of Major-General. He will have as his assistant Mr. Vincent, late Deputy Commissioner of Police in Bombay.

Arabi has written to his wife at Cairo to express his complete contentment with his quarters at Ceylon, and she and her children will proceed to join him, as soon as her health permits.

The Royal Warrant of June, 1881, provides for an establishment of six Field-Marshals. As yet, however, we have only four. It clearly is due to the senior Generals that the two vacancies should be filled, and we trust that ere the anniversary of her Majesty's birthday comes round again, the Secretary of State for War will be induced to consider the propriety of carrying out the terms of the Warrant.

The Prince Consort's Library at Aldershot ought to be the best Military library in the kingdom; but it is sadly neglected, and cannot compare with that of the Royal United Service Institution. There is plenty of space for new publications, but even official Blue-books and other works of reference are conspicuous by their absence. The gallery is filled with lumber. The catalogue was printed in 1860, and has but few additions entered. It appears, moreover, to be generally kept behind a bookshelf, where it is difficult to find. Books which have been in the library for years have no book-plates or any mark or stamp on them to show to whom they belong, and could not be identified if they were removed. Such a state of things is far from creditable to those concerned. The Library was intended by its lamented founder to supply a want which had long been felt. It certainly does not do this now, for it has been so shamefully neglected of late years that it has lost all its value.

Major-General C. Tower, C.B., will be retired on the 20th inst., having been five years unemployed.

Captain E. Ward, Royal Artillery, has been appointed Inspector of Warlike Stores at Bermuda.

An impression seems to have gained ground that the 65th and 81st Regiments are to be brought home at once from Aden and India. This idea has arisen, no doubt, in consequence of the steps taken by the War Office to make known its intentions with regard to providing change of quarters for Infantry battalions. Lists appear from time to time in the daily papers giving details of changes of stations. These lists are invariably most misleading. They are published one day, to be contradicted a few days afterwards, and they are prepared in such a way as to blind the unwary. It has never been intended to order home the 65th and 81st before the next relief season.

A Deputy-Assistant-Adjutant and Quartermaster-General is to be added to the Staff establishment of the Northern District, from April 1.

Colonel F. W. Grenfell, King's Royal Rifle Corps, Aide-de-Camp to the Queen, has vacated his appointment as Assistant-Adjutant and Quartermaster-General of the Army of Occupation in Egypt, and taken up his duties on the Staff of Major-General Sir Evelyn Wood, with the rank of Brigadier-General, her Majesty having approved of his acceptance of service under the Khedive.

The training of several Militia Battalions has been fixed to commence on Wednesday. For what reason Wednesday is chosen, it is difficult to understand. It will cause great inconvenience and be a decided failure, and is most unfair to the men, most of whom will lose an extra fortnight's work, as they will not be able to get work, or leave, in the middle of a week.

Lord Napier of Magdala, who has been for some time at Shepheard's Hotel, Cairo, looking, in his quiet way, into the situation, has been much benefited by his residence, notwithstanding the bad weather which has prevailed recently in Northern Egypt. It was expected that he would inspect the troops in garrison a day or two after the mail left, but as Sir A. Alison was still confined to his room, the review was not fixed for any day.

The number of Captain Instructors at the School of Gunnery, Shoeburyness, is to be raised from four to five.

The proposed division of the Manchester District into two separate commands will not be carried out this year. The subject has been deferred for future consideration, and will be gone into again when Lord Hartington has had time to consider other matters of more pressing importance.

It is rumoured at Aldershot that the command of the Division, which will become vacant by Sir D. Lysons' compulsory retirement in August next, will be given to a distinguished officer who held a high command in Egypt during the late campaign. The appointment would be a most popular one with the service.

Parliament is to be asked to vote the sum of £38,000 for expenditure during the year 1883-4, in replacing the present wooden huts at Aldershot, Shorncliffe, and the Curragh. The largest sum, £20,000, will be spent at the Curragh, Aldershot will take £13,000, and Shorncliffe £5,000.

We learn from Egypt that Sir E. Wood and Baker Pasha are running a friendly race in the business of reorganisation, but the Gendarmerie are already at work. At present, it is the Gendarmerie who do all the garrison duty at Cairo, as far as the Egyptian part of it is concerned. Colonel Synge has been inspecting the state of the Delta, and Colonel Baker has gone up country, and was at Assiont by last accounts. There are exaggerated reports of disturbances made by those who are interested in making it appear that the country is agitated, and that it would be dangerous to withdraw such profitable customers as the Army of Occupation.

The 3rd Battalion York and Lancaster Regiment (3rd West York Militia) are under orders to assemble for training on July 11, and go into barracks at York, which will be a great advantage to them, after being so many years in camp. The Pontefract people, it is said, object, and are making efforts to get the present arrangement altered. It is hoped that the Military authorities will not give way, and sacrifice the interest of the public service to local pressure. Mr. Childers, being no longer Secretary for War, the Pontefract inhabitants will find they have not the same power as formerly.

The Navy.

EGYPT MEDAL.

Department of the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, Spring Gardens, March 7, 1883.

Notice is hereby given, that medals for the operations in Egypt are ready for issue to the officers and crews, entitled thereto, of the ships named below; viz.:—Her Majesty's ships Dee, Decoy, Don, Dragon, Inconstant, Orion, Penelope, and of the officers and men of the Royal Marine Battalion. Application should be made personally or by letter to the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, London, S.W. Petty officers and seamen, &c., whether applying in person or by letter, are requested to produce their certificates of service.

ADMIRALTY, March 2, 1883.

The under-mentioned Assistant-Engineers have been promoted to the rank of Engineers in her Majesty's Fleet, with seniority of the 1st inst.:—John Samuel Rees, Alfred John Nye, and William James Brown.

ADMIRALTY, March 3, 1883.

The following qualified candidates for the Naval Medical Service have been appointed to be Surgeons in her Majesty's Fleet, with seniority of February 26 last:—Bowen Stilon Mends, Timothy Joseph Crowley, M.D., Arthur Keess, David Lennox, M.B., Bassett Charles Edward Fitzgerald Gunn, Donald Templeton Hoskyn, John Evans Penn, Robert Howard Nicholson, Percy Bellamy Bury, M.B., John Nicholson Seymour, M.B., John Leslie Barrington, and Jeremiah Sugrue, M.D.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Chaplain the Rev. George Godfrey Ward Clemenger, B.A., has been placed on the Retired List of his rank from the 1st inst.

ADMIRALTY, March 6, 1883.

Royal Marine Light Infantry.—The under-mentioned officers have been appointed probationers in the S.C. (dated March 3):—Lieutenants Mansel Travers Shewen, Charles Charnier, and Clarence Herbert Macdonald.

The following Surgeons have been promoted to the rank of Staff Surgeon in her Majesty's Fleet, with seniority of the 2nd inst., viz.:—John Lyon, M.D., John Tyndall, and Alexander Richard Joyce.

ADMIRALTY, March 8, 1883.

With reference to the notification of special promotions made in her Majesty's Fleet for services rendered at the attack on the Forts at Alexandria on July 11, 1882, which appeared in the *London Gazette* of August 8, 1882, Commander Thomas Seymour Brand has this day been promoted to the rank of Captain in her Majesty's Fleet.

Navigating Lieutenant Walter William Browne has been promoted to the rank of Staff Commander in her Majesty's Fleet, with seniority of the 3rd inst.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Paymaster Edward Foster has been placed on the Retired List from February 10 last, with permission to assume the rank and title of Paymaster-in-Chief.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer John Watson (*a.*) has been placed on the Retired List of his rank from the 6th inst.

APPOINTMENTS.

Commander—John R. E. Pattison, to the Neptune.

Staff Commander—William H. James, to the Neptune.

Lieutenants—James B. Hay, to the Excellent, additional, to complete requalifying in gunnery; W. B. Charter, to the Crocodile, vice Robilliard; Arthur C. Clarke, Stuart B. Roupell, Powlett H. S. Hungerford, Henry M. T. Jones, Alan B. Leslie, and Norman G. Macalister, to the Neptune; Charles W. W. Ingram, to the Crocodile, vice Roberts; Edward B. T. Hall, to the Penelope, vice Hungerford; Charles B. P. Hume, to the Duke of Wellington, vice Macalister; William P. Shakespear, to the Cambridge, vice Jones; Angus W. S. Douglas, Frederick S. Sieveking, and George E. B. Bairnsfather, to the Fantôme.

Commissioned Boatman—Timothy Higgins, Blyth Haven, to be chief boatman, Barton, vice Ellis, promoted.

Algerine, Com. G. W. Allen, left Simon's Bay on the 9th ult. for St. Helena, and will await there the arrival of the mail of the 1st inst. from England, and then take it on to the Commander-in-Chief at St. Paul de Loanda.

Audacious, Capt. Tracey, flagship of Vice-Admiral G. O. Willes, C.B., Commander-in-Chief on the China station, was at Hong Kong on Jan. 29. The Curaçoa was at Yokohama on Jan. 19, and would remain at Yokohama as senior officer in Japan. The Daring was at Kobé on Jan. 19, and was to leave on Feb. 1 for Yokohama. The Moorhen was at Yokohama on Jan. 19, and was to leave on Feb. 1 for Kobé. The Cleopatra was at Shanghai on Jan. 24, and would remain. The Zephyr was at Shanghai on Jan. 24, and would remain. The Sheldrake left Shanghai on Jan. 24 for Kobé, calling at Simonoseki. The Audacious had arrived at Hong Kong on Jan. 18, and was refitting. The Encounter was at Hong Kong on Jan. 29, and would remain. The Pegasus was at Hong Kong on Jan. 29, preparing for recommission. The Albatross was at Hong Kong on Jan. 29, waiting to be recommissioned; the crew turned over to the Wivern. The Fly, at Hong Kong on Jan. 29, was to leave early in February for the Straits Settlements Division, calling at Saigon and Bangkok. The Swift was at Hong Kong on Jan. 29, refitting. The Lily left Hong Kong on Jan. 20 for Singapore, calling at Hoihow, to await relief by the Linnet, and would proceed to England, calling at Colombo, Aden, Malta, and Gibraltar. The Kestrel left Hong Kong on Jan. 20 for Amoy, Foochow, Swatow, and would then return. The Vigilant was at Hong Kong on Jan. 29, refitting. The Champion was at Singapore on Jan. 15; ordered to visit Johore, and then proceed to Penang. The Foxhound was at Labuan on Jan. 7; had visited Sulu, Sandakan, and Kudat; was to leave on the 15th for Sarawak, and would then return to Labuan about Jan. 25. The Magpie is wintering at Kobé. The Flying Fish was at Nagasaki on Jan. 19; ordered to leave for Hong Kong. The Wivern (manned by the crew of the Albatross) was at Canton on Jan. 28, and would remain.

Briton, Capt. A. J. Kennedy, was at Simon's Bay refitting on Feb. 6.

Carysfort, Capt. Stephenson, C.B., flying the flag of Admiral Lord Alcester, arrived at Marseilles on Wednesday, and exchanged the customary salutes with the French naval and military authorities. Lord Alcester's flag was hauled down at sunset. The Carysfort will remain at Marseilles for a few days, and will then return to Malta.

Cockchafer, Lieut. and Com. H. W. Hill, was to leave Algiers on March 5, weather permitting, for her station.

Dart, Lieut. and Com. Moore, arrived at Sydney on March 3.

Decoy, Lieut. and Com. H. C. Bigge, arrived at Limasol on March 5.

Dragon, Com Bolitho, left Malta last week for the East Indies station.

Espoir, Lieut. and Com. Gamble, arrived at Malta on March 7, *en route* for the China station.

Himalaya, Capt. Palliser, was to leave Hong Kong on March 8.

Lively, Com. Parr, flying the flag of Vice-Admiral Lord John Hay, Commander-in-Chief on the Mediterranean station, arrived at Malta on March 3.

Mallard, Lieut. and Com. Littledale, arrived at Bermuda on Feb. 3; would accompany Dido and Urgent to lat. 37° N., *en route* to Jamaica on Feb. 16, and would then proceed to Jamaica or return to Bermuda, according to circumstances.

Minotaur, Capt. Fellows, flagship of Vice-Admiral Sir W. M. Dowell, K.C.B., senior officer in command of the Channel Squadron, with the Achilles, Agincourt, and Minotaur in company, arrived at Lisbon on March 3. Would sail March 12.

Nelson, Comdre. James E. Erskine, A.D.C., was at Sydney on March 3.

Neptune, Capt. W. H. Maxwell, has been commissioned; complement, 542. The *Times* of March 8 supplies the following:—"The commissioning of the Neptune, turret-ship, for the Channel Squadron, has been postponed from the 20th to the 28th inst. As already stated, she will be commanded by Capt. Maxwell, who will have Com. Pattisson as his second-in-command."

Rocket, Lieut. and Com. Orlebar, arrived at Monte Video on March 3, homeward bound.

Sapphire, Capt. Fullerton, arrived at Maderia on March 7, and was to have left again on the 9th, *en route* for the China station.

Stork, Lieut. and Com. Blennerhasset, arrived at Madeira on March 1, and was to sail last Sunday.

Sultan, Capt. Walter Hunt Grubbe, K.C.B., joined the Channel Squadron at Lisbon on March 3.

Thalia, Capt. Brackenbury, C.M.G., arrived at Singapore on Wednesday, and was to leave the same day for Hong Kong.

Headaches and Disordered Stomach.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, Robert Humphreys, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "Eno's Fruit Salt." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

"Sapo Carbonis Detergens" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "Wright, Southwark," are on each wrapper, and branded on each tablet, without which none is genuine.

BIRTH.

Stewart.—On March 4, at Kirkley, Lowestoft, the wife of Lieutenant-Colonel H. H. A. Stewart of a son.

DEATH.

Herapath.—On the 7th inst., at Derwent Lodge, Addison Road, W., Spencer Harriott Sambourne Oakes, infant son of Captain Spencer John (4th Batn., Royal Fusiliers) and Ada Mary Herapath, aged eighteen months.

BREWERY — ALDERSHOT.
Secretary—Captain J. J. MALLANDAINE.

DR. J. COLLIS BROWNE'S
ORIGINAL AND ONLY GENUINE. CHLORODYNE.

From SYMES and Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1881. To J. T. DAVENPORT, Esq., 33 Great Russell Street, Bloomsbury, London.

Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff), discovered a remedy to denote which he coined the word CHLORODYNE.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

COUGHS, ASTHMA, COLDS,

BRONCHITIS,

EPILEPSY, SPASMS, COLIC,

PALPITATION, HYSTERIA, and is the true Palliative in

NEURALGIA, GOUT, CANCER,

TOOTHACHE, RHEUMATISM.

GREAT SPECIFIC for

DIARRHŒA,

CHOLERA, DYSENTERY.

IMPORTANT CAUTION.
The immense sale of this remedy has given rise to many unscrupulous imitations.

N.B.—Every bottle of genuine Chlorodyne bears on the Government stamp the name of the inventor,

DR. J. COLLIS BROWNE.

Sold in Bottles, 1s 1½d, 2s 9d, 4s 6d, by all Chemists.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

ARMY AND NAVY CO-OPERATIVE MEMBERS ARE SUPPLIED AT

ARGOSY BRACES.

For **RIDING,** *For* **BICYCLING,** *For* **TRAVELLING,**
For **ROWING,** *For* **HUNTING,** *For* **POLOING,**
For **WALKING,** *For* **SHOOTING,** *For* **TUG-OF-WAR.**
For **TENNISSING,** FOR EVERY-DAY LIFE.

THE ARGOSY BRACES are for sale by every Hosier and Outfitter throughout EUROPE, INDIA, and all BRITISH POSSESSIONS.

They will wear longer than any other Suspenders, and as they contain no india-rubber, are particularly suitable for hot climates.

The characteristic feature of these Braces consists in the employment of pulleys and cords instead of the fixed attachment at present in use. The effect of this is that the strain varies with the movement of the body, and never becomes excessive on any one part. The advantage is obvious. These Braces may always be worn with comfort, and buttons are not pulled off. Insist on having only the **ARGOSY BRACE.**

Kept in three sizes: No. 1, Boys; No. 2, medium Men's; No. 3, large Men's. Prices from 1s 6d (advancing 6d per pair) to 8s 6d.

⁂ Be very careful to get the right size, when perfect comfort is guaranteed. Size of waist required.

Retail of every Hosier and Army Outfitter throughout the Civilised World, or of

J. E. KILLICK and CO., 137 Strand, London, W.C. (opposite Gaiety Theatre).

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Field-Marshal his Royal Highness the Duke of CAMBRIDGE will preside at the 19th ANNUAL GENERAL MEETING of this Institution, to be held at the Royal United Service Institution (by the kind permission of the Council), on MONDAY, March 12, 1883, at 12 o'clock, noon.

By order,
G. W. FORSTER, Secretary.
Offices, 22 Cockspur Street, S.W., March, 1883.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

NOTICE is Hereby Given that the ANNUAL GENERAL MEETING of this Institution, to be held on Monday, March 12, 1883, at 12 o'clock, noon, will, at its close, be constituted a SPECIAL GENERAL MEETING, for the purpose of confirming the following alterations to Fundamental Law No. 6.

That in place of the scale of payments for the purchase of Presentations in the Royal School as given in Fundamental Law No. 6, the following scale shall be substituted, viz. :—

			£	s.	d.
If 10 y'rs of age	£435				
		Difference for 1 month	4	1	8
,, 11 ditto	386				
		ditto	4	3	4
,, 12 ditto	336				
		ditto	4	6	8
,, 13 ditto	284				
		ditto	4	10	0
,, 14 ditto	230				
		ditto	4	11	8
,, 15 ditto	175				

That the payment for a Life Presentation shall be £956, and for a Perpetual Presentation, £2,066.

By order,
G. W. FORSTER, Secretary.
March, 1883.

J. AND W. TOLLEY'S EXPRESS RIFLES.

·360 bore DOUBLE EXPRESS... ... ... £20
·450, ·500, and ·577 bore DOUBLE EXPRESS £25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ... £28
An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]

From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s, £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

THE VERSMANN'S PATENT GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. Therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address:—
The Versmann's Moss Litter Company, LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

EASTER VOLUNTEER REVIEW, BRIGHTON, 1883.

HOLLOWAY'S PILLS and OINTMENT.—During excessive variations of temperature, every one is more or less liable to internal congestions and inflammations. Throat, chest, liver, bowels, kidneys, and skin all suffer in some degree, and may be relieved by rubbing in this Ointment, aided by proper doses of the Pills, for administering which full directions accompany each box. In truth, any one who thoroughly masters Holloway's "Instructions" will, in remedying disease, exchange the labour of an hour for the profit of a lifetime. All bronchial, pulmonary, and throat disorders require that the Ointment should be thoroughly well rubbed upon the skin twice a day, with great regularity, considerable briskness, and much persistence.

The LIST of APPLICATIONS for SHARES will be CLOSED on WEDNESDAY, the 14th inst., for London and the Country.

ALDERSHOT BREWERY COMPANY, LIMITED.

CAPITAL, £60,000, in 12,000 SHARES of £5 EACH.

SECRETARY—Captain J. J. Mallandaine.

OFFICES—49 Pall Mall, London, S.W.

ABRIDGED PROSPECTUS.

This Company has been formed for the purpose of purchasing the Freehold Brewery and Premises, established in a central position of the town of Aldershot (close to the South-Western Railway Station), and acquiring the Plant, Machinery, Casks, Horses, Drays, Utensils in Trade, and all the Fixtures thereof and therein. The Stock is to be taken at a valuation at the time of taking possession.

The Brewery is a lofty brick-built and slated structure, fitted with all the latest modern improvements for brewing Ale, Stout, and Porter on a large scale, the whole forming a handsome block containing Beer, Hop, and Malt Stores, and all the usual requirements for an extensive trade.

There is no other Brewery at Aldershot, where in time of peace there are from 12,000 to 20,000 men. The resident civilian population of Aldershot is, according to the last census, over 12,000. The consumption of Beer and Porter at the sixteen Regimental Canteens during the time of peace averages about £72,000 per annum, and at the thirty-six messes about £8,000 per annum.

An arrangement has been made with a Local Agent having a large Military connection to take over for the Company his business of ten years' standing with the Camp, the gross returns from which have on an average of five years been at the rate of not less than £3,000 per annum, and also to secure his services.

The Company will also act as Agents for the supply of Burton Ales (the commission on which alone is estimated at £1,000 per annum), and will become Agents for Wine Growers and Distillers. They will also manufacture Aerated Waters.

It is estimated that of the capital, £40,000 will be required to be called up, and that this will purchase the Freehold and Plant, and provide working expenses sufficient to pay a dividend of 10 per cent. per annum. The following calculation will show that such profit may be reasonably expected:—

At present the Brewery is capable of turning out 600 barrels per week, at an average price of 30s per barrel, say £46,800 per annum; 15 per cent. profit upon this sum is £7,020, or equal to 17½ per cent. upon £40,000 of capital paid up.

The profitable nature of the Brewing trade is well known. The Stock and Share Lists illustrate the success of Joint-Stock Brewery Companies.

The purchase price of the Property is £30,000' and the Vendor will remain by agreement as Manager for a term of two years, and until after a dividend of 10 per cent. has been earned by the Company.

The Directors have caused an independent valuation of the property to be made by an experienced valuer, whose Report may be seen at the Offices of the Solicitors.

The Title has been legally investigated, and certified to be perfect.

The Vendor, who is the promoter of the Company, will pay all expenses incidental to its formation up to the allotment of Shares, including agency, law costs, advertising, brokerage, printing, and postage.

The Shares will be allotted in accordance with the priority of their application, and should no allotment be made the deposits will be returned in full.

The following Agreements have been entered into:—One dated 15th of November, 1882, between Thomas Sheldrake (the Vendor) of the one part, and James John Mallandaine (as Trustee on behalf of the Company) of the other part; another Agreement, dated 29th of November, 1882, is between Thomas Sheldrake of the one part, and Cornelius Wren of the other part; and another Agreement, dated the 30th day of December, 1882, is between the said Thomas Sheldrake of the first part, the said James John Mallandaine of the second part, and the Company of the third part.

These Agreements, with the Articles of Association, Report, and Valuation may be seen at the Offices of Messrs. Poole, Hughes, and Poole, 33 Chancery Lane, Solicitors to the Company.

Prospectuses, with Forms of Application, may be obtained on application to the Bankers, or the Secretary, at the Offices of the Company, 49 Pall Mall, London, S.W.

(*) Honorary Queen's India Cadet.

At the Preliminary Examination held in February, 1882, Six out of Seven Candidates, and at the Preliminary Examination held in March, 18:2, all Four Candidates, sent up from the Manor House, were successful.

H. WOLFFRAM, the Manor House, Lee, S.E.

WICKWAR COLLEGIATE SCHOOL, near CHARFIELD, GLOUCESTERSHIRE.

Head Master—LAWRENCE PRESTON, 1st B.A. London University, and F.G.S., formerly Assistant-Master at Cheltenham College.

This School affords (on very moderate terms), efficient Preparation for Professional or Commercial Pursuits and all Public Examinations. Thorough groundwork. Individual attention. Exceptional advantages for delicate or backward boys. Very healthy locality. Superior educational home for boys whose parents reside at a distance or abroad.—For prospectuses, &c., apply to the HEAD MASTER.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

NEWTON COLLEGE, S. DEVON.

President of Council—Earl of Devon.

TEN VALUABLE SCHOLARSHIPS, July, 1883.

Special Terms. Clergy, Officers, Professional Men. Twelve Grad. (Oxford and Cambridge) Masters for 150 Boys. New school buildings. Fine situation.

MAJOR DE THOREN and Major MORGAN, who have hitherto conducted the Rev. J. CARDWELL'S MILITARY ESTABLISHMENT in Jersey, have entered into arrangements to SUCCEED that gentleman, and will open on the 2nd prox. The success they have hitherto had has been very great. One-third of those sent up for the three last examinations have passed and obtained commissions, and every candidate has qualified.—For further information, apply to Major MORGAN, 3 Douro Terrace, Jersey.

NEGLECTED EDUCATION, or DELICATE HEALTH.——SPECIAL ADVANTAGES OFFERED to TWO GENTLEMEN'S SONS, in a Rectory, surrounded by an extensive Glebe, in a lovely village near Harrogate.—Address, CANTAB., care of Messrs. Dawson and Sons, 121 Cannon Street, London, E.C.

THE MILITARY and ROYAL NAVAL CLUB,

16 ALBEMARLE STREET, PICCADILLY, W.

For Officers of the Army, Navy, Royal Marines, and Auxiliary Forces, and those retired from the same.

For particulars, apply to the SECRETARY, at the Club.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small uantities.

JOHN HANES, Manager.

Store Warehouses, Baker-Street Bazaar, W.

FALKNER'S "REAL MALT" WHISKEY.

Pure Dublin Distillation.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and the Rev. Dr. FROST, LL.D., 19 Lexham Gardens. W., formerly at 28 Kensington Square, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Fifty-two successes last year, eighty this year. In the recent WOOLWICH Examination four passed, viz., 4th, 17th, 22nd, 27th, and a fifth pupil qualified, out of seven sent up.

LIEUTENANTS of MILITIA.—At the March Military Competitive Examination, eight obtained commissions, viz.:—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

At the last Examination (September) ten passed, viz.:—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th), M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

At the April Further Literary Examination, Three passed, viz.:—4th, 37th, 86th. This October Four passed, viz.:—5th, 10th, 14th, 26th, being all sent in on both occasions.

STAFF COLLEGE Successes:—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. No failure up to date, and 46 have passed since December.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

THE ROYAL ACADEMY, Gosport.

Patrons.

Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Nomination to a Naval Cadetship for the June Examination has long been given to the School, and will be competed for after Easter. Any Pupil joining at that time will be eligible. There are Special Classes preparing for Naval Cadetships for Woolwich, Sandhurst, the Militia, and all Competitive Examinations.—Apply to the Rev. EDWARD BURNEY, M.A., Head Master.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ROYAL INDIAN ENGINEERING COLLEGE, Cooper's Hill, Staines.

This College has been recently placed on a new basis, and the advantages afforded by it as a training institution for those who purpose adopting the Civil Engineering profession in India or elsewhere, are now offered to all persons desirous of following the course of study pursued there.

A number of Students, not exceeding 60, will be admitted to the College in September, 1883. Candidates for admission must, on July 1, 1883, be over 17 and under 21 years of age, and must give satisfactory proof of their having received a fair general education.

The Secretary of State for India will offer 13 appointments in the Indian Public Works Department for competition among the students entering the College in September, 1883, at the termination of their prescribed three years' College course, that is, in the summer of 1886. The Secretary of State for India will further offer two appointments in the Indian Telegraph Department among the same students after two years' course of study, that is, in the summer of 1885.

In the event of there being more candidates for admission than the College can receive, the preference will be given to qualified candidates according to dates of application for admission.

For all further particulars, apply by letter only to the Secretary, Public Works Department, India Office, S.W.; or to the President, Royal Engineering College, Cooper's Hill, Staines.

JULAND DANVERS, Secretary,
Public Works Department.
India Office, October 25, 1882.

MILITARY EDUCATION in FRANCE.

A limited number of CANDIDATES PREPARED for all Army Examinations, by a very successful Tutor. Last year all Militia Officers sent up passed their "Further." A Special Class for the Military Competitive.—Address, "MILES," care of Messrs. Clowes and Son, 13 Charing Cross.

SCHORNE COLLEGE, near WINSLOW.—Nine Resident Masters, including Seven University Men. 100 BOYS (Sons of Gentlemen). Good diet, sound education, home care. Thirty guineas a year, varying with age; and reduced, to brothers and orphans.—Address, Rev. Dr. JAMES.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 Commissions for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to Forty-eight Successes, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

MILITIA COMPETITIVE EXAMINATION ONLY.—A Few Candidates desiring special individual attention are Prepared by Major COWPER, assisted by an Officer of equal experience, who has taken high honours in Fortification, Surveying, &c. At the last Four Examinations (the average number sent up for each being between 3 and 4), Pupils passed at their first trial 1st, 10th, 21st, 30th, 33rd, 34th, and 37th on the List.—10 Clifton Villas, Maida Hill, London, W.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence January 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

KINGSLEY COLLEGE, WESTWARD HO!

Head Master—Rev. F. HEWSON WALL, LL.D.

Visiting Council.

Vice-Admiral Sir Wm. M. Dowell, K.C.B.
Robert Ellis, Esq., M.R.C.S., &c.
Rev. Roger Granville.
General W. N. Hutchinson.
Colonel Kennard, M.P.
Major-General Molesworth, R.H.A.
Sir George Stucley Stucley.
Rear-Admiral A. T. Thrupp.
Secretary, Ambrose Berkeley Wall, Esq., R.N.

References kindly permitted to the late Secretary of State for War.—Address, Captain BISSON, No. 3 Berners Street, London, W.

ARMY, CIVIL SERVICE, UNIVERSITIES, PUBLIC SCHOOLS.

MESSRS. BISSON, BORMAN, and CO. send, free of charge, PROSPECTUSES of the most SUCCESSFUL TUTORS for Woolwich, Sandhurst, Military Competitive, Staff College, Home and Indian Civil Services, Universities, Public Schools, &c.—3 Berners Street, W.

ARMY EXAMINATIONS, &c.—In the late Examinations Mr. WATKINS, late Scholar, Christ's College, Cambridge, passed Messrs. Plomer, Panton, Carpendale, Brownlow (U.C.), and Voyle (I.C.), for Sandhurst, and Mr. Cronin took honours at the Academy; Mr. Brett qualified for Woolwich.

Twenty-two other pupils have taken high places past year for the above, the Universities, Student Interpreterships, and Militia Examinations, Military and Pass.

A Class for Staff College.

Address, 90 Kensington Park Road, W.

LIEUTENANTS of MILITIA.—A COURSE of INSTRUCTION, including Fortification, Surveying, Tactics, Army Discipline Act, Drill, Queen's Regulations, &c., given by Major DAUBENY and A. PINHEY.—Apply to A. PINHEY (late R.A.), Burlington House, Spring Grove, Isleworth, W.

WOOLWICH, SANDHURST, and MILITIA.—Mr. S. H. WINTER PREPARES PUPILS for Military and other Examinations. More than 200 of his pupils have passed, many of them taking very high places.—Connaught House, the Common, Woolwich.

SANDHURST, WOOLWICH, and LITERARY EXAMINATIONS for MILITIA OFFICERS.—Candidates for the above Examinations are PREPARED by Mr. G. M. HICKS, M.A., who receives a limited number. Thorough teaching and individual attention. List of recent successes on application.—5 South Row, Blackheath, S E.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful:—

C. H. Farquharson	5th	J. F. Campbell	23rd
J. E. Cullinan	12th	C. L. Crutchley	31st
C. W. Garraway	16th	B. T. Mahon	38th

—Apply to D. C. FEENY, B.A.

LIEUTENANTS of MILITIA, Candidates for Line Commissions, are PREPARED for the Preliminary, the Further Examination, also for the Military Competitive Examination, by Lieutenant-Colonel COATES, Reserve of Officers, formerly of the Royal Military Academy, Woolwich, and Acting Brigade-Major at the Cape.

Colonel Coates has had much experience in coaching, and was, until quite lately, instructing at a large Army Coaching Establishment. His fees are about one-third less than those usually charged; and as he limits the number of his Pupils to Four, great individual attention is insured.—Apply to Colonel COATES, Shepton Mallet, Somersetshire.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Patron—Her Most Gracious Majesty the QUEEN.
Chairman—Major-General J. T. BOILEAU, R.E., F.R.S.

THE MARINE STEAM-ENGINE, a Treatise for the use of Engineering Students and Officers of the Royal Navy. By R. Sennett, Chief Engineer, R.N., First Assistant to Chief Engineer, H.M.'s Dockyard, Devonport; late Instructor in Marine Engineering at the R.N. Coll.

"Steam propulsion is not an old branch of engineering, and its perfection may be probably confided to the new class of engineers of superior training and mathematical knowledge whom the Admiralty are educating for the services, and for whom Mr. Sennett's book is mainly intended."—*Times.*

"It seems to us that Mr. Sennett has succeeded remarkably well in carrying out the object he proposed. His book cannot fail to be useful to all who have to do with the practical working of marine steam-engines."—*Saturday Review.*

"The author's object was to provide a text-book for students of marine engineering, which might also be found useful by naval officers who desire to obtain a knowledge of the machinery in the vessels they may be appointed to command. For this purpose the work is well adapted." — *English Mechanic.*

"For the first time the students of marine engineering and naval officers have now within their reach a text-book on the most important subject that can come under their notice. Mr. Sennett's work is eminently practical." — *Broad Arrow.*

"By his method of arrangement, the author has succeeded in providing a text-book suitable for the use of students of marine engineering and of naval officers. To the latter class, who may be in command, it is almost indispensable."—*Iron.*

London: Longmans and Co.

PRUDENTIAL ASSURANCE COMPANY,

(LIMITED),

HOLBORN BARS, LONDON.

THIRTY-FOURTH ANNUAL REPORT,

FOR THE YEAR ENDING 31st DECEMBER, 1882.

The Directors have much pleasure in presenting their Report and Accounts for the year 1882.

The Reduction in the rate of expenditure in both Branches has been continued during the year.

The Invested Funds of the Company, including the paid-up Capital, now exceed Three Millions, viz., Ordinary Branch, £928,176; Industrial Branch, £2,119,223.

ORDINARY BRANCH.

The New Business of this Branch for the year consists of 7,067 Policies, assuring the sum of £865,148, and producing a New Annual Premium Income of £32,777.

The Claims of the year amount to £73,621, representing 455 Deaths and 24 Endowment Assurances matured.

The Annual Premium Income at the end of the year is £164,949, being an increase of £22,216, over the year 1881.

The Investments of the year have been made principally in Consols, Mortgages upon Freehold Property in London, and Reversions.

The rate of expenditure of the Branch is less than Ten and a half per cent. on the Premium Income.

INDUSTRIAL BRANCH.

The Premiums actually received during the year in this Branch are £2,126,022 3s 11d, as compared with the sum of £1,849,494 18s 5d, received during 1881, being an increase of Premium Receipts of £276,527 5s 6d.

The Claims of the year amount to £773,813, and the total amount of Claims paid in this Branch is £4,559,925.

The Investments of the year have been made in New Three per Cents., Loans upon Rates, and Freehold Ground Rents.

The total expenses of this Branch, as compared with those of the previous year, show a reduction in the rate of Expenditure of nearly two and a half per cent. on the Premium Income.

The Company is now represented in every part of the United Kingdom, and the charges for extension expenses no longer appear in the Accounts.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, February 25, 1883.

Hospital returns for week ended February 23:—

	Total Force.	Sick.	Proportion per cent.
Artillery, Cairo	845	59	7·0
Cavalry „	1,103	94	8·5
Engineers „	211	8	3·8
1st Brig. (Gen. Earle)	2,330	173	7·4
2nd do. (Gen.Graham)	2,905	181	6 2
Sundries	729	40	5·5
	8,123	555	6·8
Alexandria	1,790	136	7·6
Ismailia	95	7	7·1
	10,008	698	7·0
Officers	323	15	4·7
Men	9,685	683	7·0
	10,008	698	7·0
Horses	2,123	102	4·8
Mules	707	11	1·6
	2,830	113	4·0

The above are extremely satisfactory, as showing only a general average of 7 per cent., even the Cavalry having come down to 8½. The weather still remains very cool. Among officers placed on sick list during the week are the following:—

Name and Regiment.	Illness.	Date of Entry.
Major Darley, South Staffordshire	Dislocation	Feb. 16, 1883.
Lieut. Welch, 19th Hussars	Enteric Fever	Feb. 16, „
Lieut. M'Cracken, Berks	Simp. Contd. F.	Feb. 17, „
Capt. Eden, 1st Royal Highlanders	Gout	Feb. 19, „
Colonel Corban, Berks	Rheumatism	Feb. 21, „

Sir Archibald Alison is suffering from an attack of fever, and General Graham has been for some days laid up.

The following officers proceed up the Nile, per Nile steamer Tatah, in charge of 57 convalescents, viz.:—Captains Harden, 1st Royal Sussex Regiment, and Moubray, Royal Highlanders; Lieutenants Mackenzie, 1st Cameron Highlanders, and Sir G. Thomas, Bart., R.H.A., and Rev. W. C. Magill, Roman Catholic chaplain.

Passages have been provided for Captain Sapte, Royal Sussex Regiment, to Cyprus; Lieutenant Welch, 19th Hussars, to England, invalided; and Miss Forest, Nursing Staff.

The following alterations were made in movements:—7th Dragoon Guards—Head-quarters and five troops proceed to England, per steamship Assyrian Monarch; Surgeon-Major Mackinnon in medical charge, assisted by Surgeon R. V. Ash, A.M.D. Remainder will go per steamship Lydian Monarch, in medical charge of Surgeon-Major Wood, assisted by Surgeon J. M. Beamish, A.M.D.

Captain Cummings, 1st Battalion Royal West Kent Regiment, is appointed to superintend the commission of Criminal Investigation at Alexandria.

Captain A. O. Green, R.E., has ceased to be employed on surveying duties.

Lieutenant Gough, 2nd Oxfordshire Light Infantry, arrived in Egypt on the 17th inst., and took up his duties as A.D.C. to the General Officer Commanding Cavalry Brigade on the 19th inst.

Surgeon-Major T. G. Rogers has reported his arrival in Cairo, and is posted for duty with the 1st Brigade.

Lady Alison recently delivered the Egyptian medals to the 79th (Camerons), General Graham representing the Commander-in-Chief, who was confined to his bed by fever. The 38th and 42nd are still waiting for their decorations.

There is a rumour that the 79th will be the next regiment to leave, and the total force will certainly be shortly reduced to 6,000 or 7,000 men. The Cavalry being now reduced to one regiment, the 19th Hussars, it seems likely that it will no longer be classed as a separate Brigade, and that either General Arbuthnot will leave or will take the place of General Earle, who, it is understood, will receive a Staff appointment at the Horse Guards. Should this be the case, the two Cairo Brigades would be commanded, the one by an Engineer and the other by a Cavalry General Officer.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Route-marching will be discontinued after this week, and spring drills commenced on the 15th inst. These drills will be carried out under the general supervision of Brigadiers, who have been instructed to frequently visit the corps of their brigades while at drill, in order to regulate the progress at the course so as to bring all to a conclusion about the same time, the middle of April. During the month of May, each company of infantry in succession will be instructed in field-cooking, shelter-trench digging, tent-pitching, &c., every man belonging to the company to be in the ranks on these occasions. It is not anticipated that the work for the drill season will be anything more than usual. No great assemblage of troops is expected, nothing exceptional being provided for in the Estimates. During the month of May there will be steady drills by brigades and practice in the new system of attack, to be followed in June by divisional field-days and minor operations of all arms two or three times a week. In July and August manœuvres on a more extended scale will be carried out, and perhaps a flying column or two, but nothing definite can be arranged until it is known what forces will be available. Minor operations and field-days will be continued till the end of October. With Divisional Orders of Saturday last, instructions were issued for the practice of outpost duty by brigades during the present week. On Wednesday last, all Infantry General Officers, Staff, Mounted Officers, and Captains met the General Commanding the Division at the Prince Consort's Library, where he explained the nature and object of the practice. The general idea of these exercises is as follows:—"Two forces, one from Reading and one from Winchester, are ordered to concentrate at Aldershot. The force marching from Reading, which comprises about 8,000 infantry, has reached Farnborough. It receives orders to bivouac on Cove Common, and protect itself by outposts. The outposts, if seriously attacked, to fall back on the North Camp, where a defensive position will be taken up, until the Winchester force arrives." The special idea assumed that "three battalions of 400 men each, or a total of 1,200 out of the 8,000 infantry (about one-sixth of the force), would be detailed for outpost duty. Of these, a battalion from the advanced guard would be sent forward to the centre of the position to be occupied, and the other two from the main body to right and left of the first. The battalion for the right having reached the Queen's Parade, North Camp, it receives orders from the General Commanding the outposts to advance by way of the Camp Farm, and take up an outpost position on the south part of the Fox Hills, fronting east, its left (which would be in connection with the centre battalion previously sent forward) resting on Ricochet Hill, and its right on the South-Eastern Railway." Orders have been issued during the week for Brigadiers to carry out these outpost duties as early as convenient. Reports of what is done, and a sketch showing the positions taken up by pickets and supports, and the general line of sentries, are ordered to be sent to the Assistant-Quartermaster-General the day after each exercise. Major-General Sir F. FitzWygram, Bart., has returned from leave of absence and resumed command of the Cavalry Brigade, which was held temporarily by Lieutenant-Colonel G. Luck, C.B., 15th Hussars. Officers commanding regiments of cavalry and battalions of infantry have been ordered to make such arrangements for the preliminary training of the non-commissioned officers (in accordance with par. 35, Musketry Regulations) as will ensure the target practice of the first troop or company being commenced on the 1st prox., on which date the annual course of musketry will commence. War games have been discontinued until further orders. A telescopic range-finder, for infantry, the invention of the Earl of Wemyss, is being experimented with at the Camp. The A Troop, R.E. Train, will proceed to Chatham at an early date, returning to Aldershot with pontoons. Major R. Stephens and Lieutenants A. H. Cowie and J. E. Capper, R.E., will shortly proceed to Chatham, for duty at the School of Military Engineering. Several haversacks of a new pattern, intended to be worn with the new valise equipment, are now being tried by regiments in the 1st Brigade, and will be severally reported on. Captain E. W. Murphy, 109th Regiment, has joined the Army Veterinary School; Captain H. W. Maclear, 3rd Buffs, has joined No. 1 Garrison Instruction Class; Lieutenant W. S. J. Barry, 87th, has been excused attendance at the present garrison class; Surgeon Ward, A.M.D., has been posted to Aldershot. The following Boards assembled on Thursday, for the examination of the under-mentioned Lieutenants of Militia who are candidates for commissions in the Line:—A Board of Medical officers at the Cambridge Hospital. Military Boards.—To conduct the competitive examination in military subjects. 1st Board.—Consisting of a field officer and two Captains, 3rd Brigade, to examine Lieutenants Holland and Payne, 3rd Royal West Surrey; Needham and Thursby, 3rd Royal Warwickshire; Woolmer, 4th Royal Fusiliers; Mylne, 3rd Bedfordshire; Milward, 5th Royal Irish; Phillips and Cox, 3rd Cheshire; Armstrong and Pakenham, 3rd South Wales Borderers; Combe, 3rd Hampshire; Lysons, 3rd Oxfordshire L.I. 2nd Board.—Consisting of a field officer and two Captains, 1st Brigade, to examine Lieutenants Burne, 3rd Berkshire; Jaffray, 3rd West Kent; Bainbridge, 3rd Middlesex; Browne, 3rd Royal Irish Fusiliers; Koch, 5th Royal Irish Fusiliers; Cochrane, 4th Leinster; Connor and Riach, 3rd Royal Munster Fusiliers; Gordon, 2nd Brigade, Cinque Ports Division, R.A.; McGregor, 9th North Irish Division, R.A.; Larking, Hants Engineers; Boultbee, 3rd Shropshire L.I.; Caldwell, 6th King's Royal Rifle Corps. Monday, the 5th inst., was the anniversary of the Battle of Barrosa, in 1811, where the 87th Royal Irish Fusiliers (Faugh-a-ballaghs), by an irresistible bayonet charge, drove the French from the key of the position, captured an Imperial eagle and several guns, and covered themselves with undying fame. In conformity with time-honoured regimental custom, the bands paraded at reveille, and with patriotic and loyal airs on fife and drum and brass awoke the slumbering echoes among the old huts of the North Camp, as they marched through the lines. With ringing cheers Barrosa morn was greeted by the brave young Irishmen of the 87th, which has distinguished itself on many fields since that memorable day. I learn that Mr. Docherty, late Schoolmaster, 85th, whose case was recently drawn attention to, and who has petitioned the highest military authority for mitigation of sentence in vain, is, with his family, at the present time in a state of absolute starvation. He has tramped the country seeking employment in any capacity, even as a labourer, but without success. His unfortunate children have scarcely a rag to cover them, and are, in fact, in such a shocking state of destitution as beggars description. Yet this man comes of a family who have served the Crown for generations, and has himself done good and faithful service for his country during many years, twelve of them in India. The one act of drunkenness for which he has been discharged the service pensionless is the only crime recorded against him. Under any circumstances, the quality of mercy would not have been strained, if exercised in his favour, and especially on account of his helpless offspring. The Egyptian medals for the 87th only arrived on Tuesday. The 84th have not yet received theirs. Those for the corps of Military Police have been received, and will be presented on parade next week by Sir Daniel Lysons. A Committee, not yet constituted, will shortly assemble at Aldershot to go into the whole question of the Infantry valise equipment, and report on the merits of the new valise equipment, as compared with the old; also, on a number of subsidiary inventions. A pretty general belief exists that the Oliver magazine equipment was not fairly tried in 1879-80. The labour of the Committee which then sat has resulted in a new regulation valise, which this new Committee will be called upon to practically test. Dr. Oliver claims that his equipment is superior to any other, and all that he asked for his invention was a fair trial to demonstrate this. It is contended by not a few that this fair trial it did not get. An opportunity will soon arise for settling this debateable matter, by giving the Oliver equipment another trial.

The following is a list of the candidates for her Majesty's Indian Medical Service who were successful at the competitive examination at Burlington House on the 19th ult. and following days. Twenty-two candidates competed for five appointments, 21 were reported qualified:—J. M. Young, 2,555 marks; G. Jamieson, 2,525; M. A. T. Collie, 2,515; W. H. Quicke, 2,255; A. O. Evans, 2,225.

THE NAVY ESTIMATES.

The Navy Estimates, issued yesterday, show an apparent increase upon the Votes for the current year of £273,099, but this augmentation of expenditure is explained to mean a "net actual increase" of only £129,567, the difference between these two sums representing the amount transferred from the Army Estimates for gun mountings, electrical and torpedo fittings, and for medals to seamen, and the amount included in these Estimates for the expenses of the military operations in Egypt over and above the ordinary expense of the Navy. The gross estimate of the cost of the Naval service for the ensuing year is set down at £11,582,758, against £11,155,909 for 1882-83, giving a gross of £426,849. But the gross cost of the Navy is only £10,757,000, or £825,758 less, this last-mentioned amount being the value of the old-store moneys and extra receipts which last year it was decided should henceforth be appropriated in aid of the Votes. Comparing the appropriations in aid in 1883-84 with those estimated for 1882-3, we find an anticipated increase of £153,750. This is made up chiefly of increases upon two items, viz.,—£77,000 upon the credits to Naval stores, including the proceeds of the sale of ships, and £60,000 upon the credits to the vote for the Transport service, including a contribution of £48,000 from the Egyptian Government towards the maintenance of the Army of Occupation. The total sum which the House of Commons is to be asked to grant, independently of the appropriations in aid, is £10,757,000, against the £10,483,901 voted for 1882-83, exclusive of the £350,000 voted a few nights ago on the Supplementary Estimate, and of £1,400,000 provided for the Naval service in the Vote of Credit for the expenses of the Military operations in Egypt. This sum of £10,757,000 is provided for nominally under 17 votes, but virtually under 19, two of the votes being divided into two sections. Upon 12 of these an increase amounting in the aggregate to £423,382 appears, and seven are more or less reduced, the total of the reductions amounting to £150,283. Dividing the Estimates into the three natural divisions of effective, non-effective, and non-Naval, we arrive at the following result:—The effective votes (1 to 14) show a net increase of £259,448. This is made up of small additions to Vote 1, for wages; Vote 3, for the Admiralty establishments; Vote 4, for the Reserves; Votes 7, 8, and 9, for victualling, medical, and marine establishments; Vote 13, for Naval prisons, law charges, &c.; and Vote 14, for miscellaneous services. Very large additions are proposed to be made on Vote 6 and Vote 10, Section 2, under which provision is made respectively for the cost of labour in the Royal Dockyards, and for machinery and ships built by contract. On the former of these the increase is £109,142, and on the latter £285,447. Large reductions are proposed on the following votes:—Vote 2, for provisions, £58,691; Vote 10 (Section 1), for shipbuilding and repairing materials, £60,000; Vote 11, for new works, buildings, &c., £17,203; while Vote 5, scientific and educational, and Vote 12, for medicines, also show a small diminution. Passing on to the non-effective votes, we find that Vote 15, for half-pay and retired pay to officers, shows a substantial decrease, larger than that presented in last year's estimates; but upon Vote 16, Section 1, for military pensions, the increase is less than hitherto. Altogether, the non-effective votes make a demand for only £1,050 more than last year, whereas last year's estimates for the same services were £7,434 in advance of those for 1881-82. Vote 17, which is the non-Naval, or Army Transport Vote, shows a large increase, amounting to no less a sum than £136,300 against £123,700 voted last year. The entire cost of the Transport Service is given in a note, under Vote 17, as £136,300, and under other votes £122,467; total, £258,767. Reverting to Vote 1, we find that provision is made for 44,850 officers, seamen, and boys of the Navy, and for 12,400 Marines, that is, for 250 officers and men of the Navy fewer than last year. This reduction seems to be distributed over all ranks pretty equally: thus flag officers and their retinues are reduced by five, commissioned officers by 49, subordinate officers by 14, and seamen by 174. Under Vote 4, we find that the Reserves are to be maintained on their present footing, namely, 18,000 men of the Royal Naval Reserve, and 1,750 of the Seamen and Marine Pensioners Reserve, but that only 1,600 of the Royal Naval Artillery Volunteers are provided for, instead of 1,800. Turning to Votes 6 and 10, for the matériel of the Fleet, we find in the former a large addition to the cost of our Dockyards provided for in the shape of increased wages to the artificers, and yet the Admiralty decline to increase the pay of the Naval officer. The programme of Shipbuilding Works in the Home Yards and at Malta estimates for the employment of 1,375 more men at home, and 397 more at Malta, than were shown in the previous year's Estimates. Looking at the statement of new work to be performed at the Dockyards, it would seem probable that the larger proportion of these additional men are to be employed upon repairs, as the new construction provided for falls somewhat short of that promised in last year's programme. During the year it is proposed that the Royal Dockyards shall be occupied on 36 vessels of all classes, including 12 ironclads, 3 corvettes, 4 sloops, 5 steel steam cruisers, 11 composite gun vessels and boats, and 1 paddle-wheel vessel; 15,172 tons are to be built during the year, of which 11,224 are to be armoured and 3,948 unarmoured. In addition to these, private shipbuilders are to turn out 1,982 tons of armoured construction, and 2,270 tons of unarmoured, including 27 torpedo boats. This gives an aggregate of 19,644 tons to be built in the year, against 20,142 in 1882-83, and is certainly not the way for this country to keep pace with other Naval Powers. Under Vote 10, Section 2, for the first time, a sum of £161,905 is taken to provide gun-mounting, hitherto supplied to the Navy by the War Office authorities, and is, we presume, intended to supply machine-guns and mountings to the Fleet. We shall revert to these Estimates on a future occasion.

TORPEDO AND GUNNERY COURSES, 1883.

1. Special full-pay torpedo course, including Whitehead, commences third Wednesday in July, and lasts 66 working days, *i.e.*, 43 for torpedo, 21 for Whitehead, and two for examination, for gunnery and torpedo lieutenants, and lieutenants R.M.A., and a few others. To be borne in Vernon, July 18 to Oct. 17.

2. Special half-pay torpedo course, for senior officers, commencing second Monday in April, and lasts 40 working days, to be followed by a gunnery course for commanders and upwards, which lasts 20 working days. A similar gunnery course will be commenced at other times, whenever five officers are ready to join it. To be borne in Vernon, April 9 to June 1; Excellent or Cambridge, June 4 to June 29.

3. Lieutenants' short courses. (Eight weeks torpedo and three months gunnery.)

To join on the Saturday Before the—	Vernon.		Excellent.

* Officers who entered the Britannia after Dec. 31, 1875, must undergo the course of instruction in pilotage, in accordance with the instructions contained in Circular No. 11 of 1882.

5. Engineer Officers. Four courses, at dates to be arranged, and to last about seven weeks.

THE EGYPTIAN WAR MEDAL.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In your paper, dated March 3, I observe a paragraph,—"Some correspondence has appeared in one of our daily contemporaries that a clasp should be granted for the action at Kassassin," &c. Is it really too much to expect that a clasp should be given for the year "1882, Egypt," for those officers and men who were "under fire," but not at Tel-el-Kebir? Many men and officers were wounded or knocked over with sun and sickness before the decisive action took place. While the Highland Brigade were lying in the Bay of Ismailia for days, waiting to disembark, the Line regiments, Mounted Infantry, Household Cavalry, Royal Marines, and Royal Marine Artillery were bearing the heat and burden of the day, and many a gallant fellow lost his chance of the clasp for Tel-el-Kebir. Surely it is not too late to expect a clasp for Egypt, 1882, for those who were under fire?—I am, &c.,

PER MARE, PER TERRAM.

Preliminary examinations for admission to the Royal Military College will be held in London, Edinburgh, and Dublin on July 11 and 12, and on Aug. 29 and 30, 1883, under the regulations issued with G. O. 113, 1880. No preliminary examination for admission to Sandhurst will take place immediately preceding the "Further Examination" of Dec., 1883.

We (*Irish Times*) regret very much to learn that the health of Major-Gen. Sir Hugh Clifford, K.C.M.G., continues to give great anxiety to his friends, and that there is no prospect of the General being able to return to the active duties of his profession, to which he is devotedly attached.

The directors of the Prudential Assurance Company, Limited, have presented their thirty-fourth annual report, for the year ending Dec. 31, 1882. It contains several features calculated to prove satisfactory to the shareholders. Among others may be mentioned that a further reduction in the rate of expenditure in both branches has been continued during the year, and that the invested funds of the company, including the paid-up capital, now exceed three millions. Also that in the ordinary branch the new business for the year consists of over seven thousand policies, producing a new annual premium income of over £32,000. The annual premium income also shows at the end of the year a very large increase; while the rate of expenditure of the branch is considerably reduced. In the industrial branch, also, there appears a large increase of premium receipts, and a satisfactory reduction in the rate of expenditure. No charges for extension expenses appear in the accounts, inasmuch as the company is now fully represented in every part of the United Kingdom, and there is no necessity to incur any.

Reviews.

Memoirs of the Services of the 64*th Regiment (Second Staffordshire), from* 1758 *to* 1881, by H. G. Purdon. (Allen.)

On January 1, 1836, his Majesty King William IV commanded that an account of the services of every regiment in the British Army should be published under the superintendence and direction of the Adjutant-General. This work was undertaken by Mr. Richard Cannon, and the records of about half the regiments were published in 1853. That gentleman's "Historical Records" does not appear to have given complete satisfaction to the service, but, nevertheless, no effort, excepting McNair's "Colours of the British Army," seems to have been made since then to suppy a want of such great importance, with the exception of those isolated contributions which, from time to time, have issued from the press, and are the work of individual members of the corps whose services are recorded. The time has now arrived when additional importance is lent to this subject. So mischievous has been the "hanky-panky" course pursued by the military authorities under the present system of uniting battalions together which had no previous connection with each other, that regiments seem likely to lose their identity altogether. This seems to have been the *raison d'être* of Mr. Purdon's book, and he can now rest with a satisfied conscience at having not only foreseen the danger, but also at having endeavoured to do good service to "The Second Staffordshire," by rescuing them from what may prove eternal oblivion. The compiler of this record divides it into seven chapters, each of which is devoted to a different subject. He first treats of the formation and first sources of the regiments, then the American War of Independence, next the campaign in the West Indies. The fourth chapter is devoted to the operations in which the regiment was engaged, from 1815 to 1856; then follows the Persian Campaign and the Indian Mutiny, followed by a chapter detailing the services of the regiment from 1861 to 1881. The record all through deserves much commendation for descriptive power and simple statements of facts as they occurred, without any imitation of the inflated style which is so often affected in similar works. The concluding paragraph thus describes the expiring moments of the old regiment:—

> "The regiment was still quartered at Templemore on June 30, the last day of their existence as the 64th, and of the black facings. After muster parade on that date, they were formed into line, and the Colonel addressed the regiment, after which they gave three cheers for the old corps, and next day found themselves the Prince of Wales's North Staffordshire Regiment, with white facings and no number."

Cassell's History of the Franco-German War.—A new edition of this important work is now in course of publication by Messrs. Cassell and Co. It is intended that it shall be completed in twenty-four parts, and embellished with about 500 illustrations and plans of battlefields. With Part 1, there is issued, free of charge, a large presentation plate, representing "The Battle before Belfort," one of the remarkable incidents of the war. The issue of this new edition of a work that has long since become so popular with the multitude will give general satisfaction.

Messrs. Cassell and Co.'s publication, entitled *The History of the Year*, has evidently been prepared with considerable care. It covers the period that has elapsed from Oct. 1, 1881, to Sept. 30, 1882, and affords much useful information.

Messrs. George Routledge and Sons have issued a most attractive edition of Longfellow's *Poems*. It embraces the author's complete copyright edition, occupying 680 pages of large crown octavo, and is illustrated with sixteen page-plates by Sir John Gilbert, R.A. This work affords a striking instance of the progress that is being made in providing cheap literature for the million. Its remarkable feature is that it not only contains every poem printed in any other edition issued in England, but also 125 copyright poems which can only be found in its pages. The price of the volume is 3s. 6d.

An Illustrated Shakespeare Birthday-Book is rather a quaint idea, but it has been carried out by Messrs. Routledge with decided success. The tasty little volume which represents the *Birthday-Book* contains nearly 350 illustrations compiled from Shakespeare's plays and poems. No doubt it will afford much amusement, and even more as a medium for testing the memory and affording pleasing information, particularly to juvenile readers.

We have received a copy of Messrs. Kelly and Co.'s *Handbook to the Titled, Landed, and Official Classes for* 1883. The corrections have been brought down to the end of January, and the volume will, no doubt, be found equal in accuracy to any of its predecessors.

More than 50 years of existence has been enjoyed by *Dod's Parliamentary Companion*, and the number now published contains a complete revision of the whole work. In it the latest alterations in Parliamentary procedure forms an attractive feature; also does the careful record of the great number of Ministerial appointments which have been made during the past year. Altogether, it affords evidence of careful preparation, and seems determined to achieve a century of political existence.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Made simply with boiling water or milk. Sold only in packets labelled—"JAMES

AN UNDOUBTED HARDSHIP.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I was glad to see a letter by "Quid pro Quo," in your paper, on the subject of Half-pay Majors being brought into regiments, as it is a grievance that will act most detrimentally—in these days of enforced retirement—to all the captains and subalterns throughout the regiments concerned, and one that I trust and feel sure the Secretary of State for War will see rectified. If it is necessary to do something for them, let them be given unattached promotion, or put back into their old regiments, which formerly gained a step on their retirement, or let them be kept supernumerary to the establishment until such time as they shall be forced to retire, but do not allow a regiment which has borne the heat and burden of a campaign to suffer. I will take one example of a regiment now serving in Egypt, which one of these half-pay majors was brought into on augmentation. A major of that regiment retired, and, in the ordinary course of events, three captains would have been promoted (two being seconded). Now, the half-pay major takes his place, and no promotion ensues, the consequence being most disastrous to the juniors, for these three captains which ought to have been promoted will not have to retire in seven years, as they otherwise would have done, unless again promoted. Surely it cannot be intended by the Authorities that the officers of this regiment, who gained nothing in the way of promotion by the recent campaign, should actually suffer by it. It is but just, at all times, to give officers the benefit of promotion due to them, and far more so when hardly earned, at the risk of their lives, on the field of battle, and in an unhealthy climate.—I am, &c., FULL JUSTICE.

NAVAL PAY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I have read your admirable leading article on the pay of Naval officers with much interest, and I consider that the thanks of the Navy are due to you for so ably advancing their claims. I trust you will be well supported, as you deserve to be. The fact is that, we have to thank that old skinflint St. Vincent for the way we are treated; his notorious expression, "Keep them poor, and they will serve you well," has never been forgotten. The hardship is the compulsory half-pay to which Naval officers are subjected, and the cruel part of it is, it is not half-pay, but only about a third, quite insufficient to live upon, even without a family to support. A wealthy country like ours ought to be ashamed to treat her faithful servants so shabbily, but until we have some one to represent us in Parliament, we can expect no improvement. The few representatives in the House of Commons are wealthy men, or, at all events, are not dependent on the profession, and consequently do not care to move in the matter. All honour to Lord Belmore, for taking up our case! It is certainly scandalous that Admiralty clerks, &c., who never are a night out of bed, except for their own pleasure, should be paid more than Lieutenants, who are grinding away in all climates. The pay of a Captain in command is, I consider, ample, so I write quite disinterestedly on the subject, being a POST CAPTAIN.

SIR,—All the articles in the *Army and Navy Gazette* of March 3 are well worthy of attention, that on the pay of the Navy is especially so. I can assure you that a dear friend of mine, who is now in command, and who has a large family, says he almost begrudges shoe-leather expended in a walk on shore. Unfortunately, I see but little chance at present of a rise, for the exchequer is pretty low. Your feeling remarks on the navigating line will be appreciated. Can you do anything to induce the Admiralty to allow all commissioned time to count for retired rank, as it does for pay? Some have been seven years acting-master, or in charge of vessels for many, and always on foreign service, and lose the whole of it. Neither do they give us a chance of a step after retirement, as they do executive commanders. Some have over 20 years' service as master in various grades (including flagships), and might as well have retired, so far as rank goes, on promotion. Occasionally, we feel it keenly.—I am, &c., STAFF CAPTAIN.

Rear-Admiral R. V. Hamilton, C.B., completes his command at Queenstown on the 6th prox., and will be succeeded by Rear-Admiral Herbert, who will hoist his flag in the Revenge, the Directorship of Naval Ordnance devolving upon Capt. Codrington, of H.M.S. Excellent.

"We understand," says the *Portsmouth Times*, "that upon the formation of a Flying Squadron early in the approaching financial year, Rear-Admiral Sir M. Culme-Seymour, Bart., will, in all probability, hoist his flag in the Bacchante, on being appointed to the command of the squadron."

The Forth Yacht Club, Granton, N.B., has received the command of her Majesty to style itself "The Royal Forth Yacht Club." The Admiralty have accordingly granted a warrant authorising the Club to wear its distinguishing marks—a crown and Maltese cross, on the blue ensign of her Majesty's Fleet. The R.F.Y.C. has a capital club-house, in its own grounds at Granton, two miles from Edinburgh, and will doubtless continue to be much appreciated by Naval officers stationed in the Firth of Forth.

The monster Italian ironclad Lepanto, constructed in Leghorn, at the docks of MM. Orlando, will be launched on March 12. The King and Queen of Italy will be present at the ceremony.

Orders have been received at Portsmouth for stores and a steaming party to be sent to Pembroke to bring round the Edinburgh, formerly Majestic, turret-ship, for purposes of completion and trial.

The Aldershot Brewery Company, Limited, has been incorporated, with a capital of £60,000, for the purpose of purchasing the freehold brewery and premises established in a central position of the town of Aldershot (close to the South-Western Railway Station), and acquiring the plant,

ARMY NOTES.

All officers, warrant officers, and non-commissioned officers of infantry who have served abroad for a period of eight years, and those who have served at home for a similar period, will in future be permitted to register their names for posting to the home and foreign battalions respectively, and their applications will be favourably considered whenever the exigencies of the service admit of an interchange being offered. This order will apply to warrant officers and non-commissioned officers of the Royal Engineers, serving out of India.

The sword of honour presented by the inhabitants of Cairo to Lord Wolseley has been forwarded to his lordship through the Foreign Office.

The *Irish Times* says:—"The reorganisation of the Egyptian Army, under Major-Gen. Sir Evelyn Wood's command, is being steadily proceeded with, and the details have reached the War Office. The General's staff is to consist of Lieut.-Col. T. Fraser, C.M.G., Royal Engineers, Capt. F. G. Slade, Royal Artillery, Lieut. E. J. Stuart-Wortley, King's Royal Rifle Corps. Lieut.-Col. A. M. Taylor commands the cavalry, being assisted by Brevet-Major H. C. Chermside, C.M.G., Royal Engineers, as second-in-command. The artillery will be under the command of Lieut.-Col. F. Duncan, R.A., the other officers being Capt. Wodehouse and Lieuts. C. S. B. Parsons, R.H.A., H. M. L. Rundle, and Carter, R.A. The infantry brigade will be under Col. F. W. Grenfell, A.D.C., King's Royal Rifle Corps, who will hold the local rank of Brigadier-General."

The annual meeting of the Royal United Service Institution was held in the theatre of the building, Whitehall, on Saturday, the Earl of Morley in the chair. The report showed that forty-three members and 138 annual subscribers—making a total of 181 new members—had joined during the past year. The loss by death amounted to eighty-six, and sixty-six members had withdrawn their names, whilst the names of fifteen had been struck off the list in consequence of the non-payment of their subscriptions, after frequent applications. The increase in numbers was, therefore, fourteen. As to the future locality of the institution, the council were still unable to afford the members any information; nor did they anticipate that any change would take place during the present year. The funded property of the institution on Jan. 1 last amounted to £14,069 1s. 6d. On the motion of Admiral Sir F. Nicholson, seconded by Lieut.-Gen. Sir B. Walker, the report was adopted. The Secretary announced the decision of the referees—Gen. Schomberg, Major-Gen. Cameron, and Major-Gen. H. A. Smyth—on the six essays received in competition for the gold medal, the subject being "The Best System of Field Training applicable to the British Army." The referees reported that the essays had not attained a sufficient standard of excellence to justify them in awarding a gold medal. Votes of thanks were accorded to the referees for their services, and to the Earl of Morley for presiding. The Earl of Morley, in replying, said that Lord Hartington had begged him to assure them how deeply he felt at not being able to be present. Since he last had the honour of occupying the chair, he did not think any great revolutions or reforms had taken place. The question which was then on the paper—namely, the future locality of the institution—was still in the same condition. As regarded the general condition of the society, it was extremely satisfactory. Year by year—he might almost say, day by day—science was becoming more applied to war, both by land and sea, and there could be no question that an institution like that stimulated not merely a desire for information on subjects of mechanical science, but for scientific information applicable to the operations of war generally, and also useful to our services at large. The meeting then terminated.

Col. Webber, C.B., R.E., lectured on the subject of Military Transport, at the Royal United Service Institution on Friday. Gen. Sir A. Herbert presided. Col. Webber first entered into a discussion of experiences of military transport in the actions of British armies beyond our own frontiers. While he commended the energy, intelligence, and devotion of individuals in connection with the transport, he was sparing of commendation in regard to the system as it was seen in work. He entered at length into all the details of the system, presented an account of the organisation of the German transport system, and discussed the question of separating the transport service from the supply service. His proposals, briefly stated, amounted to the complete separation in time of peace of "supply" and "army transport" and the organisation of the latter branch on a purely military footing; the establishment of a school, not only of instruction, but of examination in the subject of army transport, connected with the peace cadres; the most rapid transfer to the reserve of drivers of every man who had been trained and served sufficiently long to take his full share in the training of others; the adoption of waggons on the principles of construction followed in the American buck and army wagons; the distinction between "army transport" in peace and war and "line of communication" or "general transport," and the establishment of a "transport intelligence officer," whose duty would be to be able at a day's notice to guide the authorities straight to all the sources of supply of animals, drivers, and waggons in the world. A discussion followed on the many points raised in the paper.

The following General Order has been issued from the War Office:—"1. His Highness the Khedive of Egypt (authorised by his Imperial Majesty the Sultan of Turkey) having signified his desire to express his approbation of the services rendered by the British Army in suppressing the late rebellion in Egypt by conferring a bronze star on all the troops engaged in this service, her Majesty the Queen has been graciously pleased to notify her assent to the proposal, and the Field-Marshal Commanding-in-Chief has it in command to convey her Majesty's permission that the decoration be accepted and worn in uniform by all officers and soldiers who are entitled to the Egyptian medal, under the provisions of General Order 280 of 1882. 2. Officers who served on the general, divisional, and brigade staff, as also officers who were specially employed, will submit their applications to the Adjutant-General to the Forces, Horse Guards, War Office, stating the nature of the appointment held by them during the campaign, and the address to which the star should be sent. 3. Officers who served as heads of departments will furnish returns of officers and others who served under their command. 4. Officers commanding regiments of cavalry, battalions of infantry, and companies of Commissariat and Transport and Ordnance Store Corps, will forward nominal rolls of officers, warrant officers, non-commissioned officers, and men who served under their command. Officers commanding batteries of Royal Artillery and troops and companies of Royal Engineers will not be required to furnish these rolls, as sufficient information exists in the offices of the Deputy-Adjutants-General Royal Artillery and Royal Engineers to ensure the correct issue of the stars for these services."

"We [*Irish Times*] understand that had Sir Beauchamp Walker vacated the appointment of Director-General of Military Education, the post would have been offered to Lieut.-Gen. Sir E. B. Hamley, K.C.B., in recognition of his services in Egypt; but a certain article in a magazine had the effect of turning the tables against the author of the well-known operations of war, and it is feared in military circles that his chances of obtaining anything good from the present Government are very remote."

It is stated that definite orders have been given regarding the scale of allowances to be paid to the officers and men of the Indian Division, Egypt Expeditionary Force, who lately visited England; and that accordingly (1), British officers will receive their full Indian pay and allowances, with full staff salaries, for the whole period; (2), the Native officers and men full pay, together with staff pay of any regimental appointments they may have held, such as subadar-major, adjutant, kote duffadar, pay havildar, &c.; also field batta for the whole period of their absence, and until the date they rejoined their corps; (3), officers and non-commissioned officers (British as well as native) who may have acted for the absentees *pro tem.*, will be granted the usual acting allowances; and (4), such advances of pay as may have been made to the party in England will be recovered at the official rate of exchange for the year.

There are 197 captains in the Staff Corps, and 261 lieutenants actually admitted, with 134 on probation; total subalterns, 395, a marked and gratifying increase on the numbers of recent years. It is, of course, useless to deny that Bengal is the favourite Presidency with young officers, and very naturally so. There is more chance of seeing service in the Bengal Army than in that of either Bombay or Madras, and rightly or wrongly, it is an article of faith with subalterns that most of the plums in the military pudding are given away in Bengal.

The Government of India have sanctioned the formation of two regiments of Pioneers in the Madras Army.

It is stated that the Government has under consideration the abolition of batta to native regiments, and the grant of a commuted allowance as an addition to pay, with free carriage on the march.

Owing to the great advantages which it is felt would result from the adoption of machine guns for land service and the protection of hill stations and fortresses in India, pressure is, the *Irish Times* hears, about to be brought to bear on the local military authorities in India, to induce them to submit the subject to the consideration of an independent committee, it being felt that owing to professional bias, the subject has not received the notice which its importance demands.

Under instructions from Government, all soldiers of the British Service under sentence of discharge with ignominy are to be removed to England in sufficient time to allow of their discharge being carried out before the expiration of their terms of imprisonment.

The provisions of the order regulating the tenure of commands in the Native Armies of India are extended to the corps of Sappers and Miners in the three Presidencies. Present incumbents coming under the operation of the rule are to be allowed to hold their commands for one year from Dec. 22, 1882.

There is said to be no truth in the statement that the Commander-Chief in India contemplates interfering, under any circumstances, with the wholesome rule limiting the tenure of command of native regiments to seven years. On the only occasion on which an officer sought to have the rule suspended in his favour, he is said to have been snubbed in reply.

The *Times* says:—"An intimation was received at Chatham Garrison on Tuesday that Major-Gen. the Hon. R. Monck had been appointed to the command of the Chatham District, which has been vacant since Major-Gen. Sir E. Wood proceeded to Egypt. It is understood that Chatham will only be retained as a separate command for another year, after which it will be divided and connected with the South-Eastern and Woolwich districts."

A brace of pistols, of excellent Egyptian workmanship, have been forwarded, through the Foreign Office, for presentation to Major-Gen. Sir D. C. Drury-Lowe, K.C.B., by the inhabitants of Cairo.

The *Irish Times* says:—"The General officers promoted for distinguished service in Egypt—viz., Gen. Lord Wolseley, Lieut.-Gen. Sir A. Alison, and Major the Hon. Sir J. C. Dormer—are to continue as supernumerary to the fixed establishment, until the officers receive promotion who would have stood next junior to them on the establishment of the present rank, if they had to wait their promotion in the ordinary course."

The *Morning Post* says:—"The question of the wearing of decorations has been so far decided by the issue of an intimation from the Horse Guards which states that, while it is not in the province of his Royal Highness the Commander-in-Chief to issue any orders with respect to officers when they appear in society as private gentlemen, there is no objection to their wearing miniature decorations at dinners or evening parties."

The band of the Corps of Commissionaires will perform this afternoon between the hours of 3 and 10 p.m. at Humphry's Hall, Knightsbridge, in aid of the Egyptian War Fund.

Tuesday's Gazette.

◆

ARMY.

WAR OFFICE, Pall Mall, March 6, 1883.

2nd Dragoon Guards—Capt. B. Relf is placed on retired pay, with the hon. rank of Major.

8th Hussars—Lieut. G. H. L. Buchanan, from the 5th Dragoon Guards, to be Lieut., vice P. L. Clowes, promoted.

12th Lancers—Capt. G. H. Dean has been seconded for service on the Staff (Jan. 1).

19th Hussars—Capt. W. P. Warner resigns his commission.

Royal Artillery.

Lieut.-Cols. and Cols. D. J. McGrigor (late Madras), to be Col., vice W. D'O. Kerrich (late Madras), promoted Major-Gen. (Jan. 19); E. Maitland, from the Seconded List, to be Col., vice R. J. Hay, placed upon the Unemployed Full-Pay List (Feb. 20); Major and Brevet Lieut.-Col. A. M. Rawlins (late Madras), to be Lieut.-Col., vice D. J. McGrigor (late Madras), promoted (Jan. 19): Capt. A. W. Ferrier to be Major, vice Brevet Lieut.-Col. A. M. Rawlins (late Madras) (Feb. 14); Capt. and Brevet Major F. L. Graves to be Major upon the Seconded List (Feb. 28); Capt. G. S. Parry to be Major, vice C. Morley, placed upon the Seconded List (Feb. 28).

The under-mentioned Lieuts. to be Capts.:—A. H. W. Brett, vice H. G. Newcome, seconded for service on the Staff; F. L. Cunliffe, vice A. W. Ferrier, promoted (both dated Feb. 14); T. E. Rowan, vice E. M. Flint, seconded for service as an Adjt. of Auxiliary Forces (Feb. 16); J. W. M. Newton, vice E. C. Trollope, retired; W. H. E. Dobie, upon the Seconded List; C. M. Haggard, vice G. S. Parry, promoted (all three dated Feb. 28).

Lieut. H. B. Brownlow to be Lieut. upon the Seconded List, for service with the Punjab Frontier Force.

The under-mentioned Gentlemen Cadets from the Royal Military (both dated Feb. 14); Charles Frederick Leudy, vice F. E. Rowan, Academy to be Lieuts.:—David Finlay Hosken Logan, vice A. H. W. Brett, promoted; Henry Minchin Ferrar, vice F. L. Cunliffe, promoted promoted (Feb. 16); Hugh Kennedy, vice J. W. M. Newton, promoted; Charles Noel Lyall, vice C. M. Haggard, promoted; Francis Arthur Randolph, vice W. M. Thomas, resigned (all three dated Feb. 28); Charles William Tyler, vice H. B. Brownlow, seconded.

The dates of promotion of the under-mentioned officers are altered as stated against their names:—Major F. B. Knox (Jan. 19); Major S. C. Pratt (Jan. 24); Major W. H. F. Sorell (Jan. 24); Capt. S. D. Rainsford (Dec. 31, 1882); Capt. S. C. Hickman (Jan. 24).

The date upon which Capt. W. L. Davidson was absorbed from the Seconded List is altered to Jan. 19.

Grenadier Guards—Capt. and Lieut.-Col. L. J. Oliphant to be Major, vice Lieut.-Col. R. T. Thynne, seconded for service on the Staff; Lieut. and Capt. H. E. Colvile to be Capt. and Lieut.-Col, vice L. J. Oliphant (both dated Nov. 1, 1882).

Scots Guards—Lieuts. R. Cutlar-Fergusson has been seconded for service on the Staff (Jan. 31); J. F. Erskine, from the Dorsetshire Regt, to be Lieut., vice R. Cutlar-Fergusson.

Line Battalions.

The Lincolnshire Regiment—Capt. H. C. S. Goldfrap has been seconded for service as an Adjt. of Auxiliary Forces (Feb. 16).

The Suffolk Regiment—Lieut. C. Kennedy, Adjt., to be Capt., to complete establishment (Sept. 7, 1882).

The Leicestershire Regiment—Capt. H. C. Michel retires on retired pay, with the hon. rank of Major; Lieut. H. Cowper has been appointed a probationer for the S.C. (Feb. 5).

The Cheshire Regiment—Lieut.-Col. E. A. Carey has been appointed to command a batn.; Majors F. W. B. Parry to be Lieut.-Col., vice Col. A. E. Watson, retired; Capt. R. A. Blane to be Major, vice F. W. B. Parry.

The South Wales Borderers—Lieut. H. Dolben is placed temporarily on the Half-Pay List, on account of ill-health.

The Cameronians (Scottish Rifles)—Capt. J. de W. Jebb to be Major, vice J. R. Mecham, seconded for service as an Adjt. of Auxiliary Forces; Lieut. E. Cooke to be Capt., vice J. de W. Jebb (both dated Jan. 24).

The Worcestershire Regiment—Lieut. M. D. Holwell, Adjt., to be Capt., vice J. L. Rose, promoted (Dec. 19, 1882).

The Border Regiment—Capt. E. L. S. Charlton, about to be appointed to the Militia, retires on half-pay.

The Duke of Cambridge's Own (Middlesex Regiment)—Major H. F. Morewood has been placed on retired pay, with the hon. rank of Lieut.-Col. (Feb. 28).

The King's Royal Rifle Corps—Capts. and Brevet Majors J. N. Blackwood-Price to be Major, vice H. P. M. Wylie, seconded for service as an Adjt. of Auxiliary Forces (Oct. 21, 1882); C. H. Smith to be Major, vice H. A. H. Ward, whose promotion has been cancelled; Capt. H. S. Marsham to be Major, vice J. T. D. Talbot-Crosbie, retired (both dated Dec. 20, 1882).

The Duke of Edinburgh's (Wiltshire Regiment)—Major F. L. Story has been seconded for service on the Staff (Oct. 25, 1881). The promotions to the ranks of Major and Capt. respectively of Capt. C. H. S. Kennedy and Lieut. H. W. Rowden are antedated to Oct. 25, 1881, in succession to Major F. L. Story.

The York and Lancaster Regiment—Lieut.-Col. W. Byam has been appointed to command a batn. Major and Col. G. B. Wolseley, Aide-de-Camp to the Queen, to be Lieut.-Col., vice Col. L. S. Warren, placed on half-pay (both dated Feb. 16).

The Rifle Brigade (The Prince Consort's Own)—Major A. R. Hopwood retires from the service, receiving a gratuity.

The Prince of Wales's Leinster Regiment (Royal Canadians)—Capts. A. C. E. Kaye (Nov. 18, 1882) and F. J. Kempster (Jan. 14) have been seconded as probationers for the S.C. Lieut. H. Bedford is superseded for absence without leave.

1st West India Regiment—Lieuts. C. H. M. Hitchins and R. Errington have been appointed probationers for the S.C. (both dated Feb. 5); Lieut. C. H. Saunders, from the 2nd West India Regt., to be Lieut., vice C. H. M. Hitchins; Gent. Cadet Frederick Margaretus Gray, from the Royal Military College, to be Lieut., vice R. Errington.

2nd West India Regiment—Gent. Cadet Stephen Walter, from the Royal Military College, to be Lieut., vice C. H. Saunders, transferred to the 1st West India Regt.

Staff.

Major-Gen. the Hon. R. Monck to be a Brigdr.-Gen. on the Staff, to command the troops in the Chatham District, vice Major-Gen. Sir H. E. Wood, V.C., G.C.M.G., K.C.B., who has vacated that appointment.

Col. G. C. Henry, R.A., to be a Col. on the Staff, to command the Royal Artillery in the Southern District, vice Col. R. J. Hay, R A., who has vacated that appointment (Feb. 20).

Commissariat and Transport Staff—Qrmrs. F. Battersby and W. J. Barrell to have the hon. rank of Capt., in recognition of their services during the recent campaign in Egypt.

Medical Department—Surg.-Gen. J. S. Furlong, M.D., has been granted retired pay (Feb. 6); Surgs.-Major J. Mackay, M.D., has been granted retired pay, with the hon. rank of Brigade-Surg. (Feb. 18); L. A. White has been granted retired pay, with the hon. rank of Brigade-Surg. (Feb. 11).

Army Hospital Corps—Capt. of Orderlies and Hon. Capt. D. Pringle has been placed on retired pay on reduction of establishment, with the hon. rank of Major; Lieut. of Orderlies D. O'Connor to be Qrmr. (dated July 1, 1881, such antedate not to carry back pay as Qrmr. prior to Feb. 6).

Veterinary Department—Vet.-Surg. J. W. Evans to be Vet.-Surg. 1st Class (Feb. 15).

Memoranda.

Major-Gen. W. H. B. de Horsey has been placed on retired pay, with the hon. rank of Lieut.-Gen. (Feb. 13).

Col. W. D'Oyly Kerrich, Royal (late Madras) Artillery, to be Major-Gen., in succession to Major-Gen. A. H. Dawson, Royal (late Madras) Artillery, retired (Jan. 19).

Lieut.-Col. F. Ley, retired R.M.L.I., to have the hon. rank of Col. (Jan. 25).

Capt. E. L. S. Charlton, half-pay, is placed on the Retired List, subject to the limitations of Article 87 of the Royal Warrant of March 11, 1882.

Qrmr., with the hon. and relative rank of Capt., W. E. Turnley, 3rd Batn. the Royal Scots (Lothian Regt.), retires on retired pay, with the hon. rank of Major.

Qrmr., with the hon. and relative rank of Capt., A. Boulger, V.C., the York and Lancaster Regt., to have the hon. rank of Major, in recognition of his services during the recent campaign in Egypt.

Qrmr., with the hon. rank of Capt., R. H. Murdoch, R.A., to have the relative rank of Capt. (Feb. 19).

Indian Local Service.

Lieut.-Gen. J. G. Halliday, Madras Infantry, has been transferred to the Unemployed Supernumerary List (Jan. 8).

Reserve of Officers.

Capt. W. Barnett resigns his commission. R. A. B. French-Brewster, Esq., late Lieut. 1st Dragoon Guards, to be Lieut.

MILITIA.

WAR OFFICE, Pall Mall, March 6, 1883.

Royal Artillery.

4th Brigade, Northern Division—Henry Heywood Heywood-Lonsdale, gent., to be Lieut.

3rd Brigade, Scottish Division—Lieut.-Col. and Hon. Col. A. Moncrieff, C.B., resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

4th Brigade, North Irish Division—The services of Lieut. R. B. Sparrow are dispensed with.

2nd Brigade, South Irish Division—Major and Hon. Lieut.-Col. F. H. Warren to be Lieut.-Col., vice P. Duncan, resigned (Jan. 31).

Infantry.

3rd Battalion, the Royal Scots (Lothian Regiment)—Lieut. C. F. Drummond resigns his commission.

3rd Battalion, the Queen's Own (Royal West Surrey Regiment)—The resignation of Capt. the Hon. S. Hylton-Jolliffe is antedated to May 11, 1882.

4th Battalion, the Buffs (East Kent Regiment)—The under-mentioned Lieuts. resign their commissions:—F. H. F. Walker, G. M'L. Bigoe-Williams.

3rd Battalion, the Royal Warwickshire Regiment—James Douglas Stoddart Douglas Archer, gent., to be Lieut.

3rd Battalion, the Norfolk Regiment—Lieut. Sir K. H. Kemp, Bart., to be Capt.

3rd Battalion, the Lincolnshire Regiment—Lieut. B. C. Garfit to be Capt.

4th Battalion, the Devonshire Regiment — John Mainwaring Uniacke, gent., to be Lieut.

3rd Battalion, the Suffolk Regiment—Lieut. J. K. Aitken resigns his commission; Alexander George William Tod, gent., to be Lieut.

3rd Battalion, the Prince Albert's (Somersetshire Light Infantry) —Edward Hopton Swayne, gent., to be Lieut.

4th Battalion, the Prince Albert's (Somersetshire Light Infantry)—G. G. W. Hayward. Esq, late Lieut., 1st Batn., to be Capt. (Jan. 24).

3rd Battalion, the Prince of Wales's Own (West Yorkshire Regiment)—Lieut. C. G. Smyth resigns his commission; Herbert Acheson Moore, gent., to be Lieut.

4th Battalion, the Prince of Wales's Own (West Yorkshire Regiment)—Lieut. H. Blackett resigns his commission.

3rd Battalion, the Bedfordshire Regiment—Cleveland Edmund Greenway, gent., to be Lieut.

4th Battalion, the Royal Irish Regiment—Lieut. C. A. Fry resigns his commission.

4th Battalion, the Cheshire Regiment—Capt. and Hon. Major J. Knox resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

3rd Battalion, the Gloucestershire Regiment—Henry John Cleaveland, gent., to be Lieut. (Feb. 20).

3rd Battalion, the Prince of Wales's Volunteers (South Lancashire Regiment)—Lieut. H. G. Powers resigns his commission.

3rd Battalion, the Loyal North Lancashire Regiment—John Hargreaves, jun., gent., to be Lieut.

4th Battalion, the Loyal North Lancashire Regiment—Lieut. F. J. P. Gibson resigns his commission.

4th Battalion, Queen's Own (Royal West Kent Regiment)—William Nepean Peareth, gent., to be Lieut.

3rd Battalion, the Prince of Wales's (North Staffordshire Regiment)—Capt. H. W. Holmes resigns his commission.

3rd Battalion, the York and Lancaster Regiment—Lieut. F. H. H. de C. Reade resigns his commission.

3rd Battalion, the Highland Light Infantry—Francis Myles Sandys-Lumsdaine, gent., to be Lieut.

3rd Battalion, the Royal Irish Rifles—Archibald James Leofrick, Viscount Clandeboye, to be Lieut.

5th Battalion, the Rifle Brigade (the Prince Consort's Own)—Capt. B. V. Shaw resigns his commission.

YEOMANRY CAVALRY.

WAR OFFICE, Pall Mall, March 6, 1883.

Derbyshire—Q. D. Hume, Esq., late Capt. Antrim Militia, to be Lieut. (supernumerary).

Royal 1st Devon—E. F. John, Viscount Exmouth, late Lieut. 4th Batn. the Devonshire Regt., to be Lieut.

Lancashire Hussars—Humphrey Francis de Trafford, gent., to be Lieut. (supernumerary).

Leicestershire—C. Smith, Esq, late Capt. 1st Dragoons, to be Capt. (Feb. 13).

Shropshire—Lieut.-Col. C. G. Wingfield is granted the hon. rank of Col.

Worcestershire—Lieut. F. J. A. Wood resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the regt. on his retirement.

1st West York—Capt. A. A. C. Nelson, 5th Dragoon Guards, to be Adjt., in succession to J. C. Kinchant, promoted Lieut.-Col. in the 11th Hussars (Feb, 22).

VOLUNTEERS.

WAR OFFICE, Pall Mall, March 6, 1883.

Artillery.

1st Ayrshire and Galloway—The under-mentioned Capts. resign their commissions:—A. Guthrie and W. M'Gibbon.

1st Banff—William Fergusson, gent., M.D, to be Surg.

1st Devonshire—Capt. W. A. Gillow resigns his commission.

1st Fifeshire—Capt. J. W. Johnston to be Major.

1st Northumberland and Sunderland—The services of Lieut. H. Scott-Russell are dispensed with.

1st West Riding of Yorkshire—Ernest Frederic Taylor, gent., to be Lieut.

Engineer.

1st Gloucestershire—The under-mentioned gentlemen to be Lieuts: —Alfred de Courcy Lyons, M.B., and James William Helps.

2nd Gloucestershire (the Bristol)—The under-mentioned officers resign their Commissions:—Lieut. F. G. Newbolt, and Qrmr. R. Cripps.

1st Lanarkshire—David Laidlaw, jun., gent., to be Lieut.

Rifle.

3rd Aberdeenshire (the Buchan)—John Edington Park, gent., to be Lieut.

2nd Cheshire (Earl of Chester's)—Lieut. C. Gamon resigns his commission; William Thorne, gent., to be Lieut.

1st Cumberland—The under-mentioned Lieuts. to be Capts.:—J. Mitchell, and J. Ostell, jun.

2nd Devonshire (Prince of Wales's)—The Rev. J. W. Neligan, B.A., to be Lieut. (supernumerary).

3rd Glamorgan—The under-mentioned officers resign their commissions:—Capt. F. C. Williams; Lieuts. W. J. Rayner, J. Roberts, and J. H. W. Edmond.

1st Gloucestershire (City of Bristol)—William John Sympson Whitty, gent., to be Lieut.

1st Herefordshire—John William Hinings, gent., to be Acting Surg.

1st Isle of Wight—Acting Surg. J. G. S. Coghill resigns his appointment.

1st Volunteer Battalion, the Queen's Own (Royal West Kent Regiment)—Reginald Henry Bartram, gent., to be Lieut. (supernumerary).

2nd (East) Kent—Lieut. A. B. Burrows to be Capt.

1st Lanarkshire—The under-mentioned gentlemen to be Lieutenants (supernumerary):—James Headridge M'Ewan and Peter Lang Scott.

2nd Lanarkshire—Lieut. R. S. Paterson resigns his commission.

4th Lanarkshire (Glasgow 1st Northern)—David M'Cowan, jun., gent., to be Lieut.

4th Lancashire—Capt. G. W. Nelson resigns his commission.

1st Volunteer Battalion, the Lancashire Fusiliers—James Isherwood, gent., to be Lieut. (supernumerary).

4th Middlesex (West London)—Lieut. A. J. Hopkins to be Capt.

13th Middlesex (Queen's, Westminster)—Cornelius Graham Shaw, gent., to be Lieut. (supernumerary).

14th Middlesex (Inns of Court)—Lieut. W. H. Macnamara resigns his commission.

15th Middlesex (the Customs and the Docks)—Lieut. W. F. French to be Capt.

17th (North) Middlesex—Hon. Major and Adjt. E. Mills resigns his commission, and is placed on a retired allowance; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement (March 1).

20th Middlesex (Artists')—William Goldsmith, gent., to be Lieut. (supernumerary).

21st Middlesex (the Finsbury)—William Denton, gent., to be Lieut.

2nd Monmouthshire—The under-mentioned Lieuts. resign their commissions:—J. W. Green and T. D. Gill.

1st Pembrokeshire—Major (Hon. Lieut.-Col.) W. P. L. Lewes resigns his commission.

1st Ross-shire (Ross Highland)—Capt. P. J. Dewar resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

4th Staffordshire—The under-mentioned Lieuts. to be Capts.:—C. W. Graham and E. Hickman.

1st Stirlingshire—Capt. H. Hume resigns his commission.

5th Surrey—Capt. J. T. Nightingale to be Major.

1st Sutherland (Highland)—Lieut. J. Waters resigns his commission.

1st Volunteer Battalion, the Royal Warwickshire Regiment—Lieut. S. I. Whitfield resigns his commission.

1st West Riding of Yorkshire—Capt. R. B. Parker resigns his commission.

3rd West Riding of Yorkshire—Henry Ridley Cranmer Latimer, gent., to be Qrmr.

(Where not otherwise specified, the foregoing commissions and announcements bear date March 7, and the current year must be understood.)

Amusements.

◆

With this week has terminated the career of the elaborately-illustrated Drury-Lane annual of "Sindbad," Mr. Augustus Harris being enforced to withdraw the pantomime to permit the requisite rehearsals taking place of the novelties to be introduced by Mr. Carl Rosa during his ensuing English-opera season, commencing at Easter. The operatic term is limited to thirty nights.

At a morning performance at Toole's Theatre last Saturday, the merry farce, by Maddison Morton, called "My Wife's Second Floor," was advantageously revived. Mr. J. L. Toole, who now plays the hard-worked domestic, Jacob Close, sang for the first time in London the once famous dolorous ditty, "Villikins and his Dinah," with which Robson in 1853 was wont to delight Olympic audiences. Mr. Toole, who naturally is endowed with much of the Robsonian talent, elicited considerable laughter, and was admirably supported by Miss M. Linden, Mr. E. Garden, and Mr. John Billington.

On Wednesday a morning performance at the Gaiety was associated with the benefit of that mirthful comedian, Mr. W. J. Hill, who is about to leave London on a provincial tour. Mr. W. J. Hill appeared in his amusing impersonation of Beethoven Brown in the musical, farcical eccentricity called "Crazed," and the programme was aided by Mr. Lionel Brough, Mr. Edward Terry, Mr. Charles Warner, Mr. Harry Paulton, and Mr. F. Celli.

Arrangements have been made with the Royal Italian Opera Company to continue the Promenade Concerts in the autumn. It is understood that Covent Garden Theatre and the Floral Hall have been leased for this purpose to Mr. W. F. Thomas, the late lessee, for the term of three years.

Mr. Pinero's new four-act play will be produced at the Court Theatre on the Saturday preceding Easter Monday, the cast including Miss Marion Terry, Miss Kate Rorke, and Messrs. John Clayton, Arthur Cecil, Mackintosh, Kemble, Elwood, and Philip Day.

On Thursday, Mr. Walter Frith's adopted drama of "Ensnared" was produced at the Gaiety, and Mr. Calmour's comedy, entitled, "Wives," was brought out at the Vaudeville, both morning performances being tentative representations of an encouraging kind.

For the benefit of the Royal General Theatrical Fund, a performance will take place on Tuesday afternoon at Drury Lane Theatre, kindly granted for the occasion by Mr. Augustus Harris. A very attractive programme has been arranged.

Mr. F. C. Leader will open Her Majesty's Theatre on Monday, March 26, with an operatic spectacular entertainment, in which the ballet will be made a prominent feature. It is confidently hoped by the new lessee that he can keep this large establishment open all the year round.

Mr. John S. Clarke will probably remove "The Comedy of Errors" from the Strand to the Globe Theatre on Easter Monday.

Messrs. T. W. Robertson and H. Bruce will commence their London season at Toole's Theatre on July 28, with a revival of the late T. W. Robertson's comedy of "M.P.," in which Mr. Macklin will play the part formerly acted by Mr. Bancroft.

A lively little piece, called "The Mountain Heiress," written by Mr. Gilbert A'Beckett, and associated with some tuneful music composed by Mr. Lionel Benson, was introduced on Wednesday evening as the first portion of Mr. and Mrs. German Reed's entertainment. Miss Fanny Holland, Miss Marian Wardroper, Mr. Corney Grain, Mr. North Home, and Mr. Alfred Reed effectively sustain the characters developing a slight but amusing story. Mr. Corney Grain's new musical sketch, entitled "Our Mess," will be given for the first time on Easter Monday.

"SPECTACLES: their USE and ABUSE," a Pamphlet by Henry Laurance, F.S.S., Oculist Optician, should be read by all suffering from weak and defective vision; valuable and special instructions are given to those using and requiring Spectacles. It shows how sight is seriously injured by the indiscriminate purchase of Spectacles without regard to their proper adaptation, and traces more cases of blindness and defective vision from this than any other cause. Sent post free. Mr. Henry Laurance, F.S.S., Oculist Optician, personally adapts his Improved Spectacles at his residence, 3 Endsleigh Gardens, Euston Square, daily (Saturdays excepted), 10 to 4. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but your spectacles suit me admirably. The clearness of your glasses as compared with others is really surprising." Dr. Bird, Chelmsford, late Surgeon-Major W.E.M., writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age, 82. I can now read the smallest print, although suffering from cataract on the right eye." Similar testimonials from Ven. Archdeacon Palmer, Clifton; the Rev. Tidd Pratt, Bracknell, Berks; Rev. O. Thorpe, Peckham; Rev. Mother Abbess, Mill Hill, Hendon; Lieut.-Gen. Macmullen, Brentwood, &c.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—Saturday, March 10, 1883. Letters on business and Remittances should be made to Mr. Richard James Wood.

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE Army Estimates were brought forward "in Supply" on Monday evening, when Lord Hartington made what may be considered his *début* as Secretary of State for War. His lordship's statement was eminently businesslike, and showed that notwithstanding his recent assumption of the "portfolio of the War Office," he has already mastered his subject, and does not intend to spend his time idly. He started by apologising to the House for the want of novelty which the new estimates presented, attributing the absence of change to the fact that the strain caused by the late Campaign in Egypt had induced the officials of his Department to seek rest during the recess, instead of devoting themselves to the work of maturing schemes for the further reform of the services placed under their charge. On this point, apology was scarcely necessary, for after the experience of the last twelve years, the Army and the country will be very pleased to have rest too. Proceeding to examine the several votes, his lordship explained that the only increase of any magnitude was under the head of Commissariat and Transport, due to a decision which had been arrived at to add to the *cadre* of the Transport Branch of the Commissariat six additional companies. To this decision no one can object, seeing how seriously the transport difficulty operated for some time in Egypt to prevent the onward progress of the main body of the Expedition from Ismailia. It is intended, in the first instance, to expend the additional money placed at the disposal of the War Office by increasing the establishment of the Transport Corps; but Lord Hartington has not yet committed himself to any definite course of action, for he intimated that a Committee is to be assembled to go into the question of regimental transport, and upon the report of that body it will be determined whether or not it is desirable to adopt the idea of those who wish to see the regiment made a more independent unit than it is at present. The announcement with regard to the Pay and Veterinary Departments is a satisfactory one. There is no doubt that much requires to be done to improve the prospects of the *personnel* of these two Departments. His lordship went on to speak on the subject of recruiting and the organisation of the Army. It cannot be said, however, that this part of his statement was as encouraging as it might have been. Opinions differ considerably as to the advantages of our existing system. There are some who hold that short service is operating to the advantage of the service. Many, on the other hand, contend that the effect of the system is to ruin the efficiency of the Army. Referring to the question of recruiting, his lordship admitted that the waste was considerable, but there are, he thinks, signs of improvement. We confess we do not know on what grounds this assurance is based. That recruiting was bad last year Lord Hartington attributed in some degree to the revival of trade, but still more to the standard of age being raised. However, the medical inspectors are in future to be allowed a wider latitude in passing men. As to the Reserves, we are told that the arrangement worked well during the late war in Egypt, and next year the numbers would reach 31,000 men. We may, therefore, calculate on having an increasing and efficient Reserve in any emergency in which protracted operations may be necessary,—*i.e.*, if all goes well, as it is presumed it will. Our system of military organisation, Lord Hartington argued, was subjected to a practical though not severe test in the Egyptian Campaign, which has enabled us to see that the system works easily and efficiently, and that there is no reason to be dissatisfied with late changes. These are the opinions of the framers of that system. Those who have had experience at home and abroad do not take an equally bright view of the situation, as our readers are aware. The Secretary of State for War gives great credit to his administration for having been able to send battalions to Egypt at a strength of 800 men, with only a small proportion of Reserve men in the ranks. But he forgets that the expedition sent out only consisted of one Army Corps. A country which cannot put such a force in the field without straining its organisation, must be in a bad state indeed. We congratulate the War Minster on the measures he is adopting to meet the wants of the wives and families of men employed on active service, and the orphans and children of men who have lost their lives on service. The treatment which the wives and families of soldiers have hitherto received has undoubtedly been a great blot on our military system and a lasting disgrace to the country, and any liberality in this direction will be approved by the most rigid economist. The scheme drawn up for meeting the serious difficulty caused by the periodical despatch of large drafts to India has been well thought out, and ought to secure the smoother working of the whole Military machine. The depletion of the home battalions year after year of almost all their duty men, in order to fill up gaps created in the foreign-service battalions, has naturally created great heart-burning among officers and non-commissioned officers, and has, besides, had the effect of rendering the home battalions unfit in many cases to carry out the duties required of them. "It cannot be denied," Lord Hartington remarks, "that at the present time the strain upon an Army whose organisation is now primarily directed to the formation of an efficient Army Reserve is somewhat severe." It is not only "somewhat," but very severe, and unless means are found for removing the serious defects incidental to such an arrangement, the time will surely come when the eyes of those in office will suddenly become opened to the fact that the regimental officers who have raised their voices so persistently, and shown the folly of the present system, were justified in regarding with disfavour changes the immediate effect of which has been to crush all the vitality out of the first line, whilst seeking to establish a second line of defence. Lord Hartington sees the force of the arguments raised by those who have to bear the heat and burden of the day as regimental officers at home stations, and has devised means for overcoming the difficulty. He says :—

> "Last year, the lowest establishment voted was 450 rank and file; but by sending out a draft to India, the establishment was frequently reduced much below that figure. The result has been that the average establishment of a battalion has been frequently very much below the establishment voted by Parliament. The only way to obviate this defect is to allow a corresponding excess for some months before the draft is sent out. It was not considered right to exceed the numbers voted by Parliament, even temporarily, and therefore the proposal is now made to increase the establishment to 520 rank and file. Recruiting will be permitted up to that number for a certain number of months before the drafts are sent out. When the drafts are sent out the numbers will fall a corresponding amount below the establishment, and the average establishment will thus remain the same as it was last year voted by Parliament,—namely, 450. No additional cost will be entailed by this proposal."

The part of the War Minister's statement which will be read with most eagerness will be that in which he refers to the long-talked-of reorganisation of the Cavalry. Here, again, it is advisable, perhaps, that we should quote his own words :—

> "It is necessary that I should now refer to the arrangements for Cavalry organisation, and for providing drafts for regiments in India. Last year papers were laid upon the table of the House containing a scheme which had been prepared by a Committee appointed by the War Office. Considerable objections were entertained to the proposal of General Wardlaw's Committee, and a considerable number of other schemes of organisation have been put forward. It had been thought better, therefore, to postpone for a time the adoption of any large system of reorganisation of the Cavalry, and to adopt a plan which will enable us to meet the present necessity of finding drafts for the Cavalry in India. The plan is this :—All recruits will be enlisted at the depôt for cavalry regiments in India generally, and they will be posted to such regiments as require them, care being taken to appoint them as far as possible to regiments of their own selection. Under the present system, the depôt is encumbered with a number of men invalided from India. This will be no longer allowed, but all men found unfit on arrival will be immediately discharged with usual pensions, while those considered fit for further service will be passed to the Reserve. By this means the cavalry depôt will only have on its strength the permanent training staff and the recruits, and although the permitted establishment will be exceeded by 90 during a certain portion of the year before drafts are sent to India, a corresponding diminution will take place after the drafts have been sent. In other words, care will be taken that the number of cavalry at home voted by Parliament is not exceeded. It is hoped that in this way the drafts required for India annually will be furnished without seriously interfering in any way with our existing cavalry organisation. If experience shows us this can be done, the difficulties experienced when the Army was sent last year to Egypt can in future be surmounted by sending regiments into the field with three, instead of four squadrons. The cavalry brigades would then consist of four, instead of three regiments each."

The authorities are to be commended on having yielded to the wishes of Militia commanding officers in the matter of the preliminary drill of recruits. In theory, it was, no doubt, a good thing to send a man at once to his depôt to be drilled on enrolment; but seeing that it has tended to unpopularise the Militia with the classes who furnish the bulk of the rank and file, a new order is to be issued, by which a Militiaman will have the option of doing his drills at once on joining, or putting them off until just before the annual training. Of the Volunteers, nothing but good can be said. The force continues to make steady progress, and the results of the examination in tactics instituted last year has more than come up to the most sanguine anticipations of the Military authorities. It is very creditable to the officers of the Volunteers as a body that they should have displayed so commendable a desire to increase their usefulness, and the zeal they have shown will, no doubt, have its effect in obtaining for them further concessions hereafter. No information can yet be given as to the Report of Lord Morley's Committee on Army Medical organisation. The House was informed by Lord Hartington that the Committee had concluded its labours, but its Report is not yet completed. The announcement that it is determined to publish the Report of Sir D. Lysons' Committee on the musketry instruction of the Army, which has hitherto been withheld, will give infinite satisfaction, as will also the promise which his lordship was able to make with regard to one of the recommendations of that Committee, viz., that an increase should be made at the rate of 50 per cent. on the present amount of ammunition issued for practice during the annual course. In these days, a soldier who cannot use his arm with effect is little better than an encumbrance, and any money spent in perfecting men in the use of the rifle is money judiciously expended. The item will not form any very great strain on the financial resources of the country, yet its effect on the general efficiency of the Army will be considerable. Referring to the question of uniform, Lord Hartington had something to say. The subject is one which is so interesting to the services, that here, again, we will give his lordship's words *in extenso*:—

> "Another Committee was appointed by my right hon. friend to inquire into the question of the colour of the undress uniform, and they have reported against the red uniform, on the ground that it is too visible, and not sufficiently serviceable. They recommend gray or khakee colour, between which it is difficult to choose, as far as visibility is concerned. There is, however, this difficulty about applying khakee dye to serge—namely, that it is not durable. But the difficulty has been overcome, and the recommendation of the Committee is being carried out experimentally. This is a matter which involves sentimental considerations, and it is by no means certain that either officers or men would willingly change the colour of red, to which they have been so long accustomed, and which has linked with it so many honourable memories. The khakee colour has, however, been long used in India, where, I believe, it is popular. But it would not be wise to force the change upon the Army, and we shall, therefore, issue a certain amount of clothing of the new colour, as a tentative test only. It should be noticed that the Committee do not recommend any change of full-dress uniforms; they only recommend that an undress suit of khakee colour shall be the service uniform of the Army. We propose to issue to the troops at certain stations an undress uniform of the new colour, and to issue similar uniforms to certain battalions at home, if commanding officers are willing to try the experiment."

We commend Lord Hartington for the good-sense he has shown in not forcing a change of uniform upon the Army. Scarlet has always been our national colour. Despite all arguments against its adaptability for service, the fact remains that our great victories—and no nation can boast of more brilliant military achievements than our own—have been won by men clothed in scarlet. Any compulsory change would disgust the service beyond measure. The compromise which has been offered is, therefore, a wise move on the part of the War Office, and will leave the matter really with the Army itself. The concluding portion of the very interesting statement was devoted to gunnery matters, but, as the facts brought forward related exclusively to Naval ordnance, we may pass this part of the address over, A long and interesting discussion followed his lordship's statement, in which Colonel Stanley, Sir G. Balfour, Sir W. Barttelot, Sir J. Hay, Colonel Alexander, Mr. Illingworth, Sir J. Pease, and Lord Eustace Cecil took part.

WE have the greatest respect for the opinions expressed on most matters by the *Times*. When, however, our contemporary treats of Military subjects, we find ourselves obliged to oppose it. A wonderful article appeared on the 6th inst. This article was simply one long series of weak excuses, varied once by what appears to be an attempt at a joke, for when the *Times* speaks of the "magnificent gift" bestowed upon the great body of the officers in the shape of abolition of Purchase, it cannot really be in earnest. We never defended promotion by Purchase. We always admitted that in principle the system was wrong, but when the system established by authority was swept away without giving either increase of pay or compensation to those affected, we can easily understand how they thought it to be a confiscation, seeing that men who had given thousands for their promotion found themselves serving side by side and doing exactly the same work with those who had never spent a penny either for their first commissions or for their subsequent promotion. Had promotion by Purchase merely been a custom amongst officers, tolerated, though not sanctioned, by authority, we should have thought officers unreasonable, if they had deemed themselves hardly used when the custom was forbidden, but it was a very different thing when the Government was a party to the transaction. The *Times* thinks that the intrinsic advantage of six years' active service and six years' with the Reserves ought to have secured the popularity of the system; but, unfortunately, it has not. When speaking of the "magnificent gift" above alluded to, the *Times* says,—"No one could be positive that the benefit of short service might not be misrepresented with a similar strange perversity." What object could there be for misrepresentation? The officers of the Army have tried loyally to carry out a scheme which they have known from the beginning was very defective. The *Times* would have people believe that the failure in any organisation is not due to its faulty nature, but to the imperfect manner in which the reform has been carried out. We know that such is not the case, and if there is any strange and perverse misrepresentation, it is on the part of those who, to bolster up a defective system, persistently turn deaf ears to adverse criticism. The *Times* says that the result of the short-service system is an undoubted success. If so, how is it that our battalions at home are attenuated, and we have such a difficulty in obtaining recruits? The *Times* itself cannot shut its eyes to the fact that there is a difficulty in this respect, and though it does not deem it to be alarming, yet it thinks it demands earnest consideration. This is a concession that we were not prepared for, and it creates in our mind a hope that the day may come when even the *Times* will cease to theorise upon Army matters, and deal with things as they really are. The country does not want to be told what the Army would be, if certain conditions were fulfilled; it wants to know what is its state at the present time, and how far we are prepared to protect our interests abroad, and defend ourselves at home. Of what use is it to say that no doubt we lost many recruits owing to the places in civil life vacated by the 10,000 Army Reserves being filled up by young men who, perhaps, might have enlisted, had the Reserve men not been mobilised? This is purely problematical, and so it is to attribute the falling-off of recruits to the dormant state of the Irish Militia. It is strange that the regimental district which seems to have least difficulty in obtaining recruits is the 25th (Berwick-on-Tweed), which has neither Militia nor Volunteers attached. We do not doubt the truthfulness of the returns of the Inspector-General, but when the *Times* says that in twenty-one Districts, or about one-third of the whole, the locality contributes over 80 per cent. of the recruits of the territorial regiments, and in twelve more the proportion exceeds one-half, we must decline to take this statement with implicit confidence, until it can be proved to our satisfaction that the men really belonged to the districts they were enlisted in, our experience being that men leave their own districts to enlist in others. As far as recruiting is concerned, the Territorial System has not been a success. This must be acknowledged. The authorities have tacitly admitted it, by issuing a recent order calling upon all commanding officers to enlist every eligible recruit who offers himself at head-quarters. The *Times* sees no way out of our present difficulty, except by lessening the precautions at present taken, and giving up the restriction as to age. This will be pernicious in the extreme, for it will mean the taking of every likely-looking boy who may happen to present himself, and the enlisting of immature lads is most extravagant to the country, as has been shown in the report of Lord Airey's Committee. But how is it that the Army is still unpopular? As the *Times* says, the advantages and prospects of the soldier are beginning to be thoroughly understood. Perhaps a reason may be found here,—the advantages and prospects may be too well understood. It must be admitted that the soldier's condition has been very materially improved, but there have been counteracting influences. A regiment is now no longer a home to a man. He knows he will be in it for a few years only. There are constant changes and great uncertainty, men going away every day and their places being taken by complete strangers, so that it is almost impossible to make a lasting friendship, and comradeship has been almost entirely swept away. Added to this, the prospects as to pension are extremely small. Again, the advantage of belonging to the Reserves is not apparent, for recent experience has shown that a man is at all times liable to have his prospects in civil life blighted, whenever the country becomes engaged in a petty war. There can be little doubt that during the Egyptian Campaign the Reserve men were for the most part discontented, and when they retired again to private life, it would be only reasonable to suppose that they would discuss the matter very freely, and then their ideas would be disseminated amongst the class from which we are most likely to obtain the bulk of our recruits.

THE influential meeting which was held at the Royal United Service Institution, on Saturday last, canvassed a subject of great interest to Englishmen at large, and the services in particular. The object of the meeting was to call the attention of the country to the state of the Crimean cemeteries, and to suggest plans for the amelioration of a state of things which all agreed was discreditable to the country. As many of those present had played their part in the great campaign, and had risked leaving their bones on the battle-field, their pleading for the remains of their dead comrades comes with special force. From the report placed before the meeting by Colonel Haygarth, it appears that the eleven cemeteries into which most of the dead have been concentrated have been allowed to fall into a deplorably neglected state. Not only have the various memorials erected by loving hands been allowed to decay and fall to pieces, but the poor relics themselves have been in many cases torn from their parent earth, and scattered abroad by the half-civilised tribes in the vicinity, partly from savage hatred even of the Christian's tomb, and partly from a deeply-rooted idea that treasure had been buried with the dead. This is no more surprising than it is discreditable to the English nation, when it is understood that the whole sum allowed by Government for the repair and guardianship of the Crimean graveyards is £90 a year. To those who know and can analyse the soldier's feelings, this official stinginess will appear the more culpable and inexcusable. From the highest in command to the poor lad going through his baptism of fire, there is supposed to be in all campaigns the great sustaining thought that the soldier's services will earn, either in life his country's gratitude and applause, or in death an honourable grave. We are as a nation not over-generous to those who fight for us and live, while it seems the depth of meanness to allow the bones of our heroes gone to rest to be scattered by ruthless hands, and gnawed by prowling animals of prey. Embodying this idea, his Royal Highness the Prince of Wales proposed the resolution of the evening—"That the present condition of the British cemeteries in the Crimea is not creditable to the nation, and that endeavours should be made to raise the necessary funds to have them restored, and to preserve them from further desecration." Soldiers will be grateful to his Royal Highness for his action in this matter, and for the few well-chosen words with which he submitted the resolution to his hearers, informing them that as far back as 1869 he had seen and deplored the condition of the cemeteries. Despairing, apparently, of rousing officialism from its apathy, the meeting opened a private subscription towards the object in view, and the only point upon which any variance of opinion was expressed was whether it would be better to remove all the remains into one or more central mausoleums, and there treasure them securely, or to leave them still under the turf, and only to collect the memorials into one convenient spot. With all deference to those who favoured an idea of an "ossuary," or large receptacle for the bones, we think the generally-expressed opinion will be in favour of Lord Wolseley's suggestion, that the tombstones only should be removed, and collected on Cathcart Hill, and that the resting-places of the dead soldiers should be levelled and protected by stone cairns, so that they may be for ever undisturbed. There is nothing in which nations differ more than in their sentiments concerning their dead. Continental cemeteries are in many cases only the temporary abodes of their inmates, whose relics are, after a certain time, removed to "bone-houses," to make room for future sleepers in their narrow bed. This idea the French have carried out in the Crimea, but the English people have an almost poetical notion of the sacredness of their last home "beneath the sod," and it would be repugnant, we feel sure, to that feeling of reverence which for centuries called the graveyard "God's Acre," to unearth, with however good a purpose, those who were laid there by grieving comrades thirty years ago. It is a pity that the £1,200 which, according to the report of the meeting, will be required for the necessary restoration and concentration of the tombstones and memorials should have to be made up by voluntary subscription. The work is essentially a national duty, and ought to be borne by the national purse. We trust that a resolution passed at the meeting, on the motion of Sir Lintorn Simmons, seconded by Lord Chelmsford, that the Government be earnestly requested to increase the annual grant, will receive the consideration it deserves. But we would go farther, and affirm that the whole work of reparation ought to be undertaken at the public expense, for it is little less than pitiful for the Government of the nation in whose defence those heroes died, to stand by and allow what ought to be one of its most sacred duties to devolve upon private munificence, or the surviving comrades of the slain.

THE Secretary of the Admiralty, in recent speeches at Dunfermline and Tunbridge Wells, dwelt at length on the reforming policy of the Government. Such expressions sound well, when coming from the Parliamentary representative, in the Lower House, of a Department which of all others needs reform. During the past ten years many changes have been made in the personnel of the Admiralty Office, with a view to economy and the best method of obtaining the largest amount of labour for the smallest remuneration. The necessity, if it ever existed, of employing high-class clerks in ordinary office work has long passed away; but with all the alterations which have been made, the originators have gone "wide of the mark" in legislating for an efficient system, or reconstruction. The constitution of the Board we will not deal with, other than by saying it appears reasonable to have a civilian at its head who is independent and selected from those who have Parliamentary experience; it is also right that his colleagues should be taken from the superior grades of the service, and be men who have gained a good reputation; but there the Naval element at the Admiralty virtually ends, and in carrying out their duties the Naval Lords have only the assistance of a private secretary, whose experience in Naval matters is derived from the few years he has been employed inside the Admiralty walls. Nowhere else are professional men holding administrative appointments without some one of their own service to aid them. In the administration of the Army, the Military element abounds, and contrasts strongly with the paucity of Naval officers who have any connection with their own Head-quarters, where the Civil element predominates, and is allowed to exercise too great an influence in matters which are entirely the province of Naval men. A more sound and satisfactory state of affairs would be brought about, if the present system of the Secretariat Department of the Admiralty were replaced by one purely Naval. Under the present régime, the Navy forms the head and tail of the Admiralty carcase; at one end are the professional Lords, and the other the Naval pensioners who act as messengers; the intermediate portion is "made up" of civilians, who, in nautical phraseology, know not the "stem from the stern of a ship." The post of Secretary, either Parliamentary or Permanent, has at times been filled by Naval officers. A post captain on the Active List (since deceased, while a retired Admiral) was Permanent Secretary for several years, and the Parliamentary Secretaryship was filled for nearly seven years by a noble lord when on the Active List of Flag Officers. It is not always possible to obtain a Naval officer for the latter post who has a seat in Parliament, but we consider that the Permanent Secretary should always be a Naval officer. Parliamentary representation is necessary in both Houses; the difficulty of obtaining a Ministerial Lord from the Upper House is not always met. A Parliamentary Civil Lord has then to be taken from the Peerage, generally a Junior not intimately acquainted with Naval affairs. Seats at the Board have been filled by active Admirals who were M.P.'s, but under the present rules of sea-service, and the desire to hoist their flags, it is hardly worth their while to enter Parliament, when they are liable to be called afloat at any time. Each Naval Lord should be assisted by an executive officer of high professional attainments; the importance of the post would induce keen competition, and it should be held either by a Captain, Commander, or Lieutenant; in the last two grades, promotion should be the reward, and with Captains, it could be a qualification afterwards for a seat at the Board. Naval Lords should be allowed to select their own secretaries, the same as when they hoist their Flags, and thus be further aided in the details of their official duties. Paymasters, from the training they undergo in the Naval service, are well qualified for employment at the Admiralty, and would carry out the work with an ability which would satisfy the most prejudiced. As an evidence of their value, we point to the fact that the revision of the Queen's Regulations has, for the last forty years, been entrusted to Paymasters; it is a work requiring great professional knowledge, and has been performed by officers with large experience of secretariat duties, and who possessed the confidence of the most distinguished of our Flag Officers. It is a strong argument in favour of their being detailed for duty at the Admiralty. The substitution of a civilian permanent secretary for a permanent Naval secretary is an instance of the exclusion of Naval officers from the Admiralty; such a change seems to suggest that they are incapable of filling the appointment, but it would be a grave scandal on the service, if from 284 Admirals and 530 Captains on the Active and Retired Lists none were eligible. Professional ability and experience in this last alteration were secondary considerations; it suited the official mind, and was approved by those who look on Naval officers as machines, to be worked by the Civil element from within the four walls of a Government office. The "Jack-of-all-Trades" system is evidenced in this appointment; a man who in three years jumps from the Board of Trade to Accountant-General of the Navy, and then to Secretary of the Admiralty, taking a turn at Irish affairs shortly after dropping into the last office, can know but little, if anything, of the Navy; and it shows that "Our Economic Catos" consider the service "on which the safety of the nation mainly depends" is better cared for by one skilled only in official routine, than by an officer selected from the large list of those who, by years of faithful service, have proved themselves efficient as professional administrators. The Assistant as well as the Permanent Secretaryship should be held by an executive officer, selected from those whose attainments would enable them to aid and advise in the administration of the service afloat. The present Assistant-Secretary receives £1,200 a year, a salary exceeding that of a captain superintendent of a dockyard or one in command of a first-class ship; more than one-half could be saved, were he replaced by a Naval officer. The charge in the Estimates for 25 clerks of the Higher-division is £15,757, while the cost of 22 Lower-division clerks, with the employment of temporary writers, is £5,043, giving a difference of £10,000 in the pay of the two grades, more than half of which could be saved by the employment of either active or retired officers. The salaries of the Higher-division clerks are far in excess of the value of their services. Why three "Principal Clerks" are paid from £900 to £1,000, and six "Assistant-Principal Clerks" from £700 to £800 each yearly, is one of those secrets of legislation with which the Treasury are peculiarly gifted; and the grant of £200 per annum, with progressive increase to £600, for 15 "clerks," when their professional ability commences at zero, and their only attainment afterwards a knowledge of official routine, shows how largely the interests of the Civil Service are considered; while the taxpayer is ignorant of the value he receives in return for such large incomes to public servants. Let the question be asked in Parliament why 24 Higher-division clerks each cost on an average £656 per annum, when a far less sum would provide a more efficient staff, were a selection made from the list of Naval officers. We assert, without fear of contradiction, that the clerkships of the Higher Division would be better filled by officers of the Accountant Branch of the Navy. Fifty-four Paymasters appear by the *Navy List* to have served as Secretary, the majority of whom have proved their value in that particular part of their profession, and with the ability displayed by a smaller portion in legal matters, there is undoubted proof of their advantages over civilians whose career is passed entirely within the Admiralty. The senior Paymasters thus employed would be important to Members of the Board in advising and giving opinions on matters which are now referred to the Departmental Offices, and much "red-tape" and inconvenience would be removed. The employment of Civil-Service clerks entirely at the Admiralty is opposed to the interests of the Naval service, and prevents proper administration; the civil element should be confined solely to the Parliamentary and other Departments mentioned in these columns last week, and they should be aided by Naval officers when necessary. Excepting the Army, all other Departments of the Government are essentially civil, but the Navy stands out as a branch of the public service which should be managed by its own people. It is a long-standing error of legislation that Naval Lords should be alone at the Admiralty, and not allowed direct professional assistance. Were it possible to overcome the political leanings and personal obligations of Ministerial officials, the way could easily be paved to a readjustment of this Department; but the Navy has only a small hold in the Lower House, and its existence merely comes to light when external interests, either individual or collective, are concerned. The expense for maintaining the *personnel* is grudgingly accorded, and small rewards for long service and provision in old age are considered by many unnecessary. In the event of national danger, the cry at once is, "Where is the Navy?" Millions are sanctioned for it, and, of course, people expect it to be efficient; but the public are ignorant of the defects in its administration, and believe that as the present system has so long existed, it must be the right one. It never occurs to them that all professions and trades are worked by their own craft, but that the Admiralty is not; and they are blind to the fact that individuals with mere clerical ability, and only a superficial knowledge of Naval affairs, give judgment in matters which should be decided by officers of high standing and experience. Naturally, when Parliamentary representatives are civilians, they have an affinity for non-professional subordinates, and allow the machinery of office to remain unaltered; it is this sameness of working which causes chronic debility in the Admiralty action; spurts of activity at times occur, but are too evanescent to effect improvement, and are generally directed to matters which larger minds would meet by moderate measures. If men of the upper stratum of middle-class life can find a comfortable existence in employment at the Admiralty, we blame them not; the error is with those who, when placed in authority, do not make it a duty to ascertain the best system on which the Department they control could be worked, for the public good and the efficiency of the service it represents.

THE value of the meetings held at the Royal United Service Institution in throwing light upon the organisation and employment of various branches of the Service, was fully illustrated in the lecture so carefully prepared and delivered by Captain Colomb, R.M.A., on "The Use and Application of Marine Forces, Past, Present, and Future." We have already offered some observations on the suggested future of the corps, and it is, perhaps, as well also to recapitulate some of Captain Colomb's remarks upon its past history and present usefulness; and especially so after the reception given to the motion brought forward in the House of Commons on Thursday by Mr. Hopwood. With regard to the past history of the corps, it was ably shown how troops were embarked on board ships of the Navy, in the first instance to avoid disbandment on shore, in consequence of the constitutional struggle between the Crown and the people respecting the maintenance of armed forces, but did not apply to troops serving afloat; and, secondly, to be of service in landing on an enemy's coast. The lecturer then showed how, subsequently becoming Marines, and being set aside solely for sea service, they became not only the principal fighting strength of the ships, but, the Navy being fed solely through the press-gang, its discipline was only preserved by the military element on board, so that the Marines by their example corrected tendencies to be insubordinate among the sailors, and were the guardians of Naval law and order on board. The Marines were England's sheet-anchor, when seamen were obtained mostly by force and restrained chiefly by fear. This is evidenced from the fact that newly-commissioned ships, with a careful assortment of officers and full complement of Marines, thus making complete all appliances for discipline, often waited vainly for weeks without tempting a sufficient number of blue-jackets to walk in; and although the press-gang had for many years been abolished, yet this difficulty in obtaining seamen for the newly-commissioned ships continued until the passing of the Naval Continuous Service Act in 1853, which placed the seaman of the Royal Navy, as regards conditions of service, on a level with his comrade, the British Marine. Captain Colomb clearly showed how that for many years the Royal Marine Artillery were the gunnery, and the Marine Corps generally the military, instructors of the Navy, and that they were the only instructed fighting force which the country placed at the disposal of Naval officers; in spite of which, the use and application of Marines were wholly subordinate to internal Naval requirements. They were, however, always to the fore when there was anything to be done; and although Naval gunnery had vastly improved at the outbreak of the last war with Russia, detachments of the Marine Artillery, under their own officers, were specially employed in gun and mortar-boat flotillas, in the Baltic and Black Seas. Captain Colomb only touched on the fact that although there is at present a force of 2,532 Artillery and 9,862 Infantry Marines, of whom there are generally between 6,000 and 7,000 afloat, yet they are not directly represented on the Board of Admiralty; and, also, that although the Royal Commission which sat in 1858 to inquire into the best means of manning the Navy examined 79 witnesses, not one single officer of Marine Artillery or Marine Infantry was called. A Pay-Serjeant was asked some questions about pay and clothing, and that was all the direct evidence given on behalf of Artillery and Infantry Forces on which the Navy relies, a single paragraph, in a voluminous report of 21 pages, finishing off the Marines in four sentences. It was also set forth that when Marine Artillery or Infantry officers are landed as part of a Naval force for fighting on shore, they are under the command, direction, and control of Naval officers; so that officers carefully and specially trained by the State for military operations on land, are placed in the face of an enemy under the guidance and directions of officers carefully and specially trained for Naval operations on water. With regard to actual duties on board ship, it was urged that Marine Artillerymen are not sufficiently employed at the guns, and that when so employed they are often working under a young seaman, captain of a gun, who has not as much sea service as themselves; and Captain Colomb has hit upon the root of the evil, when he quotes the evidence of Captain Sir Thomas Maitland (afterwards Lord Lauderdale), given before the Commissioners, where he says:—"I consider the Marine Artillery the most valuable men in her Majesty's service, and also the Marines; but, still, the Marine Artilleryman, I think, is totally thrown away on board ship, for if we can get a seaman capable of being captain of a gun, we put him to it, because we do not like the guns of the Navy taken out of our hands." To this, Captain Colomb honestly adds, "I perfectly understand their feelings, and applaud them for their *esprit de corps*, but it is impossible to believe that our national system can be anything but the most false, to tolerate the misuse and misapplication of the public money by the creation of a corps of splendid land and sea artillery, for the distinct and settled purpose of allowing it to be totally thrown away on board ship. There are so many startling statements in the lecture as to the way in which the corps has *not* been utilised, that after quoting extensively, there is little room left for comment—in fact, the statements speak for themselves. The suggestion that Marine Artillery and Marines should man the mastless ironclads, leaving the sparred ships of the Navy to the seamen, could scarcely be carried out under the present organisation of the Royal Navy. Such a procedure would of necessity materially reduce the numbers of seamen required, and proportionately increase the military branch, while the whole Naval system would be revolutionised. Without such an entire change, the proportion of Marine Artillery gunners might be increased on board the ironclad fleet, and the corps more generally utilised, as proposed in the latter part of the lecture, and upon which we have already touched. With reference to a war between England and other great Naval Powers, it always has been and will be, as Captain Colomb says, a struggle for positions commanding the sea; and for this purpose, troops independent of internal Naval conditions are necessary to take and keep such positions. For such services as these, Marines are the best troops that could be employed. Accustomed to ship-life, to boat service, and to shaking-down and making themselves at home and useful under all circumstances, they are admitted to be the most handy force; and this observation applies equally to their suggested employment in defence of the Colonies and coaling stations abroad. We strongly advise Mr. Hopwood to follow in the House of Commons the good example set him by the Earl of Belmore in the House of Lords—to return to the assault on the first favourable opportunity, having previously well organised his force, and to positively decline to take "No" for an answer.

The Earl of Belmore has given notice in the House of Lords that, on Monday, April 16, he will move:—"That in the opinion of this House, the rates of full-pay of Naval Lieutenants and Sub-Lieutenants should be assimilated to those of officers holding relative rank in the Army. The half-pay of Naval Lieutenants and Sub-Lieutenants should be in all cases the actual half of the full pay, except when length of service entitles them to a higher scale." We believe we are justified in stating that Lord Belmore does not intend to let this matter drop until he has succeeded in securing a better rate of pay for the ranks named in the motion, one more adequate to the requirements of the age than they are at present receiving; and we also hope, at no distant date, to see his Lordship take in hand the question of Naval Reform, and the reorganisation of the Admiralty. Lord Belmore is already connected with the Navy by ties far thicker than water, and he may confidently rely upon the hearty support of the service in his endeavours to regenerate its administration by sweeping away abuses which scandalise the age we live in. A select Committee, with power to examine witnesses on oath, should be appointed.

The Admiralty are certainly well disposed to the Citizen Army, and have issued an order that those gentlemen serving under them who are going to take part with their corps in the route-march to Brighton, prior to the forthcoming Easter Monday Review, are to be allowed a day's leave on Saturday, the 24th inst., without deducting the same from their annual leave.

The *Pioneer* has conveyed the Governor of the Gold Coast Colony from Accra to Axim, to inquire into the circumstances of the murder of a Mr. Barrow at Torquah.

It appears that the Naval Commander-in-Chief at Portsmouth has given the officers serving under his command to understand that he has no objection to the carrying and use of an umbrella, to protect their uniforms in wet weather when on shore on ordinary leave.

Much has been written about the destruction of the town of Alexandria during the bombardment, but the real cause of the catastrophe has only just been discovered. It appears that when the Woolwich authorities adopted the "gas check," and applied it to the base of all Naval projectiles, they never informed the Admiralty that the range of the guns was thus materially increased, in some cases by about 250 yards in 1,500. The result was that the sights of the guns used in the Navy have remained uncorrected; and, as a result, when the Fleet opened fire on the forts at Alexandria, half their shell flew over into the town. When will the Government liberate the Naval Ordnance Department from the Woolwich bondage?

We understand that Mr. C. McL. McHardy, Director of Stores at the Admiralty, is to be promoted to the post of Storekeeper-General, which will include his present appointment and that of Director of Victualling, at present held by Mr. Samuel S. Lewes, who retires on a pension and gratuity.

Captain M. B. Seager, Royal Marines, who, since the occupation of Cyprus, has been employed there, first as Assistant-Commissioner and latterly as Commissioner, has now been appointed President of the District Court at Nicosia. Captain Seager was called to the Bar in 1874, he having studied law with a view to further his prospects in the service, and we are glad to be able to announce his appointment to a Judgeship.

This year's German Squadron of Evolution will, for the first time, be accompanied by a hospital-ship. The old steam-corvette *Arcona* has been fitted up for this purpose with a double row of swinging bedsteads on the main-deck, operating tables, and every necessary accommodation for sick and wounded officers and men. Special arrangements have also been made for embarking invalids and lowering them into the hospital with the least possible inconvenience to them. Besides flying the Geneva flag, the *Arcona* will be painted white with a red streak, so as to make her character immediately apparent. This is of importance, as it will be her mission to accompany the Squadron in time of war, as well as in peace.

Great offence has been given by the Admiralty to the Navy by the so-called gratuitous grant for Egypt. The Admiralty appear to have gone on the prize-money system in awarding the shares. But coming out at the same time as the Military awards, the unfairness of the Naval scale is made most apparent. That a Lieutenant in the Navy who ranks with a Captain in the Army should get no more than a Lieutenant in the Army is unjust, while to make no distinction between Naval Lieutenants ranking with Majors and those ranking with Captains in the Army is so absurd that we can only assume that this is another illustration of the effect of civilian government at the Admiralty. The mistake should, however, be remedied. On the other hand, that a Post Captain should receive over a hundred pounds when Colonels in the Army are only granted £34, and that Commanders should receive £57, and Lieutenant-Colonels only £34, form anomalies not easily explained, but clearly set out by our correspondent "Observer."

Rear-Admiral Salmon, V.C., Commander-in-Chief on the Cape of Good Hope and West Coast of Africa station, was at Cape Coast Castle at the end of last month, when all the Squadron was assembled to meet him. He was to remain about a week, and would then proceed south on his way back to the Cape of Good Hope.

Notwithstanding reports that have been current since the close of the Egyptian Campaign as to the restoration of the Woolwich Division to the Royal Marines, or in any case a substantial addition to its ranks, to be distributed among the existing Divisions, it does not appear that any such step is contemplated for the coming financial year, since the Navy Estimates, which were published last week, provides only for 12,400 Marines, the same strength at which the corps was fixed by the last Order in Council of November, 1881, and at which it at present stands. It is the old story over again, of services forgotten when the emergency has passed; and it looks as if the corps will have to wait until its services are required for another campaign, before it can expect any increase to its present establishment.

Experiments will shortly be made in Kiel Bay and at sea with a hand-launching apparatus for miniature "fish" torpedoes. This arrangement is not identical with the gear already supplied to German ships-of-war for their steam pinnaces and launches; but it is of such a light construction that the complete apparatus, including the torpedo, can be carried and worked by one man.

The new breech-loading ordnance has been the cause of another serious accident in the Navy, confirming the opinion we have previously expressed that the so-called "improved French system" is not as safe as the genuine article. The accident in question occurred on board the *Stork* in February 27, while target practice was going on. The flame of the charge burst out at the breech on the gun being fired, seriously burning the captain of the gun and one of the crew. The captain of the gun also had his leg severely shattered, the bone being broken. We hope that Mr. W. H. Smith will do more than threaten to have the whole Naval Ordnance question inquired into.

We hear that the Danish torpedo-ram *Tordenskjoeld* has *not* been a success in so far as the torpedo-gear is concerned, as the broadside ejection-tubes give satisfactory results only when the vessel is motionless, or nearly so.

Some interesting experiments will be made in the course of the month at Copenhagen with compound and iron deck-plates for a new ironclad, which is shortly to be built at the Government Dockyard.

The following are some particulars of the Swedish gunboat *Edda*, lately launched at Carlskrona:—Length, 181 ft.; beam, 26 ft. 7 in.; draught, 9 ft. 7 in.; displacement, 613 tons; estimated horse-power, 960; estimated speed, 13 knots. The engines were manufactured by the Bergsund Company. The *Edda* will carry two guns, viz., one 26½-ton Armstrong breech-loader, and one 6¾ in., of Swedish make.

The requisite number of officers having applied to undergo the senior torpedo course for officers of the rank of Commander and upwards, which assembles on board the *Vernon* on the 9th proximo, no further applications to join can be entertained by the Admiralty.

The machine-gun question has reached the following stage:—France and Germany have adopted shell-guns, but are not quite satisfied. France has determined on making further trials, and has also decided that a machine-gun firing a 4-lb. shell is required. Italy is trying a gun firing shell of 2½ lb. weight, and England is about to experiment with three machine-guns, each firing 6-lb. shell. These guns have been manufactured by Sir William Armstrong, Mr. Hotchkiss, and Mr. Nordenfelt. We have not yet heard that either Herr Krupp, Dr. Gatling, Mr. Gardner, Sir Joseph Whitworth, or Mr. Vavasseur have decided on competing. The weight of the gun and carriage, as we stated some months ago, has been limited by the Admiralty to 10 cwt. The trials with the first three named guns will be shortly commenced. The Nordenfelt six-pounder has already been fired in competition with the Hotchkiss 37-millimetre revolving cannon, but the new gun to be tried is a single-barrel six-pounder, from which great things are expected.

A correspondent writes that the Chief of the British Navy in Chinese waters is not disposed to show much humanity to the sick or wounded, and that a Court of Inquiry had been ordered to investigate the circumstances under which Lieutenant Baker, of the *Flying Fish*, when suffering from fever, had been left behind on the recommendation of the medical officer of the ship, who did not consider that officer to be in a fit state to be removed to Hong Kong; and in the absence of sufficient Naval attendance, recommended that the sick officer should be attended to by himself. We feel convinced that Sir John Reid will see that Naval Surgeons suffer no undue hardships. Why will Commanders-in-Chief and Commanding Officers persist in trampling the Instructions under foot?

As we stated on January 6, the Austrian Government have ordered the construction of a powerful turret-ship at the Pola Dockyard. This vessel will be named the *Salamander*, and is to replace an old ironclad of the same name. The armament of the new vessel, as at present arranged, will consist of two 12-in. Krupp guns. The old wood-built ironclad, *Erzherzog Ferdinand Max*, of Lissa renown, is to be "converted" into a modern ironclad, and will be rebuilt of steel and iron. She will also be re-armoured and re-armed, so that nothing will remain of the old vessel except the name. The word "conversion" plays a great *rôle* in the Austrian Navy Estimates. Thus, some years ago a sum of money was voted by the Austro-Hungarian Parliament for the conversion and repair of three wooden ironclads, viz., the *Don Juan d'Austria*, *Kaiser Max*, and *Prinz Eugen*. The cost of converting and repairing the same would—with the exception of the engines, which were compounded—have sufficed for the construction of three new vessels, which, in fact, they are. If, however, the Naval authorities had at once stated that the grant was required for building new vessels, there is no doubt but that the required funds would not have been supplied. This has, to a certain extent, also been the case with the ships now in course of construction. A third vessel, to be named the *Kerka*, will also shortly be laid down. She will be unarmoured, with the exception of a steel deck, and will in all respects resemble the fast cruisers built by Messrs. Armstrong, Mitchell, and Co. Her displacement will be 880 tons, and the indicated horse-power of her engines 2,000. All the new vessels will be provided with torpedo-discharging gear. It is a curious fact, that whilst the British Government ignore the Armstrong cruisers, such vessels are either building or being laid down at Trieste, Castellamare, and Stettin!

Captain Adeane, C.M.G., in command of the *Warrior* and of the Greenock Coastguard District, accompanied by Lieutenant the Hon. H. N. Shore, Divisional Officer, and Captain Eagan, R.M.L.I., inspected last week the Stornoway Royal Naval Reserve Battery. The Reserve men mustered in the park of Lews Castle, lent by Lady Matheson for the occasion, and were drawn up in line under the command of Chief Officer Heathcote and Chief Instructor Naylor to receive the Inspecting Officer. Captain Adeane minutely inspected the men, and then put them through their field-firing, sword, bayonet, and cutlass exercises. Various battalion movements were gone through, and the men, having been marched down to their battery, were put through their great-gun drill. At the close of the inspection, Captain Adeane formed the battery into three sides of a square, and expressed himself as well pleased with the smart appearance and efficiency of the men, of whom 306 were on parade. The total number of men enrolled in the Lews district is about 1,600, but recruits are being added each week to the strength of the corps to make the Second-class Reserve up to the establishment proposed by H.R.H. the Duke of Edinburgh.

The Russian Minister of War has ordered the various detachments of the Russian Cavalry, Artillery, and Infantry which are to take part in the ceremony of the Coronation of the Czar, to leave their present quarters and proceed to Moscow during the middle of May. From this we expect the coronation will take place somewhere about June 1.

In view of the confusion and trouble caused by the horse-collar at present in use when the Army is mobilized, the German Government have, after extensive trials, adopted an adjustable collar, the invention of Messrs. Martens and Co., of Stralsund, as the best. Experiments are at present also being made with a new saddle, the "Sperling" saddle, but no decision as to the general introduction of the same into the Army has, at yet, been arrived at.

A French paper, the *Progrès Militaire*, lately gave currency to a report that, before the spring of 1886, all the German "Jäger"-battalions, and one battalion of each of the 161 Infantry regiments, would be supplied with the repeating rifle. This report is denied in German military circles, as only a limited number of magazine-rifles have been supplied by Messrs, Mauser for experimental purposes. Several companies, certainly, have received the converted arm, but this is only to test its efficiency during the coming manœuvres. That it is the intention of the War Office to adopt the magazine-rifle, if it proves reliable, there can be no doubt, but, as yet, all reports to this effect are premature.

There is a vacancy on the List of Captains of Invalids at the Royal Hospital, Chelsea, by the death of Major W. H. Warner, which occurred on Thursday.

Prince Gortschakoff is now asserted to have died from the effects of phosphoric poison, administered to him in his food. The German papers state the police have proofs of the fact.

The German papers ridicule the idea that the appointment of H.R.H. the Prince of Wales to be a Field-Marshal in the German Army has the slightest political significance. The *Kölnische Zeitung* alone reproduces the article published by the *Standard*, but the *Berliner Tageblatt* remarks that, while the comments of its contemporary are well worthy of consideration from a literary stand-point, they are unworthy of the slightest attention being paid to them.

We learn the death of General Vesco, who is spoken of as the oldest General in the French Service by our Parisian contemporaries. This is not quite the case, as General Schramm can lay claim to that honour. General Vesco, whose parents came from Piedmont, was born at Metz in 1789; he joined the Army in 1806, and fought through those big wars of Napoleon which made ambition virtue. On the return of the Bourbons, being then a Colonel, he, like many other Imperialist officers, was placed on the Retired List, where he remained until he was reinstated, also like many other Imperialist officers, by Louis Philippe, one of whose sons and two of whose grandsons have just been virtually struck off the roll of the French Army. In 1852, General Vesco passed into the Reserve, where he remained until 1879, when he finally laid down his sword. Although Vapereau says that General Schramm was born also in 1789, and joined the Army at 10 years of age, we believe he was born in 1783, and joined at the age of 16. It is true that Béranger, translated by Father-Prout, is made to sing:—

> "For every drop of blood we spent,
> Did not our flag give value plenty?
> Were not our children, as they went,
> Jocund, to join the warrior's tent,
> Soldiers at ten, heroes at twenty?"

But this is a poetical licence. General Schramm was, like General Vesco, usually in the forefront of the battle during the campaigns of the Empire, and he was lying, as every one thought, mortally wounded on the field of Wagram, when the Emperor, to console him, made him a Captain. He soon recovered, and rapidly rose in rank. While Vesco did not become a General until 1845, Schramm was a Brigadier as early as 1813. He declined serving the Bourbons on their restoration, but he donned his uniform once more when Louis Philippe became King. After the fall of the Constitutional Monarchy, General Schramm served Prince Louis Napoleon, who appointed him Minister of War. He did not long retain that post, preferring to resign office, rather than be a consenting party to the dismissal of General Changarnier. He lived to see the Emperor and the General make up their differences in 1870, when the German armies threatened the frontier. We regret to learn that General Schramm, who lives at Courneuve, just outside the walls of Paris (which he helped to defend in 1814), is ailing. As he commanded in chief in presence of the enemy, his name is still retained on the Active List. From 1806 to 1883, is a pretty good spell of service.

We learn from Paris that General Martimprey, Governor of the Invalides, died the other day, and was buried with all the honours due to his rank. Marshal MacMahon, who still holds himself erect, and a crowd of Generals, attended the funeral service; and among the officers who held up the pall was the Sub-Governor, General Sumpt, who had both his hands shot away in the Franco-German War (they have been replaced by iron claws). General Martimprey, who was, no doubt, known to many English officers in the Crimea, was the twenty-fifth Governor of the Invalides. The first, François Lemaçon, Seigneur d'Arnoy, was appointed in 1675. How long will the institution founded by Louis XIV. resist the attacks of our modern Radicals, who wish to see it abolished, for the sake of economy? It is urged that the pensioners would prefer living at home on a pension, but the veterans protest; few of them have any home to go to, or any one to look after them.

The annual general meeting of the Royal School for Daughters of Officers in the Army was held on Monday, at the United Service Institution, Whitehall. The Duke of Cambridge, who presided, said that the report in itself was satisfactory generally, although there were some points in it which were not so encouraging as they might have been. The only part not satisfactory was a deficit of £761, the whole of which was accounted for by the heavy repairs at the Bath schools, consequent upon the bad weather. There were also some irreconcileable arrears from pupils, amounting to £217. This debt had from time to time been brought forward in the accounts, but now it was thought desirable that the amount should be written off. Against the deficit there were legacies and presentation money to be placed, amounting together to £1,024, by which amount the foundation fund had been increased. No doubt a considerable saving would result from the amalgamation of the two establishments, but he doubted whether it would be desirable to depart from the course of keeping them separate. In the meanwhile, he might mention that the general condition of things was fairly satisfactory, even as far as financial affairs went, and at the same time nothing could be better than the education afforded. In conclusion, he expressed a hope that the interest hitherto taken in the institution would be continued, and that an effort would be made to get rid of the debt which had been incurred.

The correspondent of the *Times* at Cairo writes, "Gen. Baker's gendarmerie scheme is making satisfactory progress. It consists of two battalions, one of gendarmerie proper, under Gen. Whinyates; the other of urban police, under Col. La Touche. For gendarmerie purposes, Lower Egypt has been divided into four and Upper Egypt into three districts, each with a resident inspector. Two superior inspectors, Cols. C. Baker, V.C., and Synge, will reside in Cairo, and supervise Upper and Lower Egypt respectively. The details with respect to the urban police are not yet completed. Besides these, Gen. Baker has two inspectors for the repression of the slave-trade."

Major A. R. Kenney-Herbert, of the Madras Cavalry, has been appointed Military Secretary to the Governor of Madras, the Right Hon. M. E. Grant Duff, in succession to Major A. G. Spencer, 44th Regt., who recently vacated that appointment.

The *Irish Times* says:—"Her Majesty has sanctioned the issue of the bronze star, which the Khedive proposes to grant to mark his sense of the services rendered by the British troops in connection with the recent operations. The issue of the decorations will, however, be restricted to the officers, non-commissioned officers, and men of the Army and Royal Marines, and officers, petty officers, and seamen of the Royal Navy, who served in Egypt between July 11 and Sept. 13, 1882, whether they were under fire or not. Those who landed in Egypt subsequent to the action of Tel-el-Kebir are not to be considered to have any claim to the distinction."

The German Army (not reckoning that of Bavaria) is quartered in 304 garrison towns. Berlin has a garrison of over 15,000 men (17,813). Then follow Metz, with 14,441 men; Strasburg, with 8,968; Mainz, with 7,712; Cologne, with 7,655 men. The garrisons of Potsdam, Coblenz, Königsburg, and Magdeburg number over 6,000 men; there are over 5,000 men in Dantsic, Hanover, and Posen; then follow six garrisons with over 4,000, six more with over 3,000, and 15 with over 2,000 men. Excluding Bavaria, there are in Germany only 39 towns with large garrisons.

Rear-Admiral T. B. Lethbridge has accepted the Naval command at Queenstown, in succession to Rear-Admiral R. V. Hamilton, C.B., whose term of service expires on the 6th prox.

The Admiralty have awarded medals for long service and good conduct to the following men:—Jacob Carter, able seaman (rigger), of the Victoria and Albert; John Lewis and Patrick Garran, commissioned boatmen, and John Soper, boatman, of the Coastguard.

The Duke of Edinburgh will attend the coronation of the Czar in May as a special Ambassador from her Majesty. He will be accompanied by a large and distinguished suite.

The Army.

3RD DRAGOON GUARDS. Lieut. J. J. Martyn died at Mentone on the 5th inst., aged 23 years. The deceased, who was younger son of Mr. J. Martyn, of Tullyra Castle, County Galway, Oct. 23, 1880.

5TH LANCERS. Capt. Morland has arrived at Ashton-in-Makerfield, and taken over duty as adjt. of the Lancashire Hussar Yeomanry Cavalry.

9TH LANCERS. Lieut. Hopkins, who has arrived home from India, has been granted six months' leave, on medical certificate.

13TH HUSSARS. Lieut. Smithson, who has arrived home from India, has been granted twelve months' leave, on private affairs.

19TH HUSSARS. The regiment has been ordered home from Egypt.

ROYAL ARTILLERY.

Major-Gen. J. E. Michell, C.B., only son of the late Gen. Sir J. Michell, K.C.B., died last week at Tunbridge Wells, aged 55. The deceased served in the Eastern Campaign of 1854 up to May, 1855, and took part in the battles of the Alma and Balaclava, and the siege of Sebastopol. On the outbreak of the Indian Mutiny, he proceeded to India and served throughout the campaign of 1857-58. For his services in India he was promoted to brevet lieut.-col., had received the medal with clasps, and was nominated a C.B.; and for his services in the Eastern Campaign, received the medal with three clasps, the Sardinian and the Turkish medals, and the 5th Class of the Medjidie. He obtained his first commission as 2nd lieut. in Sept., 1846; was promoted to capt. in June, 1854; brevet-major in Nov., 1855; brevet lieut.-col. in 1859; col. in 1867; and major-gen. in 1880.

"Ubique" writes:—"Can you inform your readers for what reason Capt. Barrington Foote, R.A., has been granted the 4th-class Medjidieh decoration? I ask this question as this young officer proceeded as far as Alexandria at a late period, never saw a shot fired, in fact had nothing to do with the campaign. It is really making a total farce of the whole thing, and very hard on deserving officers without interest."

ROYAL ENGINEERS.

Lieut. J. H. C. Harrison has passed the higher standard examination in Hindostanee.

5TH NORTHUMBERLAND FUSILIERS. Lieut. Hore, 2nd Batn., has passed the higher-standard examination in Hindostanee.

9TH NORFOLK REGIMENT. Major J. Gillespie, 1st Batn., died at South Town Barracks, Great Yarmouth, on the 11th inst. The deceased, who was son of Mr. A. Gillespie, of Heathfield, Weybridge, was 39 years of age. He joined the Army Dec. 19, 1862; became lieut., June 14, 1864; capt., Sept. 14, 1870; and major, July 1, 1881.

10TH LINCOLNSHIRE REGIMENT. A sad and terrible tragedy has been reported from Benares, where the wing of the 2nd Batn., under Lieut.-Col. Stockwell, is stationed, poor Lieut. Coode, the adjt., having been murdered by a private soldier named Cocklin. Lieut Coode was engaged on Feb. 16 in afternoon drill between 5 and 6 o'clock, when shots were heard at some distance off, near one of the bungalows, and bullets came whistling over the men on parade. One man was already badly wounded in the ranks. Lieut. Coode galloped off at once in the direction of the firing. When only a few paces from the miscreant, Cocklin, the latter shot the horse, and at the next shot the unfortunate officer himself fell, mortally wounded in the groin, from the effects of which he shortly bled to death. The murderer, who is said to have been suffering from delirium tremens, induced by hard drinking, was at once disarmed and arrested by his comrades. The news of this fearful occurrence being telegraphed at once to the head-quarters of the battalion at Sitapur, the same evening, Lieut.-Col. Berger ordered a full parade, in review order, on the following morning, and after forming a hollow square at open order, with fixed bayonets and the colours unfurled, the following regimental order was solemnly and impressively read by the adjt., Capt. H. Wiley:—"Regimental morning orders, by Lieut.-Col. E. A. Berger, commanding 2nd Batn. Lincolnshire Regt. Sitapur, Feb. 17, 1883.—With horror, and with the deepest feelings of sympathy and regret, the commanding officer has the extreme pain of announcing (by telegram from Lieut.-Col. Stockwell) the death of Lieut. W. H. Coode, adjt. of the detached half-battalion, which took place, under most distressing circumstances, from the effects of a shot fired on parade yesterday, at Benares. The commanding officer is well aware that the officers, non-commissioned officers, and private soldiers of this battalion know best how to sympathise with the relatives and friends of this promising and much-esteemed young officer thus suddenly taken from them and from themselves, and hurried to his violent and untimely end, apparently by the hand of one of his own men; and the commanding officer most cordially feels assured that they will all bitterly mourn with him, not only for the poor young officer himself, but also for the awful crime which seems to have been committed in their very midst, and for the indelible stain which has, alas! thus fallen upon the honoured colours of the battalion." The colonel then ordered the band to play "The Dead March," after which the battalion presented arms, saluting the colours, wheeled back into line, and dismissed. The head-quarters at Sitapur have just passed their annual inspection, when the lieutenant-general was pleased to comment most favourably on the appearance and good-behaviour of the men. A draft of 200 joined from England early in February, nearly half of them being Lincolnshire men. Though young, they seem a fine and promising body of men. Lieut. Rawlinson, 2nd Batn., has passed the higher-standard examination in Hindostanee.

13TH SOMERSETSHIRE LIGHT INFANTRY. Capt. Townsend, 2nd Batn., is retiring from the service.

14TH YORKSHIRE REGIMENT. Lieut. Loudon, a probationer for the S.C., has passed the higher-standard examination in Hindostanee.

18TH ROYAL IRISH. The 2nd Batn. is to be brought home from Malta, and will be stationed at Aldershot.

22ND CHESHIRE REGIMENT. Lieut. Parsons, 2nd Batn., has passed the higher-standard examination in Hindostanee.

23RD ROYAL WELSH FUSILIERS. An exchange of battalions has been sanctioned between Capts. Griffith and Edwards, Capt. Griffith joining the 1st and Capt. Edwards the 2nd Batn.

25TH KING'S OWN BORDERERS. Capt. Dandridge, 1st Batn., has been appointed Station Staff Officer at the Dalhousie Convalescent Depôt.

31ST EAST SURREY REGIMENT is to be brought home shortly from Malta, and will be stationed at Aldershot.

35TH ROYAL SUSSEX REGIMENT. Capt. A. T. Chapman died at Algiers on the 14th inst., aged 36 years. He entered the Army Feb. 27, 1867; became lieut., March 30, 1870; and capt., June 25, 1878.

38TH SOUTH STAFFORDSHIRE REGIMENT. The regiment is under orders to proceed from Egypt to Malta. Capt. W. T. Cantley died at Cairo on March 2, from enteric fever, and was buried with military honours on the 3rd inst. The deceased entered the Army Jan. 22, 1868, became lieut., Jan. 24, 1870, and capt., Sept. 27, 1876.

40TH SOUTH LANCASHIRE REGIMENT. Considerable surprise seems to have been expressed at the way the two vacant majorities in the regiment have been lately filled up. It is certainly hard upon Capt. Linton, an old regimental officer, that he should not have received his well-earned promotion. It will be remembered that this officer was hardly used some years ago, when Major (then Lieut.) Moberly was allowed to exchange into the regiment, to come in senior to him, though junior in the service; and now, to add to the injustice done to Capt. Linton, two majorities are absorbed, and still he is kept unpromoted.

43RD OXFORDSHIRE LIGHT INFANTRY. Lieut. Rideout, a probationer, wing-officer 31st Madras N.I., is about to be admitted to the Bengal S.C., from Jan. 9, 1882.

45TH SHERWOOD FORESTERS DERBYSHIRE REGIMENT. Capt. Dowse is about to be appointed to the adjutancy of the 5th Batn.

49TH BERKSHIRE REGIMENT. The regiment is under orders to leave Egypt for Gibraltar.

63RD MANCHESTER REGIMENT. Lieuts. Quin and Dawson, candidates for the S.C., have been appointed to the 23rd Madras N.I., on probation.

70TH EAST SURREY REGIMENT. Lieut. Anderson, a probationer for the S.C., has passed the higher-standard examination in Hindostanee.

71ST HIGHLAND LIGHT INFANTRY. We (the *Irish Times*) hear that Col. Allen will shortly retire on the full pay of his rank.

72ND SEAFORTH HIGHLANDERS. The Egyptian war medal, with clasp for Tel-el-Kebir, was presented to the regiment on the 9th inst. at Parkhurst, I. of W., by Lieut.-Col. Stockwell, C.B. Prior to the presentation, the battalion was drawn up in quarter-column, and addressed by the lieut.-col. commanding as follows:—"'Seaforths,' it is again my proud privilege to be able to present you to-day, in the name of her Majesty the Queen, with another medal for yet another campaign. Not many months ago, at Aden, I had the honour of presenting you, in the name of the Queen-Empress, with medals and clasps for the Afghan Campaign, as also a bronze decoration for the famous march to Candahar. At the time I made these presentations, I wished you all luck, and expressed a fervent wish that I might again have the honour of leading you in action. I am proud and pleased to think how speedily my wishes have been fulfilled in the recent Egyptian Campaign; I am now about to present you, in the name of her most gracious Majesty, with the medal and clasp you have earned in that short, but brilliant campaign; and in doing so, I again wish you all luck, and I hope you may be all long spared to wear this honourable decoration which your Queen is pleased to bestow on you. I will now repeat her Majesty's own words, when she presented these medals to the representatives of the Army of Egypt, who, by her command, attended at Windsor Castle, on Nov. 21, 1882:—'I have summoned you here to-day to confer upon you the well-earned medals in commemoration of the short and brilliant, although arduous campaign, in which all have done their duty well, and with courageous and undaunted devotion. Tell your comrades that I thank them heartily for the brilliant services they have rendered their Queen and country, and that I am proud of my sailors and soldiers, who have added fresh glories to the victories won by their predecessors.'" On the conclusion of the address, the regiment was formed into line, when Col. Stockwell pinned the medals on the breasts of each officer, staff serjeants, and colour-serjeants, as representing their companies. After this, the company officers decorated their men, assisted by the Commanding Officer and Field officers. The proceedings terminated with a royal salute. The men were in high spirits, and their smart and soldier-like appearance gained them the well-deserved applause of all spectators.

81ST LOYAL NORTH LINCOLN. Capt. Farrant, who has arrived home from India, has been granted fifteen months' leave, on private affairs.

89TH ROYAL IRISH FUSILIERS. Capt. Barker has been granted leave from India to England for twelve months, on private affairs.

91ST ARGYLL AND SUTHERLAND HIGHLANDERS. We take the following from the *Wynberg Times* of the 10th ult.:—"We understand that the Argyll and Sutherland Highlanders, who have been stationed at Wynberg since July 6 last, will return to Cape Town on Friday next, and will be quartered in the main barracks, which have been thoroughly renovated during the absence of the regiment. The 91st Regt. and the rest of the military, who have been our neighbours for many months, will leave behind them the very highest reputation for good discipline and friendly behaviour. It has been a pleasure to have such soldiers and officers in the neighbourhood. Although everything possible has been done by Colonel Robley to promote the comfort of those under his command, and to lessen the tedium of camp life by affording means of recreation and amusement, we have no doubt the order to return to quarters will be received with satisfaction, as such a lengthened stay under canvas, together with the restrictions as to bounds, to which the soldiers were necessarily subjected during the late epidemic, tended to become tiresome, and the change to comfortable quarters, with greater liberty as to the limits to be observed, will be gladly welcomed. The regiment has sustained the loss of a highly-esteemed officer, by the death of Capt. Caudwell, which took place on Jan. 2, during his absence on leave in England. Capt. Caudwell served in the corps for nearly 23 years, during the latter five of which he was paymaster. A shooting match took place on Wednesday last between fifteen officers of the battalion and a similar number of officers of the D.E.O.V. Rifles. The Martini-Henry rifle was used, the distances being 200, 500, and 600 yards, and the scores were respectively 922 and 837 points, the Highlanders being the winners by 85 points."

95TH SHERWOOD FORESTERS (DERBYSHIRE REGIMENT). Capt. St. John has resigned the adjutancy of the 5th Batn., which he has held since Dec. 1880, for the purpose of becoming a probationer for an appointment in the Army Pay Department.

97TH QUEEN'S OWN (ROYAL WEST KENT REGIMENT). Major Jameson has been ordered to Maidstone for two years' duty with the depôt.

99TH WILTSHIRE REGIMENT. Lieut. Johnson, a probationer, wing-officer 24th Bengal N.I., is about to be admitted to the Bengal S.C.

100TH LEINSTER REGIMENT. Lieut. Willocks, who has arrived home from India, has been granted nine months' leave, on private affairs.

101ST ROYAL MUNSTER FUSILIERS. Major W. H. Warner, capt. on the Retired List, late Capt. of Invalids, Royal Hospital, Chelsea, died, after a short illness, on the 15th inst., aged 44 years. Major Warner joined the Army Dec. 13, 1856, and served in the Mutiny Campaign (medal, with clasp).

104TH ROYAL MUNSTER FUSILIERS. Capt. Evans is a candidate for an appointment in the Pay Department, and has been attached on probation to the Pay Office at Malta.

PAY DEPARTMENT. The following changes have taken place during the past month:—Major Forbes, on passage to Ceylon, to relieve Major Ewing; Majors Chauncy, from leave, to the 22nd Regimental District, Chester; Spiller, from the 19th Hussars, to the 74th Regt.; Whittington, from leave, to the 20th Regimental District, Bury; Capts. Griffith, from the 74th Regt., to Unattached List; Compigné, on passage to Ceylon; Brockman, on passage to Bermuda; Jackson, from the 43rd Regimental District, Oxford, to Unattached List; Graham, from the 100th Regt., to the 53rd Regimental District, Shrewsbury; Bromfield, from District Office, York, to the 1st Batn. 10th Regt.; Dempster, from the 28th Regt., to Unattached List; Reid, from the 1st Batn. 10th Regt., to the 108th Regt.; Maycock, 64th Regt., to the Unattached List; White, appointed to the 1st Batn. 22nd Regt.; Assist.-Pymr. Beardmore, from the 22nd Regimental District, to the 66th Regt. Two officers have joined on probation, Capts. Hanstock and Colquhoun. There are eight Regimental Districts, three Cavalry, and twenty-seven Infantry regiments requiring paymasters—total, 38 vacancies—as follows: Regimental Districts—Taunton, Clonmel, Berwick-on-Tweed, Dorchester, Oxford, Reading, Sunderland, and Galway; Cavalry, 1st Dragoon Guards, 7th Hussars, and 19th Hussars; Infantry, 1st Batn. 3rd, 1st and 2nd Batn. 6th; 1st Batn. 8th, 2nd Batn. 11th, 2nd Batn. 13th, 1st and 2nd Batn. 15th, 2nd Batn. 19th, 2nd Batn. 24th, 28th, 31st, 52nd, 55th, 56th, 58th, 61st, 64th, 69th, 78th, 85th, 86th, 91st, 103rd, 106th, 1st Rifle Brigade, and 1st West India Regt. "Rama" writes:—"Although the fact of not having an officer of the Army Pay Department to represent its members at the War Office has, no doubt, some influence in causing combatant officers to hold back from entering the department, yet, from frequent converse with many such, it appears to me that the great stumbling-block in their way is the obligation to serve for 30 years, and that were a fair retiring allowance after 20 and 25 years' service offered, lodging allowance assured under all circumstances, and servants' allowance made optional, the Department would soon become popular, and no difficulty would be experienced in keeping its ranks always recruited and with the best men available."

VETERINARY DEPARTMENT. The services of 1st-Class Vet.-Surg. A. E. Queripel, assistant-superintendent of horse-breeding operations to the Punjab, being no longer required in the horse-breeding department, have been placed at the disposal of the Commander-in-Chief in India.

The Auxiliary Forces.

MILITIA.

SHERWOOD FORESTERS (DERBYSHIRE REGIMENT). The recruits of the 4th Batn. (late Nottingham) assembled at Newark on Monday for 83 days' preliminary drill, under command of Major McCleverty. The whole of the recruits were individually inspected on the day of assembly, and finally approved by Col. the Hon. R. H. de Montmorency, commanding 45th Regimental District. He expressed his satisfaction at the general appearance and physique of the men. They are billetted in the town. The strength present at head-quarters is 8 officers, 30 serjeants, 9 drummers, and 380 rank and file. The officers present are Capts. Keyworth and Bradish, Lieuts. Good, G. M. Eyre and V. Eyre, Qrmr. Birch, and Surg. Greenwood.

THE VOLUNTEERS.

LONDON RIFLE BRIGADE. We regret to announce the death of Lieut.-Col. Ewens, which occurred on Thursday, the 15th inst. The deceased officer commenced his military career in an English Militia regiment (that of his native county, Dorsetshire, we believe). He was soon after appointed to the 30th Regt., and on the formation of the 4th Batn. of the 60th Rifles, Lieut. Ewens was transferred to that regiment, and appointed adjutant of the newly-raised battalion. After serving a few years in the 60th, Lieut. Ewens retired from the Army. He afterwards joined the Highland Borderers Militia as captain. Soon after the enrolment of the London Rifle Brigade, Capt. Ewens was appointed its adjutant, and when he vacated that post in October last, he was the senior adjutant in the Volunteer Force. He became major in the London Rifle Brigade, with the honorary rank of lieutenant-colonel. His loss is much deplored by the regiment, the high reputation of which he was in a large measure instrumental in building and maintaining.

23RD MIDDLESEX (LONDON AND WESTMINSTER) RIFLES. This regiment proceeds to Wimbledon on Saturday next, under Lieut.-Col. Routledge, to practise route-marching and extended-order drill. Lieut. R. G. Routledge will be on the Staff of Col. Hon. P. S. Methuen, C.B., Scots Guards, during the march to Brighton.

24TH MIDDLESEX (POST-OFFICE) RIFLES. The officers and their friends, to the number of about 50, dined at Limmer's Hotel on Monday evening, under the presidency of Col. H.S.H. the Duke of Teck, G.C.B.

AN UNPUBLISHED LETTER OF LORD NELSON'S.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I shall be very much obliged if you would insert this "unpublished letter of Lord Nelson's" in your popular journal. The letter can be seen in Add. MSS., "Haldimand" Collection, British Museum, 21,800, f. 342 (1778-1784).—I am, &c., W. B. TOBIN.

22 Brompton Square, London, S.W., Jan. 24.

"*Albemarle, Quebec, October* 12, 1782.

"SIR,—Upon my application to the captain of the port for a pilot for the Gulph of St. Lawrence, 'John White,' he informed me that the only pilot for the Gulph was kept by your order. Therefore, if the service you keep him for is not of greater consequence than the service he is wanted for at present, I must request that the captain of the port may be ordered to send him with me.—I am, Sir, your humble servant, HORATIO NELSON.

"To his Excellency General Haldimand."

[Short, and to the point.—ED. *A. & N. G.*]

ESPIONAGE IN THE NAVY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The un-English proceeding of the Admiralty in encouraging anonymous communications from subordinates is an insult to the service. In these days, when the race for advancement is so eager, it may be that some will endeavour to reach the goal by any means, however dishonourable, but let us hope they will be few, indeed. Oddly enough, I have just heard that a seaman of the flag-ship at the Cape of Good Hope has been tried by court-martial, charged with writing three anonymous letters, and attempting to stir up a disturbance on board, for which he was sentenced to two years' imprisonment and dismissal from the service. How will their Lordships deal with his case? Shall we see this sentence revoked, and the seaman bloom into a petty officer? as, of course, he meant well by the anonymous letters; and the attempt at a disturbance, —well, it was probably the result of others not seeing the matter in its proper light. —I am, &c.,

FIDUS ACHATES.

Rear-Admiral F. A. Herbert will, it is said, replace Admiral Sir William Mends as Director of Transports. If this is the case, Capt. Codrington will, it is believed, be offered the Directorship of Naval Ordnance, and Capt. John A. Fisher, C.B., the command of the Excellent.

The Channel Squadron arrived in Cascaes Bay on Thursday, March 1. The Sultan, from Gibraltar, joined them the next afternoon, when they proceeded into the Tagus, and anchored off Jacob's Ladder, a little below Belim, for the night, with the intention of going on early the next morning. On Saturday morning a thick fog had set in, which occasioned a delay in starting. It lifted at about 10 o'clock, and the squadron weighed anchor and proceeded up the river. Soon after passing Belim Castle, however, the fog set in again as thick as ever, and the ships had to keep station and moor by fog-signals. They succeeded in doing so with great accuracy, and without any mishap. When the fog finally cleared off, the ships were all found to be in their right places, and there was no necessity to make the unwelcome signal, "Shift berth," to any of them. Unhappily, another fatal accident has to be reported. The Achilles lost a man through a fall from aloft, while hoisting out boats. During the last week, the usual routine of drills, &c., has been suspended, while the ships have undergone a slight refit, coaled, and given general leave. The admirals and captains were received by Don Ferdinando, the ex-King, on Wednesday, and by the King on Thursday. Cricket matches have been played; on Thursday, between the ships' companies of the Minotaur and Sultan, the latter being successful; and on Friday, when the officers of the squadron beat the Lisbon Club. The squadron have been informed by signal that they will call at Gibraltar on their way to Madeira. circus also proves very attractive to both officers and men. The weather is fine, but cold. Boat work, always unpleasant in the Tagus, is more than usually so, as spring tides are making; and, owing to the fog at the time of anchoring, the ships are rather farther down the river than they generally lie. The squadron left for Gibraltar on Monday last, arriving there on Thursday, and will leave again this day for Madeira.'

A correspondent asks us to give him some information as to the origin of the word "Lance," as prefixed to the titles of corporal and serjeant. We hope some of our readers will send us a satisfactory answer to the question.

The Penelope, guardship of the Naval Reserve, having completed her refit and repair, was to have left Sheerness on Friday last, to resume her duties at Harwich. She was, however, run into by a steam collier, and has been seriously damaged. When repaired, she will proceed on the annual cruise with the seamen of the Royal Naval Reserve.

The Navy.

ADMIRALTY, March 9, 1883.

The under-mentioned Surgeons have been promoted to the rank of Staff Surgeon in her Majesty's Fleet, with seniority of March 7, 1883:—Richard John Barry and Gerard James Irvine.

Assistant-Paymaster George Augustus Frederick Cunyngham Sceales has been promoted to the rank of Paymaster in her Majesty's Fleet, with seniority of March 7, 1883.

ADMIRALTY, March 10, 1883.

The following promotion has been made:—Lieutenant the Hon. Hedworth Lambton to be Commander in her Majesty's Fleet, with seniority of this date.

Royal Marine Light Infantry.—Lieutenant William John Langford, of the Staff Corps, has been permitted to revert to the Royal Marines, with his original seniority of September 19, 1877 (dated Feb. 24, 1883).

The notification in the *London Gazette* of March 8, 1883, of Lieutenant Charles Char*n*ier being appointed a probationer for the Staff Corps, should read Lieutenant Charles Cha*m*ier.

ADMIRALTY, March 12, 1883.

Staff Surgeon George Maclean, M.A., M.B., has been promoted to the rank of Fleet-Surgeon in her Majesty's Fleet, with seniority of March 2, 1883.

ADMIRALTY, March 13, 1883.

Royal Naval Artillery Volunteers (London Brigade).—Charles Swaby Smith, Esq., M.R.C.S., to be Surgeon (March 13).

ADMIRALTY, March 15, 1883.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and November 29, 1879, Lieutenant Thomas Harvie Shersby Robertson has been placed on the Retired List from the 13th inst., with permission to assume the rank and title of Retired Commander from that date.

Assistant-Paymaster Thomas Willoughby Hall has been promoted to the rank of Paymaster in her Majesty's Fleet, with seniority of March 13, 1883.

APPOINTMENTS.

Captains—William H. Maxwell, to the Neptune; Arthur T. Brooke, to the Opal.

Commanders—George A. G. Grey, to the Northampton, additional, for service in the Fantôme, when commissioned; Hon. Foley C. P. Vereker, to the Magpie, vice Carpenter; Arthur G. Fullerton, to the Algerine, vice Allen, invalided.

Lieutenants—William J. Moore, to the Excellent, additional, to re-qualify in gunnery; Frank A. Harston, to the Alecto, in command; Stephen H. Thompson, additional, to the Hector, for service in the Avon, tender; Peter O. Cazalet, to the Alecto, additional, in lieu of a navigating sub-lieutenant; Arthur Y. Moggridge, to the Crocodile; Thomas E. Maxwell, to the Antelope, in command, when recommissioned; Algernon B. G. Grenfell, to the Lion, vice Meldrum; Sackville H. Carden, to the Antelope, re-recommissioned.

Navigating Lieutenant—Frederick C. A. Crooke, to the Indus, additional, for the Royalist.

Sub-Lieutenant—Lionel H. Hordern, to the Antelope, recommissioned.

Midshipman—Michael Culme-Seymour, to the Monarch, supernumerary.

Staff Surgeon—Gerard J. Irvine, to the Espiègle, vice Dunlop (Mr. Dow, lent to the Espiègle from the Nelson, returning to that ship).

Chief Engineers—George Rigler, to the Northampton, additional, for service in the Fantôme, when commissioned; John Bettison, to the Penelope; Reginald C. Oldknow, to the Neptune, commissioned.

Surgeons—John L. Baynall-Oakeley, to the Alecto; John Wilson, M.D., to Plymouth Hospital, vice Barry; Horatio S. R. Sparrow, to the Diamond, vice Irvine.

Assistant-Paymasters—James Maxwell, to the Repulse, vice Inch; William Le G. Pullen, to the Valiant, vice Crooke; Frederick W. J. Airey, to the Alexandra, supernumerary; George W. H. Maggs, to the Alecto, in charge, when recommissioned; Henry H. Rickard, to the Hercules, vice Sceales, promoted; Henry A. Malaher, to the Antelope, recommissioned.

Engineers—Robert C. Moon, to the Alecto; George Elliott, to the Lord Warden; William Pearson, to the Hercules, additional, for service in the Hawk, tender; James Barre, Henry Attwood, and William H. Pibworth, to the Neptune, commissioned.

Assistant-Engineers—William Fedarb (b.), to the Alecto; John S. Slade and Thomas Branton, to the Neptune, commissioned.

Carpenters—Henry Hill, to the Indus, additional, for Pelican; William Thomas, to the Indus, additional, for the Prince Albert, vice Eddy; Edward H. G. Rosevere, to the Northampton, additional, for service in the Fantôme, when commissioned; William Cleverly, to the Hibernia, for the Orion.

Clerk—William F. Horniman, to the Pembroke, vice Maggs.

Gunners—Alfred H. Churchill, to the Cambridge, additional, for service in the Foudroyant; Richard Daly, to the Alecto; William Walsh (a.), to the Hector, additional, for service in the Avon, tender; William Daly, to the Indus, additional, for the Royalist; John T. Newland, to the Penelope, vice Russell; John H. Wells, to the Asia, for the Volage, vice Newland; Christopher H. Deighton, to the Excellent, vice Wells.

Boatswains—Edward A. Smith, to the Indus, additional, for the Royalist; J. Vincent, to the Antelope, recommissioned; George W. Watkins, to the Boscawen, vice South.

Coastguard.

Chief Boatmen—George Beabey, Lowestoft, to be chief boatman-in-charge, Woodbridge Haven, vice Vandeleur, pensioned; Charles Boyle, Ryde, to be chief boatman-in-charge, Hamble River, vice Drowley, promoted.

Commissioned Boatmen—Michael Coady, Pitt's Deep, to be chief boatman, Dungeness, vice Wolfe, promoted; John Ramson, Ventnor, to be chief boatman, Bognor, vice Tatler, promoted; John G. Thompson, Garrison Point, to be chief boatman, Lowestoft, vice Beabey; Samuel Dean, Bridport, to be chief boatman, Cawsand, vice Borlase, discharged.

Algerine, Com. Allen, was at Simon's Bay on Jan. 23, and was to leave on Feb. 10 for St. Helena, and remain until March 19, when she will join the flag at St. Paul de Loanda, and afterwards proceed to Cape Coast Castle.

Boadicea, Capt. Church, flagship of Rear-Admiral Noel Salmon, V.C., Commander-in-Chief on the Cape of Good Hope and West Coast of Africa station, was at Sierra Leone up to Feb. 12, and would leave on Feb. 19 for Cape Coast Castle.

Briton, Capt. Andrew J. Kennedy, was at Simon's Bay on Jan. 23, and will proceed to Zanzibar early in April, calling at intermediate ports.

Carysfort, Capt. H. Stephenson, C.B., after landing Admiral Lord Alcester at Marseilles, proceeded thence to Malta and Port Said, there to assume the duties of senior Naval officer. Mails to Port Said.

Champion, Capt. Pasley, was at Singapore up to Feb. 9; on arrival of Himalaya would proceed to Penang (Himalaya arrived 13th inst., and would leave for Colombo on the 14th inst.) The Lily awaiting relief by Linnet, which passed Colombo on Feb. 2. The Foxhound would proceed to Penang on Feb. 11, and return to Singapore, on relief by Champion.

Crocodile, Capt. H. Hand, arrived at Portsmouth on March 11, with drafts numbering about 1,120 officers and men from Bombay, and left again on Friday.

Dasher, Com. C. E. Reade, arrived at Portsmouth on March 11.

Enchantress, Staff Com. Hills, arrived at Portsmouth on March 11, with Admiral Lord Alcester.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., Commander-in-Chief on the East Indies station, was at Rangoon up to Feb. 15; left Trincomalee on Feb. 7, arrived at Rangoon on Feb. 12, and would leave for Calcutta on Feb. 20. The Tourmaline was at Bombay, making good defects, and would be ready for sea on March 1. The Philomel left Bushire on Jan. 30, and arrived at Bombay on Feb. 9; was preparing to pay off and recommission on arrival of new crew in the Wye. The Woodlark, attached to the Persian Gulf-Division, was waiting arrival of the Eclipse at Bushire, and relief by the Arab. The Dryad arrived at Zanzibar on Feb. 12. The Ranger left Colombo on Feb. 8, and arrived at Trincomalee on Feb. 10; remains at Trincomalee until the return of the Euryalus from Calcutta. The Osprey, cruising in the Red Sea, arrived at Aden on Feb. 23, and will proceed thence to Zanzibar. N.B.—Was at Aden on Feb. 28. The Arab was at Bombay, making good defects after steam trial, and will leave Bombay for the Persian Gulf on Feb. 20. The Harrier and Undine were cruising in the Mozambique Channel and neighbourhood of the Comoro Islands, for the suppression of the slave-trade.

Flirt, Com. Hammick, was at Cape Coast Castle on Feb. 19, and would leave for Ascension after the Admiral's inspection. The Pioneer, Bullfrog, and Wrangler were at Cape Coast Castle, and would remain in Bights to meet the Commander-in-Chief at Cape Coast Castle on Feb. 22.

Monarch, Capt. Fairfax, C.B., A.D.C., at Port Said, will return to Malta after the departure of the Royal Marine battalion in the Nepaul, about the 11th inst. Mails to Malta.

Nelson, Comdre. J. E. Erskine, A.D.C., was at Hobart up to Jan. 29; would leave for Sydney about the end of Feb.; was at Sydney on March 10. The Diamond arrived at Hobart on Jan. 12 and the Espiègle on Jan. 26; both would leave for New Zealand about the end of Feb. The Miranda at Sydney Jan. 28; about to proceed to Brisbane and Fiji, with prisoner and witnesses in Jabberwock murder trial. The Lark, at Auckland Jan. 19, would leave for Lyttelton middle of March. The Beagle, Sandfly, and Renard were at Sydney on Jan. 27.

Opal, Capt. Arthur T. Brooke, was commissioned at Sheerness on March 13.

Starling, Lieut. and Com. Saunders, was at Ascension Feb. 2; sailed on that date for St. Paul de Loanda, and would remain in the South Sub-division, West Coast, until further orders.

Sultan, Capt. W. Hunt Grubbe, K.C.B., left Gibraltar on Feb. 27, arriving at Cascaes Bay on March 2, with the Channel Fleet, and weighed and anchored for the night in the Tagus, below Belem. The Fleet weighed next morning, and moored off the town. After weighing, a very thick fog came on, lifting at intervals, and, considering that at the time of anchoring the ships could not see each other, it was lucky that when the fog cleared they found themselves in very good position. In getting out the boats, one poor fellow on board the Achilles, who was hooking the stays, overbalanced himself and fell from aloft; he was buried next day. The Sultan, on her way from Malta to Gibraltar, called in at Port Mahon for five or six days—a splendid anchorage, wherein the various qualities of the boats were tested in races which the Commander gave prizes for, in the shape of bags of potatoes, &c. Two days were spent at sea, firing at a target, the opportunity being taken advantage of to expend the quarter's ammunition and get through the quarterly exercise with torpedoes. The result of the prize-firing of the Mediterranean Fleet has just been made known. The Sultan is second ship, taking the guns as a whole, but one of her guns made the highest number of points in the Fleet. Since arriving at Lisbon, the ships have been refitting, coaling, and giving 24 hours' general leave. The Squadron was to weigh anchor and proceed on March 12 for Madeira.

Temeraire, Capt. H. F. Nicholson, C.B., is at Corfu. Mails to Corfu.

A serious accident took place on Wednesday on board the Defence, lying in the Mersey. The vessel had been on a cruise for firing practice, and while the anchor was being weighed, in order to return her to her regular moorings, the capstan took charge, and 20 men were more or less injured, two of them, named Samuel Riley and Thomas Sertin, being taken to Birkenhead Hospital with broken legs, the latter having also a shocking wound in his head. Why were not the pauls down?

The Neptune, on being commissioned at Portsmouth on the 28th inst., is ordered to be supplied with gunnery men from the Cambridge, owing to a scarcity of men for draft on board the Excellent.

ADMIRAL LORD ALCESTER.

Admiral Lord Alcester reached Portsmouth in the Enchantress early on Sunday morning last, from Cherbourg. Lord Alcester embarked at 5 o'clock on Friday afternoon, shortly after which the weather became so boisterous that not only was it found undesirable for the yacht to leave her moorings, but also impossible to communicate with the shore. The storm continued with unabated violence throughout Friday night and Saturday. As evening approached, the gale began to moderate, and at 5 o'clock the Enchantress left the anchorage at Cherbourg for Portsmouth. She encountered heavy head winds all the way across, and on anchoring at Spithead at midnight her deck and spars were covered with snow. In the meantime great preparations had been made by Admiral Sir G. T. P. Hornby, the Commander-in-Chief at Portsmouth, for according Lord Alcester a suitable reception. It was arranged that, as the Enchantress approached the harbour, the Admiral should be received with salutes of 17 guns from the Duke of Wellington and St. Vincent, and that the crews should man the rigging and cheer as she passed. On the jetty at the appointed time, a guard of honour was drawn up, composed of seamen gunners of the Excellent and 80 Blue-jackets, under Lieut. Poulter, who had served during the Egyptian Campaign, while the band of the Royal Marines was drawn up in the rear to receive his lordship with musical honours. All the captains and commanders of the port, with a couple of lieutenants from each ship, were also officially in attendance, in undress uniform, with cocked hats and epaulettes, as well as a strong body of the Metropolitan Police. Among others who were waiting the arrival of the Admiral were Prince Edward of Saxe-Weimar and his staff, Admiral Sir A. Cooper Key, Admiral Hornby, Lord Colville, Cols. Mawbey and Bennett, the Commandants of the Marine Divisions at Eastney and Forton, the Mayor of Portsmouth, Col. Tulloch, and a number of military officers. A luncheon had also been provided at Admiralty House. The day was intensely cold, and time dragged heavily. At 2 o'clock, it became generally known that the Enchantress had not left Cherbourg, and, as she could not possibly arrive until evening, the parade was abandoned, and band and sailors returned whence they came. After lying at Spithead for the night, the Enchantress steamed into harbour on Sunday morning shortly after 7 o'clock. There was only a solitary policeman on the jetty, as she drew alongside with the Admiral's flag flying at the main, and the whole proceedings presented a strong contrast to the animation of the previous day. In the course of the morning, Lord Alcester, accompanied by Lieut. the Hon. Stanley C. J. Colville, flag-lieutenant, waited upon Admiral Hornby, at Admiralty House, and on his return to the yacht Lord Alcester was visited by Prince Edward of Saxe-Weimar, Admiral Sir Henry Keppel, Capt. Fisher, and Capt. Codrington, of the Excellent. At half-past 11 Lord Alcester left Portsmouth by special train for Clapham Junction, Admiral Hornby, Capt. Codrington, Capt. Colomb, and Col. Sir Owen Lanyon attending at the station to shake hands. At Clapham there was a train in waiting to convey Lord Alcester to Windsor on a visit to her Majesty. Windsor was reached at 2.25 in the afternoon. His Lordship alighted at the Royal waiting-rooms, where he was met, on behalf of her Majesty, by Col. the Hon. H. Carington and Lord Methuen. He was loudly cheered by a number of non-commissioned officers and men of the 1st Batn. Scots Guards, wearing the Egyptian medals, and assembled in the Datchet Road. It being Sunday, very little was known in Windsor of Lord Alcester's expected visit. On Monday, Admiral Lord Alcester took leave of her Majesty and left Windsor for London, arriving at Paddington at 11.15 a.m., where he was met by the First Lord of the Admiralty and Capt. Tryon. Lord Alcester then drove to the Admiralty with Lord Northbrook and took his seat at the Board at 12 o'clock, in the room of Lord John Hay, who has assumed the duties of Commander-in-Chief in the Mediterranean. Lord Alcester has appointed Mr. A. J. Clayton his private secretary, that gentleman having acted in the same capacity to Vice-Admiral Lord John Hay, when at the Admiralty. Last night the Earl of Northbrook entertained Lord Alcester at dinner at his official residence, H.R.H. the Duke of Cambridge, the Duke of Edinburgh, and other distinguished officers being among the guests. Lord Alcester was the guest of the Marlborough Club on Wednesday, and he will shortly be entertained at dinner by the members of the United Service Club. Several other banquets and festivals are in course of preparation to give the gallant Admiral a fitting reception on his return home from active service in the East.

Letters addressed to the Seagull will reach her at Gibraltar up to April 16.

At a recent full meeting of the Committee of the Royal Naval Female School, Admiral the Hon. Arthur Duncombe in the chair, Miss Jemima Leys, an old pupil of the school, was elected lady governess (*nem. con.*) from a list of 40 candidates, in the place of Miss Quinan, who is resigning on account of ill-health. Miss Leys has been engaged in teaching ever since she left St. Margaret's 14 years ago, latterly as head mistress of the High School at Farnworth. The Committee have every reason to believe that Miss Leys will not only bring her experience but a hearty devotion to work, for the best interests of the school, to which she is bound by ties of gratitude and affection. We sincerely trust that the good reputation which this excellent institution has so long enjoyed will be thoroughly maintained under the rule of the new lady principal, with whom rests our best wishes of success.

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

EGYPTIAN WAR FUND.

THE SAME LIBERAL DISCOUNT ALLOWED TO MEMBERS.

P. M. C.
ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures at their wholesale-trade Prices, which are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have taken this course of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,
PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

SPECIAL NOTICE.
TO THE NOBILITY AND GENTRY.
WM. PUGH (many years coat-cutter at Messrs. Poole's, Saville Row), having succeeded to the old-established first-class business of Jackson and Co., 5 CORK STREET, BOND STREET, respectfully solicits the patronage of the Nobility and Gentry.
Best trade only, at fixed, fair prices, and 10 per cent. allowed for prompt cash.
N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready-money entitles them to.
WILLIAM PUGH (from Poole's), 5 CORK STREET, LONDON, W.

&c., &c.

BOOKS, Etc., RECEIVED FOR REVIEW.

Wyld's Plan of the Volunteer Review (J. Wyld)—The Interpreter, by G. J. Whyte-Melville (Longmans and Co.)—Professional Papers of the Corps of Royal Engineers, Vol. 7, 1882 (E. Stanford)—Tea, the Drink of Pleasure and of Health (Field and Tuer)—India in Six and Australia in Sixteen Days, by W. Campbell (W. H. Allen and Co.)—Croesus's Widow, by Dora Russell, 3 vols. (J. and R. Maxwell)—Report of the State of the Militia of the Dominion of Canada (Ottawa: Maclean, Roger, and Co.)—The Emigrant's Guide, 1883 (Pitt and Scott).

NOTICES TO CORRESPONDENTS.

ENQUIRER.—1. The relief of Candahar. 2. No. 3. No. 4. No.
BRONZE STAR.—We do not see that any useful purpose would be served by the adoption of your suggestion.
MAJOR-GENERAL.—The order was published in our issue of March 10.
AUDAX.—Apply through your own orderly-room. All depends on your own commanding officer.
J. R. R.—Yes, certainly.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenchaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.
LONDON, SATURDAY, MARCH 17, 1883.

IN the House of Commons, last Monday, Mr. Whitley asked the Secretary of State for War, "Whether it was true that of the Army Pay Department in the Egyptian Campaign, numbering over 30 officers, only one had received any acknowledgment of his services, whereas other Departments had been widely recognised; and, if so, what reason there was for thus passing over a Department which had been officially acknowledged to have well performed its responsible duties." Sir A. Hayter replied,—"The duties of the officers of the Pay Department are rarely such as to call for the display of those qualities which are rewarded by honorary distinctions in the time of active service. They do not, as a rule, necessitate officers going under fire. As a matter of fact, Lord Wolseley only recommended Colonel Olivey, the Chief Paymaster, for a distinction, whose services were specially arduous, and he received a Companionship of the Bath; but he expressed his satisfaction in despatches at the way in which the officers of the Department performed their duties in Egypt, and they will all receive the war medal and the Egyptian star." It would appear, therefore, that because the duties of the officers of the Pay Department necessarily preclude them from being under fire, responsible work at the base during a campaign does not entitle an officer to any recognition of his services. This is, indeed, a startling doctrine, particularly when we note the decorations and promotions given to the officers of the Commissariat and Ordnance Store Departments, most of whom were similarly detained by the exigencies of the service, either at Ismailia or Alexandria, and therefore never saw a shot fired. For of the Commissariat, over 21 per cent. were honoured, 12 being decorated by the Khedive, three made C.B.'s, and three promoted; and of the Ordnance, 45 per cent. were honoured, five being decorated by the Khedive, one made a C.B., and three promoted. Considering that the Director of Army Clothing at Pimlico was given a Civil C.B., in the same (supplementary) *Gazette* in which Colonel Olivey's arduous services were acknowledged by a similar Civil C.B.-ship, and that many officers, both Staff and Departmental, such as Colonel Sir O. Lanyon, Lieutenant-Colonel H. G. MacGregor, Lieutenant-Colonel Dawes, Deputy-Commissary-General

Russell, Assistant-Commissary-General Morgan, Deputy-Assistant-Commissary-General Mills, all of the Ordnance, and Assistant-Commissary-General Randall and Reeves, of the Commissariat, &c., who were decorated or promoted, never left Alexandria or Ismailia, as the case might be, until after Tel-el-Kebir, it is simply ridiculous to urge that honorary distinctions, as Sir A. Hayter defines "decorations and promotions," were confined to those who were actually at the front. When it is known that five-sixths of the officers of the Army Pay Department in Egypt were old combatants of long service, half having previous service in the field, the treatment of this Department, compared with others in Egypt, is simply disgraceful. At the present time, there are only seven officers on probation to fill up some forty vacancies. In the discussion on the Army Estimates last Monday in the House, some changes favourable to the Department which have been often urged in these columns were announced. But from all we hear, we feel convinced that candidates will not come forward to join a Department which has been treated in almost every respect, but notably as regards the recent campaign, differently to all other Departments in her Majesty's service.

The speech of the Secretary of State for War in the House of Commons last Monday, and the Army Estimates themselves, indicate that the following points as regards the Army Pay Department will be carried out very shortly:—1. The number of Chief Paymasters to be increased from 12 to 15. 2. Honorary rank of Major to Paymasters after five years' service in the Department for those who joined before June, 1881, and after 10 years' service for those who joined after that date. 3. Retirement after 25 years' total service, and in cases of ill-health and other causes before that service, on the same rates as combatant officers. 4. Lodging allowance or quarters. 5. Servant's allowance optional. 6. The formation of a corps of clerks. 7. Increased facilities for officers obtaining leave by the employment of another officer on extra pay. These points will be embodied in a Royal Warrant, and we have reason to believe that Chief Paymasters will be called upon to perform administrative duties in their respective districts, and that there will be a rearrangement of the honorary rank now held in the several grades.

The death of Major-General J. Mitchell, C.B., R.A., and the retirement of Major-General Evans, R.A., promotes Colonel Sir R. Biddulph, K.C.M.G., R.A., Governor of Cyprus, to Major-General's rank.

It was recently stated in the House of Commons that 25 regiments required Paymasters. A reference to our "Regimental Intelligence," under the heading "Pay Department," shows that that number is now considerably within the mark, there being, according to the current *Army List*, three Cavalry regiments, twenty-seven Infantry regiments, and eight Regimental Districts without Paymasters, making a total of thirty-eight vacancies, though in a few instances officers who have retired from the Department are serving temporarily in the latter. We also understand that more officers are urgently wanted for finance duties both in South Africa and Egypt; hence it will be seen that the figures above, which indicate that the Department is more than 12 per cent. under its establishment, do not exaggerate the numerical inefficiency; and this unsatisfactory state of affairs is further illustrated by the fact that numbers of officers are anxiously looking forward to the chance of retiring at the earliest possible date. For this condition of things, we are indebted to the brilliant administration of the War Office during the last five years, and we feel that such results must lead the new Secretary of State for War to acknowledge that the government of the Army Pay Department by an officer of its own might by worth a trial, at any rate.

We understand a very large number of Artillery officers—at least seventy per cent.—are in favour of the break-up of the Royal Regiment, and the separation of the mounted and dismounted branches, but are prevented from expressing their views, which are at variance with the powers that govern this portion of the Scientific Corps.

In a recent gazette Captain of Orderlies D. Pringle, Army Hospital Corps, was placed upon half-pay "on reduction of establishment." This is such a strange proceeding, and one so manifestly unfair to the British taxpayer, that we trust some Member may take notice of it in the House of Commons, as we cannot believe that Lord Hartington can really be aware of the serious waste of public money that Captain Pringle's retirement entails. Captain Pringle was some time since Staff Officer of the Army Hospital Corps at headquarters, his salary being £182 10s. per annum. By a marvellous piece of official manœuvring he has been got rid of, and his duties have been undertaken by a couple of Medical officers, who carry them out much less efficiently at a cost to the State of £1,300 per annum. Hume once remarked "I can detect a penny miscalculated in the estimates, but they put on a pound for every penny I take off." Now we have always objected most strongly to any interference with the Army Hospital Corps. The corps was essentially a cheap organisation, and its officers were men who had risen by merit to the commissioned ranks. The only effect of the recent changes has been to treble expense, and this without in any way increasing efficiency. Such "reform" is, to say the least of it, ill-judged, and we cannot think that the financial authorities at the War Office can have had their eyes as open as they might have been when they sanctioned Captain Pringle's removal from his appointment as Staff Officer, A.H.C. Leaving out of the question the injustice done to a deserving soldier, we hold that a serious wrong has been done to the tax payer, for a medical officer, with his professional education, can be better employed than doing work such as that which devolves on the officers and non-commissioned officers of the Army Hospital Corps.

Lieutenant J. G. Bagnell, 15th Regiment, has been appointed a Lieutenant Instructor at the School of Musketry, Hythe.

The War Office have recently received information of the death in Broadmoor Criminal Lunatic Asylum of Captain John Goode, late of the 10th Regiment, who in 1837 committed a gross outrage upon the Queen, and was subsequently tried at Queen's Bench for sedition. Captain Goode was sent to Bethlehem as insane, and was subsequently admitted to Broadmoor, where he died from natural decay at the advanced age of eighty-nine. Few careers have been more sad. Captain Goode, a young man well connected, entered the Army in 1811, and saw considerable service in our last war with the United States, serving under General Ross in the operations in the *Chesapeake*, at the battle of Bladensburg, capture of Washington and Alexandria, action near Baltimore, and destruction of the American flotilla. In 1815, he was at the attack and capture of Guadaloupe. Eleven years later, he joined the 10th Foot as a subaltern, and was promoted to an unattached company in 1835. He had long harboured the delusion that he was entitled to the Throne of England, and on her Majesty's birthday, May 24, 1837, was taken into custody for creating a disturbance and forcing his way into Kensington Palace. After his release, the unfortunate man found his way into Birdcage Walk, and accosting the Queen on her way to Buckingham Palace, made use of obscene language, shook his fist in her Majesty's face, and announced his intention of replacing her Majesty on the Throne. He was subsequently taken into custody, and was tried as above stated. To his dying day, he adhered to the delusion that he was the son of George IV. and Queen Caroline, and consequently entitled to the Throne. It having been proved that he was insane, the War Office very properly declined to deprive him of his commission, and had regularly remitted his half-pay for the past forty-six years to the proper authorities.

It is proposed by the Army Estimates for 1883-4 to convert the Grand Store, at Gibraltar, into barracks, for 450 men.

The Militia Return for 1882 shows an extraordinary deficiency in the Permanent Staff of the Infantry, when in England no less than 100 serjeants and 65 drummers are required, and in Scotland 24 serjeants and 13 drummers. It would be supposed the authorities would have taken the greatest care in keeping always complete this valuable staff.

The state of the Yeomanry for 1882 does not appear to us very satisfactory. Out of an establishment of 14,458 officers and men, there was a deficiency of 3,364, including 12 serjeants of the Permanent Staff. The regiments which show the greatest deficiencies are the Warwick, 178 of all ranks; Wilts, 153; 1st West York, 152; Oxford, 151; Stafford, 150; North Somerset, 140; Lanark, 139; Montgomery, 133; Dorset and Gloucestershire, 127 respectively; 1st Devon, 126; East Kent, 122; Hampshire and Shropshire, 116 each; and West Somerset, 107.

The following is a complete list of the appointments made to the new Egyptian Army and Gendarmerie. For temporary employment in the Egyptian Gendarmerie, under Lieutenant-General Baker Pasha:—Majors S. M. J. Sunderland, 35th Foot; W. A. Smail, 75th Foot; and C. B. Gordon, 79th Foot. Egyptian Army:—Sirdaar and Chief of the Staff of the Army, His Excellency Major-General Sir H. E. Wood, V.C., G.C.M.G., K.C.B.; Aide-de-Camp to his Excellency the Sirdaar, with rank of Major, Lieutenant E. J. M. Stuart-Wortley, 60th Rifles; Adjutant and Quartermaster-General, with rank of Colonel, Lieutenant-Colonel T. Fraser, C.M.G., Royal Engineers; Assistant-Adjutant and Quartermaster-General, with rank of Lieutenant-Colonel, Captain F. G. Slade, Royal Artillery; Surveyor-General, with rank of Colonel, Major C. M. Watson, Royal Engineers. In command of 1st Brigade of Infantry, with rank of Brigadier-General, Colonel F. Grenfell, A.D.C., 60th Rifles. In command of Artillery, with rank of Colonel, Lieutenant-Colonel F. Duncan, Royal Artillery. In command of Cavalry, with rank of Lieutenant-Colonel, Lieutenant-Colonel A. Taylor, 19th Hussars. In command of batteries of Artillery, with rank of Major, Captain T. H. Wodehouse, Royal Artillery; Lieutenant C. S. Parsons, Royal Horse Artillery. In command of Infantry Battalions, with rank of Lieutenant-Colonel:—1st Battalion, Major H. C. Chermside, C.M.G., Royal Engineers; 2nd Battalion, Major C. H. Smith, 60th Rifles; 3rd Battalion, Major H. H. Parr, C.M.G., 13th Foot; 4th Battalion, Major A. S. Wynne, 51st Foot. Second in command of Infantry Battalions, with rank of Major:—1st Battalion, Captain T. O. Quirk, 41st Foot; 2nd Battalion, Captain A. Shakespeare, Royal Marine Artillery; 3rd Battalion, Captain C. B. Pigott, 21st Hussars. Second in command of Cavalry, with rank of Major:—Captain H. Kitchener, Royal Engineers. Supernumeraries, with rank of Major:—Captain A. C. Haggard, 25th Foot; Lieutenants R. A. Marriott, Royal Marine Artillery; C. C. Turner, 53rd Foot; D. Carter, Royal Artillery; H. M. L. Rundle, Royal Artillery; A. Sinclair, 1st Beloochee Regiment; A. Mantell, Royal Artillery; C. Davidson, 79th Foot.

The number of men who deserted from the Army in 1882 was 6,942, against 7,530 in 1881, and 9,299 in 1880.

Major-General H. A. Smyth, Royal Artillery, succeeds Lieutenant-General Hon. E. Gage, C.B., in command of the Woolwich District, as we anticipated. It is an interesting fact that the new Commandant is the most junior of the thirteen major-generals of Artillery on the Active List who, it was supposed, were fit for service.

Colonel R. Hay, Royal Artillery, is likely, we believe, to succeed Major-General Smyth as member of the Ordnance Select Committee.

It would seem that the Militia Force continues to show a steady and alarming falling-off in numbers. Whereas on January 1, 1882, the effectives stood at the grand total of 112,953 men (including the Irish Militia); on January 1, 1883, that strength had diminished to 106,054 men. The establishment voted by Parliament every year is 139,293 men, showing a net deficiency of over 33,000 men. It will, therefore, be interesting to know what steps the authorities are taking to keep up this most valuable force, unless it is intended it should in time disappear altogether.

On the abolition of the convict establishment at Spike Island, the Depôt Battery and Head-quarters of the so-called South Irish Division of Royal Artillery is expected to move up thither from Kinsale, we presume because there are no Militia Artillery at Queenstown. Such is Artillery localisation.

The force in Egypt after the approaching withdrawal of troops will consist of seven and a half battalions of Infantry, one Cavalry regiment, one battery Royal Horse Artillery, two garrison batteries Royal Artillery, and two companies of Engineers.

It is probable that the selection of Major-General Smyth, R.A., for a command will lead to the speedy retirement of Major-Generals H. P. Yates, C.B., N. O. S. Turner, C.B., E. A. Williams, C.B., and G. T. Field, Royal Artillery, who are now unlikely ever to be employed again.

No mention in the Army Estimates is made of any intention on the part of the authorities to raise the 4th Militia Battalion to the following territorial regiments, viz., Lothian, Northumberland Fusiliers, East York, East Lancashire, Cornwall, Hants, Dorset, South Lancashire, Welsh, Black Watch, Berks, Wilts, York and Lancaster, Duke of Albany's, and Gordon Highlanders. The King's Own Borderers remain as before, without any Militia whatever being attached to them. It seems strange, in such centres of population, at least, as Reading, Cardiff, Warrington, Burnley, Newcastle, and Aberdeen, that the necessary recruits cannot be obtained.

Two Distinguished Service Rewards of £100 per annum are vacant, one by the appointment of General E. S. Claremont to the Colonelcy of a regiment, the other by the death of General T. C. Smith.

The public attention is occupied, almost to the exclusion of other matters, by the attempted destruction on Thursday night of the offices of the Local Government Board in Whitehall, and by the simultaneous explosion at the printing offices of the *Times*. Though the former attempt fortunately effected little harm beside an extensive destruction of glass, and the latter proved futile, these outrages have caused general and reasonable apprehension. When the duration of massive public buildings seems precarious, and vague rumours of intended violence are afloat, it behoves the Government to take all possible precautions against the recurrence of such events as those we have mentioned. We would suggest their adding to the usual safeguards of the public peace by employing those trustworthy old soldiers, the Commissionaires, as extra watchmen or sentries. It happens that a larger number than usual of the corps are available for such duties at present. Should it be deemed expedient to arm the veterans, the rifle and bayonet, or the sword in some cases, would soon again be familiar to those hands which have often used them against their country's foes abroad, and might be depended upon to use them against traitors at home.

Reviews.

The Officer's Field Service Note and Sketch-Book, by Major Gunter, 2nd Batn. East Lancashire Regt., is a pocket-book no officer should be without, and makes its appearance in time for all officers of the Auxiliary Forces who are about to participate in the Eastertide march of the Volunteers to Brighton, to use. To these it will prove of inestimable value, for it can be used as a field-book for measuring distances, for the measurement of works, &c., and can be used without a sketching-case. It is sufficient in itself to enable any officer to make very complete, rough sketches for all military purposes, accompanied by reports which the printed *aide-mémoire* will make more complete and useful than if drawn up merely from memory. Few things are more important in war than complete and careful reconnaissances; but Volunteers, as a rule, know little of the duties imposed by such work; while, in the matter of outpost duty, they are lamentably deficient of knowledge. With this book in hand, the deficiency is made up. An officer will therein learn how to make road reports, river reports, encampment reports, bivouac reports, cantonment and billeting reports, reports on positions and outpost reports, and will find the notes on outpost of great value. The remarks on the defence of villages and railways should also be studied, and any Volunteer officer possessed of this book will only have himself to blame should he commit any serious mistake in the eyes of the military authorities superintending the march to Brighton. The publishers, Messrs. Waterlow and Sons, Limited, deserve the highest credit for the neat and practical form in which they have produced this eminently useful officer's pocket-book.

Obituary.

Gen. T. C. Smith, on the half-pay list, late of the 27th Regiment, died on Sunday, at his residence in Cambridge Street, Eccleston Square, in his 89th year. He entered the Army in 1813, prior to which he had served for a short period in the Navy, and was three times wounded. He served in the Peninsular campaign from June, 1813, till the end of that war in 1814, and was present at the engagement at Ordal. He served also in the campaign of 1815, and was wounded at the battle of Waterloo. He obtained a lieutenancy in 1819, was promoted to a captaincy in 1835, became major in 1842, lieut.-col. in 1848, and col. in 1854. He obtained the rank of major-gen. in 1862, was promoted to lieut.-gen. in 1871, and gen. in 1877.

It is certain the Queen's Physician, Dr. Fairbank, has written strongly recommending LENTILLA, or TONIC DAILY FOOD. It cures indigestion, heartburn, constipation, liver and stomach complaints, &c., besides having such wondrous nourishing properties. Makes soup, puddings, porridge, biscuits, custards, &c. Tins, 1 lb., 1s 6d; ½ lb., 10d. Barrels, 28 lb., 30s; 14 lb., 16s. Of all Chemists.—Proprietor, H. J. DEACON, Beckenham, Kent.

Amusements.

Mr. Robert Buchanan's new drama, entitled "Storm-Beaten," was produced at the ADELPHI on Saturday evening, with a strong cast. The plot, which served as the basis of one of the author's recent novels, is of a very elaborate kind, and requires to be unfolded in a prologue and five acts. The hero, Christian Christianson, is very ably and impressively represented by Mr. Charles Warner, and Mr. J. H. Barnes embodies, in an equally commendable manner, his antagonist, Richard Orchardson. The other personages in the piece, all more or less important, are played by Miss Amy Roselle, Miss Ewerctta Lawrence, Mrs. Billington, Miss Clara Jecks, Mr. Beerbohm Tree, Mr. H. Proctor, Mr. E. F. Edgar, and Mr. J. G. Shore. The strong situation occurs on the ice-floe, shown both in the third and fourth acts, where Christian encounters his enemy. Everything likely to contribute to the success of the drama has been done both by the management and the performers, and with a litttle compression, "Storm-Beaten" should win the favour of Adelphi audiences for some period.

At the GAIETY on Monday evening was produced Mr. F. C. Burnand's new version of "Bluebeard," in the form of a three-act burlesque drama, so freshly imagined, so brightly written, and so admirably acted, that a complete success was attained by the most legitimate means. Mr. Burnand has humorously conceived the notion that the dreaded mystery of the famous blue chamber was connected with certain cerulean cosmetics, by which the owner of the castle was enabled to renew the azure colour of the ringlet over his forehead, alone endorsing his pretensions to be the lineal descendant of the original Abomelique, and the inheritor of the estate. Miss E. Farren, with unflagging spirit, plays young Bluebeard, and cleverly caricatures the extravagances of the old melodrama. Miss Kate Vaughan, as the traditional victim to curiosity, adroitly travesties the spasmodic style of Mdlle. Sarah Bernhardt. Miss C. Gilchrist as Sister Anne, and Miss Phyllis Broughton as a young shepherd, caper and carol agreeably enough; and Mr. Henley astonishes as well as amuses the audience by a singularly close imitation of Mr. Henry Irving. Another diverting impersonation is that of Bluebeard's fussy father-in-law, played by Mr. Edward Terry in his most quaintly comical fashion. The decorative accessories are tasteful and brilliant, the music, arranged by Herr Meyer Lutz, full of melody; and a deserved success, likely to be long-enduring, may happily be chronicled with unalloyed satisfaction.

The well written, capitally acted, and superbly mounted melodrama, "The Silver King," reached its hundredth performance, at the Princess's Theatre, on Thursday evening, and judging by the plaudits of the very numerous audience (comprising representatives of art, literature, music, and the drama) assembled on the occasion, which followed the close of each act, the popularity of the production of Messrs. Hermann and Jones remains undiminished. That the admiration and respect of the public for Mr. Wilson Barrett as manager and actor has greatly and deservedly increased, was made apparent by the ovation he received at the conclusion of the performance.

On Wednesday evening, at the Banquet Room of ST. JAMES'S HALL, Mr. F. B. Chatterton made his first appearance as a public reader, by a recital from memory, of "The Christmas Carol" and "The Trial from Pickwick."

The troop of eight Broncho horses, brought from America by Mr. Farini, and cleverly taught by their trainer to perform some surprising tricks, greatly add to the attractions of the ROYAL WESTMINSTER AQUARIUM. The horses are said to have been captured with the lasso on the plains of Colorado about five years since, and are supposed to be the descendants of some Barbary coursers left behind in Peru and Mexico by Pizarro and Cortes.

It is stated that Col. Malcolmson, late 3rd Sind Horse, has been finally and completely exonerated from all pecuniary responsibilities in connection with the regimental accounts. We should be glad to add that the same officer had been completely exonerated from all the costs of the Maiwand Court-martial.

It is understood that the H, K, M, and N Batteries, 1st Brigade, Field Artillery, and Nos. 7 and 8 Batteries, Scottish Division, 1st Brigade, Garrison Artillery, will return to England during the next trooping season; and it is very probable that the 10th Hussars, 65th, 81st, and 89th Regts. will also proceed home from India next trooping season.

The Right Hon. the Marquis of Hartington has consented, as Secretary of State for War, to become a patron of the Army and Navy Pensioners' Employment Society.

The Society for the Encouragement of the Fine Arts is one well deserving of encouragement. The programme for the 25th session, 1883, is most comprehensive. The second conversazione will take place at the Galleries of the Society of British Artists, Suffolk Street, Pall Mall East, on Thursday, 5th prox. On Thursday, April 19, there will be a lecture by Brinley Richards, Esq., on "The Music of Wales, and the 11th Century MSS. in the British Museum" (with selections of music). On Thursday, April 26, a lecture by W. H. Cope, Esq. (member of council), on "The History of Stained Glass in England during the Middle Ages." On Thursday, May 10, a lecture by G. A. Storey, Esq., A.R.A. (member of council), on "Art." On Thursday, May 24, a lecture by Chas. Pfoundes, Esq., F.R.G.S., F.R.Asiatic S., &c. (member), on "Art and Literature of Old Japan;" and on Thursday, May 31, the third conversazione will be held.

The *Standard* says:—"The Government of Japan has just sanctioned an increase of the army by 12 battalions of infantry, of 640 men each, which, with a strengthening of the cavalry, artillery, and engineers, means an addition of 10,000 men to the armed forces of the Mikado."

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "WRIGHT, SOUTHWARK," are on each wrapper, and branded on each tablet, without which none is genuine.

BIRTH.

HARRIS.—At Ravenswood, Havelock Road, Southsea, March 9, the wife of Edwin Harris, Paymaster, R.N., H.M.S. Tamar, of a daughter.

MARRIAGE.

GREGG—ATKINS.—On the 6th inst., at Christ Church, Rushbrook, county Cork, by the Rev. J. D. Craig, D.D., uncle of the bride, assisted by the Rev. Canon Loane, M.A., and by the Rev. W. Daunt, M.A., William Gregg, Captain in the Leicestershire Regiment (17th), only surviving son of Richard Gregg, Esq., J.P., to Susan May (Susie), eldest daughter of the late John C. Atkins, Esq., of Carrig, Queenstown.

DEATHS.

MICHELL.—On the 7th inst., at Bishop's Down Spa, Tunbridge Wells, universally regretted, Major-General John Edward Michell, C.B., Royal Artillery, of Huish House, Langport, Somersetshire, aged 55, only son of the late General Sir John Michell, K.C.B., and nephew of the late Brigadier-General Edward Michell.

DICKSON.—On the 13th inst., David John A. Dickson, Lieutenant 1st Battalion Argyll and Sutherland Highlanders, son of the late D. J. Dickson, of Mount Charles, Portobello, age 24.

SAM BERRIDGE, formerly of Stamford, in the county of Lincoln, who, in 1820, enlisted under an assumed name as a soldier in the Horse Regiment of Artillery, and had been in the Foot Guards, and his Wife and Children (if any), are requested to at once communicate with Mr. W. F. LAW, Solicitor, of Stamford, from whom they will hear of something to their advantage. The mother of Sam Berridge was Elizabeth Berridge. Sam Berridge had two brothers, Tom and Anthony; and three sisters, Di, Ann, and Sarah.

WANTED, for the PERMANENT STAFF of the 3rd DURHAM RIFLE VOLUNTEERS, a SERJEANT. He must be a good drill instructor, and able to keep accounts.—Apply to the ADJUTANT of the above Battalion, Sunderland.

MILITIA TRAINING, 1883.—To MESS PRESIDENTS.—A MESSMAN, thoroughly experienced, is open to accept an Engagement with one or two officers' messes for the Annual Training; first-class testimonials.—Address, "MESSMAN," care of Mr. Sharman, 25 Aldbridge Street, Old Kent Road, London, S.E.

TO be SOLD at TATTERSALL'S, on MONDAY NEXT, March 19, in the Sixteen-Stall Stable, the property of an Officer, an ARAB HORSE, quiet with troops. Has been ridden by a Lady in the Park. A BLACK GELDING, Broken Charger; quiet in harness, a good fencer. Both these Horses were ridden through the Egyptian Campaign, and are believed to be perfectly sound.

A HOME in a GENTLEMAN'S FAMILY, combined with Education, is offered for a YOUNG CHILD whose parents are going abroad for a few years. Highest references given and required.—For terms, &c., apply, "X.," care of Mrs. FURNICE, Havant, Hants.

IMPORTANT TESTIMONY

IN FAVOUR OF THE

SPECIAL DEVON TRICYCLE.

Seaton, September 27, 1882.

SIR,—Having had a good trial of the SPECIAL DEVON TRICYCLE, over very rough and very hilly roads, I must tell you that I am much pleased with it. It is an easy one to ride, and the swing frame is a wonderful assistance for hills. It is very strong and comfortable.—Yours faithfully, A. H. TRAHERNE.

The Manager, Exeter B. and C. Co.

I may add that, being lame, I cannot get any exercise by walking; but the exercise I get on the machine has not only restored my health, but I am able to go out into the country when and where I like.—A. H. T.

THE PARASCHO CIGARETTES.

THE PARASCHO CIGARETTES are now being made from the New Crop of Yenijeh Tobacco, and will be found to possess in perfection the peculiar and delicate aroma for which these Cigarettes have become so famous. The Parascho Cigarettes are made only from the finest Yenijeh (Turkey) Tobacco, and are rolled in the best paper procurable, free from Nitre, and made specially for the Parascho Cigarettes. The Parascho Cigarettes will be found different from and superior to all others. The Parascho Cigarettes are pronounced by connoisseurs to be "the only Cigarettes worth smoking."

The Parascho Cigarettes are supplied to the leading members of Fashionable Society, Clubs, and Messes.

The Parascho Cigarettes are made in eight different sizes, and are put up in boxes, each containing 50, 100, and 250 Cigarettes. The Parascho Cigarettes may also be had in sample boxes, containing 24 Cigarettes (accompanied by a detailed Price List), on receipt of 2s 6d in stamps, or postal order.

THE PARASCHO CIGARETTE DEPOT, 65 Park Street, Grosvenor Square, London, W.

And may be had from all the leading Tobacconists.

SECRETARY—George F. Bambridge, Esq.

OFFICES—174 New Bond Street, W.

ABRIDGED PROSPECTUS.

This Company has been formed for the purpose of purchasing the patented inventions of Ferdinand Mannlicher, of Vienna, for improvements in breech-loading firearms, and also for the purchase of any patents or inventions of a similar character, so that the Company may not be restricted in its operations, or in any way hindered from availing itself of any improvements or additions that may be brought under the Directors' notice.

It is considered that the Mannlicher Rifles are as nearly perfect as may be, in the present state of science, as breech-loading weapons, of both single and repeating action, having regard both to the various requirements that have been indicated by the best military authorities, and also to the objections existing to other systems which require to be avoided.

The principal valuable inventions of Mr. Mannlicher, of Vienna, of improvements in breech-loading rifles, have been made the subjects of patents in England and other leading countries. One consists of a rifle containing in the butt a reserve of twenty military cartridges, and therefore capable of discharging twenty-one shots without reloading; another, of a rifle containing also in the butt twelve similar fully charged cartridges, and therefore capable of firing thirteen times without reloading. The third is a military rifle of extremely simple and strong construction, with a detachable magazine capable of holding from five to ten cartridges.

The first of these arms is considered particularly serviceable for Naval Purposes, for Artillery, and for Mounted Infantry; the second and third would be more applicable for the use of the Infantry of the Line, who do not need so large a reserve of cartridges, and require a rifle of the utmost strength and simplicity.

It has been tested at Vienna, where 1,000 rounds have been fired from one and the same rifle with most perfect success. It has also been tried on the military ranges at Plymouth, where it worked equally well, and made excellent practice, its accuracy and the rapidity of fire being most remarkable. The Directors are assured that this weapon can be made cheaper than any other Repeating Rifle which has hitherto been produced. It is handsome in appearance, and entirely devoid of any approach to clumsiness. It is also simple and strong, and easily taken to pieces.

Rifle No. 2 is a very inexpensive weapon, and can be supplied at a slight increase of price upon the ordinary Martini-Henry.

Rifle No. 3 is claimed to have the peculiar merit of a greater simplicity of construction than that of any other military rifle hitherto invented, and can be taken to pieces in the field and put together again in 30 seconds, without the aid of any tool or instrument. An attachable magazine on the same principle as the fixed magazine can be used with this rifle.

The moment for introducing weapons of this class appears peculiarly opportune. For the time has now arrived in which a general transformation of the infantry weapons of all countries is likely to commence, when millions of new arms on the repeating principle would have to be produced throughout Europe within the next few years. It is evident that into the calculations of every Power, even the richest, the question of expense must largely enter, and that a gun yielding to none in rapidity and efficiency must, if the cheapest, stand the best chance of adoption. Now, it is claimed that these are precisely the conditions of the Mannlicher Rifle, and that whilst as rapid as any in its action, it is the simplest weapon, the easiest to machine, and the cheapest to manufacture ever brought forward, under which conditions the Company would be able to realise a very handsome profit, and yet supply the gun cheaper than any other in the market. The Company does not propose to manufacture these weapons themselves, at present, and, moreover, would be inclined to dispose of their first order in such a manner as to realise an early dividend.

It is evident that the profits of the arms trade in times of transformation must be large, and that the re-equipment of the army of but one Power of any standing would alone run into hundreds of thousands. If, therefore, an order for 100,000 Rifles is secured, profits sufficient to pay dividends from 30 per cent. ought to be relied upon.

Nor is the military arms trade the only one to which the Directors can confidently look as a source of income. As is well known, the older forms of magazine arms have found all over the world a market for sporting purposes, and for those of defence, both afloat and ashore. It cannot be that a weapon so far superior to these in every essential point will fail in like manner to find a great private sale. Means have been taken to bring the weapons before all the principal Governments in Europe, and the notice taken of them has been most encouraging, and the first, and indeed almost the only immediate outgoings, after paying for the Patents, will consist in providing a good supply of sample arms, and bringing them properly before the various Committees on Small Arms now sitting, or about to assemble.

The purchase price of the Patents is to be paid as follows:—£12,000 cash and £20,000 in fully paid-up shares, with royalties calculated on a sliding scale, so as to be in great measure dependent on the success of the Company.

The only agreements entered into are one dated the 23rd day of February, 1883, and made between Ferdinand Mannlicher of the one part, and Charles Thomas Hawke Bennett of the other part; and another dated the 24th day of February, 1883, and made between Charles Thomas Hawke Bennett of the one part, and George F. Bambridge, a Trustee for and on behalf of the Company, of the other part; and may, together with the Memorandum and Articles of Association, as also lists of Patents and scale of Royalties, be seen at the Offices of the Solicitors to the Company.

The Vendor of the Patents, who is the promoter of the Company, will pay all the costs and charges incurred in the formation of the Company, except the usual brokerage, up to the allotment of shares. Should no allotment be made, the deposits will be returned in full.

Prospectuses may be obtained on application to the Bankers, Brokers, or the Secretary, at the Offices of the Company, 174 New Bond Street, W.

ARMY PAY DEPARTMENT.—A Retired Staff Paymaster wishes to dispose of UNIFORM, viz., Tunic, Mess Jacket and Waistcoat (very little used), Undress Belt and Pouch, Cocked Hat, with Plume and Case. Height, 5 ft. 10 in.; size round chest, 39 inches.—Apply, by letter, to "B.," care of Mr. PRINCE, Stationer, Surbiton, Surrey.

BRYANT & MAY'S MATCHES.

"FOR THE BLOOD IS THE LIFE."

CLARKE'S WORLD-FAMED BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

ALL BUT NEW OFFICERS' UNIFORMS, for the Army, Navy, Militia, and Yeomanry, may be obtained of LEWIS MOSES, 65 (late 464), New Oxford Street, W.C., at one-fourth their original cost; or on hire. Swords, cloaks, belts, sashes, saddles, &c. for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

FALKNER'S "REAL MALT" WHISKEY.

PURE DUBLIN DISTILLATION.

The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only. A stock always kept in bond ready for shipment to India and the Colonies.

LONDON, 40 CHARING CROSS.
DUBLIN, 83 GRAFTON STREET.

HOLLOWAY'S OINTMENT and PILLS.—A Cure for Abscesses, Piles, Fistula, and Sores of Every Description.—The very satisfactory results arising from the use of this invaluable Ointment, when the patients have been suffering from any of the above disorders, have induced the Medical Profession to introduce it into the hospitals and their private practice, and in many instances where the sufferer was considered incurable, Holloway's Ointment, in conjunction with his Pills, have relieved the most desperate cases. They are also unequalled for the cure of scrofula, scurvy, and all diseases of the skin; and the cures they effect are not merely partial and temporary, for by their purifying powers they bring about a marvellous and complete change in the whole system, enabling it, with renovated powers, to resist the approach of all future attacks of similar diseases.

J. AND W. TOLLEY'S
EXPRESS RIFLES.

·360 bore DOUBLE EXPRESS...	£20
·450, ·500, and ·577 bore DOUBLE EXPRESS	£25
If fitted with Tolley's Patent "Giant-Grip" Action, specially designed to prevent the SLIGHTEST MOVEMENT at the moment of discharge. The strongest action extant ...	£28

An inspection of above invited.

The shooting of our Rifles is under the personal supervision of a member of the Firm, and is not deputed to any subordinate, AS IS USUAL IN MOST CASES. By this means we are enabled to guarantee to our customers Rifles with a figure of merit that cannot be beaten.

[Extracts.]
From Capt. J. E. B., 45th Regiment: "I yesterday fired with the rifle without raising the back sight from 25 to 200 yards, and almost every shot struck its fellow, with the other barrel."

B. W. W., Assam, India:—"I must certainly give you credit for the splendid weapon that you have built me."

Capt. F. W. M., Mysore:—"I have never had a rifle (and I have had all kinds) which has given me such satisfaction."

Lieut.-Col. W. A., 22nd Regiment:—"The Express Rifle gives me perfect satisfaction."

Lieut. C. W. D., 92nd Highlanders:—"I have fired with it, and find it very accurate and well balanced."

C. F. SHOT GUNS, Hammer or Hammerless, £13 13s, £15 15s, £17 17s, £20, £25, and £30.

We are constantly receiving a supply of above from our manufactory in Birmingham, at our London address, where one of the principals can at any time be seen.

THE VERSMANN'S
PATENT
GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¼ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address:—
The Versmann's Moss Litter Company,
LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

GAUTION.—Proceedings will be taken against persons infringing the Company's patent.

LAMPLOUGH'S
PYRETIC SALINE.

HAVE IT IN YOUR HOUSES AND TRAVELS, USING NO OTHER. This is the true antidote in Fevers, Eruptive Affections, Sea or Bilious Sickness, having peculiar and exclusive merits. *Officers and others proceeding to Egypt, India, and the Colonies should not fail to take a supply with them.*

EKOWE (with Col. Pearson).—"There was great demand for Lamplough's Pyretic Saline."—See *Blackwood's Magazine.*

LETTER FROM RAWUL PINDEE.—"Your Pyretic Saline will do more to prevent *fever* than all the quinine can cure."

Observe the GENUINE has my NAME and TRADE-MARK on a BUFF-COLOURED WRAPPER.

(*) Honorary Queen's India Cadet.

At the Preliminary Examination held in February, 1882, SIX out of SEVEN Candidates, and at the Preliminary Examination held in March, 1882, ALL FOUR CANDIDATES, sent up from the Manor House, were successful.

H. WOLFFRAM, the Manor House, Lee, S.E.

WICKWAR COLLEGIATE SCHOOL, near CHARFIELD, GLOUCESTERSHIRE.

HEAD MASTER—LAWRENCE PRESTON, 1st B.A. London University, and F.G.S., formerly Assistant-Master at Cheltenham College.

This School affords (on very moderate terms), efficient Preparation for Professional or Commercial Pursuits and all Public Examinations. Thorough groundwork. Individual attention. Exceptional advantages for delicate or backward boys. Very healthy locality. Superior educational home for boys whose parents reside at a distance or abroad.—For prospectuses, &c., apply to the HEAD MASTER.

ARMY EXAMINATIONS.—The Establishment formerly conducted by Dr. LAUMANN and Mr. ELDERTON at Fulham, is now carried on by the latter at MANOR COURT, Hanwell, where pupils are prepared for the above Examinations. Average number of pupils, 10; average number passed per annum, 8.

NEWTON COLLEGE, S. DEVON.

President of Council—Earl of DEVON.

TEN VALUABLE SCHOLARSHIPS, July, 1883.

Special Terms. Clergy, Officers, Professional Men. Twelve Grad. (Oxford and Cambridge) Masters for 150 Boys. New school buildings. Fine situation.

MILITARY COMPETITIVE EXAMINATION.

MAJOR DE THOREN and Major MORGAN, who have hitherto conducted the Rev. J. CARDWELL'S MILITARY ESTABLISHMENT in Jersey, have entered into arrangements to SUCCEED that gentleman, and will open on the 2nd prox. The success they have hitherto had has been very great. One-third of those sent up for the three last examinations have passed and obtained commissions, and every candidate has qualified.

Major De Thoren was Professor of Tactics at Sandhurst, Garrison Instructor at Madras, Deputy-Assistant-Quartermaster-General in the Abyssinian Campaign, and mentioned in despatches for Survey and Reconnaissance.

Major Morgan passed the Staff College, and is the author of "Summary of Tactics," and "Summary of Law."

The Fees at this establishment are unusually low.

For further information, apply to Major DE THOREN, Bellefield, Jersey, or to Major MORGAN, 3 Douro Terrace, Jersey.

NEGLECTED EDUCATION, or DELICATE HEALTH.——SPECIAL ADVANTAGES OFFERED to TWO GENTLEMEN'S SONS, in a Rectory, surrounded by an extensive Glebe, in a lovely village near Harrogate.—Address, CANTAB., care of Messrs. Dawson and Sons, 121 Cannon Street, London, E.C.

THE MILITARY and ROYAL NAVAL CLUB,

16 ALBEMARLE STREET, PICCADILLY, W.

For Officers of the Army, Navy, Royal Marines, and Auxiliary Forces, and those retired from the same.

For particulars, apply to the SECRETARY, at the Club.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.

Store Warehouses, Baker-Street Bazaar, W.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., 19 Lexham Gardens, W., PREPARES Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. A Special Class for the STAFF COLLEGE. Captain James passed from the Staff College in 1877 with honours, first in mathematics, &c. During the past fifteen years, over 500 Pupils have passed from this Establishment. Eighty-three successes last year. Last year, for WOOLWICH, five passed, viz., 4th, 7th, 17th, 22nd, 27th, out of seven sent up.

LIEUTENANTS of MILITIA :—1882: At the March Military Competitive Examination, EIGHT obtained commissions, viz. :—Richards (4th), Grant (12th), Wimberley (14th), Cass (28th), Shadwell (30th), Woodwright, Legge, Vignoles (Cavalry).

September :—TEN passed, viz. :—Holland (2nd), Blewitt (8th), Whiffin (14th), Gorman (19th) M'Mahon (20th), Morris (25th), Barthorp (28th), Cochrane-Baillie (33rd), Edwards (36th), another was 41st, and Goodair, 42nd, received a cavalry commission.

Literary Examination :—All sent up in 1882 passed, viz. :—4th, 5th, 10th, 14th, 26th, 37th, 86th.

STAFF COLLEGE Successes :—1881: 1st, 4th, 16th. 1882: 1st, 7th, 10th, 15th, 22nd, 23rd, 26th.

Captain JAMES prepares Officers for the Promotion Examination. Fifty-eight have passed since December, 1881.

Captain JAMES begs to announce that Major E. J. LYNCH, late Garrison Instructor, Home District, is about to join him.

MATHEMATICS.—A Cambridge Wrangler VISITS and RECEIVES PUPILS in London; teaches by Correspondence; and supplies, on moderate terms, Solutions of the most Recent Examination Papers, including Sandhurst, Woolwich, I. C. S., London B.A., and B.Sc.—G. HEPPEL, M.A., 180 The Grove, Hammersmith.

THE ROYAL ACADEMY, Gosport.

Her Most Gracious Majesty the Queen.
His Royal Highness the Prince of Wales.
His Royal Highness the Duke of Edinburgh.
His Royal Highness the Duke of Connaught.
His Royal Highness the Duke of Albany.

A Nomination to a Naval Cadetship for the June Examination has long been given to the School, and will be competed for after Easter. Any Pupil joining at that time will be eligible. There are Special Classes preparing for Naval Cadetships for Woolwich, Sandhurst, the Militia, and all Competitive Examinations.—Apply to the Rev. EDWARD BURNEY, M.A., Head Master.

ARMY EXAMINATIONS.—PREPARATION in FRANCE by B. ARNETT, M.A., Cantab., J. J. RIX, B.A., Cantab., and F. BREITENSTEIN. Rigeard, Chartres, France.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, in conjunction with Captain GREENE, assisted by able and Experienced Masters, PREPARE CANDIDATES for Woolwich, Sandhurst, the Militia Competitive Military Examinations, and the Staff College.

The Pupils are received in the Families of the Principals, which will be a Special Advantage to those wishing to practise French, German, and Italian conversation.

Highest references; amongst others, Major-General Sir Evelyn Wood, V.C., K.C.B., Colonel the Hon. P. Methuen, C.B., Scots Guards, Assistant-Adjutant-General, Horse Guards.

For particulars, apply to H. ZOBEL, Poulton House, Hampton, Middlesex.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

MILITARY EDUCATION in FRANCE.

A limited number of CANDIDATES PREPARED for all Army Examinations, by a very successful Tutor. Last year all Militia Officers sent up passed their "Further." A Special Class for the Military Competitive.—Address, "MILES," care of Messrs. Clowes and Son, 13 Charing Cross.

SCHORNE COLLEGE, near WINSLOW.—Nine Resident Masters, including Seven University Men. 100 BOYS (Sons of Gentlemen). Good diet, sound education, home care. Thirty guineas a year, varying with age; and reduced, to brothers and orphans.—Address, Rev. Dr. JAMES.

MALVERN COLLEGE, LIMITED.

Head Master, Rev. C. T. CRUTTWELL, M.A.

The NEXT TERM commences on FRIDAY, May 4. New Boys to arrive May 3. Entrance Examination, May 4, at 9 a.m.

Apply to E. B. SCALLON, Esq., M.A., Secretary.

MILITARY COMPETITIVE.— ONE VACANCY. Four taken. Limit, Five.—Apply to Captain H. D. EVANS, late R.A., Glassaugh, Portsoy, Scotland.

BEDFORD GRAMMAR SCHOOL.—Head Master—J. S. PHILLPOTTS, M.A., B.C.L., formerly Fellow of New College, Oxford, and Assistant-Master at Rugby School.

Eight Exhibitions for four years to the Universities.

Special Classes for Woolwich, Sandhurst, E.I.C.S., &c.

All (four) pupils sent up in 1880 passed direct into Woolwich. In 1881, sixth and ninth places. Two passed direct (July, 1882) for Indian Civil Service. Next day of Entry, May 3.

Fees, per annum—day boys under thirteen, £9; above thirteen, £12. Terms for boarders on application as above.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 COMMISSIONS for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to FORTY-EIGHT SUCCESSES, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

MILITIA COMPETITIVE EXAMINATION ONLY.—A Few Candidates desiring special individual attention are Prepared by Major COWPER, assisted by an Officer of equal experience, who has taken high honours in Fortification, Surveying, &c. At the last Four Examinations (the average number sent up for each being between 3 and 4), Pupils passed at their first trial 1st, 10th, 21st, 30th, 33rd, 34th, and 37th on the List.—10 Clifton Villas, Maida Hill, London, W.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence Jaunary 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

OXFORD RESPONSIONS, and all UNIVERSITY MATRICULATIONS.—VACANCIES caused by successes last week at Oxford Responsions.

Address, Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

KINGSLEY COLLEGE, WESTWARD HO!

HEAD MASTER—Rev. F. HEWSON WALL, LL.D.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last September Examination, the following, out of Twelve sent up, were successful :—

C. H. Farquharson	5th	J. F. Campbell......	23rd
J. E. Cullinan	12th	C. L. Crutchley......	31st
C. W. Garraway ...	16th	B. T. Mahon.........	38th

—Apply to D. C. FEENY, B.A.

LIEUTENANTS of MILITIA, Candidates for Line Commissions, are PREPARED for the Preliminary, the Further Examination, also for the Military Competitive Examination, by Lieutenant-Colonel COATES, Reserve of Officers, formerly of the Royal Military Academy, Woolwich, and Acting Brigade-Major at the Cape.

Colonel Coates has had much experience in coaching, and was, until quite lately, instructing at a large Army Coaching Establishment. His fees are about one-third less than those usually charged; and as he limits the number of his Pupils to Four, great individual attention is insured.—Apply to Colonel COATES, Shepton Mallet, Somersetshire.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

Patron—Her Most Gracious Majesty the QUEEN.
Chairman—Major-General J. T. BOILEAU, R.E., F.R.S.

2/- TEA OF EXTRAORDINARY QUALITY,

As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS
A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves.

COOPER COOPER and CO. sell their Teas for ready money only. They have thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co., thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

(Corner of Francis Street, next door but one to the Army and Navy Co-Operative Society.)
TELEPHONE No. 3102.

Established in 1879, for the benefit of Members of the Army and Navy Co-Operative Society, but now open to the Public generally, HOUSE and ESTATE AGENTS, AUCTIONEERS, STOCK, SHARE, and MORTGAGE BROKERS, GENERAL AGENTS. The Electric Telegraph News Company has placed two of its Machines in the Company's Offices, whereby a continuous telegraphic record is obtained throughout the day of fluctuations in prices in every description of Stocks and Shares and of the latest General News. The information thus obtained is open to the use of all clients and Subscribers of the General Agency and Exchange, Limited. For those Clients desirous of purchasing or selling Stocks and Shares, their time, trouble, and expense of going into the City is saved, and instant execution of orders at the prices of the moment is ensured.

SALE and EXCHANGE ARTICLES of all KINDS, the same being placed on view at the Showrooms, thus leading to a more ready sale.

Monthly Sales by Auction are held, at which any articles remaining unsold may be disposed of, without additional expense to the sender.

The *Service News and General Agency and Exchange Circular*, published on the 15th of every month, is the best medium for Letting or Selling Property, and for those seeking Houses or Estates; also for the Sale or Exchange of Articles.

All information can be obtained on application to the Secretary, Major W. N. G. JOHNSON.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, March 7, 1883.

Hospital returns for week ended March 3, 1883 :—

	Total Force.	Sick List.	Proportion per cent.
Artillery, Cairo	849	60	7·0
Cavalry „	558	57	10·2
Engineers „	212	7	3·3
1st Brigade	2,315	158	6·8
2nd do.	2,887	191	6·6
Sundries	609	37	6·1
	7,430	510	6·8
Alexandria	1,766	112	6·3
Ismailia	111	7	6·3
	9,307	629	6·7
Officers	299	16	5·3
Men	9,008	613	6·8
	9,307	629	6·7
Horses	1,732	73	4·2
Mules	640	4	0·6
	2,372	77	3·2

These figures still show general improvement, though there is slightly more sickness among cavalry.

Captain Cautley, South Staffordshire, was admitted into hospital for ague on January 23 ; in a week, his illness was declared to be enteric fever ; he died at the Abbassiyeh Hospital at 8.10 p.m. of the 2nd inst., and was buried with military honours the next day. The following officers are among those upon the sick list:—

Name and Regiment.	Illness.	Admitted.
Capt. Griffiths, Highland L.I.	Congestion of Liver	Jan. 9, 1883.
Lieut. Scott Elliot, Cameron H.	Enteric Fever	Jan. 11 „
Capt. Alsopp, R.A.	Enteric Fever	Jan. 14 „
Lieut. Burney, Berks	Enteric Fever	Jan. 19 „
Surg, Osburne, A.M.D.	Enteric Fever	Feb. 1 „
Capt. Mortimer, A.P.D.	Pleuro-Pneumonia	Feb. 5 „
Lieut. Enthoven, R.A.	Enteric Fever	Feb. 12 „
Lieut. Welch, 19th Hussars	Enteric Fever	Feb. 16 „
Major Darley, S. Staffordshire	Dislocation	Feb. 27 „

Colonel Hammill, Gordon Highlanders, was discharged from hospital on the 4th inst.

The following show entries into hospital and deaths in Cairo only during the last four months :—

	Entries.	Deaths.
November	1,956	55
December	1,407	20
January	1,023	17
February	586	6
Total	4,972	98

The summer weather may be said to have commenced with the present month, though as yet only pleasantly warm.

The 19th Hussars have been ordered in from Helwan, and will take up their quarters at Abbassiyeh, where the first brigade, under General Earle, are stationed.

The Calabria will take home No. 2 Battery, Royal Artillery, with Veterinary-Surgeon W. B. Spooner in charge ; and Assistant-Commissary-General Reeves, C.B., Brigade-Surgeon O. Barnett, C.I.E., and Surgeon W. E. Webbe, A.M.D., will embark by the same vessel.

Surgeon L. W. Swaby is transferred from Alexandria to Ismailia, and Surgeon W. Rowney from Ismailia to Cairo.

Lieutenant F. C. Heath, R.E., is attached to the Staff of Major-General Earle, commanding 1st Brigade, for one month.

Lieutenant Cutlar-Fergusson, Scots Guards, is appointed Aide-de-Camp to the Lieutenant-General commanding.

Surgeon A. G. Kay, A.M.D., will proceed without delay to India for duty in that country, passage being provided.

Superintending Sister Miss Cannell proceeds to Ramleh, as convalescent, for change of air ; and passage to England is provided for Nursing Sister Lee, invalided.

The following officers have passed in subjects A and B, sec. 4, par. 28, Queen's Regulations :—1st Battalion, Somerset Light Infantry—Captain and Brevet Major H. H. Parr, C.M.G. ; 1st Battalion, Black Watch—Captain C. G. Eden ; 2nd Battalion, Highland Light Infantry—Captain H. R. Kelham ; 3rd King's Royal Rifle Corps—Captain and Brevet Major C. H. Smith, Captains F. W. Archer, H. D. P. Parry Okeden, W. S. Anderson ; Lieutenants E. T. Scudamore Stanhope and W. H. Kennedy ; Gordon Highlanders—Lieutenants E. Gilpin Brown, H. K. Stuart, C. Miller Wallnutt, J. S. Henderson, and F. Gordon ; Cameron Highlanders—Lieutenant J. S. Ewart.

The following form of oath, administered to Egyptian native officers sitting in court-martial, may be of interest :—"I swear by the great God thrice, by all his honourable Prophets, by his Holy Books, by my creed, by my honour, and by my conscience, that I will investigate this case justly, void of any partiality, and shall decide it with equity in accordance with truthful proofs which may be produced ; that in case of a doubtful matter, I shall decide it conscientiously, and according to the custom of war in like cases ; that I shall avoid feelings of friendship, relationship, and brotherhood, as well as all hatred and malice, towards anyone who shall be summoned before me for judgment ; that I shall cause justice and equity to be my guide, and I swear that I shall disclose to no one the verdict until it is officially made known, nor shall I permit the opinion of any of the members of the court-martial to be known, unless in a subsequent assembly of that Court ; and God is my Judge to what I say."

It is probable that Captain Haggard, of the King's Own Borderers, will be named second-in-command of the 4th Battalion.

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Little outpost practice was possible for some days (in accordance with instructions published last week), owing to the extreme cold. After the open weather of many weeks past, the recent rigorous frost, accompanied by piercing north winds, was keenly felt by the hut-dwellers on the Aldershot plateau. The Divisional Order of Saturday last, announcing that the Secretary of State for War had sanctioned for the troops quartered in wooden huts an additional extra issue of fuel, to the extent of one-third the ordinary winter allowance, was welcome news, especially to married soldiers and their families. The weather is now, however, much milder and spring-like, and some outpost duties were practised regimentally on Thursday and Friday. Spring drills commenced on Thursday, and are now in full swing, being carried out in strict accordance with a memorandum by Sir Daniel on the subject circulated during the week. The 2nd Battalion 18th, at Malta, and the 31st, at Gibraltar, are held in readiness for Aldershot, and may be expected here in the course of two or three weeks. No. 12 Company, Commissariat and Transport Corps, will also shortly arrive at the Camp from Egypt. Unless the Egyptian Division be still further reduced, which is improbable, any increase of the Aldershot command after the arrival of these regiments cannot be looked for much before July next, when, in that and the following month, according to a recently circulated official memorandum,—"Manœuvres on an extended scale will probably be carried out, and additional forces will arrive in Camp ; consequently no definite programme can be laid down, but within the two months it is hoped that some flying columns of all arms will march, and that it will be practicable to practise bivouacs, encampments, outpost duties on an extended scale, and entrenchments." This programme is almost identical with that proposed for the same months last year, but which was not carried out. At least one-fourth of the troops forming the Egyptian expedition was organised and equipped at the Camp during these months and despatched to the seat of war, and the sum voted for Aldershot manœuvres absorbed in the war expenditure. During the autumnal manœuvres of 1871, 40,000 troops assembled at the Camp for a month's operations, and for several years afterwards manœuvres on a more or less extensive scale were carried out. But these annual camps of exercise have gradually fallen away, and will probably not again be revived on a large scale until, as in 1871, a great European convulsion frightens us into drawing up our battalions and reckoning our resources. Aldershot Camp of recent years has been neglected and starved, and is now nothing more than a huge theoretical school ; practical training in the operations of war, on a large scale, has not been possible here for a long time. Even flying columns cannot be organised, for want of funds. Some two years ago, when it was proposed that a small flying column should take the field for a few days, a sum of less than £1,000 was refused for this purpose, and the project was, in consequence, abandoned. As a means of training all ranks for war, in times of peace, flying columns are simply invaluable. Yet a force of this kind has not been exercised at the Camp for years. The under-mentioned officers, having been examined in January last, in accordance with the Musketry Syllabus of November, 1882, have been found qualified to instruct their troops and companies in musketry :—Majors Napier and Jervoise, 3rd Hussars ; Lieutenant Kennedy, 26th ; Captain Beatty, Lieutenants Harris and Lamb, 39th ; Major the Hon. C. Dutton, 85th ; Major Money, Captain Martin, and Lieutenants Wolfe, Henry, and the Hon. E. Stopford, 87th ; Captains Hervey and the Hon. P. Sidney, and Lieutenants McGrigor and C. à Court, 3rd Battalion, Rifle Brigade. The Marris system of rifle practice, which has been recently highly spoken of by Lord Wolseley, finds much favour among the regiments here, and is in pretty general use. By means of this patent tube, it is found possible to teach a man to be a good shot up to 900 yards by practice in an ordinary barrack-room. A committee, composed as follows, is appointed, and will assemble at an early date, under arrangements to be made by the president, to make a trial of and to report upon the old and new valise equipments :—President—Colonel R. Harrison, C.B., A.Q.M.G. ; members—Colonel T. R. Stevenson, C.B., 87th Fusiliers ; and Lieutenant-Colonel M. H. Hale, 26th Cameronians. Captain G. M. Fox, 42nd Highlanders, succeeds Captain F. A. Gore, 84th Regiment, as Assistant-Inspector of Gymnasia, on the 15th prox. Captain B. C. Quill, 84th Regiment, has been appointed Superintendent of the Shorncliffe Gymnasium. Captain F. L. Cunliffe, R.H.A., is under orders for India. Lieutenant-Colonel F. W. Ward and F. J. Fox, R.A., have been ordered to Aldershot. A committee, consisting of Colonel Harrison, A.Q.M.G., Lieutenant-Colonel Hale, 26th, and Major Burnett, R.H.A., have been ordered to assemble and report on some steel shield-carts which have been sent to Aldershot for trial. The 11th Middlesex R.V. will arrive at the Camp about the 21st inst., for a week's drill with the Regulars, under the command of Colonel C. E. G. Browne. This battalion will probably be quartered in the South Camp. The 56th Army Signalling Class, composed of the following officers, and 22 non-commissioned officers of various corps, assembled on Thursday, at the Army Signalling School, for a course of instruction, under Major Thrupp, Inspector of Army Signalling :—Majors Hemming, Royal Dragoons, and Peckitt, 84th ; Lieutenants Calley, 1st Life Guards ; Peel, 2nd Life Guards ; Patten, 18th Hussars ; Drummond, Grenadier Guards ; Lovell, Coldstream Guards ; Hall-Parlby, 11th ; Hamilton, 20th ; Lloyd, 24th ; Voyle, 59th ; Chads, 38th ; Farrer, 39th ; Alderson, 97th ; Thatcher, 53rd ; Reade, 85th ; Legh, 60th ; Rooke, 62nd ; Tryon, 92nd ; and Adye, 83rd. To join in April :—Lieutenants Hare, Scots Guards ; Lang, 84th ; and two non-commissioned officers. The Serjeant-Major and Serjeants of the 87th Royal Irish Fusiliers held their annual ball on St. Patrick's Eve, in the North Camp Gymnasium. Invitations were sent to all those of similar rank in the Division. A battalion of Foot Guards is expected to arrive at the Camp during the ensuing week, for a course of musketry instruction, and will be quartered in the North Camp. Lieutenant Healy, 39th, is under orders to join the 54th in India. The order for Major Stevens, R.E., to proceed to Chatham is cancelled. Lieutenant Swayne, R.E., is struck off the strength of the Division.

It is stated that Col. Galloway, Commandant of the Madras Body Guard, has refused the offer of the appointment of Military Secretary to the Governor of that presidency, in succession to Major Spencer.

A committee has been formed of General Officers and gentlemen in Scotland to collect and cause to be preserved in St. Giles's Cathedral, Edinburgh, the regimental colours of old Scottish regiments. The military authorities at the Royal Hospitals at Chelsea and Netley, where stands of old colours exist, will be invited to deliver up any that will assist in completing the proposed collection.

THE BOMBARDMENT OF THE FORTS OF ALEXANDRIA.

Two highly-instructive lectures on the effects of the bombardment of the forts around Alexandria on July 11, 1882, have been recently delivered at the Royal United Service Institution, by Captain Walford, R.A. These lectures are so replete with information, that a careful consideration of them must prove useful. The lecturer divides his subject into two parts, in the first of which he relates in detail the construction of each of the Egyptian works and their armament, and also the effects of the fire on the guns and works, taking each fort in detail; whilst in his second paper, the lecturer describes the effects of the Egyptian fire on the ships engaged, and then points out what, in his opinion, are the lessons to be learnt from this recent bombardment of forts by some of the heaviest armed ships afloat. The Mediterranean Squadron, upon which devolved the task of destroying the Egyptian defences, was composed of eight armoured ships, five small gunboats, and one despatch vessel, giving a grand total of thirteen fighting ships. The large ships of the Fleet were divided into two squadrons, as follows :—*Outside Squadron*—Inflexible, Temeraire, Alexandra, Superb, and Sultan; *In-shore Squadron*—Monarch, Invincible, and Penelope; and the following tables show the armament of the different ships, and the expenditure of ammunition :—

Ship.	Gun. 16″	12″	11″	10″	9″	8″	7″	64	40	Total.
Alexandra	...	...	2	10	...	...	...	...	...	12

Total	88	117	184	752	224	231	135	1,731	412	152	621	224	58	3,198	10,160	16,233	7,100	37

The amount of powder fired away was 131,856·5 lb., of which amount the Inflexible used 39,900 lb., and the Superb, 22,897·75 lb. The 3,198 projectiles fired from the larger guns of the whole Fleet, included 233 Palliser, 2,246 common, 261 shrapnel, 154 segment, and 175 empty shells, and 126 solid shot, and 3 case shot. The Penelope fired the highest average number of shots per gun, viz., 28·8, and the Invincible the lowest, viz., 12·6. The average number of shots per gun for the Inflexible was 22·0. The defences of Alexandria may be summed up as follows:—Looking from the seaward, on the left hand of the city, are situated Forts Silsileh, Pharos, Adda, and the Ras-el-Tin lines, which comprise Fort Ras-el-Tin, the Hospital Battery, the so-called Moncrieff Battery, and the Harem Battery; whilst on the right hand, we find Forts Saleh Aga and Oom-el-Kubeba, the Meks sea lines, comprising Fort Meks and the Citadel or Fort Namusia, and at a distance of three miles from these lines, the Forts Marabout and Ajami. The proper sea defences of the city extend a distance of six miles, and including Fort Marabout, a distance of nine miles. The lecturer then proceeds to point out the general character of the Egyptian defences, and their armament. The parapets are formed, without exception, of sand, covered with a thin coating of cement. The interior slope is invariably revetted with stone, and is vertical. The escarp, except where it is very low, and the few counterscarps which exist are revetted with soft limestone. The cheeks of the embrasures are revetted with this soft limestone. Traverses are to be found in the batteries for rifled guns. The rifled guns, without exception, fired through embrasures, whilst the smoothbores, with rare exception, fired over parapets. The lecturer mentions that no effort was made by the Egyptians to give flank defence to any portion of the forts, and only at Silsileh and Oom-el-Kubeba was the use of a ditch adopted. The following table gives the number of ordnance actually mounted at the time of the bombardment, and, in addition to these, there were eight rifled guns unmounted :—

Ordnance Mounted.

Fort or Battery.	R. guns.	S.B. guns.	Mortars.	Total.
Fort Silsileh	2	3	1	6
„ Pharos	8	37	4	49
„ Adda	5	14	5	24

„ Kamaria	...	5	1	6
Meks Sea Lines	...	24	...	24
„ Fort	5	9	5	19
Total	37	182	31	250

The action of the Fleet during the engagement is clearly set forth by the lecturer as follows :—

> From the commencement of the action (about 7 a.m.), the stations were as follows :—
>
> (1st phase. 7 a.m to 10.30.) The Alexandra, the Superb, and the Sultan engaged the forts and batteries from Ras-el-Tin to Pharos. These ships were under way until about 9.30, and up to that time engaged at a range of from 1,500 to 2,400 yards. They then anchored at a range of from 2,200 to 3,550 yards, firing principally on the Ras-el-Tin Fort and lines. The Inflexible, stationary, but not anchored, engaged Fort Ras-el-Tin (at 2,700 yards), and Oom-el-Kubeba (at 4,000 yards). The Invincible and the Penelope, at anchor, at a range of 1,500 yards, engaged Fort Meks. The Monarch, under way, at various ranges, engaged Meks Fort and lines, and Oom-el-Kubeba. The Temeraire, at anchor, at a range of 4,000 yards, supported the Invincible and the Penelope.
>
> (2nd phase. 10.30 a.m. to 1.30 p.m.) At or about 10.30 a.m., Fort Ras-el-Tin and Meks Fort were silenced. The Alexandra and the Sultan then engaged the West Battery (Harem), which was silenced about noon; they then attacked the Centre Battery. The Superb engaged Adda, and the Temeráire Pharos, while the Inflexible divided its attention between these two forts. The Monarch finally silenced Oom-el-Kubeba, about 1 p.m.
>
> (3rd phase. 1.30 p.m. to 3 p.m.) At 1.20 a shell from the Superb blew up the magazine at Adda, which was then silent. The Temeraire, Inflexible, and Superb continued to bombard Pharos, which was silenced about 2.30 p.m., at which hour also the Centre (Moncrieff) Battery ceased to reply to the Sultan and Alexandra. The Inflexible and the Temeraire then turned their attention to the Hospital or Bluff Point Battery; this was silenced by 3 p.m., but venturing on the 12th again to open fire, it was finally silenced by seven rounds from the same ships. Between 3 p.m. and 5.30 p.m. (at which latter hour all firing ceased by signal), a few shots were fired at the forts, with the object of preventing the garrison from attempting to bring their guns again into action. The Alexandra also threw some shell into Fort Silsileh, while in the earlier part of the day some of the gunboats had been employed in shelling Fort Marabout, and in covering with their fire a landing party, which succeeded, without opposition, in dismounting some of the guns at Fort Meks.

The lecturer then goes on to treat the effects of the fire of the ships on each fort seriatim, which, though exceedingly valuable and instructive, want of space will not permit our quoting in full. The pieces of Egyptian ordnance which, according to the lecturer, were dismounted by the fire of the ships, are seventeen in number, of which four are rifled guns; in addition to these, four other pieces, three smooth-bores and one mortar, were dismounted, either by bursting or by excessive recoil, the latter being due to the increased charges and extreme elevation used by the Egyptians in their endeavours to obtain greater range. Further, the lecturer considers that at least six pieces were rendered unserviceable by various causes during the bombardment. The following account of the dismounting of a 36-pounder in Fort Pharos is very interesting :—

> "On the rear face, a 36-pounder, having been hit on the cascable by a chance shell, has been thrown completely over the parapet, and is now, after passing through the roof of a shed in the ditch, standing on its muzzle at a distance of 30 feet from its original position."

In summing-up the damage done to the parapets and escarps of the forts and batteries, the lecturer, roughly calculating, comes to the conclusion that of the shot which have hit the forts, 50 per cent. have passed over the parapet, 33 per cent. have struck the escarp, and 17 per cent. the parapet. The difficulty experienced in seeing the guns and embrasures, on account of the smoke and mist, the natural tendency to fire at conspicuous objects, and the inclination to take too full a sight when firing rapidly, are some of the causes which, the lecturer considers, led to the elevation of the ships' guns being too high. These deductions seem very reasonable, and for which it seems difficult to suggest a remedy. Looking to the fact that the average number of rounds was only 22·0 per gun of the Fleet during the eight hours-and-a-half engagement, the aim between each shot need not, therefore, have been a hurried one. The A Battery of Fort Adda was entirely destroyed at 1.20 p.m., by a shell fired from the Superb, which pierced its magazine, and blew it up. The lecturer notes a curious incident in connection with the left-flank battery of Fort Meks, where the fire of its two 10-in. smooth-bore guns greatly annoyed the Invincible, and it was found very difficult to silence them. These guns appeared to those on board to be protected in a Moncrieff gun-pit, or some similar plan; while the comparative safety of this battery was, in reality, due to the fact of there extending in its front, 90 ft. distant, a wall 16 ft. high and 3 ft. thick, which, being 6 in. below the crest of the battery, allowed its guns to fire over it, but stopped and exploded the shells fired by the ships, which would otherwise have hit the battery. In only one case did a shell actually pierce any parapet. This happened in the fort of Oom-el-Kubeba, and was the effect of one of the Inflexible's 16-in. shells. The thickness of the parapet was 12 ft., and the trough made by this shell was 16 ft. long and 8 ft. wide. The losses of the Egyptians in this engagement have been variously estimated at from 280 to 500 men, whilst on board our ships five men were killed and 28 wounded. The damage done to the ships was comparatively slight. The Alexandra received the greatest number of hits, viz., sixty, of which twenty-four penetrated the ship above the armour-plating. The shell which effected the most serious damage was that one which struck the muzzle of one of the Penelope's 8-inch guns, stripped the outer muzzle-tube for 6 inches, then broke up, and destroyed the transom-plate of the gun-carriage. The gun and carriage were put out of action, and eight men were wounded. The Monarch and Temeraire received no hits and suffered no losses. The armour-plating of the ships was not penetrated in a single instance, but only dented. Having thus briefly touched on the first part of Captain Walford's lecture, we will proceed to consider his view of the lessons learnt therefrom. The general action of the Fleet is first commented on; and here the lecturer, after passing in review the tactics adopted by the ships, arrives at the conclusion that in future bombardments,—

> "It is probable that ships will attack forts at a range beyond the armour-piercing power of ordinary projectiles, but from a more or less stationary position, and will thus abandon the advantage conferred upon them by their power to refuse a fixed target to their adversaries. The ships will, however, of course, still possess, and make use of, every facility to change their posts, whenever the forts may find their range."

Thus, according to the lecturer, ships engaging land batteries will have to discard the plan of attack hitherto considered most advantageous, viz., steaming past the batteries in line ahead, and each ship to deliver her fire as the batteries came in range, thus preventing the enemy from obtaining the correct range of the ships, but allowing the latter to lay their guns for the exact distance at which they intend to pass, the disadvantages of moving gun-carriages for the ships being more than compensated for by the disadvantages to the enemy of moving targets to aim at; and notwithstanding the fact of these tactics having been altered to that of keeping the ships nearly stationary or at anchor, after the first two hours of the bombardment, we maintain that the former method of engaging forts, under the same circumstances as occurred at Alexandria, is the only practical one. The lecturer reasons that because during the first two and a half hours of the engagement the ships received most of their hits when the line-ahead tactics were performed, and that after adopting the stationary plan the fire of the ships improved considerably (as seen from the ships), and at the same time the enemy's fire slackened, therefore the latter system would seem to be the better one. But it seems feasible to suppose that if the fire of the enemy, when the ships were moving, was so accurate, it should have been considerably more so, provided nothing serious had occurred to render it less so, when the ships presented fixed targets to the enemy; therefore, as, after the first two and a half hours of the engagement, when the ships were stationary, little or no damage was received by them, it is only fair to conclude that the fire of the Fleet in the early portion of the bombardment was terribly effective, and had then completely demoralised the Egyptian gunners. It is only natural that the fire of the ships' guns should improve, as the officers and guns' crews became more accustomed to the work of laying their guns under an enemy's fire. It is extremely unlikely that ships will ever be employed to bombard a place possessing first-class fortresses, manned by properly-disciplined and trained gunners; but should such a work be necessary, then specially-constructed and specially-armed vessels for this express purpose will have to be devised and used. The lecturer draws attention to what would be the probable result of a large shell entering a ship's port, and bursting on the gun, throwing it off its slide. A 12-ton gun was in this way actually thrown some 10 or 12 ft. clear of its carriage in Fort Ras-el-Tin. Undoubtedly, the effect of such a lucky (?) shot would be the sinking of the ship, due to the gun so dismounted breaking its way through the decks and the bottom of the vessel. But it seems hardly possible to suppose such an occurrence happening, more especially when the breech-loading guns have been mounted in all our ships, because of the very small space left in a ship's port for a shell of a size capable of dismounting a ship's heavy gun to pass in, without coming into contact with the muzzle of the gun, when, though it would probably disable that gun and carriage, it would not destroy the ship. The number of blind shell is estimated by the lecturer to have been about 50, of which 67 per cent. were Palliser, and 33 per cent. were common shell. No blind shrapnell were observed. This number of blinds cannot be considered as very serious, as the total number of Palliser, common, and shrapnell shells fired by the Fleet were 2,894, so that the per-centage of blind shell was only 1·7 per cent.; and of these, the greater portion were Palliser, which are hardly expected to be exploded against masonry and sand works. The lecturer then goes on to speak of the machine-guns, the Nordenfelt and the Gatling, from which a large quantity of ammunition was fired, 16,233 from the former, and 7,100 from the latter gun. Though diligently searched for, the lecturer states that no sign whatever could be found of the effect of the Gatling bullets, and only five marks made by the Nordenfelt bullets on the Egyptian guns were discovered by him; and there were no visible marks of these latter projectiles on the escarps and parapets, whilst the effects of the shrapnell he states to have been numerous and very pronounced. The average range of the ships (2,200 yards) was too great to expect the Gatling rifle-calibre gun to have been effective, but the Nordenfelt machine-gun used by the ships was a one-inch calibre weapon, throwing a bullet weighing ½ lb., with an initial velocity of 1,500 feet per second, and besides fired volleys of four shots; while the round shrapnell bullets weigh only 4 oz., and would have at 2,000 yards hardly more than 200 f.s. velocity, against 500 to 600 f.s. for the Nordenfelt bullets at that range. The range of this Nordenfelt gun is some 3,500 yards, and the fact of one of the Nordenfelt bullets having made an oblique hit 1·25 inches in depth on one of the 10-inch guns in Fort Meks, proves conclusively that the range was well within the power of the gun. Further, it must be conceded that if the big ship guns were accurately aimed, as they undoubtedly were, the Nordenfelt guns ought also to have been as well directed, therefore it seems extraordinary that so few marks of these bullets should have been discovered. As regards the hits on the parapets and escarps of the forts by the Nordenfelt bullets, they must have easily penetrated the outer thin coating of cement, and buried themselves several feet in the sand, and therefore little trace of their whereabouts would have been left even the same day, and still less likely to be discovered three weeks after, at the time of the lecturer's examination. Also, looking to the fact that 70 per cent. of the shrapnell shells fired by the Fleet were directed against the Meks forts, where 54 smooth-bore guns were mounted *en barbette*, and, therefore, legitimate objects for shrapnell fire, and that the greater portion of the Nordenfelt bullets were directed against the rifled guns which were fired through the embrasures, thirty out of a total of thirty-seven such pieces being mounted in the Ras-el-Tin works and Forts Adda and Pharos, against which works only some 37 shrapnell were fired, it may be fairly allowed that the demoralisation of the Egyptian gunners in these works and the silencing of their fire were due, to a great extent, to the torrent of Nordenfelt bullets poured on them, which was the effect desired to be achieved by the Nordenfelt guns, and not the marking of the guns or parapets. The Nordenfelt guns have too often proved their perfect shooting qualities, to need enlarging on here. The senior Naval Lord, Sir Astley Cooper Key, in the discussion which ensued, spoke very highly of the value of the Nordenfelt guns to the Fleet on the occasion of the bombardment. In conclusion, the lecturer deduces certain points from the statements contained in his lectures, which he offered for the consideration of the meeting. These were, among others:—1. It is of importance that the batteries for coast defence should have a considerable command above the sea, but should not be conspicuous objects on the coast. Speaking generally, this is undoubtedly a correct deduction; but it is a curious fact, in the face of it, that the heavy guns mounted and being mounted at Gibraltar are placed in works with only a command of some 20 feet. The lecturer states that many of our batteries are very deficient in invisibility. This is a matter that most certainly should be very carefully looked into. The forts or batteries should not be small in size, or, if small, several must be built, to support each other. We prefer to believe that several small works capable of concentrating the fire of their guns, and affording the maximum of support to one another, are better, in these days of huge guns, and, consequently, huge shells, than one or two large forts, a smaller mark being offered to the attacking ships, and not so general a demoralising effect produced by the explosion of a large shell, such as one of the Inflexible's 16-inch projectiles. Of course, by the construction of proper traverses, each gun of a fort is, to some extent, isolated; but not so completely so, as if they were mounted in separate works. 2. It is of less importance that coast defences be good forts than that they be good batteries. By this the lecturer means that all care and money should be devoted to the sea-face, and that it is not of great importance whether the gorge be closed or not. Here we can hardly agree with the gallant lecturer, for looking at the enormous strength of the land defences of the principal forts as they exist at the present time, it seems improbable that they would be attacked by a fleet, unless an army on shore were co-operating with the ships. And this reminds us of the capture of the Taku Forts, which were undefended on their land side, by the French and English troops, which had landed on the coast above the forts, and circumventing them, assaulted and took them in the rear, which the Chinese considered most unfair. 3. Great care must be taken to render the magazines and stores absolutely secure, and also to provide bomb-proof cover for the garrison. Here we entirely agree with the lecturer, and also in his rider that the use of several small stores and magazines is both more safe and more convenient for the service of the guns than is that of one or two large buildings. 4. Some description of counterguard should be made in front of all low-lying batteries, both for the purpose of deceiving the enemy as to the position of the true parapet, and of covering the latter from some portion of the fire. 5. The parapet of a coast battery should be certainly 10 feet high, of which 9 feet should be revetted. 6. It is absolutely necessary that the rear of the gun portion should be enfiladed, at least from the bullets of shrapnell and machine-guns. 7. Each gun should be divided from its neighbour by a bomb-proof traverse, and a parados should be provided in rear of each battery, in order that the remainder of the fort may be sheltered from fire. 8. Embrasures should be so constructed as to afford the worst possible mark for fire or sight. Several other deductions were drawn by the lecturer, but the foregoing seem the more important of them. No doubt, officers of the Royal Artillery and Engineers will find a vast deal of information contained in Captain Walford's lectures, which can but prove of great value to them, and worthy of careful study. We would point out one feature of the fire of the ships which calls for some explanation, which is that every description of weapon was fired, and every description of projectile, including solid shot and case shot. In studying the excellent report of the effects of the bombardment of the Alexandria Forts drawn up by Captain Walford, we were much pleased with the ample evidence therein afforded of the excellence of the fire from the ships in point of direction, and also the fact that though the Ras-el-Tin lines, and some of the other forts, covered the town of Alexandria, yet only one or two shells actually fell within that city. The necessity of avoiding such a possibility must certainly have very seriously hampered the Admiral in his plan of attack. The lecturer rather complains of the Fleet not having made any deliberate attempt to form practicable breaches in the revetments, but we cannot help believing that Lord Alcester, knowing, as he did, the exact condition of the Egyptian works, and of the men fighting the guns, performed most effectually, and in the most rapid manner, the work of silencing the enemy's fire and destroying their forts, so that they should no longer remain as a menace to our Fleet. Another feature of the bombardment necessitating a few remarks, is the abundant proof afforded of the exceeding gallantry displayed by the Nubian gunners in sticking to their guns to the last, though from the first the task must have appeared to them a hopeless one. In the discussion which followed, Sir Astley Cooper Key, Lord Waveney, Admiral Boys, Sir John Hay, M.P., and several others took part. His Royal Highness the Duke of Cambridge, who took the chair, made some very apposite remarks at the conclusion of the discussion, and the interesting meeting was brought to a conclusion by a vote of thanks to Captain Walford, R.A., for his papers, and to the Duke for presiding.

THE NAVY IN PARLIAMENT.

THE NAVY ESTIMATES.

The echoes of the dynamite explosions at the Foreign Office and at the offices of the *Times*, and the din and crash of shattered windows and crumbling masonry, had scarcely died away on Thursday evening, when the Members of the House of Commons turned their attention to Naval matters. But the shock produced by the attempted Fenian outrages had evidently perturbed the minds of the assembled legislators. While Mr. Hopwood was bringing forward his motion on behalf of the Royal Marines, while Mr. Gourley was dilating on the state of our Naval Reserves and the exhaustive report of Vice-Admiral H.R.H. the Duke of Edinburgh on the Naval Reserves, and even while the Parliamentary Secretary of the Admiralty was introducing the Navy Estimates, it was easy to detect a feeling of impatience, not only in the speakers themselves, but also among those who sat and listened, which was only partially relieved when the Home Secretary, in reply to Sir Richard Cross, stated that he had received from the police a report that at five minutes past nine an explosion had taken place on a ground-floor room at the Local Government Board Office, wrecking the room and injuring the buildings in the neighbourhood. He would state nothing further as to the cause until there had been an official inquiry. He was also informed that about half-past seven there was a canister found at the offices of the *Times* newspaper, containing some explosive materials, which seemed to have caused a slight explosion, but led to no serious effects.

On going into Supply, Mr. Hopwood called attention to certain inequalities and defects of administration affecting the corps of Royal Marines. Especially he complained that Staff appointments and other rewards were not open to Marine officers; that the service was not represented on the Board of Admiralty; and that the rates of pay, &c., of the non-commissioned officers and men were not equal to those of the Line. To devise a remedy for these grievances, he moved for the appointment of a Select Committee. Lord Lewisham seconded the motion, and laid particular stress on placing a General officer of Marines on the Board of Admiralty. Sir G. Balfour, Sir J. Hay, Mr. E. Collins, Lord H. Lennox, Sir W. Barttelot, and Sir H. Fletcher supported the motion, and Mr. Campbell-Bannerman, speaking on behalf of the Government, protested that the Admiralty had every desire to do justice to the claims of the Marines, and enumerated various advantages which have recently been conferred on them. As to the representation of the Marines on the Board of Admiralty by a General officer, he could see no advantage to be gained from that, and that the Government would be unwilling to sanction such an interference with the administration of the Navy as would be involved in the appointment of a Committee. They had already done much to improve the condition of the service, and if the steps taken were not sufficient they were willing to look into the matter to see what could be done. Colonel North supported the motion, while Mr. W. H. Smith, Sir E. Reed, and Admiral Egerton advised Mr. Hopwood not to press the question to a division; but he declined to withdraw, and, on his going to a division, his motion was negatived by 60 to 39. After this there was a short conversation on the Duke of Edinburgh's report on the Naval Reserves, and the House having gone into Committee of Supply,

Mr. Campbell-Bannerman made the usual statement on the Naval Estimates, his speech contrasting strongly with that of Mr. Trevelyan's of last year. At the outset we must remark that the proposed increase of service for seamen will be generally regarded throughout the Navy with disfavour. The aggregate amount of the Estimates, he said, was £10,757,000, as compared with £10,483,901 expended last year. This year's estimate included £25,000 for the Egyptian Expedition, and taking into account transfers from the Army votes and other abnormal charges, the real increase in this year's estimates was £129,567. This increase, however, he showed in an exhaustive analysis of these votes was confined to the two shipbuilding votes, and on all the others there was a total net decrease amounting to £146,000. This result, he said, typified the policy of the Board, which was by thrifty administration of the other votes to concentrate as much money as possible on the shipbuilding vote. The programme of the Board, however, was not startling or ambitious, for it had refused to listen to the suggestions of those who wished us to rush into a new era of shipbuilding. On the whole—including wages for repairs and new construction, amounting to £948,147, materials and stores to be worked up valued at some £800,000, and the contract vote—he showed that £2,750,000 was actually and directly devoted to the maintenance and building of ships. Passing to particulars, he stated that during the year it was proposed to build 6,218 tons of unarmoured ships, of which 2,270 tons would be by contract, and 13,206 tons of armoured vessels, in which he included 925 tons on the Mersey and Severn,—two ships, which, not being completely armoured, he proposed to class as "protected." In this way, he claimed that the Board would add the greatest amount of strength to the Navy with the smallest burden to the taxpayers. Next he gave details as to the progress and probable date of completion of the ships building and under repair, mentioning, among other matters, that it is intended to place two 100-ton guns of the Elswick pattern on one of the ships of the Admiral type. With regard to the guns, he stated that 241 breech-loaders of various sizes would be completed by the end of the financial year. Dealing last of all with the personnel, he took the opportunity of expressing, on behalf of the Board, their high appreciation of the services of the Navy in Egypt, eulogising both the professional attainments of the officers and the courage and unbroken discipline of the men. On this vote, he stated also that the Board intends to apply to Parliament for powers to grant pensions to seamen's widows and near relatives out of the Greenwich Hospital funds, and to make an alteration in the conditions of enlistment, by which the first term would be extended from 10 to 12 years, so that seamen will have to serve until they are 40 years of age, instead of 38, as at present, before they can claim their pension. The main principle of the Naval policy of the Government, he described as concentration upon the shipbuilding votes. In the present transition state of Naval construction, it would be the height of unreason to make a fresh start, and the Admiralty were, therefore, proceeding tentatively and cautiously in making such additions to the Navy as would enable the country to maintain its position, without exciting the alarm of other nations. In the discussion which ensued, Mr. W. H. Smith intimated that unless satisfactory information was given with regard to Naval gunnery, when the vote came on he should move for an inquiry into the whole subject; and Sir E. J. Reed complained of the increase of the non-effective vote, and remarked that the Estimates strengthened rather than weakened the apprehensions of those who were anxious about the state of our Navy. Ultimately, the vote was agreed to, as were also a vote of £261,300 for the wages of seamen and Marines, and a vote on account of the Civil-Service Estimates.

H.R.H. the Duke of Edinburgh visited the House of Commons during the evening, and remained watching the debate on the Royal Marines, in the future of which corps he naturally takes the most lively interest. Had not the Fenian outrage occurred, it is generally believed that Mr. Hopwood's motion would have been carried. But owing to the explosion, the House was nearly empty when the debate came on.

The Gazettes.

TUESDAY EVENING.

◆

ARMY.

WAR OFFICE, PALL MALL, March 13, 1883.

The Bedfordshire Regiment—Lieut.-Gen. and Hon. Gen. E. S. Claremont, C.B., to be Col., vice Gen. G. Macdonald, deceased (March 2).

3rd Dragoon Guards—Capt. W. F. H. Yatman resigns his commission.

6th Dragoons—Lieut. C. W. Crosse to be Capt., vice A. C. McKean, promoted.

19th Hussars—Lieut. D. E. D. Barclay to be Capt., vice H. M. A. Warde, seconded (Feb. 2).

Scots Guards—Surg.-Major W. H. Pickford, M.B., retires on retired pay, with the hon. rank of Brigade-Surg.

REGIMENTAL DISTRICTS.

Lieut.-Col. and Col. R. Mockler, having completed five years' service in command of the 19th Regtl. District (The Princess of Wales's Own Yorkshire Regt.), has been placed on retired pay, with the hon. rank of Major-Gen. (Feb. 23).

Lieut.-Col. and Col. W. J. Chads, from half-pay, to be Lieut.-Col., to command the 50th Regtl. District (The Queen's Own Royal West Kent Regt.), vice Col. D. R. Barnes, who retires from the service, receiving the value of his commission.

LINE BATTALIONS.

The Buffs (East Kent Regiment)—Major E. G. Graham retires from the service, receiving the value of his commission.

The Lincolnshire Regiment—Lieut. B. St. J. Barter to be Capt., vice H. C. S. Goldfrap, seconded (Feb. 16).

The Devonshire Regiment—Capt. D. T. Kinder to be Major, vice C. S. Bailey, retired (Nov. 18, 1882); Lieut. the Hon. W. Yarde-Buller resigns his commission.

The East Yorkshire Regiment—Lieut. T. N. Bagnall has been seconded for service as a Lieut. Instructor at the School of Musketry, Hythe (Nov. 9, 1882).

The Leicestershire Regiment—Lieut. A. W. McKinstry to be Capt., vice J. H. C. Michel, retired (March 7).

The Royal Scots Fusiliers—Major F. W. Hamilton to be Lieut.-Col., vice Col. A. Templeman, placed on half-pay (Jan. 23).

The Cameronians (Scottish Rifles)—Major A. D. Eden retires on retired pay, with the hon. rank of Lieut.-Col.

The Worcestershire Regiment—Col. H. Davis, having completed five years' service as a Regtl. Lieut.-Col., has been placed on retired pay (March 2). Lieut. A. E. Aitken has been appointed a probationer for the S.C. (Dec. 31, 1882).

The Hampshire Regiment—Major W. E. Gilbert retires from the service receiving a gratuity.

The Black Watch (Royal Highlanders)—Lieut. the Hon. A. F. G. Hay, from half-pay, to be Lieut., vice J. A. Park, died of wounds received in action.

The Essex Regiment—Capt. E. C. Parker retires from the service, receiving a gratuity.

The Queen's Own (Royal West Kent Regiment)—The resignation of the appointment of Adjt. by Capt. M. Wynyard, and the appointment in his succession of Capt. E. B. L. Bevan, are postdated to Oct. 12, 1882.

The Duke of Cambridge's Own (Middlesex Regiment)—Capt. A. N. Hayne to be Major, vice H. F. Morewood, retired (Feb. 28); Capt. M. T. Lyde has been seconded as a probationer for the S.C. (April 29, 1882).

The King's Royal Rifle Corps—Major W. Forster retires from the service, receiving a gratuity; Capt. T. S. Clarke to be Major, vice N. W. Wallace, retired on half-pay (Jan. 24); Capt. F. M. Ward retires from the service, receiving a gratuity, with permission to retain his rank and wear the prescribed uniform; Lieut. G. H. Wells to be Capt., vice C. Michell, retired (Dec. 2, 1882); Lieut. the Hon. A. H. F. Greville to be Capt., vice H. A. H. Ward, retired (Feb. 28).

The Manchester Regiment—Capt. J. A. Barlow to be Major, vice E. P. Phillipps, whose promotion has been cancelled (Feb. 14).

The York and Lancaster Regiment—Capt. A. W. Brooke has been seconded as a probationer for the S.C. (May 29, 1882).

The Durham Light Infantry—Major F. Dawson retires on retired pay, with the hon. rank of Lieut.-Col.

The Royal Irish Rifles—Lieut. C. H. Scott-Plummer resigns his commission. The restoration to full pay of Lieut. the Hon. A. F. G. Hay, from half-pay, dated Feb. 7, is cancelled.

Princess Louise's (Argyll and Sutherland Highlanders)—Lieut. D. J. A. Dickson is removed from the Army on account of ill-health.

The Rifle Brigade (The Prince Consort's Own)—Major E. A. P. Burnell retires from the service, receiving a gratuity. Supernumerary Major J. A. Fergusson to be Major, vice H. C. G. Dugdale, seconded from March 8, for service as Commandant of the Deolalee Depôt (April 17); Capt. R. F. Meysey-Thompson to be Major, vice A. R. Hopwood, retired (March 7).

The Prince of Wales's Leinster Regiment (Royal Canadians)—Capt. W. H. A. Denys has been seconded for service as a probationer for the Army Pay Department (Feb. 28).

2nd West India Regiment—Lieut. H. H. Keighley to be Capt., vice G. A. Macintire, retired (Feb. 28).

Staff—Major-Gens. M. Walker, V.C., C.B., to be a Brigdr.-Gen. on the Staff, to command an Infantry Brigade at Aldershot, vice Major-Gen. J. B. Spurgin, C.B., C.S.I., whose period of service in that appointment is about to expire; H. G. Woods to be a Brigdr.-Gen. on the Staff, to command the troops in the Belfast District, vice Major-Gen. J. R. S. Sayer, C.B., appointed to the command of the troops in the Western District; His Royal Highness A. W. P. Albert, Duke of Connaught and Strathearn, K.G., to be a Brigdr.-Gen. on the Staff, to command an Infantry Brigade at Aldershot, vice Major-Gen. H. Rowlands., V.C., C.B., who vacates that appointment (all three dated April 1).

Lieut.-Col. and Col. W. A. Gib, C.B., Madras S.C., to be a Brigdr.-Gen., to command a Brigade in the Madras Presidency, vice Major-Gen. H. N. D. Prendergast, V.C., C.B., who has vacated that appointment on promotion (Jan. 18).

Capt. G. M. Fox, the Black Watch (Royal Highlanders), to be a Deputy-Assist.-Adjt. and Qrmr.-Gen., to perform the duties of Assist.-Inspector of Gymnasia, vice Capt. F. A. Gore, the York and Lancaster Regt., whose period of service in that appointment is about to expire (April 15).

Commissariat and Transport Staff—The under-mentioned officers to be Deputy-Assistant-Commissary-Generals on probation, with the temporary rank of Captain in the Army:—Lieuts. G. Frend, the Northumberland Fusiliers (Oct. 13, 1882); A. G. Leonard, the East Lancashire Regt. (Oct. 29, 1882); C. W. S. Hallett, the Royal Scots (Lothian Regt.) (Nov. 4, 1882).

African Commissariat—Deputy-Comy. J. C. Gore to be seconded on appointment as Auditor-Gen. of the West African Settlements (April 1).

Royal Military College—Capt. H. B. Mortimer, the Prince of Wales's (North Staffordshire Regt.), to be an Instructor, vice Lieut.-Col. R. O. de Montmorency, the Royal Irish Rifles, who has vacated that appointment on promotion (March 1).

Army Pay Department—Pymr. and Hon. Capt. A. S. G. Jauncey, 12th Lancers, to have the hon. rank of Major (Feb. 1).

BREVET.

Capt. S. C. Hickman, R.A., to be Major, in recognition of his services during the recent campaign in Egypt (Jan. 25).

MEMORANDA.

Major C. W. Carlyon, retired, R.L.M.I., to have the hon. rank of Lieut.-Col. (Feb. 10).

Paymaster and Hon. Major E. McArthur, retired, R.M.A., to have the hon. rank of Lieut.-Col. (Feb. 15).

Deputy-Assist.-Comy. C. Bather, Bombay Establishment, to have the hon. rank of Lieut. (July 5, 1882).

The under-mentioned Lieut.-Cols. to be Cols.;—H. G. Puckle, Madras S.C. (Dec. 9, 1882); A. T. Cox, Madras S.C. (Dec. 10, 1882); A. G. D. Logan, Madras S.C., and S. H. Williams, Madras S.C. (both dated Dec. 12, 1882); A. T. Reid, Bombay S.C.; W. H. Ross, Bombay S.C.; J. W. H. Johnstone, Bengal S.C.; J. Lampen, Madras S.C.; J. C. Hay, Madras S.C. (all five dated Dec. 20, 1882); S. Darling, half-pay, Assist.-Adjt. and Qrmr.-Gen. (for Recruiting), Dublin District (March 8).

RESERVE OF OFFICERS.

William Smith Dunbar Abbott, Esq., late Capt. 8th Hussars, to be Capt.

Capt. F. A. Lucas, 20th Middlesex R.V.C., to be Lieut.

Lieut. W. Basham resigns his commission.

MILITIA.

WAR OFFICE, PALL MALL, March 13, 1883.

ROYAL ARTILLERY.

7th Brigade, North Irish Division—Lieut. G. H. M. Roberts resigns his commission.

ENGINEER.

Royal Monmouthshire—Lieut. H. A. M. Worsley resigns his commission.

INFANTRY.

3rd Battalion, the Queen's (Royal West Surrey Regiment)—Edgar James Temple Crutchley, gent., to be Lieut.

3rd Battalion, the Northumberland Fusiliers—Herbert Lionel James, gent., to be Lieut.

4th Battalion, the Royal Fusiliers (City of London Regiment)—Capt. and Hon. Major E. Burton resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement. Lieut. S. J. R. Dremel resigns his commission.

5th Battalion, the Royal Fusiliers (City of London Regiment)—Lieut. M. A. Faulkner, from the 3rd Batn. the Duke of Cornwall's Light Infantry, to be Lieut.

4th Battalion, the Norfolk Regiment—Lieut. H. T. Mills resigns his commission.

3rd Battalion, the Lincolnshire Regiment—Lieut. H. E. Vipan resigns his commission.

3rd Battalion, the Prince of Albert's (Somersetshire Light Infantry)—Lieut. H. P. Levita resigns his commission.

3rd Battalion, the Leicestershire Regiment—Philip Henry Trew, gent., to be Lieut.

3rd Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Capt. J. E. Radcliffe resigns his commission; William Joseph Manley, gent., to be Lieut.

3rd Battalion, the Royal Scots Fusiliers—Lindsay Buchanan Scott, gent., to be Lieut.

4th Battalion, the Cheshire Regiment—The services of Capt. E. Redding are dispensed with. Robert Marmaduke Bird-Thompson, gent., to be Lieut.; Qrmr. C. Perry is placed on a retired allowance (April 1).

3rd Battalion, the Royal Welsh Fusiliers—Lieut. W. H. Cooke resigns his commission.

4th Battalion, the Royal Welsh Fusiliers—Lieut. F. W. Turner to be Capt.

3rd Battalion, the Royal Inniskilling Fusiliers—Lieut. R. M. Gore resigns his commission.

3rd Battalion, the East Lancashire Regiment—Lieut. R. Creyke resigns his commission.

3rd Battalion, the East Surrey Regiment—Lieut. G. O. Graham resigns his commission.

4th Battalion, the East Surrey Regiment—William Horsley Persse, gent., to be Lieut.

3rd Battalion, the Border Regiment—Capt. T. A. Irwin (Capt., retired pay), from 3rd Batn. the Manchester Regt., to be Capt.

3rd Battalion, the Royal Sussex Regiment—Qrmr., with the hon. and relative rank of Capt., W. Goldby, is placed on retired pay, with the hon. rank of Major, and is permitted to wear the prescribed uniform on his retirement (March 31).

3rd Battalion, the Hampshire Regiment—Walter Hugh Rawnsley, gent., to be Lieut.

3rd Battalion, the Essex Regiment—Capt. (Hon. Lieut.-Col.) H. G. Bowen resigns his commission.

4th Battalion, the Essex Regiment—Lieut. R. B. Colvin to be Capt., vice S. Pattisson, resigned.

3rd Battalion, the Sherwood Foresters (Derbyshire Regiment)—Capt. E. L. S. Charlton, half-pay, late the Border Regiment, to be Capt. (March 7); Herbert Rhodes, gent., to be Lieut.

4th Battalion, the Sherwood Foresters (Derbyshire Regiment)—Charles Gaitskell, gent., to be Lieut.

9th Battalion, the King's Royal Rifle Corps—Lieut. J. C. H. Purcell resigns his commission.

3rd Battalion, the Duke of Edinburgh's (Wiltshire Regiment)—The Hon. H. A. M. Wellesley to be Lieut.

3rd Battalion, the Prince of Wales's (North Staffordshire Regiment)—Alfred Richard Wood, gent., to be Lieut.

3rd Battalion, the Royal Irish Rifles—The under-mentioned Lieuts. resign their commissions:—R. H. Keown and H. S. Perceval-Maxwell.

4th Battalion, Princess Louise's (Argyll and Sutherland Highlanders)—Capt. W. H. Maxwell resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement. Lieut. A. C. Shaw-Stewart resigns his commission.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, March 13, 1883.

Royal 1st Devon—Capt. C. T. D. Acland to be Major.

Leicestershire—Lieut. H. T. Barclay resigns his commission.

VOLUNTEERS.

WAR OFFICE, PALL MALL, March 13, 1883.

ARTILLERY.

1st Lancashire—John Davey Hayward, gent., M.B., to be Lieut.

2nd Lancashire—Capt. H. Cockson resigns his commission.

3rd Middlesex—Francis Edward Knott, gent., to be Vet.-Surg.

1st Midlothian (Coast)—Lieut. J. H. Gillespie to be Capt.; Hon. Major and Adjt. C. W. Maynard resigns his commission, and is placed on a retired allowance, also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement (April 1).

1st Newcastle-on-Tyne—Arthur Taylor Wear, gent., to be Acting Surg.

1st Northumberland and Sunderland—Ernest Vaux, gent., to be Lieut.

1st West Riding of Yorkshire—Lieut. W. Morant resigns his commission.

2nd West Riding of Yorkshire—Major J. B. Holroyde resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

ENGINEER.

1st Cheshire—Lieut. A. Reid to be Capt.

1st Gloucestershire—Arthur Frederick Griffiths, gent., to be Lieut.

2nd Gloucestershire (the Bristol)—Henry Augustus Vernet, gent., to be Lieut.

RIFLE.

2nd Aberdeenshire—Lieut. G. Wilson resigns his commission.

1st Volunteer Battalion, Princess Charlotte of Wales (Berkshire Regiment)—Lieut. C. J. O'Brien resigns his commission.

1st Brecknockshire—Acting Surg. E. A. Applebe resigns his appointment.

4th Cheshire—Capt. W. M. P. Coleman, 1st Batn. the York and Lancaster Regt., resigns his commission as Adjt.

1st Clackmannan and Kinross—Thomas Henderson, gent., to be Lieut. (supernumerary).

1st Derbyshire—Capt. F. J. Robinson resigns his commission.

2nd Devonshire (Prince of Wales's)—The under-mentioned Gents. to be Lieuts. (supernumerary):—James Harrison and Percival Skinner Snell.

1st Edinburgh (the Queen's City of Edinburgh Rifle Volunteer Brigade)—Lieut. J. Drew, jun., to be Capt.

2nd Edinburgh (City)—Lieut. P. MacGlashan to be Capt.

3rd Volunteer Battalion, the Essex Regiment—The surname of Lieut. F. E. Heubeck is as now described, and not as stated in the *London Gazette* of Feb. 13.

4th Volunteer Battalion, the Essex Regiment—Lieut. W. E. Keymer, from the 3rd Volunteer Batn., to be Lieut.

1st Forfar (Dundee)—Charles Templeman, gent., M.B., to be Acting Surg.

2nd Forfar (Forfarshire or Angus)—Lieut. D. P. Booth resigns his commission.

3rd Glamorgan—The under-mentioned gentlemen to be Lieuts.:—William John Lewis and Francis John Carlyle.

1st Gloucestershire (City of Bristol)—Lieut. E. A. S. Hounsell, from the 1st Volunteer Batn. the Queen's (Royal West Surrey Regt.), to be Capt.

2nd Hampshire—Alfred Herbert Jolliffe, gent., to be Lieut.

1st Volunteer Battalion, the Queen's Own (Royal West Kent Regiment)—Lieut. A. T. F. Simpson to be Capt.

5th Kent (The Weald of Kent)—Charles James Jessel, gent., to be Lieut.

3rd Lanarkshire—Lieut. P. MacLellan resigns his commission.

7th Lanarkshire—Lieut. J. Wallace to be Capt.

5th Lancashire (the Liverpool Rifle Volunteer Brigade)—Lieut. H. C. S. Rooke resigns his commission; Oswald Emyn Brown, gent., to be Lieut.

9th Lancashire—Capt. W. M'C. O'Leary, 2nd Batn. the Prince of Wales's Volunteers (South Lancashire Regt.), to be Adjt. in succession to Brevet Lieut.-Col. C. P. Bertram, placed on a retired allowance (Jan. 25).

1st Volunteer Battalion, the Loyal North Lancashire Regiment—Lieut. J. Humber, jun., resigns his commission.

2nd Lincolnshire—The under-mentioned gentlemen to be Lieuts. (supernumerary):—William James Eland Hobson and Charles Edward Bonner.

2nd London—Lieut. H. W. Hummell to be Capt.; Howard Wallace Soutter, gent., to be Lieut.

1st Middlesex (Victoria)—Capt. S. T. Holland resigns his commission.

11th Middlesex (Railway)—John William Beningfield, gent., to be Lieut.

18th Middlesex—Surg. P. H. Bird resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

22nd Middlesex (Central London Rangers)—Lieut. P. Lambert to be Capt.

23rd Middlesex—Edwin Denny Berton, gent., M.B., to be Acting Surg.

4th Norfolk—Major (Hon. Lieut.-Col.) R. T. Gwyn resigns his commission; E. B. Mansel, Esq., late Capt. 6th Dragoons, to be Major.

1st Stirlingshire—Patrick Francis Connal-Rowan, Esq., to be Capt.; Lieut. D. Duncan resigns his commission.

1st Suffolk—Capt. and Hon. Major E. St. G. Cobbold resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

6th (West) Suffolk—Charles Watts Whistler, gent., to be Acting Surg.

3rd Surrey—Frederic Allan Nicholl, gent., to be Lieut.

2nd Volunteer Battalion, the Queen's (Royal West Surrey Regiment)—Ernest Heron Carr, gent., to be Lieut. (supernumerary).

1st Volunteer Battalion, the Royal Warwickshire Regiment—Lieut. H. Heaton, jun., resigns his commission.

1st East Riding of Yorkshire—Lieut. F. J. Ingoldby resigns his commission.

2nd Volunteer Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Capt. E. Nesfield resigns his commission.

3rd West Riding of Yorkshire—The under-mentioned Lieuts. to be Capts.:—J. C. Russell and F. Ambler.

7th West Riding of Yorkshire (Leeds)—Capt. V. T. Thompson resigns his commission.

(Where not otherwise specified, the foregoing commissions and announcements bear date March 14, and the current year must be understood.)

FRIDAY EVENING.

◆

ARMY.

INDIA OFFICE, March 16, 1883.

The Queen has approved of the following admissions to the Staff Corps, made by the Governments in India:—

BENGAL STAFF CORPS.

To be Lieutenant:—Second Lieut. H. S. G. Hall, from the Derbyshire Regt. (Sept. 14, 1880).

MADRAS STAFF CORPS.

To be Lieutenants:—Lieuts. R. F. Clothier, from the 2nd West India Regt. (dated Sept. 29, 1879, but to rank from Aug. 12, 1875); A. M. Lloyd, from the Hampshire Regt. (dated June 1, 1881, but to rank from Aug. 7, 1880); H. G. Sutton, from the Bedfordshire Regt. (dated Nov. 9, 1881, but to rank from July 1, 1881).

It is but rarely that the public have the opportunity of hearing the pupils and students from Kneller Hall play together as a band in any public place. Such was, however, the case last Monday, at the War Exhibition at Humphrey's Hall, Knightsbridge, where about 40 members of the band played for the benefit of the Egyptian War Fund. The expectations which the initiated had formed as to the performances of this most excellent band were more than justified, for it was impossible to know which to admire most, the full and rich harmonies of the intermediate parts, or the excellence of the solo-playing. It is to be hoped that the public will soon again have the advantage of hearing this splendid band, which is too little known outside military circles, and of which Col. Thompson, the commandant of the school, and Mr. Cousins, director of musical studies, may well be proud.

As several applications for estates of soldiers of her Majesty's British regiments, who have died in India, have been made to the India Office, in consequence of communications received from India by the applicants, officers commanding are reminded that such estates are dealt with and distributed by the War Office.

The *Times of India* says:—"The rumour we referred to last week about the marriage of an English officer with the daughter of an Indian Rajah turns out to be true, though the English papers had mutilated the Rajah's title out of all recognition. The marriage took place between Major Gilbert and one of the two daughters of the late Rajah of Kapurthala, who died at Aden on his way to England some dozen years ago. The Rajah served with distinction in the Mutiny and was presented with a gun, which his troops took from the rebels at Lucknow, by Sir Hope Grant. He married, singularly enough, the daughter of a Ludhiana missionary, to whom he was devotedly attached, and he is said to have adopted his wife's religion. After his death at Aden she went to Paris with her two daughters, and eventually married a doctor. She was always known in India as the 'Ranee,' but on her return to Europe she dropped her Indian title, and brought up her children in a European manner. The two young ladies, one of whom was married last month, were from twenty to twenty-two years of age."

The Repeating Rifle Company (Mannlicher System), Limited, has been incorporated, with a capital of £75,000, for the purpose of purchasing the patented inventions of Ferdinand Mannlicher, of Vienna, for improvements in breech-loading firearms, and also for the purchase of any patents or inventions of a similar character, so that the Company may not be restricted in its operations, or in any way hindered from availing itself of any improvements or additions that may be brought under the Directors' notice.

THROAT IRRITATION.—Soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use Epps's Glycerine Jujubes. In contact with the glands at the moment they are excited by the act of sucking, the Glycerine in these agreeable confections becomes actively healing. Sold only in boxes, 7½d, tins, 1s 1½d, labelled "JAMES EPPS and Co., Homœopathic Chemists, London." A letter received:—"Gentlemen,—It may, perhaps, interest you to know that, after an extended trial, I have found your Glycerine Jujubes of considerable benefit (with or without medical treatment) in almost all forms of throat disease. They soften and clear the voice.—Yours faithfully, GORDON HOLMES, M.D., Senior Physician to the Municipal Throat and Ear Infirmary."

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, March 17, 1883. Letters on business and Remittances should be made to Mr. RICHARD JAMES WOOD.

The Army and Navy Gazette *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

GENERAL SIR LINTORN SIMMONS has an article in the current number of the *Nineteenth Century* on "The Weakness of the Army." Sir Lintorn Simmons's ideas on Army Reform are pretty well known. His present contribution to the literature of this all-important subject may be regarded as a reply to the arguments of General Sir Patrick MacDougall, whose pamphlet on "Short-service Enlistment and the Organisation of Our Infantry" we lately noticed. That General Simmons handles his subject in a masterly manner goes without saying, for whatever he undertakes to do he does thoroughly. The writer uses as the groundwork of his arguments the Annual General Return of the Army for 1881. He starts by pointing out that with a "paid Army at home with a strength of 92,784 men of all ranks, we were compelled, in order to send a small expedition, comprising about 32,000 men, to Egypt, to have recourse to India for about 4,500 men, to our Mediterranean garrisons, which were reduced in strength by about 2,000, and to call in 10,800 of the Reserves, so that, abstracting these extraneous sources of supply, the great home Army contributed not more than about 20,000 men to the expedition." Sir Patrick MacDougall, it may be remembered, contended that the Campaign in Egypt had "gloriously vindicated the new organisation." Sir Lintorn Simmons maintains, on the other hand, that it has done nothing of the sort,—that the campaign against Arabi was no test at all of the soundness of the principles upon which our Army is organised, and that, if it was, the system has entirely broken down. So that we have two high authorities expressing opposite opinions. As both are men who, from their rank and professional attainments, deserve to be heard, it may be well to take the views of the two together, and see what the facts are that are adduced by both sides, and how those brought forward by the one are set aside by the other. General MacDougall says:—"Those who, with a view to disparage young soldiers, have shown that many of the battalions in Egypt were composed of men averaging seven years' service, at a date when the Short-service system had been eleven years in operation, are really paying the highest compliment to a system capable of producing the results they describe." General Simmons replies:—"The effort that was made to accomplish this object [the placing of 32,000 men in the field] has been eulogised as a feat of the highest administrative order, and, no doubt, as compared with previous displays of a like nature, it was highly creditable; but the fact, nevertheless, remains that the Military machine, possessing, to use an engineering expression, a nominal power of 92,000 fighting men, was very severely strained to place 20,000 of their number in the field; and not only so, but if general report is to be believed—and there is good ground for the belief—those that remained behind were by no means in a satisfactory condition, as regards training and formation; so much so, that if the remainder of the Army Reserve had been called out, the utmost that could have been accomplished within a reasonable delay of a few months would have been to mobilise and place a force of about 20,000 more men in the field, a fact that is well known in foreign countries." When we criticised Sir Patrick MacDougall's pamphlet, some weeks ago, we were severely censured by one prominent Army reformer, because we asserted that its only effect would be to make us, as a nation, appear ridiculous. This statement, we were told, was not justified, and it was held that we had taken an extreme view. But here is an authority, surely as reliable as General MacDougall, who endorses what we said. And what says the Continental Press? General Simmons quotes a passage from the *Russki Invalide*, in which it is stated that "the difficulty the [English] Government experienced in raising attenuated regiments to their proper strength, and the numerous cases that occurred of mere skeletons of detachments being sent to the seat of war, showed that, at the very utmost, England could not land more than 40,000 troops on the Continent of Europe without considerable difficulty, and even this could not be effected without leaving England completely bare of an Army." We ask, is this the case? Unfortunately, the answer can only be given in the affirmative; and yet the reformers ask us to believe them, when they say that the campaign in Egypt "gloriously vindicated" the soundness of the principles on which they have been working for the last twelve years! Now, it is only by putting any system to a practical test that its weak points can be discovered. The campaign in Egypt was not a big affair, still, it enabled us to form a pretty fair estimate of our real fighting strength. It may serve the purpose of prejudiced officials, who have had a hand in the building-up of the "organisation which has been so gloriously vindicated," to profess that all has gone well; but independent critics, such as General Simmons, prefer to draw their own conclusions. General Simmons is content to found his arguments on official statistics, and it may be presumed that these figures are reliable. From the returns furnished by the Adjutant-General, from statistics extending over the eight preceding years—during which short service had been in existence, and 184,110 recruits had been enlisted—it was ascertained by Lord Airey's Committee that an average of 123 men regularly disappeared from the ranks of the Army out of every 1,000, before the end of the year in which they were enlisted, or with an average of about three months' service; 246 per 1,000 before the end of the next year, or with an average of eight months' service; and 290 per 1,000 before the end of the second year from that in which they enlisted. Of these 290 men, 13 will have died and 39 been invalided, 50 will have purchased their discharge, 160 will have been lost by desertion, struck off the rolls on conviction of fraudulent enlistment, or discharged for felony with ignominy or to penal servitude. It certainly is most remarkable that the number of men lost by desertion and misconduct should reach so formidable a proportion. These facts, which are indisputable, seeing that they are gleaned from the report of a War-Office Committee, General MacDougall has overlooked. General Simmons does not allow the matter to escape his notice, and the inference he draws is, that these men, "On their return to civil life, will assuredly bring what influence they have to bear upon their friends to prevent them from yielding to the solicitations of recruiters. Their experience of service in the Army, combined with that of the vast number who quit it at later periods before completing their engagements, is quite sufficient to account for the difficulty there is in getting able-bodied men to enter the Army, even in seasons when there is a general lack of employment throughout the country, and for the comparatively small number of really good and respectable men who enlist, and are fit for promotion to the rank of non-commissioned officers." This is no doubt, only too true; the influence of the old soldier must necessarily be considerable, both for good and for evil. At the present time, thanks to the tendency of the reformers to attack everything that is time-honoured, discontent reigns supreme throughout the Army. The duties of non-commissioned officers and men, owing to the attenuated state of home battalions, is double what it was ten years ago. The reformers cannot or will not see the short-sightedness of a policy which only has the effect of making every man, directly he joins the service, look forward to the day when he will be able to leave it, either legitimately or otherwise. It has always been made out that under short service the Army was being popularised. But do the figures published in the Annual General Return of 1881 show that this is the case? We find that, out of 26,258 recruits enlisted in 1881, 3,449, or 131 per thousand, had disappeared before the end of that year; also, that out of 25,622 enlisted in 1880, 6,125, or 239 per thousand, and out of 25,927 enlisted in 1879, 6,641, or 256 per thousand, had gone before the end of 1881. If the Army has been popularised, how are we to account for the large number of men who no sooner don a uniform than they want to set it aside again for the civilian garb? Figures may be misleading, but these figures tell their own tale. We will make every allowance. We know that, under a short-service system, the number of recruits required each year to fill up gaps is much greater than under a system which secures the services of men for more lengthened periods. Yet the fact remains that the leakage is very large, and this of itself must constitute a source of considerable weakness, and naturally tends to unpopularise short service with the Army itself. It has to be remembered that a man who joins the service, is "licked into shape," and decamps just when he is becoming a useful fighting unit, is not only a dead loss, he is an expense as well. He has to be equipped, fed, housed, and drilled, and to no purpose. It would be interesting to know how much money is recklessly wasted in this way year by year. Sir Patrick MacDougall expresses surprise at "the changes in our military organisation introduced by Lord Cardwell, and recently developed by Mr. Childers, are still viewed with dislike by regimental officers, who are unable to perceive how the Army can be benefited by a system under which the condition of individual battalions was allowed not long ago so palpably to deteriorate." For our own part, we do not see that there is much reason for astonishment that short service is unacceptable to the regimental officer, indeed, how could it be otherwise than unpopular with any soldier who has the welfare of the service at heart. The idea is good enough, but as it is worked out, it has the effect of doing no possible good, nay, incalculable harm. "Short service," General MacDougall argues, "is the pivot on which the changes lately effected in our Army organisation really turn. The first object of short service, and its primary advantage, is the formation of a Reserve." Of course, it is a great thing to have a well-organised Reserve to fall back upon, in case of necessity; but in forming a Reserve, we ought not to commit the serious error of undermining the very vitality of the Regular Army. General Simmons shows clearly how imaginary the benefits are which are supposed to be derived from this Short-service and Reserve system. To summarise his figures, we find that during the first six years, from 1870 to 1875, inclusive, *i.e.*, since the introduction of short service, 64,588 men were enlisted for long service, and 57,693 for short service, making in all 122,281. On January 1, 1882, of the long-service men, only 28,800 were still serving; of the short-service men, 7,811 men were still serving, whilst not more than 22,062 were in the Reserve. The whole number of men available was therefore about 58,673, giving a loss of 63,608 men, or 529 per thousand. Out of 18,494 men enlisted in 1875, only 10,302 were serving in the Army or the Reserve on January 1, 1881. The loss had been 8,192, or 443 per thousand, in less than six years. In face of figures such as these, is it to be wondered at that "the changes in our military organisation introduced by Lord Cardwell, and recently developed by Mr. Childers, are still viewed with dislike by regimental officers, who are unable to perceive how the Army can be benefited by a system under which the condition of individual battalions is allowed so palpably to deteriorate." With all due deference to Sir Patrick MacDougall and those of his school, it surely is a good thing for the British Army that regimental officers do "still view with dislike" changes which have had the effect of completely ruining the Army, and rendered it incapable of meeting any foe more formidable than half-hearted Egyptian Fellaheen. It is the one consoling reflection at the present time, to those who wish to see the Army of Great Britain rise again from the ashes to which it has been reduced, that throughout the great struggle which has taken place over the vexed question of long *versus* short service, the regimental officers and a few men like Sir Lintorn Simmons have remained loyal to themselves and the service. Sir Patrick MacDougall contends that "according to an actuarial report presented to Parliament, short service accomplishes a prospective saving in respect of pensions to the amount of half a million pounds. The belief that without offering the inducement of a pension recruits could not easily be obtained has been signally disproved. Recruits over 19 years of age are now obtained in greater numbers than when men were invited to enter nominally at 18, but practically at 16 years old, with the prospect of a pension." With regard to the first of these statements, it need only be observed that the return in question takes no account of the serious losses incurred under the new system, by reason of the waste that goes on. General MacDougall's allusion to recruiting is a particularly unhappy one, having in view the announcement in the Inspector-General of Recruiting's recently issued report, that there was last year a falling-off of about 25,000 men, who were obtained by the Army, notwithstanding the fillip that ought to have been given to recruiting by the war in Egypt. There is another statement of General MacDougall's which calls for remark. He observes that the general result, as shown by the Inspector-General of Recruiting, is, that during 1881, rather more than half the recruits raised within the Territorial Districts were for the territorial regiments, and the proportion has increased yearly. Has it? Then how will he account for the particulars which he will find in the Annual General Return for 1882, under the head of "Recruits raised in Regimental Districts and Regimental Sub-districts during 1881," which give the numbers as follows:—Total obtained for the Army (in Infantry Regimental Districts), 18,227; total enlisted for regiment or brigade, 5,506? These figures show conclusively that not a third of the men obtained passed into the service in the several Regimental Districts and for the local brigades. We should like to hear General MacDougall's explanation of his statement that more than half of the men are passed into the ranks of the local regiments, "and the number has increased yearly." We simply quote a few passages from General MacDougall's pamphlet to show what his statements are worth, and guard the uninitiated against being led by such rash assertions. But to return to Sir Lintorn Simmons. The General does not advocate a return to long service. "To return to long service," he says, "is impossible, and would not give the country what it requires, and what the experience already gained by short service has demonstrated to be practicable, viz., a force of moderate dimensions with the colours, which can be supplemented, in case of necessity, from a reserve trained in its ranks, and whose services are secured by a retaining fee. The real question at issue is not one of long or short service, but rather of the enlistment of boys or men, and of retaining them in the ranks when enlisted. A highly experienced officer of rank who served in Egypt has expressed a very decided opinion that immature youth, of whom there were a few, were next to useless, as they had invariably to be sent on board ship after a few days' work on shore. Lord Airey's Committee, at page 21 of their Report, showed the extravagance of enlisting boys, by stating the cost to which they put the country before arriving at maturity, and becoming fit to endure the hardships of war, or even of service in India." The writer will have every practical soldier with him, in what he says as to the shortsightedness of filling the ranks with a large number of undeveloped striplings, incapable of performing any but the easiest duty. And yet the Secretary of State for War, as he told us the other day, has decided to set aside the 19 years age limit, and return to the old arrangement condemned by Lord Airey's Committee, by which the service was simply flooded by undersized youths. The object of Sir Patrick MacDougall has clearly been to represent the system, in the building-up of which he has played a prominent part, a success. Sir Lintorn Simmons has adopted a more commendable course. He demonstrates that the whole organisation has collapsed; and he appeals to Lord Hartington to look the situation in the face as an honest Minister, jealous of the good name of the Department over which he presides, should do, and seek to find a remedy for existing defects. He goes further, and shows how the difficulties can be overcome. The plan proposed by him is almost identical with that suggested by Lord Airey's Committee, viz.:—1. The formation of training depôts. 2. The lightening of the duties of recruits. 3. An increase in the amount of deferred pay. "The only true method of maintaining an Army by voluntary enlistment," Sir Lintorn Simmons considers, "is to make it popular, not only in the ephemeral sense that people will cheer it when parading the streets on its return from a successful campaign, not in that sense that the ordinary toasts at public banquets shall be received with cheers, but in the only sense in which it can be of any practical value,—by inducing young men to surrender their liberty for a considerable portion of their lives to enter its ranks, submit to its discipline, and endure its hardships, for the honour and safety of their Queen and country. It is neither fair nor right to expect young men to make such sacrifices, while giving them less wages than they can earn in civil life, coupled with perfect freedom and the power to change their employers whenever they like. The inadequate wages is the real cause of the existence of bad soldiers and bad characters, and of the tremendous waste and useless expenditure named. It also accounts for much of the deterioration of discipline, and of the vast amount of crime and punishment which, as is revealed by these returns, is lamentably on the increase in the Army." After reading Sir Lintorn Simmons' article side by side with the pamphlet of Sir P. MacDougall, one cannot but be struck by the earnestness of tone in which General Simmons' paper is written throughout. It bears the impress of truth all through, and there is in every line of it an evidence of sound reasoning and good taste. The Army reformer, and those who uphold him, have striven—ineffectually, it is true, but persistently—for some time past, to prove that recruiting has been going on briskly, that Territorial is a huge success, that there is an absence of crime, little or no desertion, and that young soldiers are as good, if not better, in every way than old; in fact, that by slow degrees the Army was attaining that state of perfection which we have all along been led to believe it would reach, if only we gave the ideas of the reformers time to work themselves into order. One by one, the pet theories of the party of progress have failed, and no more conclusive evidence could be adduced to show how untenable is their position than the pamphlet of Sir P. MacDougall, and some recent articles in the *Times*. Sir Lintorn Simmons's paper has appeared opportunely. Lord Hartington has now assumed charge in Pall Mall. He would do well to take Sir Lintorn into his counsels, for he evidently understands the subject upon which he treats, and knows exactly where the shoe pinches.

EASTER has come round again, and with it we are to have a repetition of the military spectacle which, on several previous occasions, has been witnessed on the Downs at Brighton. It is well known how steadfastly we protested for years against the Easter outing of the Volunteer Army, and how adversely our criticisms have in turn been criticised by those who professed to be the "friends of the Volunteers." But the occasion for protest, it must be confessed, is gradually passing away. The Easter review is by slow degrees developing into what we always aimed at its being made—a really useful lesson in the art of war. There is a certain amount of holiday-making in connection with the Review, it is true, but this year it will be associated with practical work which reflects considerable credit upon those who take part in it, for it shows them to be earnest in their desire to learn all they can in the limited time at their disposal. The Volunteer Force of to-day is a different institution to what it was eleven years ago. The idea of a regiment being a sort of shooting club has happily died out, and with it the services are being lost of the old school of Volunteers, who, by their eccentricities of dress and eccentricities of bearing, brought much ridicule on the service, in the earlier years of its existence. There are some, no doubt, who view the disappearance of these worthy men with alarm. For our own part, we fail to see that there is anything to fear from their withdrawal. We are prepared to do them full credit. For many years they stimulated their relatives and friends to exert themselves, and they may fairly claim to have laid the foundation of the fabric which has since assumed such definite proportions, and has by slow degrees acquired those qualities that are now earning for it the respect and good-will of the most sceptical of military critics. But there is no gainsaying that in this more practical age, when warfare has become an art, the Volunteer of the old school is sadly out of place, even in the ranks of a semi-military body. It was the great aim of the founders of the movement to resist all attempts at militarising the force. Their views were that a Volunteer should be a sort of independent sharpshooter, untrammelled by any rules as to discipline. He was to be dressed "anyhow," his great merit was to consist in his intelligence, and this intelligence was supposed to give him a claim to make rules and regulations and choose officers for himself. The campaign between Germany and France taught us many important lessons. One of the most striking of these was that a military body without proper organisation and 'without discipline,' is useless in modern warfare. The founders of the Volunteer Force, actuated by the best possible intentions, had been striving for twelve years to induce our Military authorities to do the very opposite to what the Germans were doing. The war of 1870-71 put the German organisation to a severe test, and the result showed how much there was to admire in a system which enabled the Government to place the whole military machinery of the country in motion, as it were, by one stroke of the pen. Since 1871, the War Office has been actively engaged in reforming all branches of our defensive forces. The Volunteers have been taken vigorously in hand, with the rest of the Army. We have no hesitation in saying that the changes introduced, so far as the citizen soldiers are concerned, have been in every way beneficial. The Volunteer Force of to-day, as we have observed, is quite a different institution to what it was eleven years ago. It is different, because it is more in hand, more efficient, and composed for fighting purposes of far better material. Eleven years ago, the discipline was of the loosest kind; there were no examinations for officers and serjeants; Jack was encouraged to think himself as good as, if not better than, his master; everything was done, in fact, in the most rough-and-tumble manner. All this has been altered. The places of the grey-bearded old gentlemen who were to be found in the ranks in such large numbers have been filled by younger men, Schools of Instruction have been established, Aldershot has been utilised annually as a training-place, and more stringent rules have been framed as regards discipline and efficiency. Indeed, the whole spirit of Volunteering has been changed. And what has been the effect produced on the Force itself? Increased numbers, increased popularity, increased efficiency,—*i.e.*, improvement all round. Eleven years ago, we were regarded as one of the greatest enemies the Volunteers had, because we ridiculed the idea of reviews being held on a large scale, in which forces were engaged which were little better than a rabble under arms. We ask,—Is there any Volunteer in the whole service who would wish to go back to the old state of affairs? And yet if the recognised Volunteer champions had had their own way, they would have let things remain as they were. They were perfectly satisfied with matters as they existed in 1871, and attributed all adverse criticism to professional jealousy. But who have been the best friends of the Force,—those who favoured it with so much ill-advised laudation, or the much-abused military critics, who, appreciating the exertions that were being made, strove to point out shortcomings, and show how defects could be remedied. Had the Volunteer champions had it all their own way, the movement would have fallen through long ere this.

It has only been due to the persistent advocacy of men of the new school that the concessions have been obtained which render the service to-day a valuable auxiliary to the Regular Army. Much has been done, much more still requires to be accomplished. The Volunteers have shown that they themselves are desirous of being treated as soldiers. It does them credit that, notwithstanding all the silly rubbish that was written and said about them, when Sir Hope Grant's famous report appeared which put a stop for a while to the Easter outings, they have readily responded to each successive appeal on the part of the Military authorities. They are now reaping their reward, for those who see them on the Downs at Brighton on Monday will regard them in quite a different light to what they did formerly. It would be idle to pretend that the Force, constituted as it is, has attained to a degree of perfection which would allow it to take the field in earnest; but that it has made rapid strides forward, there can be no doubt; and that it should have done what it has is greatly to its credit, seeing the immense difficulties with which it has had to contend.

THE question of the increase of pay to certain ranks in the Royal Navy, raised in the House of Lords by Lord Belmore, is of such magnitude and importance, that no opportunity should be lost of urging its consideration. The replies given to suggestions for increasing the pay of officers either in the Army or Navy are not usually couched in a liberal spirit. In this instance, it was said that those who entered the Navy were, as a rule, the sons of gentlemen acting from patriotic motives, and not merely looking to the question of pay; and on a former occasion, when reference was made to the pay of the junior ranks of the Army, the matter was looked upon in the light of supply and demand; that so long as the supply greatly exceeded the demand, there would be no necessity to offer an increase of pay. Thus, a rich country like Great Britain, which pays its Civil servants most liberally, and whose manufacturers and merchants pay their employés the value of their labour, shelters itself from the just payment of those who expatriate themselves from their homes, and subject their lives to disease from climate and peril from the enemy, on the plea that the officers who serve do so from patriotic motives, or that there are hundreds ready to take their places at the same price. Neither of the arguments used is either just or fair, and it is more than doubtful whether the expression of Lord St. Vincent quoted by "Post Captain," in a letter we published last week, "Keep them poor, and they will serve you well," is a fair exposition of the motive for good and faithful service in the Royal Navy. A British officer is always ready to do his duty, and it matters not whether he has his thousands of private income, or only a pittance of pay, he still performs that duty honestly; but instead of a man doing his duty the better for being kept poor, there is little doubt he would do it with a better heart if fairly paid for his day's work than when he is stinted and his pockets kept empty. Of late years, the one idea with regard to the services appears to be the limiting of age in the several ranks, and the creation of redundant retired lists of officers who are still ready, able, and willing to serve; and it is morally certain that a time will come when the country will protest against the increase of the non-effectives. In consequence of the wholesale retirements during the past twelve or fourteen years, there are at present between five and six hundred more officers of the Navy and Marines on the Retired Lists than there were twelve years ago; and even this number does not represent the actual relative monetary value of the pensions now, and then, since before the Orders in Council which considerably raised the scale of retirement to induce officers to accept it, the List of Lieutenants of the Royal Navy who were on the reserved half-pay of only six shillings per diem amounted to 500, whereas now there are none upon that scale, all being upon a higher rate of retired pay. The ages also of the generality of retired officers are less now than at the time referred to, as since that date about 700 old war officers, dating from 1797 to 1840, have been wiped off by death, and have been replaced by the same number of younger men, together with nearly 600 in addition; the total retired officers of Navy and Marines now reaching over 2,900. That deferred promotion creates discontent, there can be no question; but in nine cases out of ten, the discontent arises as much from the fact that an old officer has to grub along upon the same pittance of pay he has been receiving for years, as from the actual waiting for higher rank. A substantial increase of pay to those serving would not cost the country more than is now being expended in increasing the retired lists, and if an officer knew that for every year's service an addition would be made to his pay, he would wait more cheerfully his turn for promotion. Much has been said of late of the higher payment of the Civil servants of the Crown, and reason fails to explain why men who spend their lives at a desk should receive so much more liberal a reward than those who wear the sword. Most assuredly, the pay of the junior ranks of the Navy should be made to correspond with those of the Army, or why should "relative rank" exist? At any rate, the same system which applies to the Civil branch of increase of pay by annual increments, ought to be equally applied to the Executive of both the Army and the Navy; rising to a maximum for each rank, and commencing afresh on promotion. Such a system as this would enable an officer to look before him, and feel that his income at least increased with his length of service.

THE founders of the Royal Naval Reserve were far-seeing men, to whom the country owes a deep debt of gratitude. The success of the old school, and the ill-disguised feeling of superciliousness with which the officers were at first greeted by their *confrères* of the Regular service, have in some measure died out; but it is quite evident, from the manner in which their services have been ignored for Egypt, that their status is not yet what it should be. It certainly appears invidious, to say the least, to give the chief of the Transport Department four decorations, and not even to mention the officers whose zeal and seamanship contributed in no small measure to the success of the expedition. A grand opportunity was thus missed of bringing the members of the respective services together on common grounds, an opportunity which may not again occur during the active life of the present generation. Disguise it as we may, the reef-topsail school of seamen, who formed the bone and sinew of the force at its inauguration, are, owing to the introduction of steam and mechanism in Naval warfare, relatively of less value than they formerly were. To these Islands, the new motor has not, notwithstanding the leading part its inhabitants take in engineering enterprises, been an unmixed advantage. A hundred fights have shown that on the ocean men of English breed have no superiors, and so long as seamanship was the *sine quâ non* of success, but few equals. The inventions of the engineer and the chemist have, however, in a very great measure, reduced the value of practical seamanship, and thus brought one at least of the leading nations of Europe perilously near an equality with ourselves. This would seem to indicate that the Reserve of the future should have in its ranks a certain element of mechanical skill, to leaven the rough characteristics of the majority. In the neighbourhood of our great cities and factories, this want, under judicious supervision, can easily be supplied; but to obtain it, some inducement is wanting. Men will not serve without remuneration if, when honours are distributed for a share of which they have a reasonable claim, as in Egypt, they are studiously neglected. Wars have, thanks to many causes, ceased to drag on through a number of years. The expense of modern campaigning by land or by sea renders such a policy impracticable to the most wealthy of nations; hence, the great object of statesmen and generals is to have a force in hand to strike suddenly and effectually. Now, if this axiom holds good, of what service are the majority of our First-class Naval Reserve, who at the critical moment will be in India, China, or the Pacific? There are not wanting those who are of opinion that many of these men will endeavour to shirk their agreement, should the necessities of the Empire make a sudden demand on their services necessary. But admitting that they are loyal, months must elapse before they could report themselves ready for service at a home rendezvous. The question has not yet been raised as to the authority of a commander of one of her Majesty's ships over Naval Reserve men on a distant station, should hostilities suddenly break out. In the interest of all parties, it is desirable that a point of so much importance shall at once command attention, and be finally settled. Although the merchant ship can at any time ill spare a member of her scanty crew, the services of the State are paramount to every other consideration; therefore, no uncertainty should for a moment interfere with its effectiveness. A very concise yet clear report on this subject has recently been made to the Admiralty by his Royal Highness the Duke of Edinburgh, on his relinquishing the command of the Coastguard to Sir Anthony Hoskins. It confirms in a remarkable manner the opinions which we have from time to time formulated on the subject, notably in that part relating to the expediency of recruiting the ranks of the First-class Reserve men from sources nearer home than we do at present. Even in point of physique, this plan would have great advantages over that now followed, for it is a well-known fact that English fishermen are superior in muscular development, in endurance, and in intelligence, to the average run of the seamen who now man the ships of the Merchant service. The former are accustomed from their earliest infancy to the management of boats and small craft in all weathers, while many of the latter, who have taken to the sea late in life, are unable to pull an oar. It is more than doubtful if the twenty-eight days' annual drill on board an old wooden frigate, moored head and stern in a close dock, is sufficient to give an untrained man the necessary amount of knowledge of all arms which in theory he is supposed to acquire. The Boer war has conclusively shown, to our sorrow, that a few skilful marksmen are superior to any number of untrained levies; and we question the ability of the most consummately skilled gunners to impart to a novice, under the present system, all that is required to constitute him an effective. It would be far better to take these men on a cruise, and instruct them to fire at a target under varying circumstances of wind and weather, rather than to continue in the stereotyped groove of twenty years since. The pay of seamen of the Reserve, joined to the prospective pension, should make the service popular, and there is every reason to believe that it is so. Up to the present time, the State has paid liberally for services which may never be required, and such being the case, it should not hesitate to make its own terms with the fortunate recipients of its bounty. We are certain that an unlimited supply of excellent materials is at command, if the proper means are taken to seek them out, not a difficult task for those who are interested in the welfare of the force, and the protection of these Islands. The Duke of Edinburgh has very properly pointed out the evils which arise from the present system of manning the cruising tenders by Fleet men. He might have gone a step farther, and illustrated the gain which would accrue to the service, if the officers belonged to the Executive, in lieu of the Civil branch, of the Navy. Seamen are keen observers, and have a strong objection to serve under those whom they somewhat contemptuously term "interlopers." No better school for young officers than the rough work of coasting is to be found. In the performance of their ordinary duties, they could not help acquiring that confidence in emergencies which theory cannot give. If this change were made, it is probable we should not hear of any further complaints of a want of discipline on board these useful little craft. The remarks on the status of the Commanders and Lieutenants of the Coastguard are also worthy of attention, indicating, as they unquestionably do, that high consideration for the happiness of all classes which is pre-eminently one of the characteristics of a right Royal race. It would be well for the Navy if a shadow of this disinterestedness and love of fair-play fell on a Board whose powers for good or for evil are almost despotic. It is unreasonable for them to attempt to ignore the existence of the ordinary qualities of human nature, by practically shelving an officer who accepts the supervision of a district. After the hard struggle for promotion which unavoidable circumstances now compel the majority of lieutenants to endure, a short relaxation from the monotonous grind on shipboard is highly desirable. Two or three years on shore will enable an officer to start with renewed energy; and the time might be well utilised in adding to his store of theoretical and, in many instances, practical knowledge of the details of shipbuilding, and other useful subjects.

The death of Rear-Admiral J. Dobree McCrea, occurring as it did so suddenly, whilst in the prime of his life, has deprived the service of one of its most popular and respected officers. A strict officer, and yet a kind and genial superior, Admiral McCrea's death will be universally regretted by the Navy.

Rear-Admiral Sir Francis Sullivan, Second-in-Command of the Channel Squadron, struck his flag on board the *Agincourt* on March 17, at Gibraltar, on being appointed to succeed Sir William Mends, as Director of Transports at the Admiralty, Rear-Admiral J. C. Wilson being appointed Second-in-Command of the Channel Squadron. Captain Hopkins has been selected to succeed Rear-Admiral Herbert as Director of Naval Ordnance, early next month. Captain Codrington vacates his command of the *Excellent*, it is said, much against his wish, and at the personal request of Lord Northbrook, to take up the appointment of Captain Superintendent of Sheerness Dockyard, and Captain John A. Fisher, C.B., assumes the command of the *Excellent*. Rear-Admiral Sir Anthony Hoskins is spoken of as likely to become Admiral Superintendent of Portsmouth Dockyard, and, out of the dozen or so of flag officers who this week visited the Admiralty, we think that Vice-Admiral the Hon. F. A. Foley or Rear-Admiral Gordon Douglas stand the best chance of immediate employment, should Rear-Admiral Herbert not accept the vacancy at the Reserve Office. It is evident, however, that the Navy is suffering from a similar complaint as that which has for some time past afflicted the sister service. This latest shuffle of the Admiralty pack makes scarcely any change in the distribution of employment. Before their seats have had time to get cold, our few "only men" take one another's places, with as great regularity and precision as if their so-doing were a matter of course, while officers of equal merit, but who are not in "the swim," remain out in the cold shade of unemployed half-pay.

The reports regarding the state and condition of the bottom of the *Neptune* are, as the Secretary to the Admiralty stated to the House of Commons, considerably exaggerated, there being nothing to prevent her being put in commission, as intended, at the end of the month. There was, however, an ominous ring about the terms in which Mr. Campbell-Bannerman expressed himself; it is no doubt perfectly true that "no immediate outlay is necessary"; but it is to be feared that the *Neptune* will give some trouble in the future. No one who walked under her bottom, when in dock the other day, could fail to be struck by the extensive corrosion of the iron bottom, as evinced by the quantity of rust exuding through the zinc sheathing and staining the whole floor of the dock. No amount of care bestowed upon the "double bottoms" will compensate for the rapid rusting of the inaccessible exterior surface of iron thus exposed to the action—all the more fatal because partial—of salt water. True, the zinc bottom will always be clean, and the destructive effects of galvanic action can be provided for by the application of new sheets from time to time. But who is to answer for the condition of the iron plates, thus carefully covered up with a kind of wooden sieve? It is to be hoped that we shall hear no more of this plan of wood sheathing in future; if we have not as yet adopted—and it is said that we have not—the best anti-corrosive and anti-fouling compositions for our ironclads, then let us do so as soon as possible; but no more of these ingenious contrivances for partially electro-plating their rusty bottoms with zinc. As for the alleged straining of the iron frames, there was nothing to catch the eye of a casual observer; but of course, since her memorable mishap on the Thames, the *Neptune* has been looked upon with more than suspicion by outsiders, and there are those among Naval officers who assert that even now they can detect a break in her sheer when afloat.

The facts relating to the accident on board the *Defence* are as follows:—The mooring swivel was being hove in, and the officer at the main-deck capstan put one paul down. The tide gave the ship a shear, which brought extra strain on the cables, when one parted. The jerk on the capstan thus caused the accident, by the paul not acting. More pauls should have been down, but they are defective, and will probably all be replaced with new at Plymouth. The cable was brought up by patent controller, and thus only a few feet went out. Two men had each a leg broken badly, and at once were sent to hospital for more comfort than the dark sick bay. Seven others were put on sick list for cuts, contusions, and sprains. Two have already returned to duty, and all the rest are doing well. The two in hospital give some cause for anxiety, as complications may set in, but at present all goes well. After the accident, both bowers were slipped, as the anchors were foul, and the ship was once more brought to her moorings. Ships of this size, with only half steam-power, are not fitted for such strong tidal rivers. Only moorings will hold them, as their cables often part, if used as they were twice last week. We hope we shall hear no more of such accidents, as most probably in May next the crew of the *Defence* will be turned over to some smaller ship with adequate steam-power.

The Commander of the Russian dockyard at Vladivostock, Commodore Venkovitch, has been tried by court-martial, and condemned to be dismissed the service, for peculation and corruption. The frauds were proved to have extended over a long period, and to have been participated in by a large number of officials under Venkovitch's charge. They were brought to light when Admiral Lesovsky temporarily resigned the post of Minister of Marine, and went out to Vladivostock in 1879, to take charge of the Russian Pacific Fleet, during its demonstration against China.

The fourth colossal Italian ironclad, the *Lepanto*, sister-ship to the *Italia*, was launched last Saturday from the shipbuilding yard of the Chevalier d'Orlando, at Leghorn, in the presence of the King and Queen of Italy and a brilliant suite, which included the English Ambassador, Sir Augustus Paget. The keel of the *Lepanto* was laid in August, 1877, and her dimensions are as follows:—Length, 122 mètres; breadth, 22¼ mètres; displacement, 14,500 tons. Her engines will be of 18,000 indicated horse-power, and are estimated to give a speed of 17 knots. She will carry four 100-ton guns, besides numerous torpedo boats and Nordenfelt machine-guns, both shell-firing and mitrailleuses.

The total number of recruits drawn for the Russian Baltic Fleet for this year amounts to 2,288 men. Of this number 1,738 have already arrived at Cronstadt, and the remainder are due within the next ten days. Out of the 1,738, nearly 600, or 30 per cent., can read and write, showing that, as a class, Russian seamen are better educated than the recruits drawn for the Army. An account of the trades of the recruits throws an interesting light on the sort of men impressed by the conscription into the Russian Navy. 827 have been employed as wherrymen on the inland rivers, or as seamen and fishermen along the coast; 430 are peasants, 63 joiners, 62 stokers, 50 tailors, 40 shoemakers, 28 carpenters, 27 engine-drivers, 20 smiths, 19 cabinet-makers, 13 wheelwrights, 14 boiler-makers, 9 painters, 9 coopers, 6 bandsmen, 6 stove-setters, 5 cooks, 2 draughtsmen, 2 skippers, &c. Thus, the greater number of the recruits possess a knowledge of arts of more or less value to the Navy, which are secured by the State at no extra expenditure, thanks to the law of universal conscription.

The two leading torpedo officers in Russia, Captain Verkoksky, head of the Mining School at Cronstadt, and his immediate assistant, Lieutenant Tveritinoff, have just returned from Moscow, where they have been engaged in making plans for the illumination of the Kremlin with the electric light, during the Czar's coronation. Acting upon their report, the Admiralty has placed at their disposal a number of officers and men of the Baltic torpedo service, who will proceed to Moscow forthwith, and commence operations.

The following statement shows what essential changes have been made in the German scheme of 1873 for re-organising the Navy. The German Fleet includes, at present, of battle ships, seven ironclad frigates and five corvettes; of cruisers, ten spar-decked corvettes, eight flush-decked corvettes, four gun-vessels of the *Albatross* class, and five first-class gunboats; for coast defence, one ironclad, eleven armoured gunboats, fourteen torpedo-boats, one second-class gunboat; eight despatch-boats (including the *Hohenzollern*); two transports; twelve training ships; for harbour service, eleven steamers, eight pilot vessels and lightships; total, 107 vessels. There are at present building one ironclad corvette, one spar-decked corvette (to replace the *Victoria*), two flush-decked corvettes (one to replace the *Nymphe*), one gunvessel of the *Albatross* class, two ironclad gunboats, one torpedo-boat (to replace the *Natter*). The effective has been increased by one flush-decked corvette (the *Sophie*), seven torpedo-boats, two despatch-boats (the *Pfeil* and *Blitz*), one steam-tug for harbour service. By the scheme of 1873, there were required by 1882 twenty-three ironclads, namely, eight frigates, six corvettes, seven monitors, two batteries, as well as twenty corvettes of various sizes, including training ships, six despatch-boats, station tenders, &c., eighteen gunboats, including surveying-vessels, two gunnery ships, three sailing brigs, twenty-eight torpedo-vessels. According to this statement, only the number of sailing brigs actually provided for is in existence. The planned effective is short by one ironclad frigate, one armoured corvette, and six ironclads, of the monitor class, two armoured batteries, one gunnery ship, seven gunboats, and thirteen torpedo-boats. There are, on the contrary, completed, in excess of the original plan, three corvettes (including training-ships) eleven armoured gunboats, and two despatch-boats.

The Russian Government have sold a large number of their older torpedo boats, which are now being replaced by boats of a modern type.

The entire *personnel* of the Russian Aral Fleet has been broken up, and the officers punished in various manners for peculation, neglect of duty, &c. The commander of the fleet, Captain Kulikoff, has been sentenced to Siberia for life, his immediate subordinate cashiered and sent to serve as a common seaman on board the Pacific Squadron, and the other officers punished with fines and terms of imprisonment. The severity of General Tchernayeff towards these officers has produced quite a panic in Turkestan, where, under General Kaufmann's *régime*, officials were allowed to do almost what they liked, and indulged in every form of venality.

A westerly gale is not a very rare phenomenon in Portsmouth Harbour, yet the landing-places in the dockyard are so arranged that, in the event of a really hard blow from the westward, there is not a single landing where it is possible to embark or disembark with any degree of comfort, except up the Camber, by the rigging-house, which is usually crammed with lighters and lumps, and is obviously not intended for landing, in having no proper steps. The advantage of a steam launch on such occasions is heavily discounted by the risk of hard knocks alongside awkward steps, with a strong tide running past, and a gale of wind on shore. It is strange that, amid all the modern improvements, some kind of sheltered landing, in the shape of a T pier or camber, has not been constructed.

We imagine the first regiments to whom the new invisible grey uniform will be supplied will be the Rifle Battalions; their green uniform, it is well known, is more visible than the scarlet. We trust these distinguished corps will appreciate the honour conferred upon them by the authorities.

In consequence of the feeling of insecurity caused by the late abortive attempts to destroy buildings, by explosions of dynamite or some kindred substance, the Government have resolved to provide additional means for protecting the public offices. The Secretary of State for the Home Department has announced, among other measures, an intended addition of 500 men to the Metropolitan Police; but he admits that some time must elapse before even this small augmentation can be completed. The expediency of the suggestion which we offered last week, that Government should at once avail themselves of the services of the Commissionaires, has thus been confirmed. The employment of these trusty veterans for this particular purpose is not without precedent; for in 1867, when the explosion at Clerkenwell Prison caused general alarm, a detachment of the Commissionaires were sworn in as special constables, and at the request of the proper authority, took charge of the Privy Council Office for some time. Besides, in anticipation of a serious riot, a considerable number were kept at their head-quarters in constant readiness to turn out.

We have before us a memorandum of the grievances of the General-List officers of the Indian Army, who have decided to bring their case before the Secretary of State for India. From a perusal of the document in question, their demands appear very reasonable. They only ask to be placed, in regard to retiring pension, on an equality with officers of the Staff Corps, many of whom entered the service at a date subsequent to themselves; and they feel it a hardship that after having been for 23 years, to all intents and purposes, under the same rules as the officers of the old Honourable East India Company, they now find themselves practically cut off from participation in the off-reckonings. The reason of the difference made appears to be that General-List officers did not enter the Staff Corps before September, 1866, which seems a little illogical. Had they been told at the time that their not joining the Staff Corps would have entailed on them such serious pecuniary consequences, they would, of course, have joined it to a man. But they, like their comrades of the Cavalry, seem to have been ignorant of the consequences of standing aloof from the Staff Corps. In dismissing the matter for the present, we can only say that the General-List officers have a good case, and that if they unite, and do not demand too much, they will probably stand a very good chance of having their claims taken into consideration.

A French writer says:—"On July 1, 1798, Napoleon arrived off Alexandria. On the 23rd of the same month he entered Cairo with an army of 30,000 men, and the French were virtually masters of Egypt." It would be highly interesting, not to say instructive, to know how he managed his transport, &c.

The Grand Duke Michael, brother of the late Emperor, who is acting as Ordnance-General of Russia, has issued this week the following circular with respect to the slowness of firing in many fortresses:—"In going through the reports of the gunnery inspectors, I have been struck with the difference of speed in the firing of fortress guns, particularly in those situated along the coasts of Russia. In some the interval between each discharge of 11-inch guns does not exceed four or five minutes; in others the interval amounts to eleven or twelve minutes. Taking into consideration that the vast sums lavished on coast defences can be productive of results only in the event of those in charge of them displaying activity, energy, and skill, I call the attention of commanding officers to the slowness of speed in the firing of guns in many fortresses, and request of them to take measures to accelerate it. I inflexibly demand that all recruits of the present levy shall, at the end of the six months' course, be able to fire from 11-inch guns at intervals of not more than five minutes, and from guns of ordinary calibre at intervals not exceeding three minutes."

As in former years, manœuvres on a large scale will take place in Italy in the first half of next September. Two army corps will take part in the operations, one of which will be commanded by General de Lemaz, whilst the chief of the general staff, General Cosenz, will superintend the manœuvres between Alessandria and Piacenza.

An order has been issued by General Thibaudin prohibiting collective subscriptions for the erection of a statue of General Chanzy, in his native town of Vouziers. But it is intimated, at the same time, that no obstacles would be placed in the way of those who desired to subscribe individually. French officers are therefore at liberty to contribute their share, just the same way as private persons.

The locality for the manœuvres of the Twelfth German Army Corps is the country between Gotha and Eisenach, the former town being the principal *point d'appui.* As already announced by us, the operations will take place in the presence of the German Emperor.

The Czar has given orders for the Coronation fêtes at Moscow to be enlarged, so as to provide for the celebration on a grand scale of the 200th anniversary of the formation of the Regular Army by Peter the Great. In consequence of this celebration, the Preobrajensky Regiment, which is the oldest in Russia, and in which Peter the Great served as a drummer-boy, will proceed to Moscow in full strength. It may not be without interest to note that the regiment was organised by officers from Scotland, many of whom, like Generals Gordon, Crawford, and Bruce, left their mark on Russian history.

An anniversary of seventy years of service in the army is not of every-day occurrence. This singular event was celebrated by Lieutenant-General Baeyer, the president of the German Geodetic Institute, on February 8, who on that day in 1813 entered the East Prussian Regiment of Infantry as volunteer, and took part in the campaigns of 1813-14 and 1815. The old veteran received on the day of his jubilee an autograph letter of the Emperor William, conveying his Majesty's congratulations.

It was authoritatively announced a short time ago by a Berlin paper, the statement being copied by several English journals, that Count Moltke and Count Waldersee, as well as other eminent German military authorities, had given written reports in favour of the Channel Tunnel scheme to an English correspondent. There is no truth in that statement. It is semi-officially denied that either the Chief of the General Staff or the Quartermaster-General ever supplied such documents to any person.

It is stated by the *Italia Militare* that, for the present, the 9-centimètre batteries of the Italian field artillery are to receive, in place of the 9-centimètre cast steel (Krupp) breechloaders now in use, similar ones of compressed bronze. The change is to be effected this month in four batteries of each regiment of field artillery, for which 320 guns will be required. Steel barrels are to be used only in fortresses, for reserve batteries, &c. The reasons given for this important measure are that, with at least equal penetrating power, bronze barrels possess greater durability, are more easily preserved, and are handled with greater facility.

It is announced by the Russian journals that an invention, due to the late General Skobeleff, is about to be tried,—we presume, when the weather gets warmer and the ice breaks up and disappears. This invention consists in furnishing each trooper with two bladders, which can be blown out at will, so as to facilitate the passage of rivers by cavalry. A French military writer points out that the invention of the lamented Russian General really belongs to the Romans, as may be seen in the pages of Polybius. Then, without going so far back, one finds the Chevalier de Folard making experiments, similar to those which are going to be tried in Russia, in the year of grace 1701. The Chevalier was very enthusiastic on the subject, and his proposition was taken up by the Court; but, alas! peace was signed, and his suggestion was never adopted. He often tried the experiment himself, at night, and always with success, and on one occasion with 500 mounted dragoons. With these skins, the Chevalier says that a cavalry force might push boldly into the enemy's country, without any fear of being cut off at the passage of a river.

The Household Cavalry, when mounted and in full dress, do not show the medals they have got for the late campaign in Egypt. Medals cannot be seen through cuirasses, and they cannot easily be placed so as to be seen over them. The ribbon might be attached to the lower edge of the collar of the tunic, or to the edge of the lining of the cuirass, so that the medal might be seen; but, unfortunately, the pouch-belt comes so close to the collar that it would either cover the medal, or else would tear away the ribbon. The medal, or medals, might be buckled to the pouch-belt by means of small loops, like those through which the red or blue cord passes. For obvious reasons, the Household Cavalry have experienced no difficulty, till lately, in displaying war decorations. Yet it seems hard that they alone should be unable to show in full dress the medals they have so fairly and honourably won.

THE NEW BREECH-LOADING GUN.

We have lately purchased a copy of the new drill for the 6-inch breech-loading guns, broadside carriage, Armstrong pattern, as supplied to H.M.S. Volage. These guns will in future form the principal armament of all our swift cruisers, and they should certainly be fitted, instead of the obsolete 64-pounders, not only to all our men-of-war, but also to those merchant vessels which have satisfied the Admiralty requirements, and are considered capable of being converted into Alabamas in the case of a maritime war. Weighing only four tons, they are, from their great length and increased chambering, able to penetrate compound steel and iron armour-plating of 7 1-5th inches thickness; whilst the 8-inch gun, weighing more than twice as much, viz., nine tons, from its decreased velocity, cannot penetrate a 7½-inch plate of the same nature. That this gun is an immense advance on our former ordnance is undoubted, and the policy which has caused its adoption in the Navy is enlightened and far-seeing. Would that we could say the same for the mounting, and for the details of the breech-loading apparatus. In a recent issue, we stated that the mountings of these guns were obsolete, and we asked,—Who was responsible? thinking that perhaps our Excellent gunners had been too conservative, and had elected to retain the Elswick compressor, with its screw-shaft and unscientific means of overcoming the recoil. It is a wonder to us how this same Elswick compressor has held its ground in the Navy for nearly fifteen years, and though its faults are so patent, and have been so frequently unfavourably reported on by Naval officers, the Woolwich authorities who know nothing of ship necessities have continued to thrust it on our Naval gunnery authorities. After the gun is run out, the whole of the bars in the Elswick compressor are jammed tightly together. These bars are situated some feet below the longitudinal axis of the gun, where the strain of recoil takes its maximum effect. It would be bad enough if the severe strains thus caused by the leverage exerted were gradually overcome, and the force of the recoil thus slowly expended; but, instead of this, the Elswick compressor acts like a man who, trying to catch a cricket-ball, does not move his arm an inch, and thereby either misses the ball or bruises his hand. These bad qualities are intensified when the guns are fired in a sea-way, and it is more by good-luck than good management that so few accidents have happened to guns thus fitted. In the Inflexible, Dandolo, and Duilio, the immense weight necessary to the fitting of either Elswick or Scott compressors have necessitated the adoption of what is practically nearly similar to a very much better plan, viz., Mr. Vavasseur's. In these vessels, the trunnions themselves are on a slide, and the recoil is thus felt where it takes most effect, whilst hydraulic power is brought into play to gradually overcome it. If the principle is right in the Inflexible and the Italian ships, why should it not be adopted in all our men-of-war? The answer is, that the "Woolwich authorities will not have it!" How long, may we ask, are the requirements of one service to be judged of by men who are and must be ignorant of their nature? We say this in no sense of criticising the capacity of the Arsenal to supply forts and guns for military purposes. In heaven's name, then, let us come to an understanding! Let the cobbler stick to his last, and the Woolwich authorities stick to making guns for their own service! A Committee is now sitting at the War Office, to decide whether or no the manufacture of gun carriages and mountings can be entirely handed over to the Admiralty, and we hope nothing will be allowed to interfere with this step in the right direction being taken. We have more to say on this subject, but must reserve our comments for a future number.

THE STAYING POWERS OF A SOLDIER.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—A comparative test of the staying powers of officers and non-commissioned officers at different periods of service has been afforded by the result of several paper chases that have recently taken place in the county Tipperary. The distance run on each occasion was between 13 and 14 miles, and the time occupied two and a half hours. The course lay straight across country, walls, hedges, ditches, and bog-land having to be taken. The pace was a steady double, varying occasionally into a run, or a walk for breathing intervals, but no halt was allowed; ordinary fatigue-dress was worn. Twenty started:—

	14 to 20 years.	8 to 14 years.	2 to 8 years.
Numbers, inclusive of hares, who took the whole course	4	2	2
Numbers who took short cuts, did not keep up the running, and who came in late	—	4	4
Numbers who fell out and returned to barracks, before four miles had been gone over, they having lost sight of the "field"	—	1	3
Totals	4	7	9=20

A REASONABLE COMPLAINT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—It is high time the instructors of musketry were made acquainted with the position they are to occupy in the coming year's training of the men in this branch of instruction, which commences on the 1st prox. That some change is contemplated is evident from the fact that the instructorship in many battalions having become vacant, no officer has been gazetted to fill the post, and I believe it is now generally understood that the officer instructor is to be dispensed with, so far as the companies are concerned. I myself can only regret that such a decision has been arrived at with regard to the serjeant-instructors. If it is intended to again lower them on the roll of non-commissioned officers, or to dispense with their services altogether, it would be only fair to let it be known at once what the intention is, so that they might have an opportunity of joining the Auxiliary Forces, as, no doubt, they would not care to serve on in the regiment, should a misfortune of this sort befall them from no fault of their own.—I am, &c.,

ONE OF THEM.

Reviews.

The British Navy. By Sir Thomas Brassey. (Longman & Co.)

The third volume of Sir Thomas Brassey's work on *The British Navy* is valuable, not only as a book of reference, but as one which will probably serve to correct public opinion as to the state of our Navy, and perhaps induce some of the uninitiated to take a less gloomy view of this important subject than that which seems, at present, to be the most fashionable one. Until recently, the British Navy seemed to get on quietly and effectively, but suddenly the flood-gates of criticism have been opened, and theorists have sprung into existence prepared to prove that our Navy is going to the dogs as fast almost as our Army, and that safety can only be secured by the adoption of theories diametrically opposed to each other. In order to "steady" the public mind on the question of the shipbuilding policy of the Navy, and on other equally important ones, Sir Thomas Brassey has carefully prepared a summary of the opinions thereon which are entertained by the most thoroughly competent men throughout Europe, and some of which have been published, or verbably expressed in both Houses of Parliament. It would be difficult to overrate the value which has been the outcome of Sir Thomas Brassey's labours. A summary thus prepared may be regarded as a miniature history of the British Navy of the present day, its strength, resources, and administration; every record of opinion which is entitled to consideration has been carefully preserved, so that with the aid of this book of reference it will be difficult for either the optimist or pessimist to plead want of information as to the present position of the Navy, as to the most effectual mode of improving it, and most particularly as to the nature of its armaments. It is interesting to learn that moderate-sized ships and guns and plates are preferred by the Admiralty, a preference which is fully endorsed by its professional advisers. It is also interesting to learn that professional opinion is most decidedly opposed to a dependence upon a few large and heavy guns. In concluding the introductory portion of his work, Sir Thomas Brassey expresses his individual opinion that the protection of our commerce at sea should be the primary aim of our shipbuilding policy. Foreign officers and constructors are agreed that they cannot engage in the line of battle against England with the hope of success. They point to our commerce as the vulnerable spot—the heel of Achilles. These ideas are being carried out in practice. We see in foreign navies a recent and rapid development of a formidable class of cruisers, lightly armed, but of great speed and coal-endurance. Vessels of this class are plainly intended not so much to fight an action as to intercept and destroy the defenceless, yet valuable, ships of the mercantile marine of an enemy. We must be prepared to protect ourselves against the form of attack which we have most reason to apprehend, and the nature of which seems to be foreshadowed not obscurely in the shipbuilding operations of our maritime rivals.

Obituary.

Rear-Admiral John D. M'Crea, Admiral Superintendent of Portsmouth Dockyard, died suddenly at his official residence on Monday. The deceased officer was first lieut. of the Penelope in the Baltic, and was present at the bombardment of Bomarsund, Aug. 1854. He also served in the Hastings in the Baltic Expedition of 1855, and had the Baltic medal. He was Admiral Superintendent at Malta, from whence he was transferred to Portsmouth, in succession to Vice-Admiral the Hon. F. A. Foley. The remains were interred at Portsmouth on Thursday with full naval honours, the pall-bearers being Flag-Capt. Rowley, A.D.C., Capt. Codrington, Capt. Colomb, and Staff-Capts. Johnstone and Watts.

Gen. T. Charlton Smith, whose death we recorded last week, served for a short time in the Royal Navy on the east coast of Spain, and was three times wounded. In June, 1813, just after the unsuccessful siege of Tarragona, he joined the 2nd Batn. 27th Inniskilling Regiment, still wearing his midshipman's uniform. He was present in the action at Ordal on Sept. 12, when the position of the allies was carried by overwhelming numbers, after a determined resistance. The 2nd Batn. 27th (the only British engaged), had 8 officers and about 300 men killed and wounded. He remained with this battalion during its service in Spain and France, and till its return to Ireland in 1814. Ensign Smith was with the 1st Batn. 27th at Waterloo, and was severely wounded. Capt. Smith (he attained that rank in 1835) served with the 27th in South Africa, and was appointed Comdt. of Natal in 1842. For his defence of that post against the Boers, he received the brevet rank of Major, after 29 years' hard service, and a magnificent sword bearing on its blade the following inscription:—"Presented to Major T. C. Smith, H.M.'s 27th Regiment (Inniskillings) by British subjects of the Cape of Good Hope, to express their sense of his indomitable bravery in maintaining his post at Port Natal, against an overwhelming force, from May 24 to June 25, 1842." The deceased officer retired on the half-pay of Major, but attained the rank of Gen. The Distinguished-service Pension was conferred on him in 1856. Gen. Smith suffered severely for the last two years from the effects of two old wounds; a ball which lodged in his left leg, in a boat action in 1813, and another which passed through his right leg at Waterloo. Gen. Smith was, throughout his very long life, a poet of undoubted merit. A small volume of his works, printed for private circulation in 1819, would suffice to establish his reputation. We hope that a complete publication of his poems will soon appear.

The Army.

5th Dragoon Guards. The regiment proceeds from York to Ireland in the autumn, and will, it is believed, be quartered in Dublin.

6th Dragoon Guards (Carabiniers). Capt. Sprot has been granted leave from India to England for twelve months, on urgent private affairs.

7th Dragoon Guards. The regiment is in fairly good health at Shorncliffe, officers and men having picked up considerably since their arrival from Egypt.

2nd Dragoons, Royal Scots Greys. The regiment will be moved in the autumn from Ireland to Great Britain, and will most probably be stationed at York.

3rd Hussars. Lieut. the Hon. C. E. Bingham proceeds to Egypt, in charge of a draft of the 19th Hussars.

4th Hussars. The reports which are circulated as to the desertion of a captain of this regiment are exaggerated. An officer did take himself off, it is true, in a rather unaccountable manner, but it is not a fact that he has been apprehended by the police as a defaulter. We caution our readers against relying on the sensational stories which are being circulated.

6th Dragoons. The *Natal Mercantile Advertiser* of Feb. 9 has the following:—"The Cetewayo military escort, under command of Major Froom, arrived in Durban from Zululand yesterday at 12.30. It consisted of a squadron of Inniskilling Dragoons, numbering 160, two companies of the 41st Welsh Regt., 50 Mounted Infantry, the Army Hospital Corps, and some of the Commissariat. The column left the Tugela on Monday morning, and had a very wet march, as it rained the whole time from starting until arrival at Stanger about 11 o'clock, the inducements to outspan not being sufficient. On Tuesday the escort marched to Victoria village, and from there on Wednesday it reached Verulam, which was left a little before six yesterday morning. A short outspan took place on Smerdon's Flat, and then, as stated, Durban was reached at 12.30. A company of the 41st Mounted Infantry has been left behind at Etchowa, until the formation of the Border Police, under Mr. John Shepstone. The work of the column has been wonderfully and most successfully carried out, there not having been a hitch anywhere; and although sixteen spare horses were taken, only two have died of the horse sickness, which is rather a remarkable fact, the disease in these two cases having been contracted in Umhlatoosi Valley. The escort had a strange experience at the Intanjaneni Mountain, where they encamped, and were enveloped for the whole time of their stay in a heavy, wet cloud, which was very cold; but directly they got down on the Ulundi Flat, the heat was so great that it could hardly be borne. The escort is to be congratulated on the most satisfactory execution and the completion of its work."

17th Lancers. Capt. Jenkins, whose leave of absence from India has expired, has been posted to the depôt.

19th Hussars. The date of departure of the regiment from Egypt is still uncertain. All that is known is that it will return as soon as it can be spared.

21st Hussars. Capt. Wyndham is a candidate for admission to the Staff College, and has been attached to the office of the Assist.-Qrmr.-Gen. of the Dublin District for Staff work for one month.

ROYAL ARTILLERY.

Capt. F. Morley, lately proof officer at the Royal Arsenal, has taken up his appointment as inspecting officer to the Royal Gun Factories, the post being a new one, for which an allowance of £500 a year has been made to the department, including regimental pay.

The *Bombay Gazette* says:—"The cadre of the late Bombay Artillery shows how soon the officers of that splendid old regiment will cease to require a page of the *Army List* to themselves. They are returned as three colonels commandant, three removed from the list as general officers, 12 lieutenant-colonels, and 15 majors. The commission of the junior of these officers bears date 1860. The old Bombay Engineers, too, like their comrades of the Artillery, are a corps of field officers, and have two colonels-commandant, four colonels removed from the corps as general officers, three colonels, 13 lieutenant-colonels, and 20 majors. That an officer's prospects should be seriously interfered with by too rapid promotion sounds like a contradiction in terms, but in the case of many Indian Engineers we believe that promotion to general has been regarded almost as a calamity."

"R.A." writes:—"Surely, if the general hope that the Royal Regiment of Artillery will shortly be broken up, and organised like the Infantry and Cavalry, is doomed to be disappointed, something might at least be done to alter the present confusing and ridiculous nomenclature. Two or three batteries, as the case may be, make what is called a 'division,' two guns also make a 'division;' then there is a term, sometimes used on parade, 'grand divisions.' Why not call the 'division' made up of two or more batteries a 'regiment,' and the 'division' made up of two guns a 'gun troop?' Neither name would be, perhaps, very appropriate, but it might help to prevent confusion. The late Col. Home, in his valuable 'Précis of Modern Tactics,' protested against the manner in which the word 'division' was used to denote different military units; but when the Royal Regiment was reorganised last year, some term was required to express a lieutenant-colonel's command of two or three batteries, and 'division' appears to have been the only name that could be thought of. If the reformers would only leave the Cavalry alone, and take a turn at us, they would find not only a fine field for the exercise of their ingenuity and resource, but would also do a very great service to the Artillery and to the Army."

The new code of regulations, as sanctioned by the War Department, for the future management of military savings banks, has been promulgated. In future a military savings bank is to be attached to every cavalry and infantry regiment, and to the corps of Royal Artillery and Royal Engineers. A sum of £30 only is to be deposited in any one year, and not more than £200 in the whole. The interest allowed to depositors is at the rate of £3 15s. per cent. per annum.

ROYAL ENGINEERS.

Field-Marshal Lord Napier of Magdala, whom the corps are proud to claim as their own, has been in Egypt now for some time for the benefit of his health, in company with his son, the Hon. Major Napier. Our Cairo letters inform us that his residence in Cairo has been attended with benefit, and that he has nearly recovered the vigour which, for a man of his years, is rather exceptional. The garrison of Cairo has been paraded in his honour. Lord Napier, in plain clothes, took the salute at the march-past. The officers of the Royal Engineers have entertained him at a banquet, and he has been received with marked consideration by the British and native authorities. Among the places of interest he visited (and he has left but little unseen) has been, of course, the battlefield of Tel-el-Kebir, which he has inspected on two occasions and studied closely; and it is mentioned in one of our letters that his Lordship is strongly impressed with the neglect of transport, to which must be traced the mortality of the Army and the losses consequent on a front attack, as a very short and simple movement to flank Arabi's left would have enabled Lord Wolseley to have rolled up the Egyptians instantly. But to move away from the rail and the canal was impossible without carriage, and none was provided. Lord Napier of Magdala went to Luxor on March 12, and was expected back in a fortnight.

Grenadier Guards. The 1st Batn., consisting of about 26 officers and 560 non-commissioned officers and men, arrived at Aldershot from London on Monday, for the purpose of going through a course of musketry practice.

1st, or Royal Scots. Major Sheringham, 2nd Batn., is about to exchange to the 22nd Regt. with Major Blane.

10th Lincolnshire Regiment. Particulars have now been received of the murder of Lieut. W. H. Coode at Benares. On Feb. 16, deceased was drilling the men on parade, when two rifle shots were fired from the corner of the barracks. The bullets passed close over the heads of the men, and almost immediately a third shot was fired, severely wounding a private named Lilley in the knee. The men got very excited and wanted to "scatter," but Lieut. Coode ordered them to remain steady, and rode in the direction of the firing. As he was advancing at a canter, a fourth shot was fired by a private named Cocklin, who was standing outside the barrack door. The bullet did no damage, and the man again discharged his rifle. This time the bullet entered the breast of Lieut. Coode's horse, but notwithstanding this the officer still courageously advanced towards Cocklin, shouting, "What are you about, sir?" The man replied, "Stand back, sir, or I will shoot you, too." Lieut. Coode, when about twelve paces from the soldier, was dismounting, apparently with the intention of seizing his assailant, when Cocklin again fired, and this time struck the officer in the groin. Medical aid was quickly secured, but the main artery of the leg was found to be nearly severed, and he died in about an hour. Cocklin, when taken to the cell, remarked that he wished he had been able to "do" for Serjt. Brent. Serjt. Brent had been instrumental in obtaining a conviction against Cocklin's "chum" for insubordination, and deceased, as adjutant of the regiment, had prosecuted him. This is the only reason that can be assigned for the occurrence.

11th Devonshire Regiment. Lieut. Davies has been granted leave from India to England for nine months, on private affairs.

14th West Yorkshire Regiment. Lieut.-Col. Saunders succeeds Col. Warren, C.B., in command of the 2nd Batn., Brevet Lieut.-Col. Dixon becoming 2nd lieut.-col. Lieut. Lester, 2nd Batn., has been granted leave from India to England, for 15 months, on private affairs.

18th Royal Irish Regiment. The 2nd Batn., on arrival at Aldershot from Malta, will occupy quarters in the permanent barracks.

21st Royal Scots Fusiliers. Lieut. D'Aeth, 2nd Batn., has been granted leave from India to England for six months, on private affairs.

22nd Cheshire Regiment. Major Blane has arranged an exchange to the 1st Royal Scots with Major Sheringham.

23rd Royal Welsh Fusiliers. The following result of a general court-martial, held at Chester on Jan. 12, for the trial of No. 207 Pte. J. Conlan, depôt, was promulgated to the troops at a full parade in the barrack square, Wrexham, on Monday last:—"Charge—After having been discharged with disgrace from a part of her Majesty's Forces, enlisting in the Regular Forces without declaring the circumstances of his discharge, in that at Wrexham, on Sept. 20, 1882, after having been discharged from the 102nd Regt. with ignominy and from the Royal Horse Artillery with ignominy, he enlisted into the Regular Forces without having declared the circumstances of such discharges. The court found the prisoner guilty of the charge, and sentenced him to suffer penal servitude for the term of five years, and to be discharged with ignominy from her Majesty's service. Her Majesty has been pleased to confirm the finding and sentence, and to command that the sentence be carried into effect."

31st East Surrey Regiment, on arrival at Aldershot from Gibraltar, will occupy quarters in the permanent barracks.

34th Border Regiment. Capt. Richmond, Adjt. 4th Batn., becomes major, vice Major Tufnell, retired.

38th South Staffordshire Regiment. The following regimental order was issued at Cairo on the 2nd inst.:—"It is with great regret that the commanding officer announces to the battalion the death of Capt. W. T. Cautley, this evening, in hospital, of enteric fever. The late Capt. Cautley served in the battalion for 15 years, and the commanding officer feels the battalion has lost a most zealous, hard-working officer, a good comrade, and a kind-hearted friend."

41st, the Welsh Regiment. A correspondent writes from Natal:—"Large placards are placed in all our English towns and cities, picturesquely showing the advantages of the Army, describing as good the pay, clothing, and accommodation. Now, in Natal, the pay is very poor, beer being one shilling per quart, and provisions are likewise expensive in proportion; and taking into consideration that twopence halfpenny is deducted out of the 'one shilling' for vegetables, and sixpence deducted for family allotment, there is a balance of threepence halfpenny per day left. And we are to supply out of this balance the common necessaries of life, pipe-clay, butter, &c. The clothing, I will say, is fair, only we find it much too hot for this country in the summer months. As for our accommodation, after being nearly two years under canvas, in time of peace, there was erected what are termed a barracks, made partly of earth, and of a very dusty nature. With each gust of wind, our nostrils, eyes, ears, and mouth get unpleasantly filled with the dust. Again, the married men have been in time of peace separated from their families for over two years. What is the reason? If the Government intend to keep them in the colony, why do they not build suitable quarters, and send the families out to them? They have endured all the hardships, without the gains, of a campaign. There are 300 men whose first term of army service expires this year, and not one will re-engage or extend his service, for they are thoroughly disgusted at the treatment they have received. While the troops of the Egyptian Expedition have received extra money compensation, we, after two years in the field, have received none! One regiment in the colony has had all its families sent out to them. This seems as if our poor, unfortunate men were being punished. I hope some Member of Parliament will take our case up, and see justice done to our regiment. Believe me, I do not complain without reasonable cause." See 6th Dragoons.

ROYAL MARINES.

Capt. Thomas Moore, R.M.A., has been nominated adjutant of the 1st Essex Artillery Volunteers, vice Capt. A. J. Hill, R.M.A., completed period of service with Auxiliary Forces, and directed to join that corps at Stratford on the 1st prox.

Capt. C. D. Fowler, R.M.L.I., has been granted three months' leave of absence, on disembarkation from H.M.S. Urgent.

The under-mentioned have been awarded medals for long-service and good-conduct:—R.M.A.—Musician W. E. Hyde, 3rd Company; Gunners Felix Gower, 2nd Company, Frederick Cridland, 3rd Company, and Henry George, 6th Company; Serjts. James Deans, 6th Company. R.M.L.I.—Serjt. Josh. Herbert, 17th Company; Pte. David Sibley, 45th Company.

The following circular respecting the transfer of officers of the Royal Marines to the Indian Staff Corps, has been issued to the several Divisions, viz.:—"The Lords Commissioners of the Admiralty having approved, in concurrence with the Secretary of State for War for India, the transfer of certain officers of the Royal Marine Forces to the Indian Staff Corps, on the same terms as officers of her Majesty's land Forces, under General Order No. 117, of 1878, as modified by General Order No. 1, of 1882, have been pleased to direct that the number of such transfers in future is not to exceed, in the aggregate, one annually from the Royal Marine Artillery, and two from the Royal Marine Light Infantry. It must be understood by officers of the Royal Marines that the announcement of this limit does not imply any pledge that officers will be required for the Indian Staff Corps, annually or otherwise, for this depends upon arrangements over which the Admiralty have no control. All applications for transfer are to be made on or before July 1 this year." As yet, more officers have been transferred from the Royal Marines to the Indian Staff Corps, since entries were first opened, than are now provided for by this circular.

54th Dorsetshire Regiment. It is stated by the Indian papers that Lieut.-Col. Gosset will officiate for Col. E. F. Chapman, C.B., as Military Secretary to the Commander-in-Chief of India, when the latter goes on leave in April next.

66th Berkshire Regiment. A court of inquiry has assembled at Portsmouth to investigate certain serious charges brought against Capt. E. G. P. Mayers, paymaster of the regt. Among other things it is alleged that some important documents relating to regimental accounts were wilfully lost after the battle of Maiwand, and that the accused has embezzled public money to the extent of £3,000 or £4,000. It is understood that Capt. Mayers will shortly be tried by general court-martial. Meanwhile, he is under arrest. He maintains that he is perfectly innocent of the charges brought against him, and asserts that he shall be able to rebut them if certain witnesses now in Poonah can be brought home to give evidence in his favour.

67th Hampshire Regiment. Gen. William Mark Wood, colonel of the regiment, died a few days ago, at his residence, Bishop's Hall, Romford, Essex. The deceased was the eldest son of the late Mr. W. J. Lockwood, of Dews Hall, Lambourne, Essex, by his marriage with Rachel, daughter of Sir Mark Wood, and was born in 1817. He was educated at Eton, entered the Army in 1836, and in the following year assumed the name of Wood in lieu of his patronymic. He obtained a lieutenantcy in 1841, became capt. in 1844, was promoted to lieut.-col. in 1853, and col. in 1854. He served with the Coldstream Guards in the Crimea from Oct., 1854, till May, 1855, taking part in the battles of Balaclava and Inkerman, and in the siege of Sebastopol (medal with three clasps, Turkish medal, and 5th Class of the Medjidie). He attained the rank of major-gen. in 1868, lieut.-gen. in 1876, and gen. in 1878. In 1877 he was appointed col. of the 67th.

74th Highland Light Infantry. The *Western Morning News* says:—"During the Egyptian Campaign, the 2nd Batn. Highland Light Infantry, now quartered in Plymouth, lost more men in action and from disease than any other single regiment. Three officers, five non-commissioned officers, and thirteen privates were killed at the battle of Tel-el-Kebir, three subsequently died of the wounds received in that engagement, and eleven died of diseases contracted during the campaign. In memory of their comrades, the officers and men are anxious to erect a monument in Glasgow Cathedral, and towards a fund for that purpose all ranks have already liberally subscribed. To swell the amount an officer of the corps has had published in pamphlet form, price 6d., an account of the proceedings of the regiment in Egypt, from the day of landing until the day of leaving for England. The story is full of interest, and will be welcome reading, not only to soldiers, but civilians. The pamphlet can be obtained of the canteen steward at the citadel."

78TH SEAFORTH HIGHLANDERS. . Col. Warren completes his five years in command, and will be placed on half-pay from Tuesday next.

79TH CAMERON HIGHLANDERS. Major Oldham, Deputy-Assist.-Adjt.-Gen. for Musketry in the Cork District, is to be transferred to head-quarters in Dublin for duty from May 1, in succession to Major Agnew, 34th Regt., whose period of appointment will expire on that date.

81ST LOYAL NORTH LINCOLN. Capt. Crosbie has been granted leave from India to England for nine months, on medical certificate.

82ND SOUTH LANCASHIRE REGIMENT. Col. Walters completes his five years in command of the regiment, and retires upon half-pay from Tuesday next.

87TH ROYAL IRISH FUSILIERS. Gen. Sir Charles Hastings Doyle, K.C.M.G., colonel of the regiment, died shortly before 5 a.m. on Monday, at his lodgings in Bolton [Street, from heart disease. The deceased was eldest son of the late Lieut.-Gen. Sir C. W. Doyle, K.C.B., G.C.H. He was born in 1804, and was educated at the Military College, Sandhurst. He entered the Army as ensign in the 87th in 1819. His principal services were in the Colonies, having served in the East and West Indies, and British North America. During the Eastern Campaign, he served as assist.-adjt.-gen. of the 3rd Division. He was placed on the Staff as assist.-qrmr.-gen. from 1847 to 1856, in which year he was appointed Inspector-Gen. of Militia in Ireland, which post he held for five years. He was then appointed to command the troops in Nova Scotia, and was placed on the Staff as major-gen. He had received the thanks of the Canadian House of Assembly, as well as of the English and United States Governments, for his judicious management of the affair of the Chesapeake during his temporary administration of the Colonial Government, and was appointed Lieutenant-Governor of the Province of Nova Scotia, upon the confederation of the North American provinces in 1867. He resigned in May, 1873, and returned home, when he was appointed, in April, 1874, to the command of the Southern District, which appointment he held till May, 1877. He became a col. in 1854, major-gen. in 1860, lieut.-gen. in 1870, and gen. in 1877; and was placed on the Retired List in the same year. He was appointed col. of the 70th Foot in May, 1868; was transferred to the 87th in 1870, and was nominated a Knight Commander of the Order of St. Michael and St. George in 1869.

89TH ROYAL IRISH FUSILIERS. Lieut. Fry is a candidate for the S.C., and has been appointed to the 9th Bombay N.I., on probation.

100TH LEINSTER REGIMENT (ROYAL CANADIANS). Brevet Lieut.-Col. Dawes has joined the 2nd Batn. at Birr, on reverting to regimental duty for Staff employment.

MEDICAL DEPARTMENT. The following transfers of Medical officers have been ordered in India:—Surgeons-Major R. Jackson, from the Presidency to Pachmaree; J. d'Altera, from Sitapore to Naini Tal; E. Wilkes, from Dinapore to Landour; S. G. White, from Nowshera to Kasauli; W. Venour, from Meerut to Jutogh; T. Rudd, from Rawul Pindee to Dalhousie; J. Ferguson, from Mooltan to Murree; C. S. Wills, from Barrackpore to Ranikhet; G. W. McNutty, from Meerut to Chakrata; W. Temple, from Rawul Pindee to Subathu; J. Good, from Pachmaree to Cawnpore; H. Scott, from Landour to Sitapur; F. A. Turton, from Allahabad to Dinapur; J. Hector, from the Presidency to Allahabad; R. de la C. Corbett, from Dum Dum to Barrackpore; and G. Martin, from Peshawur to Mooltan. Brigade-Surgeons W. Ashton, from Allahabad to Chonbattia; R. W. Meadows, from Murree to Lucknow; and T. N. Hoysted, from Allahabad to Rawul Pindee. All these officers will have medical charge of the station hospitals.

PAY DEPARTMENT. Capt. Compigné, from the 13th Regimental District, Taunton, embarked for Ceylon on the 7th inst., to relieve Capt. C. C. Budd; Capt. J. H. Jackson, from the 43rd Regimental District, Oxford, embarked on the 15th inst for Malta, to replace Capt. R. M. Ireland, ordered home; Capt. W. B. Wade, 2nd Batn. 5th Fusiliers, left for Bombay, to rejoin his regiment in India, on the 15th inst. From Egypt we hear that Capt. C. B. Griffiths, invalided home, is on passage to England in the Nepaul. Capt. Mortimer is slowly improving in health, and will be invalided home as soon as he is fit to undertake the voyage. Capt. Fox accompanies his regiment, the 49th, to Gibraltar, and Capt. Stradling proceeds with the 38th Regt. to Malta. A correspondent writes:—"With reference to Sir A. Hayter's remarks in the House of Commons, as stated in the *Times* of the 13th inst., regarding the proposed changes in the Army Pay Department, I do not think what is proposed will meet the requirements of the case or give general satisfaction to the officers of the Department. As regards the increase of rank, it is those officers with long service who most feel the inequality in this respect, and their position compared with that of regimental officers. There are many who will not benefit for some time by the increase of rank to major, as it is proposed to be given, and if all officers who joined the Department before June, 1881, were given the rank of major irrespective of their departmental service, it would be simply an act of justice to them, and place them on an equality with regimental officers of their own standing. As regards filling up vacancies in the Department, the proposal to give rank of major after ten years' departmental service will not be an inducement to combatant officers to resign their commissions, as very few of them would not obtain that rank regimentally in a shorter time. Those officers who have joined the Department since June, 1881, or who may hereafter join, should be granted the rank of major after five years' departmental service, provided they have a total service of 20 years. All officers of the Department should have an unqualified right to lodging and servants' allowances. Further, the vacancies caused in the list of staff paymasters by promotions to the rank of chief paymaster should be filled up; otherwise, the Department generally derives no advantage from such promotion. There are no officers who have harder work or such pecuniary responsibility as paymasters, and it is very unjust that they should not have the same benefit as regards rank, &c., as officers of their own standing in other corps and Departments."

The Auxiliary Forces.

MILITIA.

4TH BEDFORDSHIRE REGIMENT. The recruits of the 4th Batn. assembled for 56 days' preliminary drill at Hertford on Monday, the 12th inst.; 246 recruits were finally approved on that day by the Commanding Officer, Col. R. B. Fellows, and are now undergoing instruction, under the command of the Adjt., Capt. F. W. Becher. The battalion, which is up to its full strength, will assemble at Hertford on Monday, May 7 next, and will proceed to Colchester on the following day, for the annual training.

"Militia Adjutant" writes:—"Noticing the remarks in your last issue on the falling-off in the strength of the Militia, I would propose, as a remedy, a small retaining fee to non-commissioned officers, in the shape of daily pay during the non-training periods; say, serjeants, 6d.; corporals, 4d.; and lance-corporals and bombardiers, 2d. They could be paid quarterly, similarly to the pensioners, by the paymasters of their own regiments. This would, I feel sure, not only render the Militia more popular, but would also increase immensely its efficiency. I think most Militia officers will agree with me that the weak point of their regiments is their non-commissioned officers. These appointments are not lucrative, and have many disadvantages for men who, in civil life, may find themselves under those whom as soldiers they commanded. Few men care to take the stripe, and those who do have little to gain by remaining in the regiment. This is especially felt in Artillery corps, where non-commissioned officers have to act as instructors in gunnery; and it is most discouraging to battery commanders and the permanent staff to find their trouble in preparing these non-commissioned officers is thrown away, by their leaving perhaps after one training. The small daily pay would make men hesitate before surrendering it, and being within the reach of all, would act as a strong inducement to steady men to enlist. I am aware that this would be a serious innovation, but it is far from being impracticable. The cost, I calculate, would be somewhere about £70,000 a year, a small sum, compared to the gain in the efficiency of such a valuable force as the Militia."

Earl Percy will on Friday ask the Secretary of State for War if he will state the reason why the form of the oath taken by a Militia recruit on attestation has been altered by the omission of the words, "in any part of Great Britain and Ireland, for the defence of the same," and of the words "so help me God."

The eight battalions of Militia ordered to train at Aldershot this year will be encamped and attached to brigades as follows:—7th Batn. Rifle Brigade, May 7, Church Plateau, 3rd Brigade; 3rd Derbyshire, May 28, Thorn Hill, 1st Brigade; 7th King's Royal Rifle Corps, June 4, Swan Inn Plateau, 3rd Brigade; 3rd East Surrey, June 4, Rushmoor Hill, 2nd Brigade; 3rd Royal Fusiliers, June 25, Rushmoor, 1st Brigade; 5th Royal Fusiliers, June 4, Rushmoor, 1st Brigade; 4th Oxfordshire L.I., June 11, North of Cove Hill, 3rd Brigade; 4th East Surrey, July 9, Rushmoor Hill, 2nd Brigade.

THE VOLUNTEERS.

LONDON RIFLE BRIGADE. The funeral of Lieut.-Col. A. T. Ewens took place on Tuesday. There was a very large muster of the regiment at South Kensington Railway Station, to which point the coffin was conveyed on an open funeral car, and there transferred to a gun-carriage of the Royal Artillery. Beside the firing-party, which was under Lieut.-Col. Adrian Hope, many present and former members of the brigade, as well as other Volunteers, followed the bier to Brompton Cemetery, the regimental band playing the "Dead March," and the *cortége* proceeding the whole distance in slow time, the firing-party with arms reversed, and the officers of the brigade being the pall-bearers. In the cemetery, a large number of Regular and Volunteer officers were assembled, among the former, Major-Gen. Higginson, C.B., commanding the Home District, and Col. Clive, Grenadier Guards, to which the London Rifle Brigade is attached; while the Lord Mayor was represented by Major Campbell, the City Marshal.

The annual return of the Volunteer Corps made to the War Office has been presented to Parliament. From this we learn that the total enrolled strength of the Force on Nov. 1 last was 207,336, of whom only 7,962 were classed as non-efficients; while 17,621 (5,692 being officers, and 11,929 serjeants) had qualified as proficients for the special grant of 50s. In addition to these, 328 officers had passed in tactics, and qualified for the special grant of 10s. The per-centage of efficients to the total number enrolled is given as 96·16, whilst the per-centage of men present at the official inspection was 84·83. In total numerical strength the Force is nearly a thousand less than in the preceding year, when it numbered 208,308, compared with 206,537 in 1880, 193,893 in 1870, and 119,146 in 1860. That the efficiency of the Force has also made continued progress is shown by the fact that the per-centage of efficients enrolled has improved from 69·66 in 1863, to 89·11 in 1873, 96·08 in 1881, and 96·16 last year. The enrolled Volunteer Force is composed as follows:—Light Horse, 260 (per-centage of efficients, 80·77); Artillery, 38,261 (per-centage of efficients, 95·63); Engineers, 8,896 (per-centage of efficients, 96·12); Mounted Rifles, 52 (per-centage of efficients, 73·08); Rifles, 159,867 (per-centage of efficients, 96·32).

In reply to Mr. M. Scott, Mr. Brand stated on Monday, in the House of Commons, that it was true that a request had been made for the loan of harness for the guns of the Metropolitan and other Artillery Volunteers at the Brighton Review, and that, being contrary to the regulations, it was at first refused. It was pointed out, however, that this might lead to great inconvenience, and an exception had been made in this case, and the harness would now be lent.

THE ARMY PAY DEPARTMENT IN EGYPT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The officers of the Army Pay Department are deeply indebted to you for animadverting in your last issue on the treatment its members have received in the distribution of honours for service in Egypt, as compared with officers of other departments similarly detained at the base of operations. Permit me, however, to draw attention to one point in Sir A. D. Hayter's reply to Mr. Whitley's question in the House of Commons last Monday week. The Financial Secretary concluded with the words:—"And they [the officers of the Pay Department] will all receive the Egyptian war medal and the Egyptian star." Exactly; and so will every officer, non-commissioned officer, and man, in both services, employed in the war. Civilians reading the reply would be inclined to say, "Oh! they have got the medal and star; what cause have they for complaint?" forgetting, perhaps, that the main point in Mr. Whitley's question—the treatment compared with other Departments who had been widely recognised—was quietly ignored by Sir A. Hayter in the reply. All sensible men—and there are some within the portals of the War Office who sympathise with the Pay Department in this matter—must see that if officers who have the conduct of the financial duties of an army on active service are to be excluded from all participation in honours and rewards, they had better be converted into a branch of the Civil Service (Treasury) at once, and paid accordingly. No officer with a lively sense of past service as a combatant and respect for his future position can be expected to join a Department where he receives less pay and less rank than officers of other Departments, and no special recognition for hard work in a campaign.—I am, &c.,

FIAT JUSTITIA.

A correspondent writes:—"I notice in the Aldershot notes of your issue of Feb. 24, that by a Horse Guards' ruling the regimental quartermaster-serjeant is senior to all other quartermaster-serjeants in a regiment. This is rather hard, as I have heard that since the rank was given to orderly-room and paymaster-serjeants, all commanding officers to whom the case had been referred had ruled that the quartermaster-serjeant longest in the rank was the senior. Now this is reversed, and the men of, say, a year's standing, must give place to the one of a month."

A correspondent says:—"Recruits on joining the service are very often deceived both by recruiting-serjeants and advertisements. Men offering themselves for attestation are led to believe that they will receive 1s. per day clear, but they are very soon undeceived, and find that 3½d. or 4d. per diem is stopped for additional food which is quite necessary, as 'Cardwell's boys' cannot possibly exist, much less do 'sentry-go,' on 1 lb. of bread and ¾ lb. of very inferior meat. When he learns the above facts, the recruit perhaps tries to reconcile himself to 8d. clear and free clothing; but alas! his boots want repairing, he is 'put down' for a new kersey jacket, he has to buy under-clothing in the regimental stores,—a shirt costs him 5s. I have four years' experience, and I find that a private instead of being 7s. per week to the good, could not scrape together 3s. Then why try to deceive?" There is unquestionably a great deal of truth in what this correspondent says. False statements such as those referred to, do incalculable mischief.

The appointment of Military Secretary to the Governor of Madras, which Major Spencer lately resigned, is said to have been offered to, but declined by, Col. Galloway, commanding the Body Guard. The appointment has since been offered to, and accepted by, Major Kenney Herbert, Assistant-Secretary in the Military Department of the Government of India. A Calcutta paper remarks that Madras is to be congratulated on getting back an officer who made himself so popular when stationed there before.

An Army Circular (India), dated Jan. 31, notifies the appointments which qualify a lieutenant-colonel of the Staff Corps or Indian Army for promotion to the rank of brevet colonel. General duty is, under the authority of this circular, now raised to the dignity of an appointment. But we fail to understand why a substantive lieutenant-colonel of the Indian Army should be allowed, by virtue of doing nothing,—or general duty, the terms are synonymous—to qualify for his brevet, unless it be that that privilege is accorded to Staff Corps lieutenant-colonels. In place of thus debasing the rank of colonel, we should prefer to see these unemployed lieutenant-colonels retire into private life; as doubtless they would be glad to do, on the offer of a sufficient inducement in the way of pension.

The Secretary of State for India has decided that the following appointments are not considered as coming within the category of those qualifying a lieutenant-colonel for promotion to the rank of brevet colonel:—Commissioner, deputy-commissioner, assistant-commissioner, secretary, judge, magistrate, cantonment magistrate; also appointments in the Postal, Survey, Forest, Telegraph, Police, and Educational Departments.

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS.—The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

EGYPTIAN WAR FUND.

NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures at their wholesale-trade Prices, which are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have taken this course of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,
PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

SPECIAL NOTICE to CIGARETTE SMOKERS.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 24, 1883.

WE gather the following personal statistics from the new official *Army List*. The oldest General officers are Generals P. V. England and Sir Edward Sabine, Royal Artillery, both born in 1788; and the two youngest, Major-General the Duke of Connaught, born May 1, 1850, and Major-General Sir Evelyn Wood, born February 9, 1838. Field-Marshal Lord

Strathnairn, born April 6, 1801, is the oldest officer on the Active List of the Army. Colonel the Hon. G. Villiers, Grenadier Guards, is the youngest Colonel in the service, our Military Attaché in Paris having been born September 27, 1847. A brother-Guardsman, Colonel the Hon. Paul Methuen, C.B., Scots Guards, born September 1, 1845, is the next youngest; and the third place on the list is taken by Colonel T. M. Bailie, 52nd Light Infantry, born August 16, 1844. The youngest Cavalry Colonel is Herbert Stewart, C.B., 3rd Dragoon Guards, born June 30, 1843; and the youngest Colonel in the Indian Army is Sir C. M. Macgregor, who is in his forty-third year. Turning to the Lieutenant-Colonels' List, we find that Guardsmen occupy the first five places on the age scale, the youngest being Lieutenant-Colonel W. H. Mackinnon, Grenadier Guards, born December 15, 1852—Lieutenant-Colonels V. Hatton and the Hon. E. C. Digby, both of the Grenadier Guards, have only recently passed their thirtieth birthday; and Lieutenant-Colonel the Hon. A. W. Fraser, Grenadier Guards, is also among the "juveniles," the Master of Saltoun having been born in August, 1851. The youngest Lieutenant-Colonel of the Line is Lieutenant-Colonel A. M. Taylor, 19th Hussars, whose promotion has been exceptionally rapid. He was born September 9, 1850, and entering the Army December 30, 1871, after the abolition of Purchase, has risen in less than twelve years to his present rank. The oldest regimental officer is the veteran Lieutenant-Colonel commanding the Royal Malta Fencible Artillery, the Marquis de Piro, having been born in 1824. It will be noticed that the monthly *Army List* and its sister quarterly are not quite agreed as to the rank of the Maltese Marquis; for eighteenpence he can be seen in the pink monthly as Major commanding, and for fifteen shillings, as Lieutenant-Colonel, in the bulky quarterly. Coming to the Majors' List, the youngest field-officer in the service is Brevet Major R. C. B. Lawrence, 5th Dragoon Guards, born July 23, 1857. Major Lawrence, who gained Brevet promotion for his services with the Mounted Infantry in Egypt, is nephew of the late Lord Lawrence, Governor-General of India, and has been in the Army since February 12, 1876, when he passed for his commission. The next youngest on the List is a Gunner, Major H. V. Cowan, R.A., recently promoted for the Egyptian Campaign, and also decorated for Afghan services under Sir Frederick Roberts. Major Maude, 90th Light Infantry, born in 1852, and son of the Crown Equerry, is the youngest Infantry Major; and Major Crofton, 8th Hussars, also born in 1852, the youngest regimental Major of Cavalry. On the Captains' List, a probationer for the Indian Staff Corps, in Captain A. W. Brooke, 65th Regiment, is the junior. He was born June 19, 1858. There are two other Captains born in the same year, viz., E. D. Sandys, 58th Foot, and F. W. Kitchener, 14th Regiment; while twenty Captains have yet to attain their twenty-third birthday. The three youngest officers in the service, if we may believe the figures in the *Army List*, are Lieutenants G. A. French, C. N. Trotman, and R. M. Byrne, all of the Royal Marines. The first-named was born January 21, 1865, and is the youngest of the three. Lieutenant Naylor Leyland, 2nd Life Guards, born January 24, 1864, is the youngest Cavalry subaltern, Mr. H. R. Blyth, 6th Regiment, the youngest lieutenant of Infantry, and Lieutenant W. S. Lindsay, R.A., the youngest officer in the Ordnance Corps. Riding-master Mathews, King's Dragoon Guards, born in 1852, is the youngest of his rank, and Quartermaster Hart, 46th Regiment, born in 1854, presumably the youngest officer holding that appointment. There is no medical officer under 23, and the youngest Commissariat officer has passed his 25th birthday. In the Army Pay Department, the oldest officer is Staff Paymaster Henry Burke, born in August, 1823, and the youngest, Paymaster (Captain) Creighton, 87th Fusiliers, born September, 1857.

Lieutenant-General Sir A. Herbert, the Quartermaster-General, has addressed the following letter to Messrs. Cook and Son, in reference to their services in connection with the sanitary arrangements for the Egyptian expedition:—"Gentlemen,—The Lieutenant-General commanding the troops in Egypt, having forwarded, for the information of the Field-Marshal Commanding-in-Chief, a report of the cordial assistance rendered by your firm in conveying convalescents, for sanitary reasons, in your steamers on the Nile, I have now the honour, by desire of his Royal Highness, to convey to you an expression of his thanks for the admirable arrangements made by you on these occasions, by which the troops have greatly benefited. His Royal Highness fully appreciates the public spirit evinced by you in conducting the various services on which you have been employed for military purposes in the above country."

It is understood that Major-General Earle's Brigade being broken up, he will return to England from Egypt; and that Brigadier-General Arbuthnot will succeed Major-General Harman at Alexandria, when the latter gives up his command, on going home, to take up the duties of Assistant-Adjutant-General.

The curious War-Office tactics which were adopted against the retired Generals, in depriving them of their distinguished-service pensions on retirement, has attracted a great deal of attention in the Army, as the most distinguished officers were made to pay for the higher rates of pensions granted to all retired Generals, to cover the bitter pill of enforced retirement under Post-purchase Warrants. It was a remarkably bad precedent for military administration, as it may some day be carried lower down. Other officials may persuade Ministers to deprive serjeants, corporals, and privates of their good-conduct pay on retirement, as a means of slightly increasing the pay of their comrades whilst serving, without additional cost. What is sauce for the goose may be made sauce for the gander.

A Militia officer has called our attention—not unnaturally, either—to the practical exclusion of Militia officers of the present generation from the honour of becoming Queen's Aides-de-Camp. There are at present seven Militia Aides-de-Camp, besides one supernumerary. Of these seven, no less than five have retired from the service, some of them for many years. The only appointment, and that a supernumerary one, made for a very long period has been that of the Right Hon. Colonel Stanley, and it was bestowed upon him, not for service in the Militia, in which he was a very junior officer, but for presiding over the Royal Commission on the Militia and the Brigade-Depôt system. If officers are permitted to retain these appointments after retiring from the service, it would seem fair that they should do so as supernumeraries, thus affording some chance for others. This principle seems to be admitted in the case of the Volunteers, since Lord Wemyss, the senior Volunteer Aide-de-Camp, was gazetted as supernumerary, presumably because he had retired. It would seem reasonable to extend the same rule to the Militia, in which there are still not a few officers who had served for many years, including long periods of embodiment, before the Volunteer Force was created. It may be remarked that the 170 odd officers now commanding Militia battalions who are not fortunate enough to have a handle to their names can scarcely consider a list composed of a duke, two marquises, three barons, one baronet, and one brother and heir presumptive of an earl, as fairly representative of their branch of the service. If Lord Hartington wishes to give a little encouragement to the Militia, he might fairly take this matter of Aide-de-Campships into consideration.

By a lucky fluke—promotion not having reached them by April 1—Major-Generals Sir F. FitzWygram and G. W. A. Higginson, C.B., will retain their commands, the former at the head of the Cavalry at Aldershot, the latter in charge of the Home District, for another year. This is, of course, a most agreeable thing for the officers themselves, but a sad disappointment to many anxious Major-Generals, who see looming in the future all the pains and penalties incidental to five years of idleness.

Generals Sir H. P. de Bathe, Bart., and the Hon. Sir F. Colborne, K.C.B., complete five years' unemployed service on Saturday next, the 31st inst., when they will be removed to the Retired List. Sir Henry de Bathe was born June 19, 1823, and is, therefore, under 60 years of age, the five years' rule hitting him seven years before he would have had to retire, had he been fortunate enough to have secured an appointment. His last employment was in command of the Manchester District, which command he held from July 2, 1874, to March 31, 1878. Sir Frederick Colborne was born April 23, 1817, and therefore loses two years' service. He commanded the troops in China from August 29, 1874, to March 31, 1878.

Colonel G. Bagot, half-pay, late of a brigade depôt, and formerly of the 69th Regiment, having attained the age of 59 years, will be retired from the 23rd inst.

Considering the great paucity of subalterns, more especially in those regiments stationed in Ireland, owing to the numerous detachments a regiment has to find in that country, we cannot but think that it would be a good thing to allow Militia subalterns to be attached to the Line battalions of their territorial regiments. This arrangement would help to foster a good feeling between the affiliated Line and Militia battalions. By the present regulations, Militia subalterns are only allowed to be attached, with pay, once during their entire service, and then only for one month. If they were permitted to attach themselves, say, for three months, they would then be able to thoroughly understand the interior economy of a regiment, &c., and they would also lessen the work of their brother subalterns of the Line, who are often overworked, owing to the absence of other officers who are undergoing courses at Hythe, Chatham, and elsewhere. Many Militia subalterns would be only too pleased to avail themselves of this opportunity of gaining experience.

Brevet Major W. H. Holbech, 60th Rifles, has rejoined the staff of Major-General Luard, commanding the Canadian Militia, from active service in Egypt. How is it that Major Holbech has not yet been seconded in his regiment? Considering how unfortunate the senior subalterns of the 60th have been during the last two years, in consequence of the number of supernumerary captains there have been to absorb, they ought not to be overlooked, when a chance offers of making up to them for past disappointments.

It is a strange but significant fact that, whereas the principal War-Office officials have been decorated and thanked for their services, the officials in India who bore the heat and burden of the work of preparation in Bombay, in connection with the despatch of the well supplied and admirably organised Indian Contingent for Egypt, have got nothing. Every Continental paper devoted to service matters has spoken in high terms of the Indian Contingent, the perfect organisation of which put our home authorities to shame; and yet in the drawing for honours, the Indians drew far more than their fair proportion of blanks.

We understand that more than one recognised military authority is of opinion that the clerks at the War Office are inordinately highly paid for the work they do, and that, moreover, a very large part of the work could be carried out better and cheaper by officers and non-commissioned officers from the Army. As the War Office have recently arrogated to themselves so much of the real control of the Army, it is time that a Commission should be assembled to inquire into the increasing cost of the civil branch of that overgrown department.

A feeble effort, we notice, is being made by the authorities to raise four of the new Militia Infantry Battalions, the Estimates providing for a 4th Battalion to the West Surrey, Lancashire Fusiliers, South Yorkshire, and Highland Light Infantry, at Guildford, Bury, Pontefract, and Hamilton, respectively. Inasmuch, however, as the total numbers of Infantry Militia for 1883-4 is in diminution of those borne for 1882-3, it is dubious what material advantage is gained.

It is intended to maintain at home during the coming financial year twelve Infantry Battalions, at a strength of 950 rank and file, four at 850, four at 750, four at 650, and 48 at 520. Some of these battalions, of course, are now in Egypt, from which country they may not be so easily recalled.

The List of General Officers is fast being reduced to the new establishment. There is now an excess of full Generals of but seven Cavalry and Infantry, one Artillery, and one Engineer; of Lieutenant-Generals, four Cavalry and Infantry, one Artillery, and two Engineer; of Major-Generals, 11 Cavalry and Infantry, and four Artillery. The Staff Corps appears already to have attained its proper proportions. It seems strange that the authorities, with all their professions of having an efficient, but small establishment of Generals, should still keep on this list many officers who, from ill-health and other causes, are, it is well known, never to be employed, and who thus force into retirement young and efficient Colonels who are unable to rise above that rank.

We should have imagined the present condition of both branches of the Scientific Corps would have caused some anxiety to the authorities,—the Royal Artillery with 1,400 men under strength, and the Royal Engineers with 500. Nothing, however, seems contemplated to remedy this. The condition of most of the garrison battalions of Artillery at home, with a paucity of officers and men, and an unduly large proportion of recruits to trained soldiers, seems also to invite a catastrophe at no distant date.

Captain T. Carey, 98th Regiment, of unfortunate history in Zululand, has, we regret to hear, died under mysterious circumstances in India, a victim of much persecution.

The particulars given by Mr. O. Morgan in the House of Commons relative to drunkenness in the British Army generally, and also in reference to the existence of crime in Egypt, presents a rather striking contrast to the experiences of Lord Wolseley, who was fortunate enough not to see a single case of drunkenness during his entire stay in Egypt. It appears from the returns made up to the present day that the total number of district courts-martial held in that country upon European soldiers of all arms amounted to 364. This is, no doubt, a startling total, and the only explanation is afforded by the fact that men were not actively employed, and consequently had ample leisure to get drunk, and used it "not wisely, but too well."

Captain R. A. Hickson, 3rd Buffs, has been appointed A.D.C. to Major-General Mark Walker, V.C., C.B., at Aldershot, from the 1st prox.

The Navy.

ADMIRALTY, March 16, 1883.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Lieutenant Alfred William Brookes has been placed on the Retired List from the 13th inst., with permission to assume the rank and title of Retired Commander from the same date.

Royal Naval Artillery Volunteers (Liverpool Brigade).—Henry Briggs, Esq., M.B., M.R.C.S., to be Surgeon (March 16).

ADMIRALTY, March 17, 1883.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet-Surgeon Duncan McNab Johnston has been placed on the Retired List of his rank from the 16th inst.

Royal Marine Artillery.—Gunning Morehead Campbell to be a Lieutenant (September 1, 1880).

Royal Marine Light Infantry.—Lieutenant Leonard Christopher Peters has been appointed a probationer for the Staff Corps.

EGYPT MEDAL.

Department of the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, Spring Gardens, March 21, 1883.

Notice is hereby given, that Medals for the operations in Egypt are ready for issue to the officers and crews, entitled thereto, of the ships named below; viz.:—Her Majesty's ships "Achilles," "Beacon," "Condor," "Humber," "Orontes," and "Ready." Applications should be made personally or by letter to the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, London, S.W. Petty officers and seamen, &c., whether applying in person or by letter, are requested to produce their certificates of service.

APPOINTMENTS.

Lieutenants—Charles E. Gladstone, to the Neptune; Norman G. Macalister, to the Temeraire, additional, vice Cave-Brown-Cave; D. M'N. Riddel, to the Garnet; Herbert C. Sayce, to the Humber, vice Watt; Cresswell J. Eyres, to the Assistance, vice Bairnsfather; Thomas Henry M. Jerram, to the Boscawen, for the Seaflower; Charles Gerald S. Eeles, to the Ganges, for the Skylark; Robert Maitland King, to the Impregnable, for the Nautilus; Neville Edmund C. Legh, to the Valorous, vice George Herbert King; Frederick Lancelot and George Sarsfield Walsh, to the Impregnable, for the Pilot; W. B. Charter, to the Revenge, as Flag Lieut. to Rear-Admiral Lethbridge.

Sub-Lieutenants—Robert Lowry H. Armstrong, Ernest G. Barton, and Rupert George H. Blomfield, to the St. Vincent, for the Martin; Arthur Dodgson and Arthur Wartensleben Ewart, to the Boscawen, for the Seaflower; Richard Sidney B. Bird and Ernest Charles T. Troubridge, to the Lion, for the Liberty; Edward Lohet Lowdell and Selby Horne B. Ash, to the Ganges, for the Sealark; Henry V. Hart and the Hon. Philip B. Tyrwhitt, to the Impregnable, for the Nautilus; William James, to the Impregnable, for the Pilot.

Midshipmen—Charles George C. Taylor, to the Lion, for the Liberty; Cunningham Robert de C. Foot, to the Boscawen, for the Seaflower.

Fleet Surgeon—Adam Brunton Messer, to the Neptune.

Chief Engineers—H. Benbow, to the Antelope; William Waterfield, to the Hibernia, for the Orion.

Surgeon—G. M. Cuffe, to the Antelope.

Paymaster—James Cox, as Secretary to Rear-Admiral Lethbridge.

Assistant-Paymaster—William Le Geyt Pullen, to the Revenge (as secretary's clerk).

Engineers—B. R. King, to the Hector, additional, for service in the Avon; O. G. Egan, to the Antelope; John Moysey, to the Hibernia, for the Orion; George T. Simmons, to the Hibernia, for the Thunderer; Richard T. Serle, to the Indus, additional, for the Shannon; William H. Moon, to the Indus, vice Serle.

Assistant-Engineer—William Bromley, to the Inflexible.

Chief Gunner—Israel Harding, V.C., to the Asia, additional, for the Spey and Tees.

Boatswain—Charles Miller, to the Asia, supernumerary.

Carpenter—Thos. H. Smith, to the Cambridge, vice Garland.

COASTGUARD.

Quartermaster—William Lewis, of the Royal Charlotte, to be chief quartermaster of the Adder, vice Kenyon, drowned.

Commissioned Boatmen—William England, Littlehampton, to be chief boatman, Ryde, vice Boyle, promoted; John Devine, Ballydavid, to be chief boatman, Claggan, vice Bishop, promoted; Thomas Cobbledick, Ardmore, to be chief boatman, Cairn Ryan, vice Sewell, pensioned; Frederick Maine, Sizewell Gap, to be chief boatman, Shoeburyness, vice Buckham, promoted.

Alexandra, Capt. H. H. Rawson, flagship of Vice-Admiral the Lord John Hay, K.C.B., was at Malta on March 12, when the following ships were in harbour:—Superb, Invincible, Inflexible, Iris, Hecla, Bittern, Cruiser, Antelope, Coquette, Cygnet, Helicon, and Lively. The Invincible will relieve the Orion at Alexandria when ready. The Hecla is about to proceed to England; left Malta on the 20th inst. The Cockchafer arrived on March 9, making good defects, *en route* to the China station, left on March 15. The Temeraire was at Corfu; since ordered to Port Augusta and Malta. The Monarch was at Port Said, and will shortly leave for Malta; mails to Malta. The Falcon was at Port Said. The Orion was at Alexandria, and will probably return to Malta early in April. The Condor was at Alexandria. The Cockatrice was at Constantinople. The Grappler was at Gibraltar. The Carysfort was at Malta, and remains at present. The Decoy was *en route* from Cyprus to Malta, and has since arrived. The Beacon was *en route* to Malta from Port Said. The Bittern arrived on March 4, and will remain.

Audacious, Capt. Tracey, flagship of Vice-Admiral G. O. Willes, Commander-in-Chief on the China station, was at Hong Kong up to March 19. The Curaçoa at Yokohama Feb. 2; would leave Japan in time to arrive at Hong Kong about March 1. The Daring at Yokohama, Feb. 2; would remain. The Moorhen at Kobé, Feb. 2; would proceed, about the end of February, to Yokohama. The Sheldrake left Shanghai on Jan. 24 for Kobe, calling at Simonoseki. The Cleopatra at Shanghai, Feb. 7; would remain as senior officer of the North-China Division, and would return to Hong Kong on March 15. The Zephyr at Shanghai, Feb. 7; would remain. The Encounter left Hong Kong on Feb. 6 for Manila; ordered to stay there 14 days, and then return to Hong Kong. The Pegasus at Hong Kong; ready for recommission. The Albatross at Hong Kong; ready for recommission. The Swift at Hong Kong; would remain. The Vigilant at Hong Kong; would remain. The Kestrel arrived at Amoy on Jan. 22; would leave on Jan. 29 for Foochow and Swatow, and then to return to Hong Kong. The Fly left Hong Kong on Feb. 4 for Saigon and Bangkok; would then proceed to Singapore, and be stationed in the Straits Settlements Division. The Champion was at Singapore on Feb. 1; would remain. The Foxhound was at Labuan on Jan. 13; was to leave on Jan. 25 for Sarawak, and then return. The Lily arrived at Singapore on Feb. 4; she was awaiting relief by the Linnet, and would then proceed to England. The Magpie was at Kobe on Feb. 2; would remain till March, and then proceed to Hong Kong. The Flying Fish arrived at Hong Kong on Feb. 2, to refit.

Carysfort, Capt. Stephenson, C.B., arrived at Malta from Marseilles on March 19, and has been ordered to remain there for the present.

Comus, Capt. East, was at Payta on Feb. 4. The Kingfisher was to leave Callao about Feb. 10, for South Pacific Islands, returning to Coquimbo about July 15. The Thetis would start for England, *viâ* Falkland Islands, Montevideo, St. Vincent, and Madeira, on being relieved at Coquimbo by the Constance. The Gannet, unless detained by the state of affairs in Ecuador, would start for England, on being relieved by the Heroine at Coquimbo.

Decoy, Lieut. and Com. H. C. Bigge, arrived at Malta on March 20.

Dido, Capt. Domvile, left Bermuda, with the Urgent in tow, on Feb. 16, for Jamaica.

Espoir, Lieut. and Com. Gamble, arrived at Port Said on March 18, and proceeded.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., was at Calcutta on Feb. 27, and would leave on March 8. The London, at Zanzibar, was paid off on Feb. 22, and recommissioned next day. The Tourmaline, at Bombay, will be ready for sea on March 1. The Philomel, at Bombay, was docked on Feb. 19. The Woodlark, on passage to Bombay, left Gwadur on Feb. 27. The Dryad, left Zanzibar for Tamatave, Island of Madagascar, on Feb. 25. The Ranger left Trincomalee on Feb. 19, arrived at Calcutta on Feb. 25, where she will remain until March 8. The Osprey returned to Aden from a cruise in the Red Sea on Feb. 20, was there on March 8, and will remain as senior officer's ship of the Gulf of Aden and Red Sea Division. The Arab left Bombay on Feb. 20 for Gwadur, to relieve the Woodlark, and would remain in the Persian Gulf under the orders of the senior officer of the division. The Harrier and the Undine were cruising in the Mozambique Channel and neighbourhood of the Comoro Islands for the suppression of the slave-trade.

Fawn, Com. Pelham Aldrich, arrived at Sheerness on Sunday from the Red Sea, where she has been engaged for four years on surveying service. The Fawn has proceeded to Chatham, to be paid out of commission.

Hecla, Capt. Arthur K. Wilson, arrived at Malta on March 20.

Humber, Com. C. H. Hawkins, has just completed an extensive repair at Sheerness Yard, and is ordered to commence loading with War Department and Naval stores for various stations.

Nelson, Comdre. James E. Erskine, A.D.C., was at Sydney on March 18.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., left the West Indies for Bermuda last week. The Gannet was to remain with the flag. The Fantôme was to remain among the Windward Islands. The Flamingo at Jamaica.

Orion, Capt. Fitzroy. It is expected that she will be relieved in April.

Sapphire, Capt. Fullerton, arrived at St. Vincent, Cape de Verdes, on March 18, and would proceed March 20.

Temeraire, Capt. Nicholson, C.B., is ordered to Port Augusta; would return to Malta about March 24.

Thalia, Capt. Brackenbury, C.M.G., arrived at Hong Kong on March 16.

SEAMEN IN PORT.

The first number of "The Official Year-book of the Church of England," just issued, contains a good deal about shipping, both of the Royal and of the Mercantile Navies, which has an especial interest, not only for seamen, but for all who concern themselves in maritime affairs. Speaking of the Mercantile Marine, it says:—"The Convocation of Canterbury, in its report of 1878 on 'Church-work amongst Sailors in Sixty-four Home Ports,' remarks that 'there are various societies founded for the purpose of administering spiritual service to our seamen; but the one that in every way stands first on the list is the Missions to Seamen Society, 11 Buckingham Street, London, W.C., to whose excellent and extensive work we shall very often have occasion to refer with much thankfulness and gratitude. A young clergyman of Bristol may be regarded as the founder of this society, as in the year 1835 he began to serve as a volunteer missionary in the Bristol Channel by visiting the shipping in the outer roads of Penarth, off Cardiff; King's Road, off Bristol; and Milford Haven, &c. After 20 years of devoted service, and the foundation of a society at Bristol to carry on the good work, he resigned. The following year the Missions to Seamen Society was founded in London, which was subsequently united to the Bristol Society.' This has gradually grown, and it has now 71 honorary chaplains who either themselves engage in or locally supervise work afloat, two travelling clerical superintendents, 23 chaplains, three of whom, however, are only paid in part by the Society, 41 Scripture readers, and four paid lay helpers, who also act as boatmen to the mission vessels. There are also 350 volunteer missions to seamen helpers, being captains and officers of ships who engage to further the efforts of the chaplains for the promotion of godly living amongst sailors, their spiritual intercourse and mutual recognition, and for the more devout observance of the Lord's Day. One hundred and thirty members of the crews have been recently enrolled as Missions to Seamen's associates. The salaried mission staff labour for God amongst the shipping and barges and fishing-vessels, ministering from vessel to vessel, day by day, in all weathers, all the year round, in 46 seaports at home and abroad, in anchorages, rivers, and docks. The 12 principal outer roadsteads around our shores, where ships seek shelter in tempestuous weather or during adverse winds are thus provided with 12 mission yachts, two of which are propelled by steam, whilst numerous row-boats are furnished for inner harbours, &c. The Society has eight special mission churches and church ships, and several mission rooms, institutes, &c., in active operation for the use of seamen, bargemen, and fishermen when in docks, or in boarding-houses on shore. Attention is devoted to emigrant ships, to organise services, classes, and schools on board for the voyage, and to furnish them with books and other literature. The Convocation report says:—'Church work afloat is done at a great cost, and especially where the provision of yachts or boats for use in the roadsteads is absolutely necessary, and it is also attended with considerable danger and personal inconvenience; but all such opportunities of approaching seamen are most valuable, and likely to be successful, they are gladly made use of, and often attended with the happiest results.' The income of the Society for 1881 amounted to £18,881 7s. 11d., including offertories from 646 churches. During that year 6,121 merchant seamen were enrolled as total abstaining members of the Missions to Seamen's branch of the Church of England Temperance Society, making upwards of 15,000 pledges taken in three years. There were 3,804 Bibles and 1,287 prayer-books sold; and at least half a million of publications of various kinds placed on board ships. Seamen themselves contributed £450 to the weekly offertories at five of the mission churches; whilst at the short week-day services at the Missions to Seamen Church at Bristol, there were 10,535 attendances of seafaring men, mostly 'strangers;' and at the Cardiff Church there were 5,000 attendances of men at the morning services alone at week days; and at the Swansea Church for Seamen 4,734 men, mostly from other ports, attended the week-night services; besides the crowded attendances of seamen and their families at the Sunday services and week-night meetings at these ports. And there can be no doubt that if similar accommodation for non-resident seamen worshipping were provided at other ports, with an adequate visiting staff, similar results would follow elsewhere. The Society is anxious to have a church, institute, and chaplain's house combined, built at the cost of about £5,000, at South Shields, Newport (Mon.), Hull, Sunderland, the Hartlepools, and other ports. The Convocation report, after animadverting on the great difficulties as to worship experienced in the brief intervals of their voyages by seamen in ports where their families do not reside, adds, 'Hence we cannot be surprised to find, as a fact, that in some waterside parishes thousands of seamen habitually worship God on His appointed day of rest, and many are communicants; whilst in others there are very few who worship, and next to none who communicate. A living sympathising agency is absolutely necessary to extend the invitation and the welcome to the wanderer of the sea to that church in which his more favoured brother of the shore is privileged to worship.' Reviewing the spiritual condition of the chief seaport towns of England, and the great need for supplemental aid specially directed to non-resident seamen, Convocation adds, 'The Mission to Seamen may be, indeed, regarded as a second Additional Curates' Society for ministering to seamen on the best and soundest principle, and as one of the most precious aids of the Church with respect to the fulfilment of her duty towards her sailor sons.' The opportunities for influencing sailors are often much greater when their ships are in foreign ports than when at home, for there the crews generally reside on board, and are always to be found in their vessels; whereas in the docks of London and Liverpool, for example, the foreign-going ships have no crews belonging to them. But the difficulties of obtaining support for missions to seamen chaplaincies in foreign and colonial ports, and the expense attending them, has prevented this part of the society's operations being so fully developed as its home-work. Dunkerque, Havre, Lisbon, Bilbao, Marseilles, Malta, Singapore, and Yokohama are the only foreign ports to which its paid agency is attached; but arrangements have been made with the English clergy at 70 ports abroad, both to personally befriend the crews of British ships, and to welcome sailors to their services. And a list of these has been printed and pasted into the books and periodicals, &c., issued to ships outward bound for foreign and colonial ports. Similar information as to the clergy and their services in eighty-six home ports, is printed and pasted into the books, &c., issued to vessels in the coasting trade; the services being also given in the sheet almanacks, 15,000 of which are annually placed on board ships." "The Official Year-book of the Church of England" concludes:—"Considering the wide sphere for Church work on board ships, and amongst seamen when on shore in the brief intervals of their voyages, especially when at ports other than their own; and remembering that the Missions to Seamen had only £18,881 income in 1881, which can only support a limited agency, Convocation may well conclude one of its reports thus:—'This account of the survey of the principal ports of England and Ireland will, we feel confident, be read with sorrow, for although it assures us that much good work has been done and is doing to the great spiritual advantage of our seamen, in few ports are they sufficiently cared for, whilst in others they are totally neglected.'"

The Alecto, commissioned for service on the West Coast of Africa, is being got ready for sea with all despatch, as it has been arranged for her to accompany the Opal, also commissioned for the West Coast of Africa, as far as Sierra Leone. The Alecto being designed especially for river service, it is considered desirable that she should be convoyed by a larger vessel. The Alecto will relieve the Pioneer on the river Congo, and the Opal will join the Briton at Sierra Leone.

BIRTH.

EDEN.—On the 20th inst., at 118 Ebury Street, S.W., the wife of Lieutenant-Colonel Archibald D. Eden, late 1st Battalion, the Cameronians (Scottish Rifles), of a son.

DEATHS.

CHAPMAN.—On the 14th inst., at Algiers, Arthur Thomas Chapman, Captain, Royal Sussex (late 35th) Regiment, third son of the late Joseph Barker Chapman, Esq., of Whitby, aged 36 years.

WESTBY.—On the 3rd inst., at Ventimiglia, Italy, Bernard Hogar Westby, late Captain, H.M.'s 16th Bedfordshire Regiment, and Brevet Major H.M.'s Rifle Brigade, third son of the late George Westby, Esq., of Mowbreck House, Lancashire. R.I.P.

Advertisements.

WANTED, for the PERMANENT STAFF of the 3rd DURHAM RIFLE VOLUNTEERS, a SERJEANT. He must be a good drill instructor, and able to keep accounts.—Apply to the ADJUTANT of the above Battalion, Sunderland.

WANTED.—A MAN COOK, for the training of a Militia Regiment at Shorncliffe, commencing April 23.—Address, stating terms and reference, to "J. F.," Saracen's Head Hotel, Ashford, Kent.

AN ESTABLISHED FIRM wish to materially extend operations, and REQUIRE a SLEEPING PARTNER, with a Few Thousand Pounds. No Agents' replies will be noticed.—Address, "SOLICITORS," care of Wm. Dawson and Sons, Advertising Agents, Cannon Street.

All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

GILL MEMORIAL.—The PUBLIC SUBSCRIPTION for this object is to be AMALGAMATED with the AMOUNT COLLECTED by the BRIGHTON-COLLEGE MEMORIAL COMMITTEE, in order, should a sufficient sum be obtained, to found an Exhibition for the Sons of Officers of the Army in reduced circumstances (Indian Service included) at Brighton College, where Captain Gill was educated. It is requested that Contributions may be forwarded to Captain C. F. C. Beresford, R.E., Adair House, War Office; or to Henry Griffith, Esq., Montpellier Lodge, Brighton.

ARMY and NAVY CO-OPERATIVE SOCIETY, Limited.
117 VICTORIA STREET, WESTMINSTER, LONDON, S.W.

NOTICE.

The ANNUAL GENERAL MEETING of SHAREHOLDERS will be held at GROSVENOR HALL, No. 200 Buckingham Palace Road, S.W., on THURSDAY, March 29, at 2 p.m.

By order,
H. LAWSON, Secretary.
March 14, 1883.

THE MILITARY and ROYAL NAVAL CLUB,
16 ALBEMARLE STREET, PICCADILLY, W.

For Officers of the Army, Navy, Royal Marines, and Auxiliary Forces, and those retired from the same.

For particulars, apply to the SECRETARY, at the Club.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3 ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

WORCESTER.—To be LET or SOLD, the prettiest place within miles of Worcester, BARBOURNE HOUSE, one mile from Worcester Cross. This large, beautiful, and most complete FAMILY RESIDENCE, £120 per annum.—Apply to EVERILL and DAY, 51 Foregate Street, Worcester.

ON LEASE, GLOUCESTERSHIRE.—To be SOLD, a small FREEHOLD ESTATE, with RESIDENCE, about 15 acres of productive pasture land, of which six acres is orchard, situated four miles from the city of Bristol and Clifton in a most healthy and rural neighbourhood. One mile from the Filton station, and two miles from Patchway station, on the South Wales Union Railway, where every train stops; and two miles from the Fishponds station on the Midlands Railway. The Duke of Beaufort and Lord Fitzhardinge's hounds frequently meet within an easy distance, and his Grace the Duke of Beaufort is owner of nearly the whole parish adjoining. The house has a good drawing-room and dining-room, five bedrooms, and other apartments. There is a small entrance lodge, and a detached laundry and other buildings, capable of being made a first-class residence. The price is £3,000, one-third of which may remain on mortgage at 4 per cent. A photograph of the house will be forwarded on application, with any further particulars.—Address, ALEXANDER JAMES MAULE, Stapleton Road, Bristol.

FOR SALE.—TWENTY PAID-UP SHARES of £10 each in the OXFORD MILITARY COLLEGE, covering a nomination to the College at a reduction of 20 per cent. on the ordinary fees, together with other advantages; will be disposed of at a considerable discount to an immediate purchaser.—Applications to Sir C. R. McGRIGOR, Bart., and CO., 25 Charles Street, St. James's Square.

(Facing the New Law Courts.)

THE VERSMANN'S
PATENT
GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address:—
The Versmann's Moss Litter Company, LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.

HOLLOWAY'S OINTMENT and PILLS.—DISEASES OF THE SKIN.—No case of disease of the skin, be its nature what it may, has failed to be benefited when these potent remedies have been properly applied. In scrofulous and scrobutic affections, they are especially serviceable. Scurvy, eruptions, and glandular swellings, which have resisted all other modes of treatment, and gradually become worse from year to year, have been completely cured by Holloway's cooling Ointment and purifying Pills, which root out the disease from the blood itself and leave the constitution free from every morbid taint. In the nursery, Holloway's Ointment is simply invaluable; it will give ease in sprains, contusions, burns, scalds, and infantile eruptions, and may always safely be applied by any ordinary attendant.

MILITIA COMPETITIVE EXAMINATION.—The under-signed offers his services in PREPARING MILITIA OFFICERS in MILITARY LAW and TACTICS, or would prefer joining another Officer, late R.A. or R.E., or P.S.C., in preparing Candidates for the above Examination.—Address, F. O. BELMONT, St. Nicholas Road, Upper Tooting, S.W.

MILITARY COMPETITIVE EXAMINATION.

MAJOR DE THOREN and Major MORGAN, who have hitherto Prepared the Militia Officers at the Rev. J. CARDWELL'S Establishment in Jersey, for the above Examination, have entered into arrangements to SUCCEED that gentleman in this branch of Education, and will open on the 2nd prox. The success they have hitherto had has been very great. One-third of those sent up for the three last Examinations have passed and obtained commissions, and every candidate has qualified.

Major De Thoren was Professor of Tactics at Sandhurst, Garrison Instructor at Madras, Deputy-Assistant-Quartermaster-General in the Abyssinian Campaign, and mentioned in despatches for Survey and Reconnaissance.

Major H. F. Morgan passed the Staff College, and is the author of "Summary of Tactics," and "Summary of Law."

The Fees at this Establishment are unusually low.

For further information, apply to Major DE THOREN, Bellefield, Jersey, or to Major MORGAN, 3 Douro Terrace, Jersey.

RODRIGUES' MONOGRAMS, Arms, Coronet, Crest, and Address Dies Engraved as Gems, from original and artistic designs, NOTE PAPER and ENVELOPES brilliantly illuminated by hand in gold, silver, bronze, and colours.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses, Baker-Street Bazaar, W.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

University Candidates for Sandhurst are received as non-resident pupils. In this competition two candidates (the only ones sent up) have passed into Sandhurst during the past year; Mr. W. A. Grant taking fourth place in July, and Mr. G. Barton-Smith second place in December.

In addition to the University candidate, two other pupils passed on the general list at the recent Sandhurst Examination,—Mr. C. D. Radcliffe (tenth place) and Mr. H. Marwood.

Mr. B. Smith, on this occasion, made the highest score in Mathematics, and Mr. Radcliffe highest marks in German, as well as second highest in Freehand Drawing, out of 440 candidates up for Examination.

Special arrangements made for officers studying for the Staff College or other Military Examinations.

MILITIA COMPETITIVE EXAMINATION.

The standard originally fixed for this Examination having been much raised in September, 1881, no results previously gained should be taken into account in considering the successes obtained by Militia pupils. Since the date named, there have been three competitions. At these trials Colonel WILKINSON and Lieutenant-Colonel SHAW have secured 24 Commissions for their pupils, although they have only prepared and sent up a very limited number for Examination. The names of all successful pupils have already been published.

Also, at the October Literary Examination, Lieut. C. J. Stanton took 4th place on the list.

The results obtained at other Examinations bring the general score up to Forty-eight Successes, achieved by pupils in the last 16 months; during that period the number of pupils on the strength of the establishment, resident and non-resident, has always been limited to 60.—Address, DARMSTADT, GERMANY.

MILITIA COMPETITIVE EXAMINATION ONLY.—A Few Candidates desiring special individual attention are Prepared by Major COWPER, assisted by an Officer of equal experience, who has taken high honours in Fortification, Surveying, &c. At the last Four Examinations (the average number sent up for each being between 3 and 4), Pupils passed at their first trial 1st, 10th, 21st, 30th, 33rd, 34th, and 37th on the List.—10 Clifton Villas, Maida Hill, London, W.

SANDHURST, WOOLWICH, C. S., MILITIA, &c.—The Rev. A. PRITCHARD, M.A. Oxon., assisted by his Brother, Professor PRITCHARD (late R.M. Academy, Woolwich), and a large Staff of resident Assistant-Tutors, PREPARES for any of the above.

The next Term will commence January 3, 1883.

For particulars of all this year's successes and previous ones, address Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley, Oxon.

MILITARY COMPETITIVE for MILITIA OFFICERS.—The Rev. A. PRITCHARD, who is assisted by a retired Field Officer of 8 years' experience as a Garrison Instructor, has, during the year 1882, gained five Commissions with the 14 Candidates who went up from him.

For particulars of marks, places, &c., address Rev. A. PRITCHARD, Wargrave, Henley, Oxon.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and each comes under actual *vivâ voce* instruction for 6½ hours a day. Since the introduction of the Military Competitive, out of Thirty-nine Lieutenants of Militia sent up, Twenty-four have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of successful pupils.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

DR. J. COLLIS BROWNE'S
ORIGINAL AND ONLY GENUINE. **CHLORODYNE.**

From SYMES and Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1881. To J. T. DAVENPORT, Esq., 33 Great Russell Street, Bloomsbury, London.

Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff), discovered a remedy to denote which he coined the word CHLORODYNE.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of
COUGHS, ASTHMA, COLDS,
BRONCHITIS,
EPILEPSY, SPASMS, COLIC,
PALPITATION, HYSTERIA, and is the true Palliative in
NEURALGIA, GOUT, CANCER,
TOOTHACHE, RHEUMATISM.
GREAT SPECIFIC for
DIARRHŒA,
CHOLERA, DYSENTERY.

IMPORTANT CAUTION.
The immense sale of this remedy has given rise to many unscrupulous imitations.

N.B.—Every bottle of genuine Chlorodyne bears on the Government stamp the name of the inventor,

DR. J. COLLIS BROWNE.

Sold in Bottles, 1s 1½d, 2s 9d, 4s 6d, by all Chemists.

Sole Manufacturer,

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, March 12, 1883.

The following are the sick-list returns for the week ending March 9, 1883:—

	Total Force.	Sick List.	Proportion per cent.
Artillery, Cairo	681	46	6·8
Cavalry "	556	52	9·3
Engineers "	212	7	3·3
1st Brigade	2,310	173	7·5
2nd do.	2,882	196	6·8
Sundries	658	39	5·8
	7,299	513	7·0
Alexandria	1,767	115	6·5
Ismailia	108	12	11·1
	9,174	640	7·0
Officers	294	15	5·1
Men	8,880	625	7·0
	9,174	640	7·0
Horses	1,547	60	3·9
Mules	693	3	0·4
	2,240	63	2·8

The above shows little change from last week, but such as it is, it is for the worse. It is to be noted that Alexandria is still slightly more healthy than Cairo, in spite of the fact that Alexandria returns show as sick men who are really invalided from Cairo.

Major Sinclair, South Staffordshire, is entered on sick list from March 5.

Surgeon-Major W. C. Boyd and Surgeon J. E. V. Foss, A.M.D., will proceed to England on duty with troops on board the ss. Nepaul, the former officer in medical charge. Deputy-Surgeon-General Fox, having returned from sick-leave, will take over the duties of Principal Medical Officer, Alexandria District. Surgeon-Major Warren will resume medical charge of Staff and Departments, and Surgeon-Major Conolly will return to duty with the 1st Brigade. Brigade-Surgeon H. Ferguson and Surgeon-Major S. K. Ray are struck off the command from February 27.

Assistant-Commissary-General Reeves, C.B., Commissariat and Transport Staff, having left for England, is struck off the strength of the command from March 6.

Major G. N. Marshall, R.A., has assumed command of N-2, R.A.

It will be observed that the total force in Egypt is now 9,174 officers and men. The already announced departure of the South Staffordshire and Berkshire Regiments, a battery of Artillery, and company of Engineers will reduce the force to under 7,400 men. I have reason to believe that the Gordon Highlanders will very shortly receive their orders, still further reducing the numbers to about 6,700. The 1st Brigade, under General Earle, will then consist of only the Royal Sussex (35th), and will not improbably be joined with the other brigade, under General Graham, consisting at present of the Black Watch (42nd), Camerons (79th), and the King's Royal Rifles (60th).

I understand that Lieutenant Burney, Berkshire Regiment, is likely to receive from the Khedive a decoration, in recognition of the fact that he, when travelling on the Nile, saved the lives of two natives, upset from a native craft which came into collision with the Nile steamer.

In the last batch of General Orders appeared the following announcement, which is interesting, as marking a new departure in the Bombay Army:—"Native Gentleman Sydoola Khan to be jemadar (in the 1st Lancers), vice Ragonath Sing, pensioned." This, we believe, is the first direct commission that has been bestowed in the Army of this Presidency, and we congratulate the Mohammedan gentleman who has thus stepped at once into the commissioned ranks of as good a cavalry regiment as there is in India.

A correspondent writes:—"If musketry-instructors, when abolished, are to be allowed their extra pay and horse allowance, they might be employed as parade-adjutants, superintend the instruction of recruits at drill, musketry, &c., as adjutants cannot always give sufficient time to their outdoor work, on account of the amount of office-work they have to do."

NOTES FROM ALDERSHOT.

(FROM AN OCCASIONAL CORRESPONDENT.)

Though the weather has not been favourable for such practice, being still very cold, the whole of the Infantry battalions have been exercised in outpost duty during the week, by brigades, in the neighbourhood of the Fox Hills. Numbers of officers and men have rejoined from leave of absence and furlough, and the spring drills are being pushed forward with all possible expedition, the annual course of musketry commencing on the 1st proximo. The 2nd Battalion 18th and 31st Regiments, from Malta and Gibraltar, will, on arrival, be quartered in the Centre and West Blocks, Infantry Permanent Barracks, and be attached to the 2nd Brigade. These regiments will not arrive, however, before the middle of May. The 1st Battalion Grenadier Guards, 26 officers and 570 men, arrived at the Camp from London on Monday, for a course of musketry, and are attached to the 3rd Brigade. No. 12 Company, Commissariat and Transport Corps, recently returned from Egypt, two officers, 86 men, and 100 horses, arrived here from Hilsea by march route on Wednesday. The 11th Middlesex R.V. (Railway Battalion), under the command of Lieutenant-Colonel Gore Brown, arrived on Thursday, for a week's exercise. This battalion, about 350 of all ranks, is quartered in the Centre Block, and attached to the 2nd Brigade. Contrary to recent announcement, there does not seem to be any immediate probability of the 19th Hussars returning from Egypt. A detachment of that corps for Egypt, two serjeants and 50 privates, and two serjeants and seven privates of the Commissariat and Transport Corps for Cyprus; are under orders to leave the Camp today (Saturday) for Portsmouth Dockyard, and embark in the Calabria for their respective destinations. Lieutenant the Hon. C. E. Bingham, 3rd Hussars, will proceed to Egypt in charge, and return after handing over draft. On the 3rd prox., the following parties will leave for a course of instruction at the School of Military Engineering, Chatham:—Lieutenant Greenway, 39th; Lieutenant Wise, 26th; and Captain Lousada, 84th, to join the Officers' Field-work Class; and six non-commissioned officers from various corps, to join Pioneer and Field-work Classes. Twenty-one officers of Yeomanry Cavalry will join the Cavalry School of Instruction, for a month's course, on the 2nd prox. A class of Volunteer officers will shortly be formed at the Infantry School of Instruction for Auxiliary Forces. A class has not assembled at this school for many months. The two steel shield-carts, for experimental trial and report, have arrived here from Woolwich, and are now ready for the Committee. That they have been pretty severely tested elsewhere is plainly to be seen, being marked with bullet-dents, evidently from machine-guns, and having undergone very rough usage generally. All young officers in the command who have not, since joining the service, been put through the prescribed course of gymnastics, have been ordered to attend at the gymnasia in the North Camp and Permanent Barracks for this purpose on the 2nd prox. The Annual Divisional Steeplechase Ball has been fixed to take place on the 13th prox., at the Officers' Club. A meeting to make arrangements was held at Head-quarters on Thursday, Major-General Sir F. FitzWygram, Bart., presiding. The positions of officer and serjeant-instructor of musketry in regiments will shortly be abolished. A proportion of the serjeant-instructors will be posted to the School of Musketry, Hythe (the establishment of which is to be largely increased), retaining their pay and promotion till absorbed. It is believed that the Staff appointment of D.A.A.G. for Musketry at Aldershot Camp will not now be abolished, at least not for some time to come. Deputy-Surgeon-General J. Ekin, C.B., sanitary officer of the Division, left the Camp during the week, in accordance with instructions from Head-quarters, to make arrangements connected with the medical organisation for the Easter-Monday Review, he having been appointed P.M.O. of the force to be assembled. Early in the week a misunderstanding suddenly arose in the North Camp between some men of the 87th Royal Irish Fusiliers and Grenadier Guards recently arrived from London, in the canteen of the former regiment, which resulted in an exchange for a short time of some rather rough compliments. Care has since been taken to prevent a recurrence of disturbance; the corps quartered in the North Camp have been restricted to their own canteens, and have not since been allowed to fraternise in these establishments with men of other regiments. The committee on valise equipment, of which Colonel Harrison, C.B., C.M.G., is president, will commence its labours immediately after the holidays, This committee will be a standing one, and will be assisted by various sub-committees. It will deal with, and report on, various other matters appertaining to equipment, dress, &c., besides the immediate question of the relative merits of the old and new Infantry valises. Two boards of examination will assemble on Wednesday next to examine the following officers and non-commissioned officers in Part II. of the Musketry Syllabus for company certificates:—First board—President, Lieut.-Col. Field, 15th Hussars; members, Lieut.-Col. Cox and Major Dashwood, 87th. To examine Lieut. Scott, 3rd Hussars; Lieuts. the Hon. R. Leigh, Holland, and Frith, and four serjeants, 15th Hussars; Capt. Conran and one serjeant, 30th; and eight serjeants, 3rd Batn. Rifle Brigade. Second board—President, Lieut.-Col. Simpson, 84th; members, Majors Berkeley and Egerton, 39th. To examine Lieuts. Maul and Scholes, and 26 serjeants, 84th Regiment. The examination will be conducted, and the marks subsequently assigned, by the members of the boards in accordance with Memorandum dated Horse Guards, July 3, 1882, and the Syllabus dated November 3, 1882.

LANCE-RANK.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—In your last number, you ask for information as to the origin of the word "lance," as prefixed to the titles of corporal and serjeant. The origin is well known, but is curious enough. In the days when chivalry was dying out, and the infantry were becoming the chief arm, a mounted man who had lost his horse and "broken his lance" in fair fight, thought it no shame to serve as a "Lancia-spezzata" (a "broken lance") in a company of foot. He served in the ranks, but was relieved from sentry-go, &c., and became, in fact, a sub-corporal. The French cut off the first letter of "lancia," and called such a non-commissioned officer an "Anspessade." The English kept the first word, but discarded the "spezzata" altogether, whence "Lance-corporal." Coleridge, in his translation of Schiller's "Death of Wallenstein," renders by "Anspessade" the German word "Gefreiter," a soldier who is relieved from going on sentry—the old French "Exempt," written by us phonetically "Exon," (of the Yeomen of the Guard, &c.) I imagine that the extension of the prefix "lance" to the title of serjeant is modern. My chief authorities are Grose's "Military Antiquities," London, 1801, Vol. ii., pp. 261-2; Littré's "Dictionnaire de la Langue Française," Paris, 1872, *sub voce* "Anspessade"; Barretti's Italian-English dictionary, *sub voce* "Lancia."—I am, &c.,

J. R. MacDonnell.

Oxford and Cambridge Club, Pall Mall, S.W.

THE PURCHASE SUBALTERNS' CASE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—We have, indeed, at last found a friend to espouse our cause in you. But why is a legitimate grievance like this left to the Press to endeavour to rectify? The answer to your question as to "why no one has responded to a movement started in May last by a gentleman of experience" is this,—(1.) The officers of the Army are, rightly, very averse to anything even approaching to "agitation," however just their cause. (2.) The case of Purchase Lieutenants should be considered quite separately from that of cornets and ensigns. The former, although undoubtedly entitled to compensation for the loss of the money they have sunk, come within the same category as the Purchase Captains, that is to say, they obtained their second step of promotion by purchase, in many cases passing over the heads of non-purchase officers, and thus, although they realised something in the shape of an advantage for the value of their outlay, they should, undoubtedly, receive an increased pension. On the other hand, purchase ensigns, that is to say, those who having paid the value of their first commission to Government, were unable to purchase further steps (on account of the abolition of the purchase system), obtained absolutely nothing for their £450, which has been quietly pocketed by Government, and they find themselves put on exactly the same footing, in every respect, as officers who have not paid one farthing to the State. The only fair way to compensate these latter officers is to return them their £450 at once. It would not amount to a large sum, and it would do away with the glaring injustice under which they are now suffering.—I am, &c.,

A Purchase Ensign.

THE CLYDE COURT-MARTIAL.

Numerous correspondents write to us narrating cases which have come under their own immediate observation, in which officers in command of stations or individual ships have used Government stores for their own private purposes, and have caused the said stores to be logged and entered in the expense books as expended on Government work. They point out that these cases are far more serious than that of Commander Maxwell Heron, who used three sacks of coal to air his house and 100 lbs. of paint to renovate its outward appearance, and argue that the Admiralty were fully aware that the practice was going on throughout the Service when they brought the Commander of the *Clyde* up with a round turn. It would serve no good purpose to publish the details of numerous cases reported by our correspondents, and our object, did we do so, might be misunderstood. It has been our desire to bring clearly before the public the fact that certain customs have obtained in the Navy for generations past. That the Admiralty were fully aware of the existence of such customs, there can hardly be any doubt, for, has not each Naval Lord been brought up in the service, and has he not been an eye-witness of what has taken place around him? That the officers who tried Commander Maxwell Heron were also aware that he had not exceeded the custom of the service, there is not the slightest doubt, but the Admiralty having ordered the trial on charges which, while ignoring the custom of the service, transformed the use of Government stores for private purposes into "theft," pure and simple, left them no option but to convict and sentence. And yet they did this well knowing that Commander Maxwell Heron was being made to pay for the sins of others. A wave of dishonesty had been sweeping over the service, and had to be checked; Maxwell Heron was made the breakwater. The Admiralty have apparently decided to put a stop to the use of Government stores for private purposes, such as painting cabins or official residences, making bedsteads, travelling trunks and packing cases, and charging the stores thus expended to "repairing boats." This is all very right and proper, but what we object to is the practice of pouncing upon a junior officer, and making an example of him; holding him up, as it were, as a scarecrow to the Fleet, to deter Admirals and Captains from continuing a practice which has obtained in the Navy since, we may say, the days of King Edgar. We should like to see the Admirals at the Admiralty have the courage to inform the Admirals-in-Command of stations that they are to set the example to their subordinates. But, as matters stand, the Admiralty select a subordinate whereby to warn the superiors to discontinue a practice they are all well known to indulge in, to a greater or lesser extent, on every station. It is, however, absolutely impossible to draw a hard-and-fast line, or lay down a law, whereby commanding or subordinate officers shall on no occasion use Government stores for their own private purposes. There are many occasions when it is absolutely necessary that they should do so. But the Civilian Staff of the Admiralty would never recognise the necessity, and would always charge the stores so expended against the officers' pay, were they aware of the real nature of their expenditure. Hence the reason why, when stores are used on the personal responsibility of officers for purposes other than those laid down in the instructions, but which, nevertheless, contribute to the maintenance of the credit of her Majesty's service, they are entered in the log and expense books as expended for one of the purposes for which they have been drawn. This custom has existed for generations in the Navy. It is nothing more nor less than falsifying documents, but has never been regarded in that light. With an unscrupulous second-in-command, as in the case of the Clyde, this custom could lead to peculation on a large scale, unless the commanding officer examined each document most closely, and also personally inspected the stores on board. This Commander Heron never did. He trusted the gunner, and went on leave. He signed everything put before him. The result was that the gunner had no difficulty in implicating his commanding officer, and in making it appear that he was fully cognisant of all that was going on. But it should not be forgotten that the gunner was at the time a close prisoner under arrest, that he was charged with appropriating to his own use money received from the sale of Government stores, and that he was directly interested in shifting the blame from his own to his commanding officer's shoulders. He was a prisoner, but was not even admitted to be "Queen's evidence." He knew that his only chance of escape from a heavy sentence was in so incriminating his commanding officer as, by the sentence of the court, to render it impossible for that commanding officer to give evidence against him. In this the gunner succeeded. The court sentenced Commander Maxwell Heron, on the evidence of the gunner, to be dismissed her Majesty's service, and then proceeded to try the gunner, dispensing with the evidence of the late commander of the Clyde. We understand that Mr. Bullen, the leading junior counsel on the Western Circuit, is of opinion that no English jury would have convicted upon such evidence, and we believe that, were the case brought before a civil tribunal, it would be found that the evidence of the gunner was inadmissible, and the sentence of the court invalid.

ROYAL NAVAL ENGINEERS.

The following *resumé* of the concessions granted by the Admiralty to the Engineers of the Navy will not be uninteresting to our readers. Several alterations have been authorised to be made in the Queen's Regulations. The Active List of Engineers is to be reduced to 650, or such lower number as their Lordships may think fit. The chief inspectors of machinery are not to exceed five; inspectors, seven; chief engineers, 220; and engineers and assistant-engineers, 418. The only difference here made is as regards the strength of the engineers and assistant-engineers, who were to be gradually reduced by previous orders to 600. As a matter of fact, they had already been reduced much below the fixed limit, the number on January 1 being 453, viz., 327 engineers and 126 assistant-engineers. The Active List, including engineers of all grades, and 17 engineers who were temporarily employed from outside the service, stood at 700, or 100 in excess of what is to be the future standard. As regards pay, the full pay and half-pay of chief inspectors is to be raised from £1 12s. and 18s. to £1 15s. and £1 per day; that of inspectors, from £1 8s. and 17s. to £1 10s. and 18s.; while that of engineers, after nine years' service, which is a new rating, from 11s. to 12s., the half-pay remaining unchanged at 6s. per day. It is also stated that an allowance of 4s. a day may be granted to the chief engineer in charge of the machinery of an exceptional ship, although the engines are under 3,000 indicated horse-power. The new orders with respect to mess are important, as showing the abolition of certain distinctions which have been hitherto regarded as humiliating and vexatious on board ship. Engineer messes are to be discontinued as opportunities offer. But in ships which may be hereafter commissioned with independent engineer messes, it is ordered that all engineers of eight years' seniority, and the senior engineer of a ship commanded by an officer under the rank of commander, will mess in the ward-room, and all others and assistant-engineers in the engineers' mess. It is, however, stated that the allowance which has hitherto been paid to engineer officers required to mess in the ward-room will only be granted to assistant-engineers, as all engineers are to belong to the ward-room mess in ships where there is no engineers' mess. These alterations, while deemed satisfactory from a social standpoint, are not giving universal satisfaction from the pecuniary point of view. The extra 1s. a day which is given to engineers of nine years' seniority will be consumed by the additional 1s. which will be added to their mess expenses, while the 1s. 6d. per day which a young engineer receives on promotion will be reduced to 6d. by the abolition of the customary allowance. Engine-room artificers under the new regulations are to be divided into four classes, with emoluments varying from 5s. 6d. to 6s. 6d. a day; while chief engine-room artificers will consist of two classes, their pay rising from 7s. to 7s. 6d. a day. The latter class will rank after first-class writers, and are liable to be disrated for misconduct. No engine-room artificer is to be advanced from one class to another unless he has maintained a "very good" character during the previous twelve months.

On the recommendation of Gen. Sir F. Roberts, two regiments of Madras Infantry are to be formed into Pioneers, on the model of the 23rd and 32nd Punjab N.I.

The following are the officers of the Bombay Cavalry who have accepted the terms of the Secretary of State for India, and joined the Staff Corps:—Lieut.-Col (Brevet Col.) J. Blair, V.C., Capt. (Brevet Major) C. Grant, Capt. (Brevet Major) C. F. Erskine, Capt. (Brevet Major) G. C. Hogg, Capt. (Brevet Major) A. Currie, and Capt. (Brevet Major) W. H. J. Stopford. All these brevet majors thus became Staff Corps majors on Jan. 1, 1883, and on the 4th idem Major Grant became lieutenant-colonel in the Staff Corps; thus passing in four days from a captain in the cavalry to a lieutenant-colonel in the Staff Corps. It is almost too much to expect that cavalry officers will be quite content with this tardy recognition of their claims, but at any rate their gain is immediate and substantial.

The *Bombay Gazette* says:—"Lord Napier of Magdala, when Commander-in-Chief of the Bombay Army, was most anxious to see direct commissions given to native gentlemen and to the younger sons of nobles and chiefs, but the experiment has not been successful on this side of India, nor do we think that the classes mentioned will ever care much to serve in our Army, except in a few crack cavalry regiments. The theory of direct commissions to native gentlemen is an excellent one, and within certain limitations is desirable in practice; but it must not be forgotten that the only prizes open to our native soldiery are officers' commissions, and that to give away too many direct commissions would seriously diminish the popularity of the service. However, this is a danger lying as yet in the very remote distance."

"SPECTACLES: THEIR USE AND ABUSE," a Pamphlet by Henry Laurance, F.S.S., Oculist Optician, should be read by all suffering from weak and defective vision; valuable and special instructions are given to those using and requiring Spectacles. It shows how sight is seriously injured by the indiscriminate purchase of Spectacles without regard to their proper adaptation, and traces more cases of blindness and defective vision from this than any other cause. Sent post free. Mr. Henry Laurance, F.S.S., Oculist Optician, personally adapts his Improved Spectacles at his residence, 3 Endsleigh Gardens, Euston Square, daily (Saturdays excepted), 10 to 4. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but your spectacles suit me admirably. The clearness of your glasses as compared with others is really surprising." Dr. Bird, Chelmsford, late Surgeon-Major W.E.M., writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age, 82. I can now read the smallest print, although suffering from cataract on the right eye." Similar testimonials from Ven. Archdeacon Palmer, Clifton; the Rev. Tidd Pratt, Bracknell, Berks; Rev. O. Thorpe, Peckham; Rev. Mother Abbess, Mill Hill, Hendon; Lieut.-Gen. Macmullen, Brentwood, &c.

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "WRIGHT, SOUTHWARK," are on each wrapper, and branded on each tablet, without which none is genuine.

NAVAL NOTES.

From Constantinople we hear that Capt. Woods Bey, formerly an officer in the British Navy, but who has been for some fifteen years in the service of the Turkish Government, has just received a well-deserved recognition of his really valuable services to the Ottoman Porte. The Sultan, having made known his intention of promoting this officer to the rank of Rear-Admiral and Pasha, desired that he should be presented to him after the usual Friday's reception. In obedience to the Sultan's commands, Woods Bey waited on Friday upon his Majesty at the Yildiz Kiosk, where he had the honour of being received in private audience, being introduced by Hobart Pasha. Abdul Hamid expressed to him the pleasure he felt in making the acquaintance of an officer who had faithfully served his Government during so many years, and while complimenting him on his promotion trusted that he would display in his new rank the same zeal as had marked his services in the past.

The Admiralty have awarded medals for long service and good conduct to the under-mentioned men:—Alexander Agius, bandmaster, of the Minotaur; William John Gernon, yeoman of signals, of the Indus; John Palmer, stoker, of the Royal Adelaide; Samuel Robinson and Maximilian Glennie, commissioned boatmen, William Pawley, Frederick Broadbridge, and Henry Jones, boatmen, of the Coastguard.

Another addition has been made to the Royal Navy by the launching on Wednesday, at Devonport, of the Rapid, 12, single-screw, composite sloop, 1,420 tons, 950 h.p., sister-ship to the Royalist, recently launched at the same yard. The christening ceremony was performed by Miss Nina Stewart, youngest daughter of Admiral Sir H. Stewart, the Commander-in-Chief. Her complement will consist of 150 men.

The despatch-vessel Vigilant has been on a trial trip, after undergoing considerable repairs at Hong Kong. The engines and boilers have been put into thorough order, a new main shaft has been fitted, and various other work has been carried out under the superintendence of Mr. H. Williams, R.N., Inspector of Machinery. Admiral Willes was on board. The vessel steamed out through the Lyeemoon Pass, with her engines making thirty-two revolutions per minute, and at a speed of about 13 knots. This speed was increased another knot on reaching smoother water, though by the orders of the Admiral she was not driven as most vessels are when upon their trial trips. The vessel behaved as well as could be desired, and everything went well with the engines, excepting a very slight heating of one of the bearings, and a small amount of priming in the boilers. Altogether, the results of the trip were considered very satisfactory.

"A visitor to Keyham Yard on passing the Queen's Dock," says the *Western Morning News*, "would not imagine that the apparently worn-out ironclad lying there will, in a few short months, proceed to sea as one of the newest armed vessels in the service. The ship is the Bellerophon, a spacious craft of the earliest type of ironclads, and she is to be brought forward to be the pioneer of a new system in connection with the Queen's Navy. We have long had gunnery ships in harbours for training seamen gunners, but the idea of a seagoing gunnery ship has been left for fulfilment to Lord Northbrook and his colleagues. The Bellerophon is a most suitable ship for the experiment; her engines and hull are in good repair, and the chief cost on her will be the necessary fittings for the armament she is to carry in her new capacity. The change in this respect is of a decidedly revolutionary character. In former commissions the Bellerophon carried ten 12-ton guns, five 6½-ton guns, two 20-pounders, seven 12-pounders, one 9-pounder, one Gatling gun, and twelve torpedoes. She will go to sea at the fall of the present year with guns of the newest pattern made, not only in England, but in the world. In fact, the weapons which she is to be armed have not all yet been cast. She is to be fitted with ten 'short' 8-inch guns of new pattern. The word 'short' is humorously applied to these guns, for they are 18 feet 6½ inches long and weigh 11½ tons. On the upper deck will be fitted a 'long' 8-inch gun, new pattern, which is 21 feet 2½ inches long, and weighs 11¾ tons. There are to be, in addition, two 6-inch breech-loading guns, new pattern, 14 feet long, weighing 81 cwt.; six 4-inch guns, one 9-pounder, and one 6-pounder, and six Nordenfelts. All the guns are to be on Vavasseur mountings. The great length of these weapons makes them exceedingly formidable, the charges employed being very large, and the velocity of the projectile extraordinary. The 8-inch guns will have charges of 90 lb. of powder, the 6-inch 34 lb., and the 4-inch 12 lb. The old 20-pounders on board the Bellerophon used to throw a shot of 20 lb. weight with 2 lb. 8 oz. of powder, whereas the 4-inch, or 25-pounder, which is to be part of her new armament, will take a charge of 12 lb. of powder to throw a projectile of 25 lb. weight. But the velocity of the gun is marvellous, being calculated to carry the shot 2,000 feet in a second after it leaves the muzzle. These guns are supposed to carry a projectile a distance of from five to six miles. It may be fairly said that the crew of the Bellerophon will have plenty to do when they go on board her, in learning the newest inventions for the destruction of life and property."

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL.—ITS UNEQUALLED EFFICACY IN DISEASES OF THE THROAT.—Sir G. Duncan Gibb, Bart., M.D., LL.D., Physician and Lecturer on Forensic Medicine, Westminster Hospital, author of various works on Diseases of the Throat and Larynx, writes:—"The experience of many years has abundantly proved the truth of every word said in favour of Dr. de Jongh's Light-Brown Cod Liver Oil by many of our first Physicians and Chemists, thus stamping him as a high authority and an able chemist whose investigations have remained unquestioned. Its value, therefore, as a therapeutic agent in a number of diseases, chiefly of an exhaustive character, has been admitted by the world of medicine; but, in addition, I have found it a remedy of great power in the treatment of many affections of the throat and larynx, especially in consumption of the latter, where it will sustain life when everything else fails. Dr. de Jongh's Light-Brown Cod Liver Oil has an agreeable flavour, is very palatable, and liked by children; hence its value in the third stage of hooping-cough, when it acts as a restorative and tonic." Dr. de Jongh's Light-Brown Cod Liver Oil is sold only in capsuled imperial half-pints, 2s 6d; pints, 4s 9d; quarts, 9s; with his stamp and signature and the signature of his sole Consignees on the capsule and the label under wrapper, by all chemists. Sole Consignees, Ansar, Harford, and Co., 77 Strand, London.

EASTER MONDAY REVIEW.

In command—GENERAL H.S.H. PRINCE EDWARD OF SAXE-WEIMAR, K.C.B.

ATTACKING FORCE.

Major-Gen. G. W. A. HIGGINSON, C.B., Home District.

FIRST DIVISION.

In Command—Major-Gen. R. White, C.B.

Assist.-Adjutant and Qrmr.-Gen.—Col. G. H. Walker.

Deputy-Assistant-Adjutant and Quartermaster-General—Major F. Morrison, Royal Scots.

Aides-de-Camp on the Staff—Lieut. G. Molyneux, West Riding Regt.; Lieut. the Hon. R. Lawley, 7th Hussars.

First Brigade, Col. E. H. Clive, Grenadier Guards.

Second Brigade, Col. Viscount Ranelagh, K.C.B., 2nd Middlesex R.V.

Third Brigade, Col. H. Kent, 7th Regimental District.

TROOPS.

Artillery—Col. Fitzgerald, R.A., H.A.C. Hon. Artillery Company, Major Rawlings (four 9-pounders), 62; 3rd Kent, Lieut.-Col. Hozier (eight 20-pounders), 350; 1st Hants, Lieut.-Col. Twiss, 143; 1st Sussex, Lieut.-Col. Tester (seven 40-pounders, one 18-pounder), 672; total, 1,227 men.

1st Brigade—12th Middlesex Rifles and 14th Middlesex R.V., Major Sandeman, 310; 15th Middlesex Rifles, Lieut.-Col. Kennard, 437; 2nd London Rifles, Lieut.-Col. Vickers, 550; 3rd London Rifles, Col. Laurie, 777; total, 2,074 men.

2nd Brigade—1st Middlesex Engineers, Lieut.-Col. Ball, 536; 1st London Engineers, Lieut.-Col. Drew, 400; 2nd Tower Hamlets Engineers, Lieut.-Col. Comyn, 500; 1st Volunteer Batn. Essex Regt., Lieut.-Col. Burgess, 365; 3rd Volunteer Batn. Essex Regt. and 4th do., Lieut.-Col. Birt, 361; total, 2,162 men.

3rd Brigade—3rd Middlesex R.V., Major Church, 402; 5th and 9th Middlesex R.V., Lieut.-Col. Mears, 484; 8th Middlesex R.V., Major Clark, 481; 17th Middlesex R.V., Lieut.-Col. Brown, 553; 23rd Middlesex R.V., Lieut.-Col. Routledge, 560; total, 2,480 men. Divisional Battalion—1st Tower Hamlets R.V., Lieut.-Col. Wigram, 450; total of Division, 7,166 men.

SECOND DIVISION.

In Command—Major-Gen. F. A. Willis, C.B.

Assistant-Adjutant and Quartermaster General—Major Paterson, Yorkshire Regt.

Deputy-Assistant-Adjutant and Quartermaster-General—Major H. S. G. Miles, Munster Fusiliers.

Aides-de-Camp on the Staff—Capt. Hughes, Scottish Rifles; Lieut. E. P. Curzon, 3rd Hussars.

1st Brigade, Col. G. R. FitzRoy, Coldstream Guards.

2nd Brigade, Col. T. F. Lloyd, 2nd Regimental District.

TROOPS.

1st Brigade—4th Middlesex R.V., Lieut.-Col. Lewis, 340; 1st Middlesex R.V., 6th do., 449; 16th Middlesex (London Irish) R.V., Col. Ward, 610; 18th Middlesex, Major Villiers, 750; 21st Middlesex R.V., Lieut.-Col. Morris, 502; total, 2,651 men.

2nd Brigade—1st Volunteer Batn. Royal West Surrey, Lieut.-Col. Robinson, 445; 2nd Volunteer Batn. Royal West Surrey Regt., Lieut.-Col. Paine, 431; 3rd Volunteer Batn. Royal West Surrey Regt., Lieut.-Col. Payne, 350; 4th Volunteer Batn. Royal West Surrey Regt., Lieut.-Col. Ray, 550; 1st Bucks R.V., 1st Oxford (University), Lieut.-Col. Wethered, 453; total, 2,229 men. Divisional Battalion—22nd Middlesex (Central London Rangers) R.V., Lieut.-Col. Alt, 500; total of division, 5,380 men.

Artillery, 1,227; 1st Division, 7,166; 2nd do., 5,380; total, 13,773. A troop of Middlesex Yeomanry Cavalry will be attached to the division.

DEFENDING FORCE.

Major-Gen. G. E. NEWDIGATE, C.B., S.E. District, Dover.

THIRD DIVISION.

In Command—Major-Gen. R. Rowland, V.C., C.B.

Assistant-Adjutant and Quartermaster-General—Lieut.-Col. W. Molyneux, Cheshire Regt.

Deputy-Assistant-Adjutant and Quartermaster-General—Major Hemming, 5th Dragoon Guards.

Aides-de-Camp on the Staff—Capt. Sawyer, Lancashire Regt.; Lieut. C. A. Hunter, Rifle Brigade.

First Brigade, Col. G. H. Moncrieff, Scots Guards.

Second Brigade, Col. Viscount Bury, K.C.M.G., 12th Middlesex R.V.

Third Brigade, Col. W. Fitz-Roy, 31st Regimental District.

TROOPS.

Artillery—Lieut.-Col. Finch, R.A. 2nd Middlesex A.V., Lieut.-Col. Lord A. Hill, 400; 3rd Middlesex, Lieut.-Col. Lord Truro (12 20-pounders), 542; total, 942 men.

1st Brigade—2nd Middlesex R.V., Lieut.-Col. Wylde, C.M.G., 500; 7th Middlesex (London Scottish) R.V., Col. Lumsden, 500; 10th Middlesex R.V., Col. Blackburn-Tew, 552; 13th Middlesex R.V., Lieut.-Col. Bushby, 638; 20th Middlesex and 2nd Cambridge University, Lieut.-Col. Sir F. Leighton, 570; total, 2,760 men.

2nd Brigade—1st Sussex Rifles and 1st Cinque Ports Rifles, Lieut.-Col. Verrall, 502; 2nd Sussex Rifles, Lieut.-Col. Sir H. Fletcher, Bart., 563; 1st Hereford R.V. and 3rd Hants R.V., Lieut.-Col. Sayer, 556; 21st Lancashire R.V., 5th ditto, and 2nd Gloucestershire R.V., 348; total, 1,969 men.

3rd Brigade—1st Surrey Rifles, Lieut.-Col. Irvine, 314; 3rd Surrey R.V., Lieut.-Col. Coles, 410; 5th Surrey R.V., Major Nettleship, 425; 7th Surrey R.V., Lieut.-Col. Porter, 450; 2nd Volunteer Batn. Royal West Kent Regt., Lieut.-Col. Lenon, V.C., 537; 3rd Volunteer Batn. Royal West Kent Regt., Lieut.-Col. Farrell, 373; total, 2,509 men. Divisional Battalion—2nd Tower Hamlets R.V., Lieut.-Col. Sir T. F. Buxton, Bart., 492; total of Division, 7,730 men.

Artillery, 942; 3rd Division, 7,730. Total, 8,672.

Army Corps Orders, by H.S.H. Prince Edward of Saxe-Weimar, K.C.B. (Commanding Volunteer Review):—

Head-Quarters, Grand Hotel, Brighton, March 23.

1. The march-past will take place before the manœuvres. The troops will be formed up at 11 a.m. on White Hawk Hill, south of the grand stand, and will be ready to march off punctually at 11.30 a.m. The guns will be prepared to move on to the race-course at the latter hour.

2. The 1st Division, under Major-Gen. White, C.B., will parade at the rendezvous assigned to it in the level, so as to be ready to march at 9.30 a.m. It will march off left in front, and proceed by Elm Grove; on reaching the race-course, it will turn down behind the grand stand, and take up a position preparatory to the march-past in the following formation. Each brigade will be in mass of quarter-columns facing north at six paces interval between battalions, and 18 paces distance between brigades. After the whole division has formed up, the men will pile arms, or ground arms if unable to pile from the roughness or formation of the ground, and will then fall out until 11 a.m., when the division will fall in preparatory to the march-past at 11.30 a.m.

3. The 2nd Division, under Major-Gen. Willis, C.B., will parade at the rendezvous assigned to it in the level or enclosures, so as to be ready to march off at 9.30 a.m. It will march off left in front, and proceed by the Grand Parade, Marine Parade, and East Park Road, and on reaching the race-course, will turn southwards, and take up its position in the rear of the 1st Division, aligned along White Hawk Road, and in the following formation. Each brigade will be formed up in mass of quarter-columns, six paces interval between battalions, and 18 paces distance between brigades, facing north. The men will pile or ground arms according to the formation of the ground, and will fall out till the 1st Brigade 1st Division has marched past, when it will fall in. After the 1st and 2nd Brigades of the 1st Division have marched past, the 2nd Division will move up, and occupy the ground just vacated by the 2nd and 3rd Brigades of the 1st Division. When the 3rd Brigade, 1st Division, is clear of the left front of the 2nd Division, the latter will move in fours to the left until in prolongation with the racecourse, when it will halt, front, and march past in rear of the 3rd Brigade, 1st Division.

4. The 3rd Division, under Major-Gen. Hugh Rowlands, V.C., C.B., will parade at the rendezvous on the level or enclosures at an hour which will be indicated hereafter, and will march off, left in front, by Grand Parade, Marine Parade, and East Park Road, and on reaching race-course will turn southwards, and take up a position in rear of the 2nd Division, facing north, and aligned along the White Hawk Road, in the following formation, preparatory to the march-past. Each brigade will be in mass of quarter-column, six paces interval between battalions and 18 paces distance between brigades. The division will move off 10 minutes after the 2nd Division has moved off to march past, and will march past in mass of brigades of quarter-columns.

5. The head-quarter staff will be formed up on the south end of the race-course at 11.30 a.m. punctually, preparatory to marching past—*vide* memo. attached. The Middlesex Yeomanry Cavalry will march past in front of the Artillery by half-troops.

6. The Artillery will be parked to the east and west of the south end of the race-course, and in front of the 1st Infantry Division. They will march past in divisions, according to precedence of corps, but the attacking artillery will march past before the defending artillery. After the march-past, the Artillery will proceed to the positions assigned to it by the Generals of the respective attacking and defending forces. The Hampshire Artillery band will play all the Artillery past the saluting-point.

7. After the march-past, the defending and attacking forces will proceed to the positions assigned to them, and should be ready with advance and outposts thrown out, to commence the manœuvres by 3 p.m., when a signal-gun will be fired from Newmarket Hill.

8. The limits of ground over which the troops are to manœuvre will be marked with flags. Every precaution must be taken to prevent the gorse being set on fire. This paragraph, No. 8, is to be read to the men by officers commanding on parade, and by officers commanding companies, on the ground before the commencement of the manœuvres.

9. When the "cease fire" sounds (which is to be repeated by every brigade and regimental bugler), the troops will remain halted in the position which they then occupy.

10. When the "assemble" sounds (which is to be repeated by every brigade and regimental bugler), both, forces will form up by brigades, and afterwards by divisions ready to march to Brighton.

11. The whole of the Infantry will march past in quarter-column and battalions, arms at the "trail," and will come to the "shoulder" by battalions on entering the saluting base, which will be marked by a flag. The infantry will come to the "trail" again after they have passed the reviewing officer about 50 paces.

11A. In marching past 30 paces distance will be preserved between battalions, 150 paces between brigades, and 200 paces between divisions.

12. The position of mounted officers in marching past is laid down in Part 7, miscellaneous subjects, inspections, or reviews, field exercise.

13. Officers commanding battalions will not fall out as directed above, but will remain with their battalions after marching past the reviewing officer.

14. Brigadiers will not fall out of place themselves on the right of the reviewing officer, but will remain in their places and proceed with their brigades; but brigade-majors will act as directed in separate memo.

15. General officers commanding divisions, with one aide-de-camp only, after passing the saluting point, will place themselves on the right of the reviewing officer until their divisions have passed, when they will rejoin their divisions; but assist.-adjt.-gens. will act as directed in separate memo.

16. Bands are to be massed by brigades for the march-past, and to be formed up at the heads of their respective brigades, when the divisions are formed up preparatory to the march-past.

17. The massed bands after passing the saluting-point will continue playing and march straight on at the head of the brigade, with the exception of the rear band of the massed bands, which will turn to the left into a railed enclosure which is clear of the racecourse, and after playing the brigade past, will at once move out of the enclosure by an exit to the left, follow its battalion, and so make room for the rear band of the next brigade. The brigade bands will be under charge of a staff officer. Each brigade band will commence playing as soon as the band of the preceding brigade ceases. After the brigade bands have passed the saluting point, the bands composing them will not rejoin their battalions until the brigade gets into the open country well clear of the race-course. Having rejoined their battalions, bands will remain with them during the manœuvres.

18. After the march-past, the attacking force will follow the race-course in mass of brigades, and will not attempt to get into any other formation until well on to the Downs. Particular attention of brigadiers is drawn to this order, which, if not carried out, will lead to a check to the troops in rear who are still marching past.

19. The attacking force will continue to march across the Downs, keeping within the boundaries of the review ground to Falmer, and then form up facing south-east.

20. The Artillery will use the road by Upper Bevendean, and turn into the Falmer Road.

21. When the "assemble" sounds after the manœuvres, the attacking force will return to Brighton by the Falmer Road, those corps nearest to Falmer will march through that place. Corps west of Rottingdean and Falmer Road may return through Hodshove Farm, south of Hog Farm, by the Falmer Road, and will proceed to the rendezvous originally started from.

22. After the march-past the defending force will march along the Drove towards Newmarket Farm, where it will take up a position under instructions from Major-Gen. Newdigate, C.B., commanding the force.

23. After the manœuvres, the "cease fire" will be followed by the "assemble," when the defending force will form up in division, and move off in division to Brighton, proceeding by the Drove, down the racecourse, and return to the rendez vous in Brighton, by East Park Road, Marine Parade, and the Grand Parade.

24. The troops, after returning to their rendezvous, will have time given them for refreshments in the rendezvous enclosures before marching to the railway-stations, and should arrange for being thus supplied.

No bugle sounds are to be used during the manœuvres except the "cease fire" and the "assemble," the signal for which will be given by the General commanding the Volunteer Review Forces. These calls are to be immediately taken up and repeated by brigades and regiments.

26. With reference to par. 28, General Orders, Brighton Volunteer Review, ammunition will be collected when the troops are formed up on their return to their rendezvous.

27. The field-states will be collected by Assistant-Adjutants-General of Divisions at the rendezvous previous to marching off, and will be sent on Monday evening to the Assistant-Adjutant-General, Brighton Volunteer Review, Grand Hotel, Brighton.

28. Gallopers are not expected to march past.

29. Generals commanding each force are requested to forward to the Assistant-Quartermaster-General at Portsmouth reports on the day's proceedings, together with those of the majors-general commanding divisions and brigades, and the officers commanding the attacking and defending artillery, on or before Saturday, March 31.

30. Major-Gen. Smyth, R.A., chief umpire, is requested to furnish his report as soon as possible before the 31st inst. to the Assistant-Quartermaster-General, Portsmouth. The umpires will furnish their reports to the Chief Umpire by the 29th inst., addressed 18 Stanhope Gardens, London, S.W.

Attention is drawn to paragraph 29, General Orders, Brighton Volunteer Review. No other officers than those whose names are published in the details of Staff are to march past.—By command,

GEORGE BRAY, Colonel,
Assistant-Adjutant-General, Volunteer Brighton Review Forces.

Assistant-Adjutant-General's Office, Portsmouth, March 17.

Memo.—Gen. H.S.H. Prince Edward of Saxe-Weimar, K.C.B., directs that General officers commanding divisions and brigades will be good enough to issue instructions to assist.-adjts.-gen. and brigade-majors that they will rejoin their respective divisions and brigades after they have passed the saluting-flag, and will superintend the march-past, and be careful to see that the divisions and brigades preserve the regulated distances. After the divisions or brigades shall have passed the flag, the assist-adjts.-gen.- and brigade-majors will rejoin their Generals.

The necessity of preserving the proper distances at the march-past is to be strongly impressed on divisions, brigades, and regiments.—By order,

GEO. BRAY, Col., A.A.G.

The Admiralty have ordered the immediate cessation of all overtime at Chatham Dockyard, and a considerable reduction in the number of workmen employed. Several hundreds of hands will be discharged this week.

EPPS'S COCOA.—GRATEFUL AND COMFORTING.—" By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.*—Made simply with boiling water or milk. Sold only in packets, labelled—" JAMES EPPS and Co., Homœopathic Chemists, London."—Also makers of Epps's Chocolate Essence.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, March 20, 1883.

5th Dragoon Guards—Capt. A. A. O. Nelson has been seconded for service as an Adjt. of Auxiliary Forces (Feb. 22).

5th Lancers—Capt. H. C. Morland has been seconded for service as an Adjt. of Auxiliary Forces (March 7).

13th Hussars—Capt. E. R. H. Torin has been seconded for service as an Adjt. of Auxiliary Forces (March 16).

Royal Engineers—Major G. V. Sivewright is placed upon half-pay. The second Christian name of Capt. J. T. Johnston is "Tayler," and not as hitherto stated.

Scots Guards—Surg. A. B. R. Myers, from the Coldstream Guards, to be Surg.-Major, vice W. H. Pickford, M.B., retired (March 14).

REGIMENTAL DISTRICTS.

Lieut.-Col. and Col. L. L. Brett, from half-pay, to be Lieut.-Col. to command the 62nd Regimental District (the Duke of Edinburgh's Wiltshire Regt.), vice Col. H. F. B.thesea, whose period of service in that appointment is about to expire (April 3).

LINE BATTALIONS.

The Royal Scots (Lothian Regiment)—Capt. A. W. L. Rickards has been seconded for service as an Adjt. of Auxiliary Forces (Feb. 23).

The Norfolk Regiment—Lieut. G. E. Bunbury resigns his commission.

The Prince of Wales's Own (West Yorkshire Regiment)—Col. D. S. Warren, C.B., having completed five years' service as a Regimental Lieut.-Col., is placed on half-pay (March 20).

The Worcestershire Regiment—Lieut. E. A. I. Pym has been appointed a probationer for the S.C. (Jan. 2).

The Border Regiment—Major A. J. Tufnell has been placed on retired pay, with the hon. rank of Lieut.-Col. (March 15).

The Welsh Regiment—Lieut. W. J. Peyton has been appointed a probationer for the S.C. (Jan. 31).

Princess Charlotte of Wales's (Berkshire Regiment)—Lieut. F. W. N. McCracken to be Adjt., vice Capt. F. B. R. Hemphill, who resigns the appointment.

The Manchester Regiment—Supernumerary Lieut. G. R. Pearce, who has ceased to be a probationer for the S.C., to be Lieut., vice E. W. Codrington, appointed a probationer for the S.C. (Nov. 23, 1882); Lieut. D. J. T. O'Brien has been appointed a probationer for the S.C. (Nov. 20, 1882).

The York and Lancaster Regiment—Lieut.-Col. and Col. G. B. Wolseley, who retains his Staff appointment on promotion, has been placed on half-pay (Feb. 16); Capt. and Brevet Major W. J. Kirkpatrick has been seconded for service as an Adjutant of Auxiliary Forces (Feb. 23).

The Highland Light Infantry—Capt. and Brevet Major C. M. MacDonald has been seconded for service as Military Attaché to the Consular Agency in Egypt (Feb. 5).

The Royal Irish Rifles—Lieut. O. C. Armstrong has been appointed a probationer for the S.C. (Jan. 29). The restoration to full pay of Lieut. A. Anderson from half-pay, dated Dec. 20, 1882, is cancelled.

The Prince of Wales's Leinster Regiment (Royal Canadians)—The seconding, as a probationer for the S.C., of Capt. F. J. Kempster, dated Jan. 14, is cancelled; the promotion to the rank of Capt. of Lieut. F. J. Kempster (who has ceased to be a probationer for the S.C.) is antedated to Nov. 18, 1882, in succession to Capt. A. E. C. Kaye, seconded. Lieut. W. H. Cole to be Capt., vice J. L. J. Gordon, seconded (Jan. 14).

2nd West India Regiment—Gent. Cadet Frank Rowley Metcalfe Charles De Rittich Mauduit, from the Royal Military College, to be Lieut., vice H. H. Keighley, promoted.

Chaplains' Department—The Rev. C. A. Wetherall, M.A., Chaplain to the Forces of the 2nd class, to be Chaplain to the Forces of the 1st class (Feb. 28).

Medical Department—Surg.-Major F. W. Wade to be Brig.-Surg., vice G. Whitla, granted retired pay (Feb. 1).

Army Pay Department—Pymr. and Hon. Capt. W. F. Longbourne has been seconded for service in a civil capacity in Ireland (July 1, 1882).

BREVET.

Capt. W. H. Fairtlough, retired pay, to be Major (March 24, 1863); Capt. and Brevet Major W. H. Fairtlough, retired pay, to be Lieut.-Col. (May 23, 1873); Major J. Herschel, Royal (late Bengal) Engineers, to be Lieut.-Col., under the provisions of Article 11 (*f.f.*) of the Royal Warrant of March 11, 1882 (March 10).

MEMORANDA.

Lieut.-Col. J. D. Johnstone, the Royal Sussex Regt., to be Col. (March 15).

Capt. and Brevet Lieut.-Col. W. H. Fairtlough, Retired Pay, retires from the service, receiving the value of his commission.

Hon. Lieut.-Col. E. Molyneux, late Major 7th Dragoon Guards, has been permitted to commute his retired pay (March 1).

Major E. B. Burnaby, half-pay, is placed on retired pay.

Qrmr. F. Butterworth, Scots Guards, to have the hon. and relative rank of Capt. (March 25).

RESERVE OF OFFICERS.

Capt. W. J. Mittin, 24th Middlesex R.V.C., to be Lieut.

INDIA OFFICE, March 20, 1883.

The Queen has approved of the under-mentioned officers of the Indian Military Forces being permitted to retire from the service:—Lieut.-Col. and Brevet Col. F. Horsley, of the Madras S.C. (Feb. 2); Lieut.-Cols. J. H. Willoughby-Osborne, of the Bengal Army (Feb. 21); T. H. Stoton, of the Madras S.C. (Feb. 7); and W. Chisholm, of the Madras S.C. (March 20); Major and Brevet Lieut.-Col. R. G. Birch, of the Bengal Army (Jan. 13); Brigade-Surg. R. Dempster, of the Madras Army (Feb. 28); Surg.-Major H. Day, M.D., of the Bombay Army (March 4).

BREVET.

The under-mentioned officers are granted a step of hon. rank on retirement:—

To be Major-General:—Lieut.-Col. and Brevet Col. F. Horsley, of the Madras S.C. (Feb. 2).

To be Colonel:—Lieut.-Cols. T. H. Stoton, of the Madras S.C. (Feb. 7); W. Chisholm, of the Madras S.C. (March 20); Major and Brevet Lieut.-Col. R. G. Birch, of the Bengal Army (Jan. 13).

To be Surgeon-General:—Deputy-Surg.-Gen. Sir A. Christison, Bart., M.D., of the Bengal Army (Nov. 24, 1882).

To be Deputy Surgeon-General:—Brigade-Surg. H. Adam, of the Madras Army (Dec. 31, 1882).

To be Brigade-Surgeon:—Surgs.-Major J. B. White, of the Bengal Army (July 15, 1882); T. E. Charles, M.D., of the Bengal Army (Sept. 18, 1882).

(Where not otherwise specified, the foregoing commissions and announcements bear date March 21, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

ST. JAMES'S PALACE, March 23, 1883.

The Queen has been pleased, on the nomination of Lord Carrington, to appoint Lieut.-Col. J. H. Culme-Seymour, late 82nd Foot, to be one of her Majesty's Honourable Corps of Gentlemen-at-Arms, vice Major G. Nicholas, who retires upon half-pay.

INDIA OFFICE, March 23, 1883.

The Queen has approved of the admission of the under-mentioned Surgeons to her Majesty's Indian Medical Department:—

To be Surgeons (dated Sept. 30, 1882):—Bengal—Albert William Denis Leahy, William Wilfrid Webb, and Richard Rose Weir. Madras—Robert Evans Stuart Davies, Herbert Knowles Fuller, and William Henry Neilson. Bombay—William Henry Burke and John Crimmin.

The dinner to be given to Lord Alcester by the Committee of the Empire Club will take place at the Clubhouse, Grafton Street, Piccadilly, on April 9. Admiral H.R H. the Duke of Edinburgh will preside.

HALF-PAY MAJORS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I was very glad to see "Full Justice's" letter in yours of the 10th inst. I quite agree with him, and I go a bit further, and suggest that, instead of the most unfortunate regiments who received a half-pay major, and which now appear to be quietly being absorbed into the regiments, that they should be sent back to their old regiments, and let their former regiments have an establishment of nine majors, and not us, who neither want nor deserve to be punished for, I hope honourably, at any rate, serving our country in Egypt. As an instance, I will give you one. A regiment which was through the late war has had a majority vacant since one of its majors was seconded as a Volunteer adjutant in December, 1881. A captain has quite lately been promoted, but has not been given that step, but one that occurred at the end of 1882. The regiment has but eight majors, and nine is its establishment. This looks, to my mind, rather as if the half-pay major was meant to take the place of the man who was seconded in 1881. We do not expect much now-a-days, but we do expect to be fairly and open-handedly treated.—I am, &c., ONE WHOSE SERVICE HAS BEEN BLIGHTED IN CONSEQUENCE.

By an Order in Council, dated the 19th inst., the Queen has directed that the period of training and exercise of the following Regiments and Brigades of Militia shall, for the current year, be extended under the provisions of the Act of 1875 from 28 days to the number of days mentioned in each case:—5th Brigade, Scottish Division, Royal Artillery, 34 days; 3rd Brigade, Northern Division, Royal Artillery, 34 days; Royal Anglesey Engineer Militia, 42 days; Hampshire (Submarine Miners) Engineer Militia, 56 days; Royal Monmouthshire Engineer Militia, 41 days.

The members of the United Service Club gave a dinner on the 7th inst. in honour of Admiral Lord Alcester, G.C.B., on his return from his command in the Mediterranean, at the Club House, Pall Mall. Covers were laid for about 150 persons. The Prince of Wales presided on the occasion, supported on the right by Lord Alcester, the Duke of Edinburgh, and Field-Marshal Lord Strathnairn; and on the left by the Duke of Cambridge, Prince Christian of Schleswig-Holstein, and Admiral of the Fleet Sir Alexander Milne.

H.B.M.'s Consul-General for the territory of his Highness the Sultan of Brunei, Dr. Peter Leys, arrived in the Foxhound on Jan. 18, and presented his credentials to the Rajah as H.M.'s British Consul to Sarawak on the following day. Dr. Leys and Lieut. McQuhae, commanding the Foxhound, who were guests at the Astana, visited the gold workings in Upper Sarawak, both those belonging to the Chinese Gold Companies and the stamping carried on by the Borneo Company. On their return to Kuching, H.H. the Rajah entertained the European residents to meet the Consul and the officers of the Foxhound.

The *Times'* correspondent at Berlin writes:—"Lieut.-Gen. Bronsart von Schellendorf, hitherto commanding the 2nd Infantry Division of the Guards, has been appointed War Minister, in succession to General von Kameke, resigned. The latter retires with the usual pension. In conversation with some Parliamentary friends, he is said to have avowed that the Increase of Pensions Bill had less to do with his resignation than certain momentous questions of military reform, on which he materially differed from his superiors. His successor, Gen. Bronsart von Schellendorf, was born at Dantsic in 1832, and has won a solid reputation, both as a regimental and staff officer, and as a military author; his 'Functions of the General Staff,' in particular, being a standard work. Attached to the Headquarters' Staff during the campaign of 1870-1, he attracted the special notice of King William. When the French had been hurled back into Sedan, it was Lieut.-Col. Bronsart von Schellendorf whom his Majesty sent into the town, with a flag of truce, to demand its unconditional capitulation; and who returned in company with General Reille—the bearer of Napoleon's well-known letter of surrender—'N'ayant pas pu mourir à la tête de mes troupes, je dépose mon épée aux pieds de votre Majesté.' After the war he was made Chief of the General Staff of the Guards Corps, in which he then successively received command of the 2nd Brigade and the 2nd Division. Throughout his career he has shown himself to be 'un homme de tête et d'action,' a combination which Prince Bismarck once said was not very common among his Prussian countrymen. The selection of General Bronsart von Schellendorf to fill so high and important an office as that of War Minister, has naturally not failed to cause certain disappointments and heartburnings; and it is certain that other resignations and transfers will follow. Several of the new Minister's seniors in the War Department have been passed over, and this, according to an almost invariable rule in Prussia, has only one meaning and one result. In particular, it is rumoured that General von Albedyll, Chief of the Private Military Cabinet of the Emperor, a department which is subject to the Ministry of War, has already resigned. For about 20 years, General von Albedyll has been deeper in the confidence of the Emperor, as far as the work of the Military Cabinet is concerned, than any other man. This office is the one where appointments and promotions, and the character and qualities of every officer in the army—some 15,000 or 18,000 in number—are registered; and woe to any aspirant after the Marshal's *bâton* under whose name ambition has been bracketed with idleness, or any other disqualifying vice, by the omniscient Chief of this inquisitorial bureau. Rumour now attributes the resignation by General von Albedyll, of the important post which he has worthily held so long, to the fact that Bronsart von Schellendorf is his junior, and that his Majesty cannot be prevailed upon to render his Military Cabinet wholly independent of the Ministry of War."

THE DISTRIBUTION OF EGYPTIAN WAR GRATUITIES IN THE NAVY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I beg to call your attention to the classification recently adopted, in distributing gratuities to the Royal Navy, for services in Egypt. I do so in the hope of obtaining your powerful advocacy for the redress of what I deem an injustice. Relative rank is generally supposed to carry with it all advantages, except name or actual command; and departmental officers in the Army were given gratuities in accordance with their relative or honorary rank. Thus Commissariat, Ordnance, Medical, and other officers ranking with captains, obtained the gratuity due to captains, and so on through the various ranks. In the Navy, however, surgeons, and many other non-combatant officers ranking with lieutenants in the Navy, were only given the same gratuity as sub-lieutenants, boatswains, gunners, and carpenters. Considering the acknowledged value of surgeons in war, and the many risks and hardships, in addition to those peculiar to the profession, which they often share with their combatant brethren, it is strange that they should suffer in the distribution of pecuniary rewards. The chaplain—man of peace though he be—gets a larger portion of the sinews of war than the surgeon, who is as necessary as a combatant officer in warfare when once begun. The classification adopted was founded on an Order in Council of May 16, 1871, regulating the distribution of prize-money, before medical officers had their present relative rank. I feel that the matter only wants representation to the Admiralty, to prevent a recurrence of what is manifestly an anachronism. The point in question touches all ranks of non-combatant officers of the Navy, but especially, perhaps, the Medical Department.—I am, &c., SCALPEL.

SIR,—Permit me to ask through the medium of your columns why it is that, although surgeons in her Majesty's Navy rank with lieutenants, when it comes to a distribution of either prize-money or gratuities, their shares are only equivalent to those of sub-lieutenants, chief carpenters, &c.—I am, &c., LUCRE.

Amusements.

The Easter novelties are not numerous. DRURY LANE THEATRE will be opened by the Carl Rosa Company for a season of four weeks, Mr. Goring Thomas's new opera of "Esmeralda" being produced on Easter Monday. At HER MAJESTY'S THEATRE will be presented "A Trip to the Moon," being a new version of Offenbach's fantastic comic opera, "Le Voyage dans la Lune," played at the Alhambra a few years ago. At the STRAND will be brought out a new comic opera, entitled, "Cymbia," composed by Mr. Florian Pascal, and written by Mr. Harry Paulton. At the AVENUE THEATRE, which now passes under the direction of Messrs. John Hollingshead and Michael Gunn, Offenbach's posthumous opera, "La Belle Lurette," will be transferred to the English stage. The characters sustained at the Gaiety, Paris, in July, 1881, by Mdlle. Granier, Mdlle. Meyer, and M. Jolly, will be embodied by Miss Florence St. John, Miss Lottie Venne, and M. Marius.

The Easter novelty at the SURREY is a sensational four-act drama, by Mr. W. H. Poole, called "The Miracle;" and ASTLEY'S will be opened by Messrs. Holt and Wilmot, with Mr. James Willing's elaborate drama of "The Ruling Passion," transferred from the Standard Theatre.

A morning performance, given at the OLYMPIC on Saturday, in aid of the funds of "The School of Dramatic Art," attracted a numerous assemblage, including the Prince of Wales. A new comedy by Mr. Hamilton Aidé, called "A Great Catch," was produced on the occasion, and though considerable condensation of dialogue is obviously required, the merits of the piece are sufficient to warrant the expectation of its early repetition as a portion of the regular evening programme. Miss Genevieve Ward has a part exactly suited to her, as the representative of the widow, Mrs. de Motteville, tracking the true history of an early lover, who has not merited her cruel suspicions. Mr. W. H. Vernon gives a vigorous delineation of Sir Martin Ingoldsby, whose wealth distinguishing him as an eligible husband accounts for the title of the play; and Mr. David Fisher as an old nobleman, Miss Lucy Buckstone as a young relative, and Mrs. Leigh Murray as a heartless woman of fashion, are conspicuously placed in the cast. Mr. Beerbohm Tree achieved a distinctive success as a foolish fop, known as Lord Boodle; and Mr. Frederick Cape was prominent as the worthy solicitor, Mr. Shakerly.

Mr. Pinero's new four-act comedy at the COURT THEATRE will be produced this (Saturday) evening, under the title of "The Rector; a Story of Four Friends."

The NOVELTY THEATRE, Great Queen Street, renamed the FOLIES DRAMATIQUES, will be reopened at Easter, under Mr. Francis Fairlie's management, with a comedietta and a new version of "Les Cloches de Corneville."

The NEW ROYALTY THEATRE, Soho, entirely reconstructed, will be opened at the end of this month, under the management of Miss Kate Santley. A new comic opera, by Mr. Frederic Clay and Mr. G. R. Sims, called "The Merry Duchess," will be the opening production. The house, rebuilt by Mr. Thomas Verity, the architect, will hold an audience of about 650 persons. New entrances and new exits have been provided.

A Naval pension of £50 per annum has fallen vacant by the death of Com. C. E. Powys, R.N., which has just taken place at Acton, in his 74th year. The deceased officer, who entered the Royal Navy as cadet more than half a century ago, viz., on September 5, 1822, was awarded the pension on January 28, 1881.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, March 24, 1883. Letters on business and Remittances should be made to Mr. RICHARD JAMES WOOD.

THANKS, in a large measure, to the untiring exertions of General H.S.H. Prince Edward of Saxe-Weimar, Major-General Higginson, and Colonel the Hon. Paul Methuen, the brief campaign which culminated in a decisive action on Brighton Downs on Monday last has to be pronounced a complete success. There appears now to be one general consensus of opinion in favour of the Easter outing of the Volunteers. Twelve years ago, these gatherings were viewed with disfavour, not only by competent Military critics, but by many of the best-known Volunteer commanders. They were unpopular, because it was recognised that the work was too hurriedly executed to admit of any really practical experience being gained. Now, however, matters are gradually getting into a right groove. With the resuscitation of the Easter Review, a desire was manifested on the part of a few earnest Volunteer officers to take advantage of the opportunity for acquiring an insight into that all-important part of a soldier's training,—minor tactics. Marching detachments were, therefore, organised to proceed by road to the scene of operations. These detachments were for some years allowed to act independently. It was not until last year that the Military authorities took the matter in hand, and told off a Regular officer to superintend this portion of the arrangements in connection with the Review. So eminently satisfactory were the results of the experiment, that this year the new feature has been still further developed. Some 5,000 men have given evidence of their martial enthusiasm by putting themselves under Military discipline for four days, with a view of gaining experience of a useful nature. We have no hesitation in saying that nothing could possibly have been better than the way in which all ranks acquitted themselves in the operations of Friday and Saturday. Indeed, the only break-down was on the part of the Transport, which, as usual, showed itself quite incapable of carrying out the duties assigned to it, and left the unfortunate men in some cases, after a long day's march, shivering in barns until the early hours of Saturday morning, for want of blankets. Colonel Methuen speaks in the highest terms of the conduct of the force under his command. There was evidently a desire on the part of both officers and men to learn all they could. The discomforts they had to endure were considerable, owing to the state of the weather, yet there was no case of insubordination. This is the more creditable, as one well-known commander put the discipline of his men to the severest possible test, by his ill-advised zeal in parading his detachment and drilling the men for nearly an hour, after they had done a long day's march. As to the Review itself, we are pleased to be able to speak in terms of unqualified approbation. There was none of that hurry and scurry which was noticeable some years back. Officers and non-commissioned officers appear now to have got a firm hold over their men. As a result, the operations were carried out with soldierly precision, there were few stragglers, and what is of even more importance, there was in most battalions an absence of talking in the ranks. All these things tend to show the advance that has been made. The march-past was the only portion of the day's proceedings which was disappointing. Some will contend, no doubt, that marching past is, in itself, no true criterion of efficiency. Nevertheless, it has its uses, and military critics who witnessed the defile of the troops before the Duke of Cambridge on Monday could not fail to have been struck by the vast difference there is in the drill of many of the corps. In some few battalions, every detail seemed to have been studied. Distances were correctly kept, heads were held erect, the supernumerary ranks were properly dressed, officers "carried" their swords, and the rear ranks were well closed up. These are the points by which a march-past has to be judged, rather than by the wall-like dressing of the men. Dressing, it has to be remembered, can be thrown out by the carelessness of one man, but attention to what may appear to some to be petty details shows at once whether a battalion has been well drilled or not, and whether the company officers and serjeants have been constant in their attendance at battalion parades. However, we must not expect too much from men who only take up soldiering from patriotic motives, of their own free-will. The Volunteers have given evidence that they are anxious to do all that is required of them, and the progress they have made in the last ten years has been such as to earn for them a recognised position in the defensive forces of the country. It can no longer be said of them that they are only playing at soldiers, for they have proved long since that they have got beyond all such childish frivolities. It rests with the guardians of the public purse to decide whether or not they shall continue to improve. Increased efficiency can only be obtained by means of increased funds. At present, the Government grant is quite inadequate. Consequently, the deficiency has to be made up out of the pockets of the officers themselves. Many Lieutenant-Colonels spend from £250 to £500 a year on their regiments, whilst company officers subscribe in proportion; and there are very few regiments in which a Captain gets off under £50 to £100 a year. To us, it seems manifestly unfair that an officer should be called upon to give money and time too, and until this abominable state of things is put a stop to, the service can never be considered in a really satisfactory condition. It is for the Government to remove the blot. A great outcry was made some years back against the iniquity of the Purchase system, but here we have Purchase still existing in an even worse form. It is, however, a fact of which the country should be proud, that men can be found so self-sacrificing as to give their services voluntarily to the State, and even pay for the privilege of doing so. There are several points in connection with the Review to which we may draw attention. First and foremost is the fact that a force of 23,000 men were called upon to manœuvre without cavalry and field artillery. We admit the difficulties which stand in the way of these wants being supplied, but it is a pity that means cannot be found for providing the Generals in command with a sufficient force of each arm to allow of their carrying out the operations with something like military reality. A British General gets now-a-days so very few opportunities of handling large bodies of troops, owing to the attenuated condition of most Line battalions, that every endeavour should be made to constitute these Easter Reviews a training for Generals and Staff officers, who ought to learn more than anybody else on such occasions. We are glad to find that the absurdity of allowing Volunteer colonels to command brigades is dying out by slow degrees; but even on Monday last two Volunteer officers held commands, and the remarks made openly by those who were included in their commands proved convincingly that this delicate attention on the part of the Military authorities is not appreciated by the Volunteers, who, as a rule, are greatly disappointed when they find themselves posted to a brigade under one of their own chiefs, because, as a very smart field officer remarked to us, "the selections are not always made on the ground of ability, but rather by favouritism." We have taken great pains to ascertain the views of the Volunteers on this subject, and we find that the feeling prevails almost unanimously throughout the service that brigades should invariably be commanded by qualified Regulars, and we consider it only fair to let it be known that such is the case, for we are sure that two devoted Volunteers such as those in question will not again allow themselves to be put in a false position, when they know what the wishes are of the service to which they belong. A very serious evil which is growing up in connection with the Review, is that of General officers and Brigadiers taking on to their Staff Volunteer gallopers. In one case on Monday, a General commanding a Division unnecessarily harassed a brigade, in consequence of one of his gallopers having taken a wrong order to a Brigadier. The men who aspire to the position of galloper are of two classes,—those who are good regimental officers and those who are bad. If a man is a good officer, he should on such an occasion remain with his regiment. If he is what is commonly called a "duffer," he is quite unfitted for Staff work. The only qualification for a galloper seems to be that he must ride well. Some, unfortunately, cannot even do this, and the scenes witnessed on Monday were not always edifying. We are sorry to find that many Volunteer Colonels err on the side of zeal. They are such keen soldiers, that they work their men almost to the utmost limit. A good commander always takes care that, when trying duties have to be done, the strength of his men should be reserved. Depend upon it the man who is most considerate in these matters will be most popular, and have the smartest and best battalion. Every opportunity should be taken advantage of to stand a battalion at ease, and no order should be given unnecessarily. We saw some few Lieutenant-Colonels on Monday worrying their battalions frightfully, whilst many company commanders, by their incessant talking, succeeded in doing the very opposite to what they wanted. These are things which require to be seen to on future occasions, and we offer the suggestions in all friendliness. We cannot but express a hope that next year the War Office may see its way to testing the efficiency of the Commissariat and Transport at Easter. It would entail some expense, it is true, but seeing how miserably our Commissariat and Transport arrangements fail when a strain comes, the experience gained at Brighton would help materially to show weak links in the chain, and allow of their being mended in time. It is obvious that if we could not manage to provide a substantial meal for 25,000 men at Brighton at two months' notice, we are in a very deplorable state indeed. No question of expense ought to be allowed to interfere with the efficiency of the Army. The Easter Monday Reviews, it appears to us, offer a brilliant opportunity for testing the efficiency of the Commissariat in a practical manner, and we are sure that the officers of the Department would gladly exert themselves if they were required to do so, if only on account of the experience which would be gained. The question of great-coats is one that ought to be taken seriously into consideration. Most regiments have now got regulation water-bottles and haversacks, provided, as a rule, by the officers, but very few have great-coats. There are surely any number of partly-worn great-coats in store, which could be issued to the Force, and there ought not to be a moment's delay in giving these very necessary portions of a soldier's equipment.

LORD WOLSELEY, in a speech delivered by him shortly after his return from Egypt, is reported to have said that during the period he held command of the Army operating in that country, he had only seen or heard of two cases of drunkenness. Presuming that his Lordship's speech might have been incorrectly reported, we confined ourselves at the time to a mere expression of surprise at this statement. As, however, there has been no qualification or retractation of these words in the interim on the part of his Lordship, we deem the present to be a fitting opportunity for recurring to the subject. Mr. Osborne Morgan, the Judge-Advocate-General, in reply to Mr. Caine—one of the apostles of Temperance—in the House of Commons on the 20th inst., stated that 145 soldiers were fined for drunkenness by Superior Courts-martial in Egypt in 1882, irrespective of, the Judge-Advocate-General was careful to point out, the cases of drunkenness disposed of by Regimental Courts-martial, as well as those cases summarily dealt with by Commanding Officers during the same period. The service will, we feel confident, bear us out in our assertion that for every case of drunkenness brought before a court-martial, there are fully ten other cases of this nature disposed of summarily. Furthermore, we believe we are not outside the mark when we say—if we are in error in our estimate, we shall be glad to be set right—that for every recorded case of drunkenness in the Army, another such case goes unpunished and unrecorded, for we believe it still is, and most certainly it used to be an understood thing, that, if a soldier be but quiet and undemonstrative in his cups, he will, in most instances, be allowed to sleep off unnoticed the effects of his potations. In other words, if he turns out for parade next morning and passes inspection, all goes well. Now, supposing our premisses to be correct, or even approximately so, there must have been some three thousand cases of actual drunkenness—and how much hard drinking besides does this total represent!—in the Army of Egypt in 1882. Say a quarter of this number occurred during Lord Wolseley's tenure of command, does it not appear most strange that his Lordship only saw or heard of two drunken soldiers? Now, whilst in no way wishing to impugn the mere accuracy of Lord Wolseley's purely negative statement, surely we have a right to ask,—Did Lord Wolseley, when commanding the forces in Egypt, ever have to confirm the proceedings of a general court-martial in which drunkenness formed a charge against a soldier? Were no charges of drunkenness preferred against soldiers arraigned before district courts-martial ever brought to his knowledge by the General officers commanding divisions? May we venture to ask his Lordship if he ever, or never, asked commanding officers whether there were any cases of drunkenness in their battalions? Without doubt, he must have made some inquiries of the sort, and have demanded from his lieutenants full and explicit information on this subject, for it would be positively insulting to his Lordship, and derogatory to his character and credit for sagacity as a Commander in the field, to deem it possible for him to have acted otherwise, in a matter of such paramount importance. Granting this, therefore, we submit that the public, if not the Army, has a right to inquire what Lord Wolseley's object was in making this celebrated and now historic statement, before a large and influential gathering of his countrymen. Did Lord Wolseley desire the British public to understand from him that the new Territorial Army had become so thoroughly reformed under his 'prentice hands that that bane of the service, drunkenness, had altogether disappeared from its ranks? Can Lord Wolseley, the Adjutant-General of her Majesty's Forces, and the trusted servant of his country, by, as he imagined, prudently ignoring facts, have been guilty of a *suppressio veri?* In the face of the Judge-Advocate-General's statistics, we feel with extreme reluctance compelled to admit that it looks uncommonly like it. Perhaps, however, the Adjutant-General will now tell the country what he really did mean. But this is not all we have to say on the subject of drunkenness in the Army of Egypt. Mr. O. Morgan has further stated, in reply to Sir G. Balfour, that there were 379 courts-martial held on soldiers in Egypt during a period of upwards of seven months, and that "trials for drunkenness had been unusually frequent." Pending, therefore, Lord Wolseley's explanation, probably Mr. Caine, or some other Member of Parliament interested in the subject, will take an early opportunity of asking the Judge-Advocate-General or Secretary of State for War what was the number of cases (if any) of drunkenness taken cognisance of, both summarily and by court-martial, in the Army of Egypt during the period in question. This information would prove of interest. We therefore sincerely trust it will be supplied without delay. As the obvious corollary of Lord Wolseley's statement, we would express a hope that, in future, if a General trusts to the correctness of his own exclusive observation in an important matter, he may be diffident in proclaiming the result thereof, or defer doing so pending corroboration.

THE Army Corps orders, dated the 23rd instant, promulgated by H.S.H. Prince Edward of Saxe-Weimar to the troops to be engaged in the Volunteer Review of Easter Monday, certainly lacked nothing in volume. We wish we could say they were no less wanting in other respects. The thirty odd paragraphs of which these orders are composed bear the stamp of having been most loosely and hurriedly strung together, —a paragraph, to all appearance, being added here and there, as a fresh idea struck the author. We shall as briefly as possible invite attention to a few of their salient characteristics, as regards composition and general arrangement, in no carping spirit, but in order that more care may be exercised next year. The intention being that the Review should commence with the march-past, paragraphs 1 to 7 referred to this part of the day's programme. A jump is now made to No. 11, in which, together with the paragraphs as far as No. 20, the march-past is again treated of. With another jump or two, we reach paragraphs 28 and 30, and last of the series, but only to ascertain the fact that the march-past is still further referred to. By a strange opposition in the arrangement of the sequence of these lengthy orders, their very last words contain instructions relative to the commencement of the day's proceedings. We would observe, in passing, that the march-past must have been considered to be of primary importance in the events of the day; at any rate, that impression is reasonably gathered from the fact that about three-fourths of the Orders are entirely devoted to this subject. We have now to deal with the remaining fourth, bearing upon the "Cease fire" and "Assemble," in paragraphs numbered 8, 9, 10, 22, 23, 25, and upon the "manœuvres" and "rendezvous" in the remaining half-dozen paragraphs, these latter, it is almost unnecessary to add, evidencing a similar absence of exactitude in arrangement. Throughout the orders, there is an utter want of precision in the composition. To begin with, they are issued in the name of the officer "Commanding Volunteer Review." Fancy a General "commanding a review!" and they are signed by the Assistant-Adjutant-General "Volunteer Brighton Review Forces." Was there ever a more awkward or stranger jumble of words? To continue, the author suddenly becomes intoxicated by the exuberance of his verbosity, and so the troops are ordered "to be ready" or "prepared" to parade, or march, or "move off" "punctually" at certain named hours. We wonder where it is that British troops are ever ordered to parade or march *un*punctually. Again, at par. 5, we find the "Head-quarter Staff" spoken of. Why Head-quarter? Really, in these high-pressure days of examinations, selection, confidential reports, Staff College, &c., we have a right to expect, aye, and exact too, from our Staff Officers a more careful attention to their duties; and, in the present case, we cannot help expressing our astonishment that any responsible Staff Officer, or body of officers, could be so little jealous of his, or their, professional reputation, as to be capable of promulgating such confusing orders, and ostensibly for the guidance (!) of our non-professional soldiers, forsooth!

IT is no satisfaction to Naval officers that they are subject to the influence of individuals unconnected with the service, and who are in no way interested therewith. An Admiralty clerk cannot be expected to care much for the Navy. He merely looks on employment as a comfortable means of existence; and it is not his fault that his remuneration is above his market value. The blame rests with administrators who will not admit that better men can be found to do the work. It is absurd to imagine that a Naval Lord can carry out all the duties of office by himself; and why he should be without professional aid, when, if he were on active service he would have an efficient staff at his command, is not met by the reply "that the present system answers." Is a Naval officer so different a being to his brother in the Army that he should find a Civil-Service clerk who is in no way identified with him "the mouthpiece" of his professional representative at the Admiralty, when, in the other service, officers are brought in direct contact with their own cloth at head-quarters? Divesting this question of economy, the advantage to the public service generally, and to the interests of those legislated for by this particular department, point out that an entire reconstruction of the Secretariat Department of the Admiralty should be effected, in spite of political opposition, and the resistance of those who would sooner see maladministration of Naval affairs go on, than forego one fraction of their patronage. As we have previously stated, it would be necessary to retain a certain portion of the Civil Service at the Admiralty for those duties which would bring them in connection with their own element in other Departments, excepting the Army, but the majority of the Admiralty Office Staff should be purely Naval. The officers of the Navy have varied and valuable experiences of places and facts, both foreign and colonial, which a civilian cannot acquire. He consequently must deal with questions thereon merely from official records. We know an instance in which the coal agent at a British possession was asked by letter, from the Admiralty, if a ship of a certain draught could be discharged there. This could have been easily found out by referring to the charts, which were new, but the Whitehall subordinate probably considered that his dignity would suffer, had he referred to the Hydrographer for information. Letters are written by clerks who have only an office knowledge of Naval business, and are generally signed by the Secretary in an automatic manner, as it is impossible for him to ascertain the contents of everything placed before him. It may be the opinion of some individuals that when the Secretariat Staff are unacquainted with any particular matter, they can easily obtain what they require from professional officers outside the Admiralty; but, we ask, why should not the places of these civilians be filled by Naval officers, whose ability and knowledge of all subjects which come within the scope of Naval administration would enable them to act without delay, and elucidate matters satisfactorily? On the Executive Lists of the Navy are many officers who have devoted themselves to the higher subjects of their profession, which in this age are a necessity in an elementary form for all grades of the Military branch. The "public Press" contains evidence of their ability to master and discuss subjects which, some years ago, but few Naval men cared to acquaint themselves with, and were thought too scientific for the general mind to acquire. The advantages which Greenwich affords to officers they gladly avail themselves of, and the acquisition of prizes indicates the keen competition for such rewards, which, in addition to their substantiality, are marks of individual mental superiority, and a desire for professional distinction. The services of such valuable officers ought to be utilised in assisting the Admiralty Board, and in addition thereto those who from intellectual advantages have shown their aptitude as disciplinarians, and acquaintance with the "interior economy" of ships-of-war, should be called also to help in the administration of their profession. Executive officers of brilliant capacity and attainments are allowed to rust, and their knowledge lapse, from want of opportunity of displaying their ability, and of being brought in contact with the subjects on which they are well informed. Let the doors of the Admiralty be opened to such men, and instead of one solitary Naval officer being admitted, as at present, as Private Secretary to the Ministerial Lord, let each of his Naval colleagues be allowed to select from the grades below that of flag officer, professional assistants to aid in carrying out duties which are second to none in national importance. In the separate Departments of the Admiralty the same absence of Naval officers is seen. Official wisdom has ordained that the Controller of the Navy shall be a Naval officer, with a seat at the Board; First Lords have oscillated in their opinions as to the necessity for his presence, but it is to be hoped he will always remain. Examining the list of his staff, we find but few Naval officers thereon. We will not refer to the Ordnance Committee, confining ourselves at present to the Constructors and Engineers. With the improved training of Naval Engineers, and the advantages held out to those who qualify for the higher standard of their profession, there are several valuable officers to select from. In the Constructive and Engineering Staff, there should be a larger representation of the latter branch, drawn entirely from the list of Naval Engineers, who, in addition to the superior education afforded them at the Royal Naval College, should possess a sound practical knowledge of their profession. In the constructive section, we consider that the services of high-class Naval architects should be obtained, even at a large cost, and sufficient inducement offered them to remain. The withdrawal lately of a most valuable official of this branch is an instance of the short-sightedness of underpaying superior talent. We must of necessity be far ahead of other nations in the superiority of our Navy, therefore we should ungrudgingly give a high price for the best ability in designing the most efficient type of war-vessel, even if we have to go outside the Naval service to obtain it. The introduction to the Admiralty of a Civil Lord of "special professional qualifications" cannot be too highly commended, and should be followed by additions to the Constructive Staff of gentlemen of similar ability; and we trust that this necessity will become apparent to those, both in and out of Parliament, who hold to practical advantages, in preference to political considerations and leanings. We cannot look entirely to the Royal Dockyards to fill all the posts of the Constructive Department. It must be admitted that many Dockyard officials acquire a superior knowledge of Naval architecture, and if they are able to compete with others in designing the best description of fighting-ships, we maintain that they should be considered for such appointments in preference to private individuals; but from whatever section of the profession selection is made, let the highest standard of qualification be the guide. The subject of Naval Construction and Engineering is of vital importance to the nation, and will, we trust, engage the attention of the Legislature, the members of which will, we know, agree with us that, to ensure the efficiency of the Royal Navy, we must willingly pay for professional skill.

PEOPLE of the present day who are accustomed to the sight of enormous troopships and ponderous vessels-of-war, can scarcely realise the fact that Cæsar's Legions were transported in war-galleys so small that when they invaded the British Isles, they ran their prows into water sufficiently shallow to allow the Roman soldiers to jump overboard and wade but a few yards to land. At a later period, Philip of Spain embarked 32,000 men in the ships composing the celebrated Armada, the largest of which did not exceed 1,200 tons. These were chased by Howard and Drake, Hawkins and Frobisher, in vessels of much less size, armed with little better than pop-guns. Later still, at the battles of the Nile and Trafalgar, and in other actions, wooden three-deckers ranged alongside each other, and ground their sides together with comparative impunity, as far as material damage to the hull was concerned. These facts can scarcely be realised, when the ships of the present day of over 10,000 tons, all heavily armoured, are considered and regarded as the models of vessels for offensive and defensive warfare. With regard, however, to the protection afforded by extreme thickness of metal, it has been clearly proved from time to time that no sooner is a vessel constructed with heavier armour than any of her predecessors, than immediately a more powerful gun appears, which is capable of sending a shot through her sides; and so the gun must, in the end, prove the victor. Nor is it presumed that a shot penetrating an ironclad would cause the same result as when it entered the sides of a wooden ship. In the latter case, an old 24-pounder shot often passed in at one side and out at the other, leaving a hole that might be plugged, and at the most killing or wounding a few, either by direct contact or by splinters; but if a projectile from one of the 80 or 100-ton guns pierced an armour-clad ship, a considerable breach would be made, and the scattered backing and lumps of armour would spread desolation right and left. If such a shot struck the ship on the water-line, there is scarcely a doubt that, instead of a clean hole, the fracture would be of such an extent that, with anything like a sea on, the ship must go down. Thus one well-directed shot may now do more irretrievable damage than the discharge of a whole broadside of the old type against a wooden vessel. Nor is this the only danger of annihilation incurred by monster vessels-of-war. The invention of the torpedo has introduced a means of warfare that, in the hands of a wily and energetic enemy, might carry unavoidable destruction before it. It is true that counteracting means have also been introduced either to intercept or ward off a torpedo, but it remains yet to be seen whether any of these means are effectual when tried in actual warfare; and it should not be forgotten that improvement in the construction and manipulation of torpedoes is constantly taking place. Again, the tactics of a fleet of ironclads in encountering an enemy of equal strength must be very different from what they were in the days of Nelson. Then to play at long-bowls was scorned by the British seaman, and to run his enemy on board was his heart's desire. But now, unless in an attack by boats on a ship at anchor, boarding would almost seem a thing of the past, for the mere impact of two heavy ironclads would probably carry destruction to one, if not to both; and even ramming, although certainly fatal to the vessel struck, might also be equally fatal to the aggressor, if performed at more than a moderate speed. In order, however, to keep the sea against all comers, we must have armoured ships of large size; but it is a question whether, when occasions arise, such as the attack upon forts or fortresses and other inshore work, extraordinarily large and costly vessels should not give place to a more numerous and smaller description of vessel, a fleet that will cost less in the outset, and be less liable to such a loss as was suffered in the destruction of the *Vanguard*, or by the Germans in the loss of the *Grosser Kurfürst*. Such a fleet, consisting of vessels of comparatively small tonnage, built for strength and speed, offering small mark, and carrying but few guns, of the most powerful type, would be a match for any of the largest ironclads, and of equal if not greater value when pitted against a fort; even taking it for granted that some half-a-dozen were sunk, yet one well-aimed shot, or one well executed ram, which must, first or last, happen from the many, would be fatal to the larger ship. The cost of building and maintaining such a fleet could not amount to nearly the sums expended on the immense iron structures now built, and in the event of loss, the casualty would cost but a few thousands, instead of the best part of a million, as at present.

A correspondent, writing from Gibraltar on the 17th inst., says:—"The Channel Squadron left Lisbon on the afternoon of Monday last, the 12th. The following day advantage was taken of fine weather and smooth sea to exercise at steam tactics. On Wednesday morning, a strong breeze from E.S.E. was blowing. As it freshened during the forenoon, it was deemed inexpedient to expend coal in steaming up to Gibraltar against it, so the Squadron stood across towards Cape Spartel, and came to in Jeremias Anchorage in the afternoon. On Thursday the wind having gone down, the Squadron left Jeremias at 8 a.m., and arrived at Gibraltar at 2 p.m., the *Minotaur* and *Sultan* going alongside the Mole, and the others mooring. The *Achilles* parted one of her cables, and had to let go a sheet anchor to moor with. She has, however, since recovered her bower. All the ships have completed with coal, and some boat torpedo work has been done. March is the wet month at Gibraltar, and it is at present keeping up its reputation, as it has been raining nearly the whole time of our stay. Admiral Sullivan left by the homeward bound P. and O. steamer yesterday, to take up his new appointment. Last evening Lady Adye had a reception and a small dance, which was attended by many officers of the Squadron. A start will be made for Madeira to-morrow morning at 6. In the absence of an Admiral as second-in-command, the *Sultan* will lead the second division."

Mr. Eugene Collins will on Tuesday, April 3, ask the Secretary to the Admiralty whether he can hold out the hope that the position of Marine pensioners serving as serjeants on the permanent staff of the Auxiliary Forces, will be favourably considered by him, with the view of removing the inequalities which at present exist between them and Army pensioners, serving in a like capacity, as regards pay and status.

A new feature appears in the Navy Estimates, viz.: —"Vessels *not* shown in programme for 1882-3 and completed during the year," and "Vessels shown in programme for 1882-3 and completed during the year." The authorities have conveniently forgotten that that which we suggest might in future be added, viz.:—Vessels shown in programme for 1882-3, and *not* completed as intended.

The Vote required for the extension of Portsmouth Dockyard this year amounts to £10,000,—the further amount required for completing the work is £74,000. £25,000 appears in the Navy Estimates for the new Seamen's Barracks at Keyham, leaving £65,000, to be voted in future years, to complete the work.

The present Navy Estimates provide for the commencement of two new *Merseys*—of the protected type—three gun-vessels of the *Mariner* class, and a despatch-vessel, to be built by contract. We venture to think that, with an increased charge, a smaller shipbuilding programme has never been presented to Parliament. No ironclad now building is to be finished. The *Collingwood* is to be completed three-fourths, and sent to Portsmouth; the *Impérieuse*, 80-100ths; *Warspite*, 66-100ths; *Rodney*, 47-100ths; *Mersey*, 42-100ths; *Howe*, 27-100ths; *Camperdown*, 16-100ths; *Anson*, 8-100ths; and the *Benbow* advanced to 2,147 tons,—nine ironclads in all, if the *Mersey* is counted as one. Of unarmoured cruisers, the *Amphion* is to be completed 84-100ths, and sent to Devonport; the *Arethusa* will complete after delivery by contractors, the *Leander* and *Phæton* partially so. Of corvettes, the *Calypso* is to complete 96-100ths, and the *Calliope* 50-100ths. One sloop, the *Racer*, is to be launched; the *Pylades* to advance 50-100ths; three gun-vessels and three gunboats are to be completed after delivery by contractors; one gun-vessel, the *Reindeer*, is to be launched. It may thus be seen that no effort is to be made to keep pace with the rapidly-increasing French Fleet, and that if this apathy continues, in a short time we will have become no longer the first, but the second, Naval power in the world.

Mr. Gourley will on Thursday, April 5, ask the Secretary to the Admiralty what portion of the amount (£83,226), in Vote 6 of the Navy Estimates for repairs in Portsmouth Dockyard, appertains to the *Victoria and Albert*, and how much of the further sum of £63,802 is for repairs to other yachts; and how many riggers and other workmen have been employed on board the *Victoria and Albert*, and for what purpose, since she was pronounced unfit for ocean service.

The ships-of-war it is proposed to completely repair in the Home Dockyards during the coming financial year are:—Ironclads, 1—*Bellerophon**; frigates, 1—*Raleigh*; corvettes, 4—*Turquoise**, *Emerald*, *Bacchante*, and *Active**; sloop, 1—*Pelican*; gun-vessels, 1—*Myrmidon*; gunboats, 5—*Forward**, *Express**, *Firebrand*, *Swinger**, and *Sheldrake*; despatch-vessel, *Salamis*; yacht, *Victoria and Albert*. The ships with asterisks were in last year's programme. The following it is proposed to begin repairs on:—Ironclads, 3—*Hercules*, *Iron Duke*, and *Triumph*; sloops, 4—*Cormorant*, *Egina*, *Penguin*, and *Wild Swan*; gun-vessel, *Lily*; troop-ship, *Tamar*. It will be interesting to observe how much of this work is completed in March, 1884. The repairs to the *Shannon* seem to have dropped out altogether, and the *Shah* is to spend another year deteriorating up Portsmouth Harbour.

To promote the enlightenment of Russian seamen, the St. Petersburg Admiralty has made arrangements for giving bi-weekly lectures to them at Cronstadt and Nicolaeff. The first of the series was given at Cronstadt last week, and was attended by 2,000 seamen, who were marched to the lecture-room under the command of their officers. The subjects selected deal with the history of Russia and the growth and exploits of its fleet.

Experiments are being made on the Seine, near Ivry, with a divisible iron boat-carriage, equipped with pack-saddles and draught harness. After taking the carriage to pieces, the various parts and the harness are deposited in the carriage body, which resembles a boat, and is of sufficient buoyancy to carry men and provisions, or articles of trade. Iron being chosen as the material, the novel boat-carriage may be used both in hot and cold climates.

The Russian naval journal, *Morskoe Obozrainie*, or "Marine Review," which was started at Nicolaeff a few months ago, has come to an end, owing to insufficiency of subscribers. During its short career the "Marine Review" manifested considerable talent, and it is greatly regretted that by its disappearance Russia should have lost its only independent service journal. The Cronstadt and Nicolaeff *Vestniks* are both of them official sheets, and as they contain little information beyond the regular gazette and a few local paragraphs, the Russian Navy is without any critical representative whatever. This may be satisfactory, one way, to the Russian Admiralty, which is exposed thereby to no criticism, but, on the other hand, it is recognised that the absence of any technical discussion on the progress of the fleet exercises an injurious effect upon it.

We fancied the ironclads *Edinburgh*, *Colossus*, and *Conqueror* had been launched,—certainly the *Conqueror* was reported to have lately made a most successful trial of her engines at sea; but on pages 204 and 210 of the Navy Estimates these vessels are all classified as building,—no doubt, to give proof of the extraordinary activity of the Admiralty. The real numbers of ironclads building, or about to be built, appears to us not twelve, but eight.

The activity which the Germans are displaying at Kief, in constructing there four docks, capable of containing the largest ironclads in the world, has caused Russia to look to her dockyard at Cronstadt, where no important improvements have been made for some years past. Plans are now being examined at the Admiralty for enlarging the Cronstadt docks, to render them of larger capacity, and the work of extending one of them will be taken in hand the moment the snow melts in the spring.

Malta Dockyard is to have, for the first time, the honour of constructing a ship. Provision is made in the Navy Estimates for a gun-vessel of the *Mariner* class to be laid down there, of which one-tenth is to be built during the next financial year.

Captain C. T. Jago has been promoted to flag-rank, consequent on the death of Rear-Admiral McCrea. This places a Good-Service Pension of £150 a year at the disposal of the Admiralty.

The Admiralty have ordered the repairs being made to the *Victoria and Albert* to be suspended, and it is thought probable that the proposal to spend £55,000 on this yacht having been reconsidered, a new yacht for the use of her Majesty will be constructed.

Major-General Laurie, late Deputy-Adjutant-General of Militia in British Columbia, is announced as the reader of the paper at the United Service Institution on April 6, entitled, "On the Protection of our Naval Base in the North Pacific." It is high time that some ships were stationed to make our position at Vancouver Island safe from attack. Hitherto the dockyard has been guarded by one or more of our men-of-war retained there for the purpose, but this has been rather a costly system, and has been discontinued, and now the shores are entirely without protection. Engineer officers of high standing have from time to time been sent to prepare reports on our position out there, but no steps have been taken to make things more safe. We are now to have the opportunity of hearing from the lips of an officer who has been on the spot, and whose duty it was to make himself acquainted with the country, what, in his opinion, are the steps to be taken to adequately protect our naval depôt, and it is fair to assume that he will also consider whether the Canadian Pacific Railway Terminus and the Nanaimo Coal Mines should be protected. We await with interest General Laurie's views, as a contribution to an important, but little considered question, and we hope the meeting will be well attended, and the matter fully discussed.

Two captive ascents were made in a balloon at the Easter-Monday Review, by Lieutenant B. Baden-Powell, Scots Guards, the rope being held by a detachment of Naval Volunteers; but the wind was so strong that no great height could be obtained. From an elevation of 200 or 300 feet, however, a very good view of the whole battle-field was obtained. On one occasion the wind blew so strongly that about thirty men holding on the rope were dragged over, and the balloon got away. The rope was soon caught again, however, and retained. This experiment is interesting, as showing the rough usage a captive balloon is capable of enduring.

It is really very pleasant to remark the manner in which the French Radical papers, dealing with the military profession, write on the subject of the law of 1834, which was strained and violated in its spirit in order to get rid of the Orleans Princes. Now that the Dukes of Aumale, Chartres, and Alençon have been deprived of their employment by General Thibaudin, acting in contradiction to the Senate, the Radicals declare the law of 1834 to be "an iniquitous, arbitrary, and lying law, which, far from guaranteeing the rights of officers, places them at the absolute discretion of the War Minister." After saying that the Princes are not to be pitied, the Radical writer we quote adds:—"But what concerns us is that this law menaces, in a like manner, every officer in the Army. They are all exposed to see themselves suddenly deprived of their employment, that is to say, of their personal fortune, and to find themselves without any means of existence." Observe what follows. "The Republic, which is, by its essence, a Government of justice and reparation, will make it a point of honour to give to the officers of the Army—not to the Princes, who were officers *de fantaisie*, but to real officers—that guarantee for their rank which they do not possess to-day." Now that General Thibaudin has driven a coach-and-four through this law of 1834, and has misapplied it in order to throw a sop to the Radicals, its infamy is held up to public scorn, and it is denounced as a relic of the Monarchy which must be swept away as soon as possible. It is proposed that not only shall the War Minister no longer have the power of depriving an officer of his employment, which really means dismissing from the service, but that the War Minister shall not be able, on his own authority, to suspend an officer. The writer who makes these remarks mentions a very curious fact, to wit, that the non-commissioned officers enjoy those guarantees, with respect to their rank, which the law does not accord to their superiors. A non-commissioned officer cannot be suspended from employment for more than two months, and he can, under no circumstance, be deprived altogether of his employment. It is probable that this matter will be debated in the French Parliament as soon as it reassembles, and that it will open the door to a good many cutting allusions to that justice which is the essence of the Republic, but which can make use of an iniquitous law in order to further its own ends.

Colonel the Hon. Ralph Kerr, C.B., takes up his appointment as Inspector of Yeomanry Cavalry in the Northern District, vice Colonel the Hon. C. W. Thesiger, from Tuesday next.

The commands of three Regimental Districts become vacant on May 1, viz., those of the 17th (Leicester), vice Colonel C. Blewitt; 22nd (Chester), vice Colonel T. Tyacke; and 101st (Tralee), vice Colonel W. A. Armstrong.

In a book just published in Paris ("Le Camp Retranché de Paris"), the author, M. A. Quillet-Saint-Ange, arrives at the conclusion that, even with its present means of defence, it is possible for an enemy to blockade the French capital, and that the new forts forming the entrenched camp of Paris are not of themselves sufficient protection. In order to secure communication with the country, the author proposes to connect Paris with Havre by an underground railway, defended by two fortified lines running along the banks of the Seine. He supposes the construction of such a line to be practicable, but leaves that point to be decided by engineers. The guarding lines of fortifications are not to present an uninterrupted front, but to consist of thirty-four detached works, so placed as to afford mutual flanking protection and support to each other. Twenty-one of those forts would be on the right, thirteen on the left bank of the Seine. The length of the line of fortifications on the right bank of the river would be 119 miles, that on the left bank 82 miles. The cost of the railway and works combined is estimated at £4,200,000. It is calculated that the protecting forts would require a garrison of 215,000 men.

The following General Officers assume the duties of their commands from to-morrow, viz.:—Major-General J. R. S. Sayer, C.B., transferred from Belfast to the Western District, vice Lieutenant-General Pakenham; Major-General M. Walker, V.C., C.B., a Brigade at Aldershot, vice Major-General J. B. Spurgeon, C.B., C.S.I.; Major-General H. G. Woods, the Belfast District, vice Major-General Sayer, transferred to Devonport; Major-General H.R.H. the Duke of Connaught, a Brigade at Aldershot, vice Major-General H. Rowlands, V.C.; and Major-General H. A. Smyth, R.A., the Woolwich District, vice Lieutenant-General the Hon. E. T. Gage, C.B.

If what we hear be true, the mad project of abolishing the Indian Presidency Armies, for the purpose of consolidating all the commands into one cocked hat, is irrevocably decided upon. The Commands-in-Chief of Madras and Bombay are to be abolished next spring, four Army Corps commands being created instead; one for each of the Presidencies, and one for the Punjab and North-West Provinces. The appointment of a Chief of the Staff at Head-Quarters, with Deputies at the head of the Adjutant-General's Office and Quartermaster-General's Office, in the three Presidencies, is also said to be determined on. Two Brigade commands in Bengal are to be abolished, and when Brigadier-General Sir C. H. Palliser retires, as he is about to do, the vacancy will not be filled up. Generals Hughes and Bright are mentioned for the command of the two Army Corps in Bengal. We do not think that the proposed changes are likely to do any good, beyond effecting a paltry saving in the Estimates. On the other hand, there will be fewer to do work which, if it were to be well done, is already entrusted to too few, rather than to too many hands. If the Adjutant-General and the Quartermaster-General were relieved of much of their present duty as clerks, and were employed in making the Indian Armies what they ought to be—complete and ready to take the field whenever and wherever required—it would be much more to the purpose than making their deputies still harder-driven clerks than they have been heretofore. It is really astonishing that so suicidal a measure as that of the effacing of the distinctions between the three Presidency Armies should have elicited no protest, save that which has been so generally made by the Anglo-Indian Press of all the Presidencies alike; that the Home Press should have looked on unconcerned, though it must be seen that this is but a first step towards the introduction of the Local-Army system for India, and the ultimate reduction of the Army at home and gradual dismemberment of the Empire. O that god Economy, how much mischief is practised in his name!

The large companies so much in favour on the Continent, and which seem to answer their purpose so well, were originated on account of the difficulty of obtaining sufficient officers for a larger number of companies. Would the four-company system not be applicable to our Indian Army, where our battalions have so few officers? If our native battalions were divided into four companies, each company would have its own commander, with native subalterns. An officer commanding one of these large companies would take more interest in his command than under the present system of wing-commanders and wing-subalterns, who have no independent command, but only a sort of supervision. The squadron system in the Native Cavalry seems more rational, where each squadron-commander has his own squadron under his own immediate control.

Herr Krupp is to provide some of his shot and shell for the next experiment at Spezzia. This was to be expected, from the results obtained in the last experiments, when the shot signally failed to represent the enormous power of the Armstrong guns. Krupp's shot are acknowledged to be far superior to any now made. Russian experts, who have carefully examined them, report that the hardening process is excellent. It extends gradually down to the very centre of the projectile. All attempts to imitate them have failed, and the secret is carefully preserved. The sale of these projectiles is being extended now to foreign Powers, but none will be allowed to enter England, the reason given being that pieces would be distributed among English steel manufacturers with an invitation to imitate them. The saying, "England must look to her guns," is not now necessary, but we must take care that these guns be provided with shot inferior to none. This cannot be done in haste, it takes time and careful experiments. The Ordnance Committee are at work, but we doubt if the War Office cares to go to the expenditure so necessary in this important matter.

There is a story in Paris that General Thibaudin wished to promote Colonel Riu, the officer charged with the protection of the Chamber of Deputies, but that it was otherwise decided at a Cabinet Council. We now get into two versions: on one hand, it is asserted that the Cabinet refused the rank of Brigadier, because the Colonel had not seen enough active service; and on the other, that his promotion was vetoed because the gallant officer had had a difficulty with the late M. Gambetta, whose friends are now in office. Some people say that the Colonel at once applied to be sent on active service; others that he has been packed off to Tunis by way of punishment. However this may be, there can be little doubt about Colonel Riu being an officer of considerable energy, and that he will uphold the honour of the cloth. In the year 1878, he was president of a court-martial which assembled in Algeria to try Serjeant-Major Crottet, who, attacked by a native, drew his revolver, and unfortunately shot the wrong person. The serjeant-major was acquitted, but at the same time sharply reprimanded by the president of the court, who terminated his observations as follows:—"Remain calm in presence of aggressors, and return a blow in such a way that your adversary may remain stretched. Never lose sight of the fact that the arm you have the honour to bear would be covered with a layer of shame, unless vigorously and skilfully used against those who insult your uniform. Serjeant-Major Crottet, never forget that you missed the guilty party; you bungled. Go, therefore, to target-practice, and remember that the revolver ought to be fired at close quarters." It is clear that the natives in Tunis, and the Italians in that Protectorate, will do well, on the arrival of Colonel Riu, to respect French sentries. Colonel Riu has been replaced at the Palais Bourbon by Colonel Macé, who has, in all probability, fallen on what will turn out to be unpleasant lines.

The following Staff Paymasters and Paymaster serving under former Warrants will attain the age of sixty years during the financial year ending March 31, 1884, and consequently be liable to be compulsorily retired on the following dates:—Paymaster (Hon. Major) J. W. M'Farlan, July 16, 1883; Staff Paymaster (Hon. Major) H. Burke, August 4, 1883; Staff Paymaster (Hon. Major) T. Timbrell, December 25, 1883; Staff Paymaster (Hon. Major) J. E. Large, January 21, 1884; Staff Paymaster (Hon. Major) J. Mahony, C.M.G., March 16, 1884; Staff Paymaster (Hon. Major) J. Campbell, March 22, 1884; Staff Paymaster (Hon. Major) A. Baird, March 24, 1884.

Among other things, the French Radicals want to disband the Regular Army, to arm all citizens, to re-establish the National Guard, and to demolish the enceinte round Paris, and use the site for building salubrious dwellings for the working-classes. The gentlemen in office are not likely to listen to these insane ideas, and yet, before the Franco-German War, the present Prime Minister belonged to a party which was stoutly opposed to standing armies, which considered the National Guard quite capable of giving an account of any foreign force, which cut down the military estimates, and which hampered Marshal Niel in his attempt to create a reserve. However, M. Jules Ferry in office in 1883 is a very different person from M. Jules Ferry in opposition in 1870. It is true that the lesson by which he has profited has been a severe one for the country. This does not prevent the Radicals from recommencing the old game, at the risk of bringing about the further dismemberment of France.

Excluding Bavaria, there are 304 garrison towns in Germany. According to the *Allgemeine Militär-Zeitung*, only Berlin has a garrison of over 15,000 men (17,813). Next follow Metz, with 14,441 men; Strassburg, with 8,968; Mainz, with 7,712; Cologne, with 7,655 men. Over 6,000 men are garrisoned in Potsdam, Coblenz, Königsberg, and Magdeburg; over 5,000 in Danzig, Hanover, and Posen. There are six garrisons of over 4,000, six with over 3,000, 15 with over 2,000 men. Altogether, there are in Germany, excluding Bavaria, 39 large garrison towns.

We hear that the organisation of the Austrian Railway and Telegraph Regiment will be taken in hand shortly, the appointment of Lieutenant-Colonel H. von Schlayer, of the General Staff, to the command of the corps, although not yet officially announced, being an open secret. Colonel Schlayer is an eminent Engineer officer, and is stated to be the right man in the right place, a condition of things which does not generally prevail.

The French War Minister has already issued his programme for the Autumn Manœuvres, and in consequence the various Commanders of Army Corps will have plenty of time for preparing to take the field. Six Army Corps—the 5th (Orleans), the 6th (Chalons), the 7th (Besançon), the 8th (Bourges), the 9th (Tours), and the 13th (with its head-quarters at Clermont-Ferraud)—will be out for 21 days, comprising the time necessary for concentration and dislocation. The 7th and 8th Corps are to operate against each other. Six other Army Corps—the 4th, 10th, 11th, 12th, 17th, and 18th—will execute divisional manœuvres, and the remaining six corps will manœuvre by brigade for a fortnight. The 6th and 7th Divisions of Infantry, which are in garrison in Paris, are not to take part in the manœuvres, it being, no doubt, considered that their presence is absolutely necessary in the capital for the purpose of maintaining tranquillity. The Cavalry Manœuvres, inaugurated three years ago, under the supreme direction of the Marquis de Galliffet, are, according to the French military papers, to receive a new extension. Two divisions will assemble at the camp at Chalons, and manœuvre from August 1 to 10, when they will be replaced by two more divisions, which will manœuvre from the 13th to the 22nd of the same month. Two other cavalry divisions will take the field in the neighbourhood of Chartres, between August 25 and September 3. In addition to this, the Cavalry will furnish detachments to act with the Infantry divisions, which will also be supplied with the regulation force of Artillery. It is said that the Infantry companies, which will be swelled by the Reserve, are not to exceed 180 men, and the squadrons, 100 sabres. On a war establishment, the French company is some 250 strong, but we much doubt whether many will come up to 180. Last year the Cavalry Manœuvres were surrounded with a vast amount of mystery, and no foreign officers were allowed to be present. Evil tongues attributed this to the fact that the squadrons were absurdly weak, that the force had been disorganised, and that it was deemed impolitic to reveal the nakedness of the country. We cannot say whether the same stringent orders will be issued for this year.

A French journal quotes some pages from a work entitled, "Episodes de la Guerre de 1870, et Blocus de Metz," due to the pen of the ex-Marshal Bazaine, who seems to be still residing in Madrid. Nor is this to be wondered at. In his youth, he obtained permission to fight in the ranks of the Spanish Army against the Carlists; he always retained the friendship of Queen Isabella, who wrote to him a letter of condolence the day after the ex-Marshal was sentenced to death by the court-martial which sat at the Trianon, under the presidency of the Duc d'Aumale. M. Bazaine married a Spanish lady, who aided him to escape from St. Marguerite. It is almost needless to say that his commentaries are dedicated to Queen Isabella. In the few pages before us, we find the author saying that Napoleon III. took a proper view of the situation, when, after the first defeats of August, he gave orders for the retreat of the army on Verdun, behind the line of defence of the Soufel. But this movement was interfered with too roughly by the Germans. The French corps had not time to retire, but were driven back in defeat. MacMahon should not have given battle at Froeschwiller under circumstances so unfavourable, as regards both position and numbers; but if we are not mistaken, MacMahon counted upon the co-operation of General de Failly, who might have rendered him assistance. Then, according to the author, the defences of the east had been sadly neglected. "Lorraine and Alsace," he says, "are regular military provinces, where the patriotism which reigned, and the nature of the soil, seemed to offer the best chance of establishing a national resistance. A system of defence should, therefore, have been created in advance to which the courage of the inhabitants would have given a hundredfold greater value in the hour of danger." Bazaine, remarking on the painful sensation created by the gallant hero of Malakoff and of Magenta, says:—"False patriots took advantage of it to seize upon power by leading the nation astray, and dragging it into a resistance disastrous for the country, but which was to serve them as a pedestal. Wars *à outrance* do not belong to our epoch, for they produce consequences so terrible that, in the interests of humanity, one should desire never to see them." Bazaine writes very strongly upon this point, observing, among other things, that the real motive for the war was known neither to the nation nor to the Army, and that the affair should have been settled by diplomacy. This work is said to contain several interesting lithographs, such as a letter which the Marshal wrote to the Empress Eugénie in September, 1870, asking her to repair to Metz, and place herself at the head of the troops.

General Delebecque has been appointed to the command of the 5th Army Corps, vice General Gresley, whose term of service has expired. General Lewal, the talented military writer, is appointed to the command of the 17th Army Corps.

ENGLAND'S NAVAL SUPREMACY.

The following table shows the number and tonnage of ironclad vessels launched each year in England and France since the introduction of armour-plates (the floating batteries built during the Crimean War not included):—

ENGLAND.			FRANCE.		
Year.	Ironclads Launched.	Tons Launched.	Year.	Ironclads Launched.	Tons Launched.
1859	...	...	1859	1	5,618
1860	1	9,106	1860	2	11,160
1861	3	21,309	1861	3	19,554
1862	4	26,633	1862	...	...
1863	6	30,592	1863	3	14,149
1864	8	35,512	1864	9	40,160
1865	6	42,085	1865	5	22,350
1866	2	11,863	1866	3	5,334
1867	1	4,392	1867	5	15,535
1868	3	23,189	1868	5	21,790
1869	3	19,858	1869	1	7,477
1870	6	37,348	1870	2	11,362
1871	5	24,680	1871	1	3,600
1872	3	18,250	1872	2	8,087
1873	...	...	1873	2	17,240
1874	1	9,310	1874	...	...
1875	3	29,488	1875	3	18,390
1876	6	45,940	1876	2	12,984
1877	...	...	1877	2	10,420
1878	1	4,870	1878	1	4,524
1879	1	8,510	1879	3	26,008
1880	1	8,510	1880	2	10,405
1881	2	8,640	1881	2	14,368
1882	3	27,450	1882	3	26,955
Building	8	67,530	Building	23	104,552

From the foregoing tabular statement of the ironclad tonnage launched each year in England and France since 1859, it will be observed that the increase of the British Navy since the year 1876 is certainly not calculated to "excite the alarm of other nations," as the Parliamentary Secretary of the Admiralty seems to fear might be the case, did the Admiralty really study the interests of the British Empire when compiling their shipbuilding programme, instead of the interests of the political party that happens to be in power for the time being. This is all the more apparent if we study the number and tons of ironclads launched in England, France, Italy, and Germany since 1876, when we find that there have been launched, in

Germany,	12 ironclads,	of	38,480 tons
Italy	4	„	48,556 „
England	8	„	57,980 „
France	13	„	92,780 „

This is a serious matter, which is rendered all the more grave when we come to study the following table, which compares the armour-clad tonnage ordered to be built by Parliament in her Majesty's Dockyards during the last 10 years, with that shown by the Navy Estimates as having actually been built. The figures represent tonnage "weight" of hulls, excluding engines, boilers, and other dead-weight comprised in the tonnage of "displacement." The nett deficiency during this period was 15,160 tons, or equivalent to three first-class armour-clad ships:—

	Tonnage.			
Year.	Estimated and ordered by Parliament.	Actually Built.	Deficiency.	Excess.
1873-4	7,606	5,093	2,513	...
1874-5	8,253	8,537	...	284
1875-6	10,359	10,091	268	...
1876-7	8,037	7,547	490	...
1877-8	8,621	4,855	3,766	...
1878-9	9,831	4,506	5,325	...
1879-80	6,793	5,314	1,479	...
1880-1	7,139	7,833	...	694
1881-2	10,816	9,802	1,014	...
1882-3	11,016	9,733	1,283	...
Totals	88,471	73,307	16,138	978

Nett deficiency ....15,160 tons.

The above figures do not include work estimated for and done to the ships which were purchased in 1878 under the vote of credit. But, according to this return, we find that a deficiency of 15,160 tons exists. That is to say, although the money has been voted and spent, the 15,160 tons of ironclads which should have been built with that money have not been constructed, yet the money has been spent. How? The *Morning Post*, in an able article on this subject, remarks that,—"An aggregate deficiency of so marked a character as that shown must have an important bearing upon the present unsatisfactory condition of our Ironclad Fleet, and the three first-class ironclads to which, in fact, this deficiency practically amounts, would, if they existed, be an invaluable adjunct to our Fleet just at the present moment. Although at times a departure from the programme of shipbuilding as voted by Parliament might, under certain conditions, be permissible, it becomes a serious matter when, as seems now to be the case, no after-efforts are made to recover the ground so lost; but, on the contrary, that the programme is habitually broken through, and, moreover, that, as a rule, the Admiralty authorities have altogether failed, even without any disturbing circumstance, to carry out the extent of shipbuilding suggested by themselves and sanctioned by Parliament. It is but natural that these serious departures from all official guarantee, upon the good-faith of which the Estimates have often been permitted to pass the House of Commons without any discussion at all, should cause grave anxiety and even doubt with the public as to the *bona fides* of the Government in all their recent expositions of Naval matters. We might inquire—What has become of the funds (both for labour and materials) which, voted by Parliament during past years for the express purpose of shipbuilding, have not been so utilised? We do not find that any attempt has been made to carry forward such surplus moneys on the ship votes of the one year to the credit of the next; on the contrary, the sums voted appear to have been expended to the uttermost penny, quite irrespective of the fact as to whether the authorised shipbuilding programme may have been carried out, or not. This is a most important feature of the case, because although there is a deficiency of fifteen thousand tons nominal of ironclad shipbuilding, which, to follow the method by which tonnage is reckoned in the Navy Estimates, practically amounts to three first-class ironclads, not a farthing of the sums voted for the building of this amount of tonnage is now available. In other words, the money which this represents—no less a sum, computed for labour, materials, engines, &c., than a million and a half pounds sterling—must have been diverted from its authorised channel, and devoted to objects foreign to the purpose for which it was originally intended." A grave charge is thus brought against the Admiralty, which should most assuredly be inquired into by Parliament, and it is to be hoped that the Earl of Belmore will succeed in inducing the Legislature to thoroughly investigate the manner in which the Navy has been in times past and is at present being administered by the Admiralty.

THE COMMISSARIAT & TRANSPORT DEPARTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Now that the above branch of our service is about to be thoroughly reorganised, it is to be hoped it will be placed on a sound basis, for at present it is extremely faulty. To officer it entirely from the combatant branch, some steps must be taken to ensure a flow of promotion for those officers selected. At present there is no prospect of their ever attaining a higher grade, as they will be compelled to retire (owing to age and service) several years before their seniors of the non-combatant branch, who are, in most cases, junior as regards age and service, the only recompense being that the regimental officers are to receive a slightly higher rate of pay after three years' service in the Department, than their seniors of the same grade. For the benefit of the service this should be remedied without delay, as the senior grades and junior are affected simultaneously by age and length of service, thus burning the candle, as it were, at both ends, and leaving this branch of the service denuded of officers. I would suggest a separate list being formed, a proportion of steps being given in each grade to the combatant and non-combatant officers, unless the latter are induced to retire by offers of good retiring allowances. The combination of the duties of this Department are far too complicated at present, and should be separated. They are —(1) transport, (2) supply, (3) barrack, and (4) questions on finance. 1. Transport should be composed entirely of Military men, and belong to the Quartermaster-General's Department. 2. Supply should be part of the Transport, and a branch capable of easy expansion in the event of war. To do this, each regiment in peace time should have a certain complement of men utilised as drivers, bakers, and butchers, &c., these to be massed together when their respective regiments were brigaded; thus, each brigade, when about to take the field, would have, as it were, a trained "Supply Corps." 3. Barracks should be handed over to the Ordnance Department, stores to be issued by them direct to regiments, instead of, as at present, through the Commissariat. This increases clerical labour and expense, and is practically useless. 4. Questions on finance is surely an Army Pay Department duty, and when questions arise of a complicated nature, they should be dealt with direct by their own officers, and not submitted through the Commissariat. The latter is now nothing more than a range-finder for exploded Army Circulars and Royal Warrants, to give authority to pay.—

I am, &c.,

Remodel.

Under instructions from the Horse Guards, a permanent committee, composed as follows, has been appointed to consider and report upon such questions as may be laid before it in connection with the dress, equipment, &c., of the Army:—President, Col. Harrison, C.B., Assist.-Qrmr.-Gen. Members, Col. Vincent, 3rd Hussars; Lieut.-Col. Luck, 15th Hussars; Lieut.-Col. Hale, 1st Scottish Rifles; Col. Stevenson, C.B., 1st Royal Irish Fusiliers; Lieut.-Col. Magenis, Royal Artillery; Lieut.-Col. Jones, Royal Engineers; Assist.-Comy.-Gen. Reeves, C.B., Commissariat and Transport Corps; and Deputy-Assist.-Comy.-Gen. Jeans, Ordnance Store Department.

Information from Cairo states that on the 19th inst. the Khedive inspected the batteries of Artillery which have been organised by Lieut.-Col. F. Duncan, R.A., and expressed his great satisfaction at the wonderful progress made in a few weeks. English officers present spoke highly of the way in which the men did their drills.

The following is the complete return furnished by Surg.-Gen. J. Irvine, the principal medical officer of the Army of Occupation in Egypt, of the Cairo hospital returns for the four months ended the 28th ult.:—November, 1882, entries into hospital, 1,956; deaths, 55. December, entries, 1,407; deaths, 20. January, 1883, entries, 1,023; deaths, 17. February, entries, 586; deaths, 6. Although a large number of troops have left Egypt this month, it is probable that the full return for March will be of a slightly more unfavourable character, as the hot season has now set in.

The Agamemnon is ordered to proceed to Devonport, there to be employed as a drill ship.

The Army.

1st Life Guards. The regiment leaves Hyde Park Barracks on Wednesday next for Windsor.

2nd Life Guards. The regiment leaves the Spital Barracks for the Regent's Park on Wednesday, and it is announced that there will be a "farewell service" on Sunday at Holy Trinity Church, Windsor, on which occasion the sermon will be preached by the Rev. Arthur Robins, and preparations are being made to accommodate an enormous congregation. "The Soldier's Hymn," which is dedicated to the Prince of Wales, the words of which are by the Rev. Arthur Robins, will be a special feature of the service.

Royal Horse Guards (Blue). The regiment will move on Wednesday next from Hyde Park to Regent's Park Barracks.

6th Dragoon Guards (Carabiniers). Col. J. Fryer, C.B., on the Half-Pay List, has been appointed to the command of the 17th Regimental District (Leicester). He commanded the Carabiniers throughout the Afghan War of 1879-80, and on Jan. 13 of the latter year commanded a force of Royal Horse Artillery and Cavalry, and after a desperate engagement repulsed with heavy loss a large body of Momunds at Ali Boghan. He also served with distinction in most of the other engagements of the campaign.

7th Dragoon Guards. Col. Bell Martin, formerly commanding the regiment, and lately commanding the Royal Cork City Artillery Militia, was killed on Friday week at Bishopstoke Station, on the London and South-Western Railway. On the arrival of the train, the Colonel alighted and went to the refreshment-room. Before he returned, his train began to start, and the Colonel, in his hurry to catch it, ran against a pillar and fell, his hand being caught between the footboard of the carriage and the platform. He was dragged along some distance, and was pulled under the train and killed instantly. Deceased entered the Army Aug. 27, 1852, and served with the 9th Lancers in the Mutiny Campaign (four times mentioned in despatches, and medal).

5th Lancers. Major Harvey completes his five years as adjt. of the Royal First Devon Yeomanry on the 20th prox.

9th Lancers. Capt. Fife completes his five years as adjt. of the North Somerset Yeomanry on the 17th prox.

ROYAL ARTILLERY.

Col. Duncan, Egyptian Artillery, after one or two rehearsals, had an inspection of his men lately at Ghizeh, which was attended by the Khedive, &c., and was pronounced to be a marvellous success. The Khedive at the close called Col. Duncan, Col. Wodehouse, and officers, and expressed his great satisfaction at the progress made by the recruits.

ROYAL ENGINEERS.

The Duke of Cambridge has appointed Capt. P. Cardew to be instructor in telegraphy at the School of Military Engineering, Chatham, in succession to Major R. Y. Armstrong, who has been selected by the Board of Trade to superintend the carrying-out of the provisions of the Electric-Lighting Act, 1882.

Major-Gen. H. Drummond died on Wednesday at his residence, near Bedford. The gallant officer had served in the Sutlej campaign of 1845-46; also served in the Burmese War of 1852-53, for which he received the medal with clasp for Pegu. He was principal Field Engineer with Sir John Jones's column in the Rohilcund campaign of 1858, and for his services in that campaign was promoted to major, and had his name honourably mentioned in despatches. For some time he was officiating Deputy Secretary to the Government of India in the D.P.W. Railway branch, and was in charge of the Northern Bengal Railway Survey at Simla.

Coldstream Guards. The Secretary of State for War has approved of Lieut. Corbet being appointed A.D.C. to Major-Gen. the Hon. R. Monck, commanding the troops at Chatham. The 1st Batn. has moved from the Tower of London to St. George's Barracks.

6th Royal Warwickshire Regiment. Col. Colthurst completes his five years in command of the 1st Batn. on Tuesday next, when he will be placed on half-pay.

12th Suffolk Regiment. Capt. Kennedy, 2nd Batn., has been noted for appointment as an Adjt. in the Auxiliary Forces.

21st Royal Scots Fusiliers. The following is the farewell address of Col. Gildea to the 2nd Batn.:—"Comrades, the time has come when I must say good-bye to you. I cannot find words to express how much I feel having to leave you. We have been associated for many years, in times of joy and times of sorrow, and I hoped, had my health allowed of it, to have soldiered with you as long as the regulations of the service permitted it. I shall always look back with pride to the time I had the honour of commanding you, and with feelings of admiration for the way you behaved during the severe trial of a war such as the Transvaal War was—where you fought unseen and unheard of, bearing privations and hardships seldom equalled, without a murmur—the knowledge that you nobly did your duty to our Queen, and upheld the honour of the flag under which we serve, that, as yet, has been your only reward. In going to the 1st Batn., I shall not quite lose touch of you; I only hope it will tend to draw the two Batns. more together, and strengthen the brotherly feeling that ought to exist between all who have ever served under the colours of the Royal Scots Fusiliers. Remember my services to help you are at your disposal, the same as if I was still your colonel; publicly or privately, it will be my greatest pleasure to do what little I can for you collectively or individually. I pray of you to continue in the path of duty I have always endeavoured to lead you; by a strict performance of all duties, by good conduct, obedience to orders, good comradeship, one with another, and, by fostering the fact that your regt. is second to none in her Majesty's service, you will be able to keep it in that proud position. Remember that no colonel can make a regiment a happy or a smart one, unless all ranks individually lend their aid; this you have always given to me, and I thank each one of you for it. I trust you will continue to give the same support to my successors.—(Signed), Fred. Gildea, Colonel, Royal Scots Fusiliers, Tullichewan Castle, Dumbartonshire, Nov. 11, 1882."

42nd, The Black Watch (Royal Highlanders). The latest presentation of medals at Cairo was to the Black Watch, the venerated "Forty-twa," now a rapidly vanishing quantity in print, but a number that in memory will long outlive the destructive efforts of those who are wont to obliterate local character, associations, and battalion *esprit de corps*. The presentation took place on the 2nd inst. Sir Archibald Alison, but for a fever, would have given them away. His reply was:—"There is no regiment in the Army to which I would present medals with such sincere pleasure as the Black Watch. In two campaigns they have been in my command, and I have been with them in three actions, and am sorry," &c. In his absence, the colonel presented the medals. The fortunate recipients may well be proud of this recognition of their services. Storming, as the Highlanders did, an entrenchment of considerable magnitude—not a mere shelter-trench, as on the extreme right of the attack—under the fire of some 3,000 rifles, advancing apparently into the very jaws of death, as they were unaware that the fire of the enemy would be so atrocious, then forming for a second supreme effort on a second line, was a deed reflecting the greatest credit on the regiment. In effecting this, it lost three officers and the serjeant-major dead, and five wounded. Amidst the honours that were showered broadcast in this campaign, it seems striking and inexplicable that the gallant colonel of the Black Watch should be omitted. He served in the Crimea, the Indian Mutiny, Ashantee, was second-in-command at Tel-el-Kebir, and has never yet received any special reward for his services, although he was twice mentioned in despatches. The legitimate conclusion to arrive at is that honours, like kisses, go by favour.

ROYAL MARINES.

The officers and men of the Forton Division of the Royal Marines have attended a special service in the parish church of Alverstoke, near Portsmouth, when was unveiled a brass lectern, which has been placed there by Mrs. Strong and the officers of the Royal Marine Light Infantry, to the memory of Major H. H. Strong, of that corps, who fell while gallantly leading his division at Tel-el-Kebir.

58th Northamptonshire Regiment. Pending the approval of H.R.H. the Field-Marshal Commanding-in-Chief, Capt. Phillips will be attached to the Royal Engineer Signalling Class at Aldershot, prior to his proceeding to South Africa to join the service companies of his corps.

63rd Manchester Regiment. The regiment has been moved from Warley to the Tower of London.

74th Highland Light Infantry. Col. Jago completes his five years in command of the regt., and will be placed on half-pay from Tuesday next. Brevet Major Macdonld has been appointed Military Attaché at Cairo.

75th Gordon Highlanders. The officers gave a ball at the Citadel, Cairo, on Friday, March 16, which was not attended with the success it deserved. Either the invited did not come, or the invitations were not issued with a view to filling the ball-room, and the result was that there was a bare look about the entertainment, to which the bad lighting of the rooms may have contributed. It was interesting, at any rate, to find the Highlanders "at home" in the saloon which Egyptian guests remembered as the favourite working room of old Mehemet Ali, when he was doing "Araby" against the Sultan. The general health of the Gordons is much improved.

82nd South Lancashire Regiment. Col. Walters' five years in command expired on Tuesday, and at a full parade the Colonel made a farewell address. He thanked the men for their good conduct, smartness, soldierlike bearing, and *esprit de corps*, and said that the fact that more than 2,000 men, including the reserves, had passed through the hands of the regimental instructors, in addition to the strength of the regiment during these years, showed that their work must have been no sinecure. It was very gratifying to find that the signallers of the battalion were at the head of the British Army in point of merit; and he was also pleased to learn that a temperance society had been formed in the regiment. Subsequently the officers of the regiment entertained Col. Walters at dinner.

89th Royal Irish Fusiliers. A correspondent writes:—"The regiment seems just now to be having a run of ill-luck. Arrived in India in October, 1870, three out of the first five years of Indian service were spent in moist and unhealthy coast stations in the Madras Presidency. They were then sent over to Burmah, and were condemned to five years' penal servitude in one of the worst climates of India, losing in the meantime all chance of seeing any of the active service going on in Afghanistan. As a sop to the regiment having been kept in Burmah two years beyond the time usually allotted, they were sent to their present quarters at Belgaum, in the Bombay Presidency, there, as they supposed, to have one year of a good climate before they went home. But towards the end of 1880 came rumours, too speedily confirmed, that the regiment was to remain another two years abroad. This was bad enough, but the unkindest cut remained behind. Just as everyone was congratulating himself that the last year of Indian service was drawing to a close, came the overwhelming tidings that yet another year was to be spent at Aden, the most unpopular station of any garrisoned by the British Army. In this case, I think that the Government has practically committed a distinct breach of trust. Regiments who went abroad under the old rules of 12 years' service should not be compelled to remain abroad beyond that time. It is all very well to say that no man or officer will in future be obliged to spend more than eight years at a time abroad. I should like to know how a rule of that sort comes in here. Are all the senior officers and non-commissioned officers of the 2nd Batn. Royal Irish Fusiliers, to be sent home at once with all men over eight years' service? I imagine not. Then, for goodness' sake let there be an end to this cruel procrastination which is fast turning honest soldiers into soured and discontented men, disinclined to do anything more than they can help for a master who shows them so little consideration."

94th Connaught Rangers. A sad event took place at Fermoy on Saturday last, the 24th inst., in the death of Mr. John Sherlock, after a comparatively short illness. Since the return of the battalion from Africa in April last, Mr. Sherlock had filled the appointment of canteen steward, having left the Corps of Commissionaires in London for that purpose. He was interred with military honours in the cemetery at Fermoy on the 26th inst., his funeral being attended by the whole of the officers, non-commissioned officers, and men forming the head-quarters; also the majority of the non-commissioned officers of the 2nd Batn. 25th. The following Regimental Orders by Lieut.-Col. J. Browne commanding was issued on the 25th inst.:—"The Lieut.-Col. commanding regrets to have to announce the death of Canteen Steward Mr. John Sherlock, late serjeant-major of the 94th Regt. He was born in the regiment, and remained with it almost continuously for 45 years. The Lieut.-Col., while regretting his loss, wishes to express the high opinion he entertains of the late Serjt.-Major Sherlock, and to draw attention to the exemplary conduct and valuable services rendered by him, which obtained for him the greatest respect from all with whom he served."

97th Queen's Own (Royal West Kent Regiment). Bandmaster M'Laughlin died in the Royal Infirmary, Dublin, on the 19th inst.

98th North Staffordshire Regiment. Capt. J. B. Carey, whose name attained such notoriety a few years ago in connection with the death of the Prince Imperial in Zululand, died recently at Kurrachee in his thirty-sixth year. The deceased officer was the son of the Rev. A. F. Carey, vicar of Brixham, and was born in 1847. His first commission in the Army was that of ensign in the 3rd West India Regt., to which he was gazetted in 1865, and three years later he attained his lieutenancy in that corps. In 1867 he served with his regiment in the expedition into Yucatan in Central America, on which occasion he was brought to notice in the despatches. In 1870, he was placed on half-pay, and in the following year was posted to the 81st Foot, being in 1873 transferred to the 98th Foot. From 1873 to 1875, he was garrison adjt. at Jamaica, and on his return home he entered the Staff College, Sandhurst, where he passed the final examination in 1878. In 1879, he was selected for special service in connection with the Zulu campaign in South Africa, being nominated a D.A.Q.G. On his passage to South Africa, he was wrecked in the transport Clyde, and his services on that occasion were mentioned in despatches. In 1879, Capt. Carey accompanied the Prince Imperial on the reconnaissance which proved fatal to the latter, and the conduct of the former on that occasion underwent the scrutiny of a court-martial, the result of which was that his sword was returned to him. Capt. Carey, who attained that rank in 1879, accompanied his regiment to India in 1880.

Commissariat and Transport Staff. "Economy" writes:—"Now that this branch of the service is to consist of military men entirely, recruited from the Regular Forces, would it not be economy to have officers and men clothed in scarlet? It is hoped that the authorities at the War Office will see the desirability of saving officers on joining from providing themselves with the present blue tunic, belts, &c., which cost at least £50, when their regimental uniformis sufficiently good and as endurable. The red kersey provided for infantry soldiers is quite as endurable as the blue now issued to the Commissariat."

Pay Department. An exchange has been sanctioned between Majors G. W. Rippon and W. S. Morburn, the former proceeding to Gibraltar as district paymaster, and the latter to the 29th Regimental District at Worcester.

The Auxiliary Forces.

MILITIA.

Royal Dublin Fusiliers. Capt. Franks has been appointed Instructor of Musketry to the 4th Batn.

YEOMANRY CAVALRY.

Middlesex. A squadron of this regiment was employed during the late Volunteer Campaign, mainly composed of the A Troop. It furnished orderlies to Col. Methuen's columns during the march from London. These were composed of troopers from the B Troop, under the command of Capt. Bickersteth, and were employed in keeping up the lateral communications of the several columns on the march. This duty was so well performed, that Col. Methuen spoke in the highest terms of these troopers. On Saturday, the squadron paraded in field-day order at 5.30 a.m., at Brighton, under the Adjutant and Lieut. Lambert, and proceeded by special train to Hayward's Heath, where, unboxing their horses, they had a short halt. Parading again at 8.30, they were joined by Capt. Bickersteth, who took over command, and were accompanied by Major Herbert, Staff officer, and started to reconnoitre the country along the left flank to the front, some distance in front of the infantry columns, marching in service advanced-guard formation, *viâ* Wivelsfield and Ditchling, to the Downs. On reaching Ditchling Common, the advanced parties, with their carbines drawn, spread out like a fan, and on coming to enclosed country again (as it was in close proximity to the Downs, where the enemy was expected), the flankers did not close in, but rode across country, without even returning their carbines, and taking fence after fence, keeping up with the whole party, which was moving at a trot. After halting to examine the village of Ditchling, the Yeomanry pushed on up a steep bostle to the top of the Downs, reporting on all they saw of the enemy coming into position, then sweeping round to the right, came on to a half-battalion in their rear, before they could observe them. Having finished the reconnaissance, they fell back on Wostemsbury Hill, and awaited the arrival of the Honorable Artillery Company's guns, to which they acted as escort during the engagement that day. The fight over, the squadron formed the vanguard of Col. Methuen's Division, marching into Brighton, and formed up in the King's Road in front of the Grand Hotel, where the Head-quarters of the Army Corps was established, arriving at six p.m., having been 12 hours in the saddle. In the evening, Major Tritton gave a smoking concert at the Yeomanry Club in the Drill Hall, Middle Street, where the Brighton detachment have their head-quarters, to which all the Staff and many others were invited. On Sunday the squadron paraded, under the command of Major Tritton, in the drill hall, and, headed by their band, marched to the parish church. On Easter Monday, the squadron paraded in review order in front of the Grand Hotel, and formed an escort to Prince Edward of Saxe-Weimar, who first inspected them, complimenting them on their turn-out. Marching on to the race-course, they were then told off to keep the ground during the march-past of the Volunteer Corps. The march-past over, H.R.H. the Duke of Cambridge ordered the squadron to form up. This being done, he then inspected them, and complimented them on their smart appearance. The Yeomanry were then ordered to join General Newdigate's force during the sham fight, and were very useful in sending in reports of the movements of the enemy as soon as the line of demarkation was allowed to be crossed, at gunfire. Later on in the day, they were ordered to charge a battalion of the enemy encroaching too near, and which they did successfully. Considering the Yeomanry horses have not been on parade for drill purposes since last training in August, it is wonderful how any attempt at a line can be formed. The officers on duty with the squadron were Capt. Bickersteth, in command (Major Tritton being incapacitated for mounted duties), Lieuts. Lambert and Sassoon, and the Adjt., Major Kenyon-Stow. On Tuesday the troopers shot for prizes at the Sheepscote Valley ranges, and at 4 p.m. the London members paraded and marched to the station, where they boxed their horses, and returned to town by special train.

THE VOLUNTEERS.

London Rifle Brigade. The Brigade, under command of Lieut.-Col. Lord Edward Pelham Clinton, with Lieut.-Col. Adrian Hope as second-in-command, proceeded by special train to Havant on Thursday evening, the 22nd inst., and marched to Fort Purbrook, which they continued to occupy until Tuesday morning. The total strength of the brigade was 450 of all ranks. On Good Friday there was a drill before breakfast, another at half-past 10, and a third at 2 o'clock. On Saturday there was an early serjeant-major's drill, followed by a battalion drill; and on Sunday morning, the regiment attended divine service at Christ Church, Portsdown Hill, and in the afternoon the band played from 2 to 4 o'clock. On Monday the regiment was inspected by Col. Tuson, C.B., R.M.A. Col. Tuson, at the close of the inspection, expressed his extreme satisfaction at the appearance of the men. He remarked that of late he had seen several Volunteer Corps drilling, and in his opinion their drill was quite as good as that of several of the Regulars. After the inspection there was another drill, when Lord E. Pelham Clinton said he felt that he could conscientiously echo the words of Col. Tuson. In the afternoon a detachment returned to London, but the head-quarters left on Tuesday morning, when *réveille* was sounded at half-past 3, and, after breakfast, the regiment marched to Havant, and left by special train at half-past 5 for London Bridge.

Col. R. Low, C.B., head of the Indian Transport Service, has just drawn up a scheme for a field ambulance corps for the Madras Army, which would enable a division of 5,000 men to go on active service at short notice. There is every probability that the scheme, which has been approved by Sir Frederick Roberts, will be immediately carried into effect.

Major-Gen. Burnaby, M.P., has been confined to his room at his country seat, Baggrave Hall, Leicestershire, by a serious illness.

Under instructions from the Secretary of State for India, it is notified that the regimental savings bank balances of officers promoted from the ranks may be remitted to England at the rate of 2s. 0½d. the rupee on their transfer, whenever it may take place, from the Indian to the British establishment. So long as they are serving in India, any sums withdrawn from their savings bank balances must be withdrawn in India and in Indian currency.

The Punjab, as a recruiting ground, has been absolutely closed to the Bombay Army for the present. If this restriction is to be permanent, it is much to be regretted, because the Sikhs form a most useful and soldierly element in the Bombay Army. If it is merely temporary, as we imagine to be the case, it will do good by obliging commanding officers to enlist Mahrattas, who ought to form the majority in every Bombay regiment, and whose good fighting qualities ought to be too well known in this Presidency to necessitate reminder.

Dr. de Jongh's Light-Brown Cod Liver Oil.—Its Unequalled Efficacy in General Debility and Emaciation.—In cases of debility and emaciation, the powerful curative influence of Dr. de Jongh's Light-Brown Cod Liver Oil is graphically described by Sir Henry Marsh, Bart., M.D., Physician in Ordinary to the Queen in Ireland, who, after extensive use, strongly recommended this preparation, and observed:—"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil. I consider it to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value." This eminent Physician remarks:—"With strumous and emaciated subjects, and where the general health is impaired, this remedy tells with peculiar efficacy. The reviving and reanimating effects of a regular daily course of this animal Oil are highly satisfactory. Its favourable action on the system is renovating; it checks progressive emaciation, restores the yielding health, rebuilds, as it were, the tottering frame, and brings about a most remarkable and salutary change in all the vital functions." Dr. de Jongh's Light-Brown Cod Liver Oil is sold only in capsuled imperial half-pints, 2s 6d; pints, 4s 9d; quarts, 9s; with his stamp and signature and the signature of his sole Consignees on the capsule and the label under wrapper, by all chemists. Sole Consignees, Ansar, Harford, and Co., 77 Strand, London.

THE EXAMINATION IN TACTICS.

The following are the names of the Field-Officers and Captains of Auxiliary Forces who passed in Tactics in Jan., 1882, under the provisions of G.O. 20 of 1882:—

[p., Passed; s.m., Special Mention.]

Northern District.—Lieut.-Col. J. C. Antrobus, Cheshire Yeomanry, p.; Capt. H. Turner, 4th Cheshire Regt., p.; Capt. R. T. Richardson, 1st Cheshire R.V., s.m.; Capt. F. Haworth, 3rd Cheshire R.V., p.; Capt. J. H. Wilkinson, 1st Staffordshire R.V., s.m.; Capt. B. T. Oswell, 5th Staffordshire R.V., p.; Capt. O. L. Stephen, 4th Northamptonshire Regt., p.; Lieut.-Col. J. A. Anstice, 1st Shropshire R.V., s.m.; Hon. Major H. Ashton, Duke of Lancaster's Yeomanry, p.; Capt. J. Caister, 2nd Brig. Lancashire Division, R.A., p.; Capt. R. C. Drury, 2nd Brig. Lancashire Division, R.A., p.; Lieut.-Col. R. Peacock, 7th Lancashire A.V., p.; Capt. T. W. H. Garstang, 7th Lancashire A.V., s.m.; Lieut.-Col. J. Rothwell, 2nd Lancashire E.V., p.; Major C. Birch, 4th North Lancashire Regt., s.m.; Major G. H. Morrison, 5th Lancashire R.V., s.m.; Major C. Spencely, 5th Lancashire R.V., p.; Hon. Major J. Eaton, 7th Lancashire R.V., p.; Capt. H. Healy, 12th Lancashire R.V., p.; Capt. F. N. Molesworth, 12th Lancashire R.V., p.; Capt. J. W. De Silva, 15th Lancashire R.V., s.m.; Capt. T. B. Walker, 15th Lancashire R.V., p.; Capt. R. Waring, 15th Lancashire R.V., s.m.; Capt. W. G. Barker, 15th Lancashire R.V., p.; Capt. J. A. Horner, 20th Lancashire R.V., p.; Capt. A. P. Ledward, 20th Lancashire R.V., s.m.; Capt. E. H. Preston, 20th Lancashire R.V., s.m.; Lieut.-Col. J. W. Harding, 1st West York A.V., p.; Major W. Ward, 2nd West York E.V., p.; Capt. G. H. Sanday, 1st North York R.V. p.; Major J. Liddell, 6th West York R.V., p.; Capt. J. M. Richardson, 3rd Brig. Northern Division, R.A., p.; Capt. J. G. Hicks, 2nd Northumberland A.V., s.m.; Major J. H. Bentham, 1st Newcastle R.V., p.; Major J. E. Gawith, 1st Westmoreland R.V., p.; Capt. W. N. Davison, 2nd Durham R.V., p.; Lieut.-Col. T. Reed, 3rd Durham R.V., p.; Capt. J. A. von T. Römler, 5th Durham R.V., p.

Western District.—Col. H. C. Adams, 1st Devon A.V., p.; Capt. J. R. Goodwin, 1st Volunteer Batn. Worcester Regt., p.; Capt. H. Poate, 1st Gloucester E.V., s.m.; Capt. W. Ball, 1st Gloucester E.V., s.m.; Capt. A. Webb, 2nd Worcester R.V., s.m.; Capt. H. S. Caldicott, 1st Volunteer Batn. Worcester Regt., p.; Major J. A. Watson, 5th Devon R.V., p.; Capt. P. F. S. Amery, 5th Devon R.V., p.; Capt. T. Buchanan, 2nd Gloucester R.V., p.; Capt. M. Holland, 2nd Gloucester R.V., s.m.; Capt. B. A. S. Tuttiett, 3rd Glamorgan R.V., p.

South-Eastern District.—Capt. R. Chignell, 2nd East Kent R.V., p.; Major C. W. Morland, 5th Weald of Kent R.V., p.; Capt. T. Neve, 5th Weald of Kent R.V., p.; Capt. A. J. Ramsden, 5th Weald of Kent R.V., p.; Capt. W. B. Tylden-Patterson, 5th Weald of Kent R.V., p.; Capt. E. W. Hussey, 5th Weald of Kent R.V., s.m.; Capt. W. Hoare, 5th Weald of Kent R.V., p.; Capt. E. E. Scott, 1st Sussex R.V., p.; Capt. T. J. Verrall, 1st Sussex R.V., p.; Lieut.-Col. G. J. Courthope, 1st Cinque Ports R.V., p.; Capt. E. Satterthwaite, 3rd West Kent R.V., s.m.; Capt. A. B. Williams, 3rd West Kent R.V., s.m.; Capt. T. W. Lovibond, 3rd West Kent R.V., p.

Home District.—Major J. Fawssett, 2nd Middlesex R.V., p.; Major G. C. Clarke, 10th Middlesex R.V., p.; Major E. Vaughan-Jones, 16th Middlesex R.V., p.; Major H. W. Gray, 2nd Middlesex R.V., s.m.; Capt. C. H. Clarke, 1st London A.V., p.; Capt. C. B. Dimond, 2nd Middlesex R.V., p.; Capt. W. Ruston, 8th Middlesex R.V., p.; Lieut.-Col. F. R. Wegg-Prosser, 1st London A.V., p.; Capt. C. H. Nevill, 1st Surrey R.V., p.; Capt. A. S. Harrison, 1st London E.V., p.; Capt. G. H. Dimond, 2nd Middlesex R.V., p.; Capt. P. S. Canning, 13th Middlesex R.V., p.; Capt. E. B. Lemmon, 16th Middlesex R.V., p.; Capt. E. C. Stevenson, 3rd London R.V., p.; Capt. L. W. Ridge, 20th Middlesex R.V., p.; Capt. G. T. Messervy, 12th Middlesex R.V., s.m.; Capt. D. W. Wynfield, 20th Middlesex R.V., p.; Capt. W. J. Martin, 3rd London R.V., p.; Capt. R. Gray, 7th Surrey R.V., p.; Capt. A. H. Dove, 5th Rifle Brigade, s.m.; Capt. F. A. Lucas, 20th Middlesex R.V., p.; Capt. H. B. H. Tytheridge, 12th Middlesex R.V., p.; Capt. E. H. Paxton, 2nd Oxon R.V., p.; Capt. R. Dixon, 4th Surrey R.V., p.

Woolwich District.—Major C. D. Davies, 4th Kent R.V., s.m.; Capt. B. J. Barlow, 4th Kent R.V., p.; Capt. J. W. Gidney, 4th Kent R.V., p.

Dublin District.—Major Lord Brabazon, 5th Royal Dublin Fusiliers, p.

Eastern District.—Lieut.-Col. S. L. Howard, 1st Essex A.V., p.; Major E. H. H. Combe, 2nd Norfolk R.V., p.; Capt. C. S. Orde, 2nd Norfolk R.V., p.; Capt. O. F. Reid, 6th West Suffolk R.V., s.m.; Major J. H. P. Fry, 1st Essex R.V., p.; Capt. G. A. Smith, 1st Essex R.V., p.; Capt. G. R. S. Gallaher, 1st Essex R.V., p.

North British District.—Lieut.-Col. P. Dods, 1st Haddington R.V., p.; Capt. D. H. Wilson, 1st Edinburgh R.V., p.; Lieut.-Col. J. S. Hamilton, 9th Lanark R.V., p.; Capt. R. G. Abercrombie, 1st Clackmannan and Kinross R.V., p.; Lieut.-Col. J. Matheson, 1st Lanark A.V., p.; Capt. G. S. Marsh, 1st Lanark A.V., p.; Capt. R. Shaw, 1st Lanark A.V., p.; Capt. A. M. Lindsay, 1st Lanark A.V., s.m.; Capt. R. A. Bryden, 1st Lanark A.V., p.; Capt. W. Kidston, 1st Lanark A.V., p.; Capt. J. Broadfoot, 1st Lanark E.V., p.; Capt. W. R. CAVALRY REORGANISATION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—With reference to your leading article on the subject of the reorganisation of the Cavalry, in the *Army and Navy Gazette* of the 10th inst., and with which I feel sure most cavalry officers will entirely agree, allow me to suggest a modification in the rearrangement of the regiments of Dragoons and Dragoon Guards, which would appear to entail even less alteration of regimental numbers, titles, and facings, as well as less cost to the public; at the same time that it fully meets the requirements of the proposed new scheme. To go into details: it gives a regiment of Dragoons for King, Queen, Prince of Wales, Ireland (2), Scotland, and England. It preserves the title of the King's Dragoon Guards, and the "Royal" of the 1st Dragoons. The "Bays" retain the title of "Queen's" and their white facings, whilst the "Scots Greys" retain their nationality. The 3rd Dragoon Guards retain their title, whilst assuming the additional title of the "Inniskillings," and both retain their present facings. The 4th and 5th Dragoon Guards, being both heavy regiments, would amalgamate more readily, the 4th retaining their title and the 5th their facings. The title of "Princess Charlotte of Wales" might be retained or not, as agreed upon by the corps concerned. The 6th Dragoon Guards would retain their title of "Carabiniers," and the 7th Dragoon Guards, which now head the list of good shooting in the Cavalry, would, whilst sacrificing their number, readily accept the now appropriate designation of "Carabiniers," and retain their black facings.—I am, &c.,

Twenty Years a Dragoon.

	Dragoons.	Facings.
1st King's Dragoon Guards 1st Royal Dragoons	1st King's Royal Dragoons	Blue.
2nd Dragoon Guards (Queen's Bays) 2nd North British Dragoons (Royal Scots Greys)	2nd Queen's North British Dragoons	White.
3rd Prince of Wales's Dragoon Guards 6th Inniskilling Dragoons	3rd Prince of Wales's Inniskilling Dragoons	Yellow.
4th Royal Irish Dragoon Guards 5th Princess Charlotte of Wales's Dragoon Guards	4th Princess Charlotte of Wales's Royal Irish Dragoons	Green.
6th Dragoon Guards (Carabiniers) 7th Princess Royal's Dragoon Guards	5th Princess Royal's Dragoons (Carabiniers)	Black.

THE DISTRIBUTION OF GRATUITIES FOR EGYPT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—If you refer to the following list of Naval officers, with the amount of their gratuities, for service in Egypt, and also to the Military officers of corresponding ranks, with their gratuities, you will see there is a vast difference, sometimes one way, sometimes another. I should be very much obliged if you could tell me the reason of this extraordinary difference.—I am, &c.,

Observer.

THE PURCHASE SUBALTERNS' CASE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I have read with much interest the excellent article in the *Army and Navy Gazette* of March 3, regarding the injustice which Purchase subalterns suffer under existing arrangements. In common with all concerned, I beg to thank you for the notice you have constantly taken of our grievance. Nothing could be fairer than the small addition to pension which you advocate. No man capable of seeing both sides of a question can think that the Purchase subalterns are fairly treated at present. My chief object, however, in writing, is to ask if you will favour me with the address of the "gentleman of experience," alluded to in a paragraph in your last Saturday's issue, "who has devoted much time and attention to the cause," in order that I may at once communicate with him. I know others who are quite ready to do so, too, but, like myself, have never heard of the movement.—I am, &c.,

Hard Lines.

A telegram to the *Standard*, dated Cairo, says:—"Gen. Hicks will start to-morrow for Koee, on the Blue Nile, with the whole of his fighting force. The General hopes to be able to compel the Mahdi to a decisive engagement before the rains come on."

The Duke of Cambridge has accepted an invitation to the banquet to be given at the Mansion House on Wednesday, April 11, to Lords Wolseley and Alcester. Earlier in the day the Corporation will present a congratulatory address in a gold casket to Lord Wolseley, and the freedom of the City and a sword of honour to Lord Alcester. Lord Wolseley received the freedom and a sword in 1874 on his return from the Ashantee war. On April 3, Lord Alcester will be invested with the honorary freedom and livery of the Cutlers' Company.

EGYPTIAN WAR FUND.

NATIONAL SUBSCRIPTION FOR THE RELIEF OF THE FAMILIES OF THOSE KILLED, OR WHO HAVE DIED FROM DISEASE, AND ALSO OF THOSE SOLDIERS, SAILORS, MARINES, &c., WHO HAVE SERVED IN EGYPT, AND HAVE BEEN DISABLED BY WOUNDS OR SICKNESS.

PATRON.
Her Most Gracious Majesty the QUEEN.

Subscriptions are earnestly requested. Remittances can be sent to Lady Jane Taylor, 16 Eaton Place, S.W.; or to Cox and Co., Craig's Court, S.W.

Application for assistance to be made to the HON. SECRETARY, EGYPTIAN WAR FUND, New Buildings, Little Park Street, Queen Anne's Gate, London, S.W.

P. M. C.

ON account of Orders recently issued regarding Mess Expenditure, Messrs. PELLATT and CO. (formerly APSLEY PELLATT and CO., of Holland Street, Blackfriars—the original firm—established in the year 1759, by the father of the late Apsley Pellatt, Esq., M.P.), Falcon Glass Works and China Manufacturers, Manufacturers, by special appointment, to H.M. the Queen and the Royal Family, &c., Contractors to H.M.'s Government, the Lords of the Admiralty, the Indian Stores, &c., have decided on supplying all Regiments with their Manufactures at their wholesale-trade Prices, which are very much below those usually paid by Officers' Messes. This Firm have made Mess Contracting the speciality of their business for upwards of 150 years, and have, at the present time, upwards of 140 Regiments on their books, including the most prominent of H.M.'s Service. For the past 18 months, Messrs. Pellatt and Co. have obtained the commands of every regiment giving their orders on arrival home from foreign service, without a single exception. On receipt of patterns from any Regiment, Messrs. Pellatt and Co. return estimates for the exact matching of goods. Several Regiments have taken this course of late, many being Native Indian Regiments, and the estimates returned have always shown such a great saving, as to secure the future commands and greatest satisfaction of the Mess.—All Communications and Patterns should be sent to the Offices and Show Rooms, addressed,

PELLATT and CO., Falcon Glass and China Works, 17 St. Bride Street, Ludgate Circus, London, E.C.

AMERICAN
WALTHAM WATCHES,
FOR OFFICERS ON SERVICE.
HENRY W. BEDFORD,
AGENT FOR THE COMPANY,
67 REGENT STREET
(next Door to St. James's Hall),

Has the largest stock to select from in England, in sterling silver cases, from £2 10s, and in eighteen-carat gold cases from £8 8s.

These splendid Timekeepers have been supplied by HENRY W. BEDFORD to numerous OFFICERS on SERVICE in INDIA, CHINA, the CAPE, and other Foreign Stations. The Watch chiefly recommended is the Waltham Keyless Watch at £6 6s, in silver case, or £15 15s, in gold case, adapted for variation of climate.

Army & Navy Gazette.
LONDON, SATURDAY, MARCH 31, 1883.

IN another column we give the Report of a Committee which was appointed to consider the comparative invisibility of colours, with reference to a proposed change in the uniforms of the Army. This "Colour Committee," as it is oddly called, was convened as long ago as January, 1882; the recorded experiments made by the two scientific members commenced in February, and concluded in June; the Report is dated July 25, and eight months are allowed to elapse before this important document is presented to Parliament and published. The investigations of the Committee were based on the assumption that the colour which gave the nearest approach to invisibility must necessarily be the most suitable for military clothing. But this is a narrow and a one-sided view of a question which has several aspects worthy of serious consideration. The evident disadvantages of invisibility, under many circumstances, are utterly ignored. If our soldiers, even when fully exposed, are scarcely distinguishable by the enemy, will they not be liable to heavy loss from our own artillery opening fire without regard to men whom they cannot see, and even to the danger of being shot by our own infantry in rear? And will there be no difficulty experienced by invisible Staff officers in conveying orders to invisible battalions? Few officers have seen much active service without also seeing men mistaken for enemies and fired on by their friends, even when the differences in appearance were marked. Besides, we should at once forego the moral effect so often produced in battle long ago by the sudden apparition of the "thin, red line." It is true, painfully true, that recent changes have lessened that effect, if not nullified it. The experiments of the Committee have proved that, under ordinary circumstances, white is the most conspicuous colour; that black comes next, that the very dark colours are scarcely distinguishable from black at 400 yards, that scarlet in a bright light is more conspicuous than black, and that sundry shades of grey and brown are comparatively invisible. Who that gave the matter any thought, or had any practice in "judging distance," did not know all this, without the aid of Committees? No experiments appear to have been made with soldiers in clothing and accoutrements of different colours, in different positions, and moving, as well as still. All that was ascertained was the comparative visibility of large square pieces of cloth of different colours and shades, crossed in some cases by bands of different colours not closely resembling military accoutrements. We know that the uniforms of our soldiers are not those best suited for war, and that several changes might be introduced with advantage, without destroying the distinctive appearance of our Army. A reversible helmet-cover, of two neutral colours, one much lighter than the other, was the practical suggestion offered some time ago by an officer, whose name, unfortunately, we cannot at once recall. With the conspicuous helmet thus concealed, with umber-coloured belts and grey trousers, and with all the metal "fixings" painted for service, our soldiers might be made to look dull enough to suit their reformers. A dress which was conspicuous from the rear, but comparatively invisible from the front, might be the best theoretically. Such perfection might be attained by transferring the plates to the backs of grey helmets, making the uniform grey and umber in front, but retaining the present colours for the back. Surely such a dress would be a great incentive to bravery, by vastly increasing the danger of running away! It is strange that the Volunteers should be induced to adopt scarlet and discard greys, just when evidence has been procured of the utter unsuitableness of the former colour and the transcendent advantages of the greys. The Committee think it unadvisable to break away from the glorious traditions attached to the scarlet uniforms, almost the only glorious traditions left; and they recommend that the old colours should be retained for full dress, but chiefly as a bait for catching recruits. From the entire absence of any expressions of dissent, and the apparent unanimity of this, as of many other committees on miscellaneous military alterations, we cannot help suspecting that they are called together rather to give official confirmation to the foregone conclusions of some originators of change, than to give a thoroughly independent, and possibly inconvenient, opinion.

As we lately announced to be probable, Lieutenant-General Lord A. Russell, C.B., has been appointed to command the troops stationed in the Dominion of Canada, vice General Sir P. M'Dougall, whose tenure of that appointment will expire on May 24.

The aptitude of the Egyptians in their exercises, and their quickness to learn their drill, excite the surprise of our officers, and are constantly under observation, and we have received many testimonies to their good qualities; but there are still doubts in the minds of many as to their being imbued with the gift of fighting, which is the *ultima ratio* of any army. The officers all round are pretty bad, and leave much to be desired. The sublime calmness with which the *Times* alluded lately to Baker Pasha, as having been unjustly accused of engaging foreign mercenaries, has amused a good many people and irritated others, who remember the source from which the unjust accusation emanated. There never was, perhaps, any event in history which produced such a crop of wild and utterly baseless accusations as Arabi's rebellion, and the harvest went on long after the event.

Major-General G. B. Harman, C.B., commanding at Alexandria, will succeed Major-General R. B. Hawley, C.B., as Deputy-Adjutant-General at the Horse Guards.

The War Office has lately issued—not with very good grace perhaps; but no matter—a most instructive paper, showing among other things "the numbers and ages of the men of each draft sent to India from January 1, 1878, to December 31, 1880." The general belief is that no soldier under 21 years of age ever finds his way to our Indian Empire, and this belief is fully justified by the regulations, circulars, and other documents which, from time to time, have been issued by divers War Ministers. But what says the War Office in the return before us? It must be confessed that the statistics herein given are very discouraging to those who have laboured under the impression that lads are held back from embarkation. It certainly is the reverse of pleasant to find that out of 5,297 men, the total strength of the drafts in 1878, 2,175 were under 21 years of age. In the following year, the total strength amounted to 9,840, and of these 3,542 had not attained 21 years of age; while last year, 2,208 out of 6,271 were under 21. The broad result is that during the triennial period, out of 21,408 men who left England to fill gaps in the European portion of the Indian Army, no fewer than 8,925 were below the age which has been fixed by a consensus of authority, both medical and military, as the minimum for service in India. Other equally disagreeable facts come to light on analysing the several heads of the return. Thus we find that during the three years, more than 300 lads under 18 years went out to India, 114 between 18 and 19, and 2,413 between 19 and 20, making a total of nearly 3,000 whom it would be farcical to consider men in any sense of the term. And what was the result of such precipitancy? Out of these drafts there died during the three years, exclusive of those killed in action, or who subsequently died of wounds, 871 men; whilst 526 were invalided, making 1,397 out of 21,408 who were rendered *hors de combat* in this short space of time by disease alone. Now, to say nothing about the inhumanity involved in such wholesale expenditure of young lives, the monetary loss to India must have been very considerable.

The friends of those officers and men who fell during the Egyptian campaign will feel satisfaction in hearing that the authorities have enclosed a large graveyard near the Tel-el-Kebir Railway Station. The remains will be removed to the cemetery, and buried according to the rites of the churches to which the deceased belonged.

Colonel Warren, C.M.G., R.E., accompanied by Lieutenants Burton and Haynes, who proceeded on special service last year to Egypt, will arrive in England this week. Ever since his landing in Egypt, Colonel Warren has been employed on the difficult duty of tracking out and bringing to justice the murderers of the ill-fated Palmer, Gill, and Chatterton. His efforts have so far proved successful, that five of the culprits have been hanged and eight others sentenced to various terms of imprisonment. The remains of the three murdered Englishmen have been recovered, and will arrive at the end of this week in the hired transport *Nepaul*. Colonel Warren achieved these results without the assistance of any troops. Accompanied by his two young companions, and escorted only by a few friendly Bedouins, he proceeded alone, and remained for weeks together in the very heart of the country where the murdered men met their fate. We trust that on their arrival in England the services of these officers, which have hitherto been overlooked, will be properly recognised.

We learn from Cairo that Lieutenant-General Sir Archibald Alison recovers slowly from his fever, and, accompanied by his family and Major Hutton, Assistant Military Secretary, has gone to stay at the Beau Séjour Hotel, Ramleh. This small suburb of Alexandria, situated on the desert between the Mahmoudieh Canal and the Mediterranean, enjoys during most of the year a perfect climate, which it is hoped will so far restore the General to health, that he will be able to take a cruise in the *Condor*. The General is attended by Surgeon-Major Pollock, A.M.D.

When will our Military authorities learn to work on some kind of system? No sooner do they issue an order for the carrying-out of spring drills at Aldershot, with an excellent programme of elementary drills to take place between March 15 and April 7, than they stultify themselves by ordering a General Parade on March 29 for the presentation of medals, the effect of which has been to stop these most necessary drills for the best part if not the whole of a day, just when officers and men have settled down to them properly. The medals might have been given out on Saturday (muster day), or on church parade on Sunday, without interfering with the drills. It is a pity that we do not copy the method of the German Army, as well as the badges on the shoulder-straps. With them, spring drills are not mixed up with general parades, nor is the drill of recruits disturbed in order that they may be shown off in a semi-trained state in the middle of winter to Malagassy Envoys.

The newly-raised Egyptian Artillery is said to be in a more forward state and to give greater promise for the future than the other branches of the Khedive's Army. The Artillery has, indeed, always been a *corps d'élite* in Egypt, the officers and men being specially selected and scientifically trained. Many of the former have been appointed to the new Army, and in physique and intelligence they are undoubtedly superior to their brethren of the Cavalry and Infantry. As at present organised, the new Artillery Corps consists of four batteries, two field and two camel batteries. The field batteries have the same Krupp gun which was the weapon of the late Egyptian Artillery. The camel batteries are to be armed with the 7-pounder jointed guns, which proved so successful in Afghanistan. Carrying guns on camels is no new experiment A camel battery has been in existence for some years past at Aden, and has repeatedly done useful service in operations against the Arab tribes of Yemen. Of the four Egyptian batteries, one field and one camel battery will have English officers; the other two batteries will be commanded by Native officers. The whole Egyptian Artillery will, however, be under the direct command of the English Commandant, who has the rank of Colonel on the Staff. The batteries are, at present, unhorsed and imperfectly equipped; but Colonel Duncan, R.A., and his small band of officers are working with the utmost energy, and have already achieved results surpassing the most sanguine expectations.

A Military correspondent writes to us from Cairo:—"Depend upon it, the new Egyptian Army will never be of any real use till the system of recruiting is altered. It is literally true that the British officers who were lately sent on recruiting service into Upper Egypt had to bring back the unwilling conscripts in chains. Critics complain that General Wood's new levies do not look like soldiers, and appear to have no heart; but what can be expected from recruits who are driven like felons to the ranks? Military service is more unpopular than it ever was in Egypt, chiefly owing to the false reports spread by the Mudirs of Districts, whose object is to secure bribes from the terrified conscripts, in order that they may be released from serving in the Army. It is understood that Sir Evelyn Wood has sent in a very strong report to Lord Dufferin, showing that the greatest corruption prevails on the part of the civil authorities who are responsible for the recruiting of the Army, and urging the necessity of a complete reform of the whole system of military service in Egypt."

A Committee is about to be assembled, under the presidency of Major-General Sir F. FitzWygram, Bart., to consider and report upon the present regulations for the movements of brigades and divisions of Cavalry, and propose changes therein.

The Lords of the Treasury have intimated that in accordance with the recommendation of the Committee of Public Accounts, 1879, they have decided that a charge against a vote of credit shall not in future exceed the aggregate of the sums which the spending departments can identify as directly occasioned by or for the event or object to meet which the vote has been taken. To fulfil this direction, their Lordships are agreed that it will not be necessary or practicable in every case to single out particular items in accounts of stores, or pay, or works, as wholly chargeable to a vote of credit. Very commonly the charge against the vote of credit will consist simply of an excess, or part of an excess, or any ordinary grant of Parliament, caused by a multitude of circumstances indistinguishable in their several effects, and perhaps partly normal, partly extraordinary. The spending department is, therefore, to be able in every case to produce reasonable grounds for maintaining that any individual charge, or excess of charge, defrayed in whole or part from a vote of credit, has been incurred directly for the purposes for which Parliament intended such vote to be applied.

The system of employing mounted orderlies at all hours and in all weathers is greatly abused in the Dublin garrison. Not only are such orderlies at the beck and call of various departments which are already in telegraphic communication with each other, but the clerks and others take it upon themselves to send letters, messages, and parcels on their own account, by these orderlies. It is, therefore, not to be wondered at that the horses, the property of the Government, suffer thereby, to say nothing of orderlies being employed on unsoldierly errands.

In a letter which appeared in the *Morning Post* of the 29th inst., Lord Eustace Cecil expresses the gravest apprehensions about the deficiency of recruits and the prospects of the Army generally. He deprecates the admission of boys or lads into the Army, and proposes the alternative of raising some battalions from the natives of the hill countries in India, who would be available for general service, and would be able to stand any ordinary vicissitudes of climate. The subject thus broached is very important, but, from pressure for time and space, we are compelled to postpone the consideration of it for the present.

We find it difficult to conceive that any misunderstanding can really have arisen between the Middlesex Yeomanry and the Honourable Artillery Company Light Cavalry on a question of precedence. We are aware that the constitution of the Honourable Artillery Company is a peculiar one, and that the Company enjoys many privileges; but if the corps are not Volunteers, we do not see what they are. They certainly are not Regulars, nor are they Militiamen, nor Yeomanry. Under the circumstances, we consider that the officer commanding the Yeomanry Cavalry was right in protesting against the place assigned to him and his men in the march-past last Monday at Brighton.

According to the new Army List, the Spanish Infantry numbers 60 regiments, the disciplinary regiment of Ceuta, and the 20 battalions of rifles, disciplinary battalion of Melilla, 140 reserve battalions, 140 depôt battalions, and one battalion of orderlies and writers.

The Navy.

EGYPT MEDAL.

Department of the Accountant-General of the Navy and
Comptroller of Navy Pay, Admiralty, Spring Gardens,
March 29, 1883.

Notice is hereby given, that Medals for the operations in Egypt are ready for issue to the officers and crews, entitled thereto, of the ships named below:—Her Majesty's ships "Cockatrice," "Euphrates," "Mosquito," "Salamis," "Seahorse," "Tamar," and "Temeraire." Application should be made personally or by letter to the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, London, S.W. Petty officers and seamen, whether applying in person or by letter, are requested to produce their certificates of service.

ADMIRALTY, March 24, 1883.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet-Surgeon Robert James McMorris has been placed on the Retired List of his rank from the 20th inst.

ADMIRALTY, March 27, 1883.

In consequence of the death, on the 19th inst., of Rear-Admiral John Dobree McCrea, the following promotion has been made from the 20th inst.:—Captain Charles Trelawny Jago to be Rear-Admiral in her Majesty's Fleet.

Consequent on the foregoing, the following promotions have been made on the Retired List from the same date:—Captains Philip Saumarez, Stapleton John Greville, Charles Matthew Buckle, and Cortland Herbert Simpson to be Rear-Admirals on the Retired List.

ADMIRALTY, March 28, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Paymaster Robert Deveson has been placed on the Retired List from the 28th inst., with permission to assume the rank and title of Paymaster-in-Chief from the same date.

ADMIRALTY, March 29, 1883.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and November 29, 1879, Lieutenant Archibald James Farquharson has been placed on the Retired List from the 28th inst., with permission to assume the rank and title of Retired Commander from the same date.

ROYAL MARINE LIGHT INFANTRY.—Major Henry Bevan Isaacson has been placed on the Retired List (March 27).

APPOINTMENTS.

Captain—William Codrington, C.B., to the Duncan, additional, for service as Captain Superintendent of Sheerness Yard, from April 6.

Lieutenants—G. M. Dolphin, to the St. Vincent, additional, for the Martin, in lieu of a sub-lieutenant; Lewis E. Wintz, F. St. L. Luscombe, M. H. M. Seymour, S. D. Lacy, F. W. Keary, Charles J. Briggs, H. E. P. Cust, J. L. Marx, Harry Rivers, Peyton Hoskyns, H. J. Keane, W. L. Down, C. A. Forlong, R. G. Fraser, M. Napier, R. B. S. Wrey and A. W. Torlesse, to the Vernon, additional, for short course of torpedo instruction (to date April 7); John Denison, to the Warrior, vice Hudson; James B. Hay, to the Duke of Wellington, for gunnery duties; George F. King Hall, to the Lord Warden, for gunnery duties.

Sub-Lieutenants—F. H. Peyton, to the Alecto; H. W. Thierens, to the Neptune; Edward L. Lowdell, to the Lion, additional, for the Liberty; R. T. B. Bird, to the Ganges, additional, for the Sealark; C. F. Thursby, to the Bullfrog; A. P. Stoddart, to the Pioneer.

Midshipmen—Edward Hay and F. C. H. Allenby, to the Opal; E. F. B. Charlton, A. B. E. Greville, D. R. De Chair, and C. D. Mackenzie, to the Neptune; R. S. P. Hornby, to the Dido; William H. Boys, to the St. Vincent, additional, for the Martin.

Chaplain—Rev. John S. Knight, B.A., to the Neptune.

Naval Instructor—James M. Pask, B.A., to the Neptune.

Surgeons—Robert J. Lawson, M.B., to the Ganges, for the Sealark; John Cashin, to the Impregnable, for the Nautilus; Francis Woore, to the Lion, for the Liberty; John M. Phillips, to the Impregnable, for the Pilot; Percy E. Todd, M.B., to the St. Vincent, for the Martin; Wm. M. Craig, M.B., to the Boscawen, for the Seaflower.

Surgeon and Agent—Mr. Michael Carmody, for Arran Islands.

Paymaster—Alexander Thompson, to the Lord Warden, additional, for service on shore at Leith and Clyde Division of Coastguard.

Chief Carpenter—Richard J. Grigg, to the Pembroke, vice Church.

COASTGUARD.

Chief Boatmen—Samuel Vescoe, Misner Haven, to be chief boatman-in-charge, Cliff Creek, vice Sandwith, pensioned; John Wedlake, Torquay, to be chief boatman-in-charge, Budleigh Salterton (Lower Detachment); Richard Banks, Kimmeridge, to be chief boatman-in-charge, Beer, vice Gibbons, pensioned.

Commissioned Boatmen—G. W. E. Ridge, Cawsand, to be chief boatman, Kimmeridge; John Dunnaway, Babbicombe, to be chief boatman, Gowan Haven, vice H. Hooper, transferred to Torquay; George Fooks, Beadnell, to be chief boatman, Burnham, vice Bacon, pensioned; John Morgan, Carlingford, to be chief boatman, Mouth of Boyne, vice Thomas Smith, promoted; Charles Randle, Reculvers, to be chief boatman, Misner Haven, vice Vescoe.

ANTELOPE, Lieut. and Com. the Hon. Walter H. Jolliffe, will be paid off at Malta, and recommissioned.

BEACON, Com. Mann, has left Port Said for Malta. She will be dismantled and paid out of commission.

BOADICEA, Capt. Church, flagship of Rear-Admiral Salmon, V.C., Commander-in-Chief on the Cape of Good Hope and South-west Coast of Africa station, arrived at Cape Coast Castle on Feb. 22, and was to leave on her way south to the Cape of Good Hope about Feb. 28, after inspecting the four small craft there, viz., Flirt, Bullfrog, Wrangler, and Pioneer. The Wrangler, on the arrival of her relief, the Stork, was to proceed to the South-east Coast of America, calling at St. Helena. Mails, after March 22, to be sent to the South-east Coast of America.

BULLFROG, Lieut. and Com. Papillon, has being doing duty as senior officer at Cape Coast Castle for the last month.

COMUS, Capt. J. W. East, on leaving Callao, does not proceed to San Francisco, as stated in the notice of the movements of her Majesty's ships on the Pacific station.

DECOY, Lieut. and Com. Poore, arrived at Malta from Alexandria and Cyprus on March 20.

ENCOUNTER, Capt. Robinson, was at Colombo on March 30. Would leave this day, homeward bound.

FLIRT, Capt. Hammick, was at Cape Coast Castle on Feb. 24. She was to go to Ascension for a month to recruit the health of her crew, who have suffered much from fever since the Niger Expedition. Mails to Cape Coast Castle.

GANNET, Com. E. G. Bourke, at Lota, Chile, on Jan. 3, would proceed home, when relieved at Coquimbo by the Heroine, calling on the way at Sandy Point, Monte Video, St. Vincent, and Madeira.

HECLA, Capt. Wilson, left Malta last Sunday for Portsmouth, where she was expected to arrive yesterday. The crew will be granted ten days' leave.

HEROINE, Capt. F. R. Blackburne, on being relieved at Callao by the Constance, will go to Vancouver, calling at the ports which have not been visited by the Sappho.

KINGFISHER, Com. R. H. Thornton, at Callao on Jan. 27; was about to visit the Marquesas, Society, Cook, and Hervey Groups, and Pitcairn Island, then going to Coquimbo.

LILY, Capt. R. Evans, arrived at Aden on Sunday last.

LIVELY, Com. Parr, was undocked at Malta on March 13, having made good defects and repaired damages received in the Bay of Biscay while conveying Vice-Admiral Lord John Hay to Malta.

MONARCH, Capt. H. Fairfax, arrived at Malta from Port Said on March 23.

MUTINE, Com. Edwards, arrived at Esquimault on March 29.

NEPTUNE, Capt. Maxwell, was commissioned on Thursday at Portsmouth, with a complement of 540 officers and men. As already stated, she will join the Channel Squadron for a short commission. Rear-Admiral Wilson, who has been appointed to be second-in-command of the squadron, will hoist his flag on board the Neptune, and will take passage in her to join the Agincourt.

ORION, Capt. FitzRoy, will be paid off shortly and laid up at Malta.

PENELOPE, Capt. D'Arcy Irvine, C.B., having had the damage sustained in the collision with the screw collier Dunelm repaired, left Sheerness last Saturday for Harwich. The Penelope was more injured in the collision than at the bombardment of Alexandria.

PIONEER, Lieut.-Com. Festing, is found to be full of defects, and it is doubtful whether on survey she will be considered fit to undertake the voyage to England.

ROCKET, Lieut. and Com. Orlebar, arrived at Bahia on March 29, homeward bound.

SAPPHO, Com. B. F. Clark, was at Charles Island, Galapagos, on March 8, and was about to proceed to Callao to assume the duties of senior officer on the coast of Peru on the departure of the Comus for San Francisco, until the arrival of the Heroine.

SEAGULL, Lieut. Rae in charge, arrived at St. Vincent, Cape de Verdes, on March 27, and sails for Teneriffe on the 31st inst.

STARLING, Lieut. and Com. Izat, has been invalided, and Lieut. Hadley, from the flagship, has filled his vacancy. The Starling was on the southern sub-division of the West Coast station on March 1.

SWIFTSURE, Capt. H. C. Aitchison, flagship of Rear-Admiral A. M'L. Lyons, Commander-in-Chief on the Pacific station, left Honolulu on March 22 for Esquimault.

SYLVIA, surveying vessel, Capt. W. J. L. Wharton, was still in the Straits of Magellan, surveying, on March 8.

TEMERAIRE, Capt. Nicholson, C.B., arrived at Malta from Corfu on Saturday last.

THALIA, Capt. Brackenbury, C.M.G., will be detained at Hong Kong until the middle of April.

THETIS, Capt. A. C. Curtis, was at Coquimbo on March 8, and was to proceed to England when relieved by the Constance, calling at Sandy Point, Falkland Islands, Monte Video, St. Vincent, and Madeira.

NAVAL NOTES.

The under-named men have been awarded the medal for long service and good conduct:—John Bridgewater, 1st-class ship's corporal, of the Duke of Wellington; William George Roberts, ward-room cook, of the Belleisle; John Hoare, stoker, of the Victoria and Albert; John F. Mitchell, bandsman, of the Duke of Wellington; Thomas Mansell, sick-room steward, of the Victoria and Albert; Edward Phillipson, commissioned boatman, and Henry Thorne, John Tapson, Henry Goodly Robert Roberts, Thomas Cole, and William Howard, boatmen, of the Coastguard.

Navigating-Lieut. J. W. Dixon, attached to the Admiralty Survey of the Coast of Western Australia, has had a narrow escape of losing his life from drowning by his boat capsizing in Sharks Bay. Luckily, he succeeded in swimming ashore. The life of the man who was with him in the boat was saved by a colonial seaman, named Fay, who, on the recommendation of the Governor of the Colony, has been awarded the Royal Humane Society's medal. Fay, at great personal risk, swam out to the boat with a line, notwithstanding that the place is infested with sharks.

It is stated that the distinction of making the deepest sounding in the Atlantic ever yet recorded has been achieved by the officers of the Coast Survey steamer Blake, recently returned to New York from a two months' cruise. The deepest sounding ever before reported was 3,862 fathoms, which was made by the Challenger. The depth reached by the Blake is 4,561 fathoms. The spot is 75 miles north of San Juan, Porto Rico, and not far from the place at which the Challenger sank her deepest lead.

The Rupert, having undergone extensive repairs in her hull and machinery at Portsmouth, went out of harbour on Thursday for a two hours' full-power trial of her machinery in the Solent. With a mean of 70 revolutions, the engines indicated 3,542½ horses, while the ship realised a speed of close upon 13 knots. The Rupert will complete her torpedo and Nordenfelt fittings, after which she will be turned over to the 1st Division of the Steam Reserve. Her torpedoes will be discharged from air guns.

The *Royal Navy List* for April has been issued, and may now be called an "official work of reference," since it is supported by the Admiralty, who place it regularly in the libraries of all ships in commission. The *Royal Navy List* now gives to the public the "war and meritorious services" of Naval officers, and also of officers of the Royal Marines, and must prove of the greatest interest to all those having relations or friends in the Navy. The answer to the question, "Have you a *Navy List?*" should no longer be "No," but "Yes." The *Royal Navy List*, not only in families, but in all mercantile houses in any way connected with the service, will prove of inestimable value.

Gen. Caprivi, the newly-appointed Chief of the German Admiralty, has arrived at Berlin, and has assumed charge of his duties. Thanks to the Emperor's personal interference, the higher Naval officers, who objected to a soldier being placed over their heads, have withdrawn their strenuous remonstrances, and will remain in active service. Admiral Batsch, the most disappointed at not being entrusted with the direction of the Naval administration, was the last to yield to the Emperor's solicitations. The Admiral and his colleagues, always ready to imitate England's example in Naval matters, were entirely oblivious of the fact that for a long number of years the British Admiralty has been exclusively presided over by Parliamentary leaders who have seldom had any previous practical knowledge of the duties pertaining to their high office. Gen. Caprivi, who also bears the high-sounding patronymic "di Montecuculi," is, as his name tells, of Italian extraction, though of German birth. He is in years the youngest lieutenant-general, and enjoys the reputation of being an exceedingly clever and efficient administrator. The reason why a General officer of the Army is invariably at the head of Naval affairs in Germany is to ensure the observance of strict military discipline and etiquette in the Navy, and to render impossible habits so prevalent in the English Navy, but entirely at variance with military discipline.

One of the first results of the action taken by the Committee appointed by the Admiralty to carry out the reorganisation of the dockyards, is an order received at Chatham for a reduction to be made in the staff of messengers connected with the principal office at that yard. The course pursued by the Committee is, however, warmly opposed by the heads of departments, who have addressed a remonstrance on the subject to the Admiralty, in which they point out the serious inconveniences which will accrue from the adoption of the course ordered. It is understood that certain other proposals which were considered to be of a sweeping character have also been recommended to the Admiralty by the Reorganisation Committee.

The Royal Humane Society have recently granted honorary rewards to various officers and men for saving, or attempting to save, life from drowning under the following circumstances:—On the night of Jan. 28 last, the Valiant was moored off Tarbert, when a man, named Hooper, fell overboard while ascending the ladder. The night was very dark, a gale of wind blowing, and the ship was half a mile from shore. George Bennett, an able seaman, at once jumped overboard and succeeded in supporting the helpless man, who was insensible after rising to the surface. Lieut. C. Home Cochrane, observing by the light of a signal that the men were drifting away into the darkness, gallantly jumped in and towed them both to a life-buoy, which was hanging over the stern to a grass-hawser; they were afterwards picked up by the boat; Hooper's life was extinct. Silver medals were awarded in this case. Lieut. W. B. Fisher, R.N., and boy, T. G. Rose, of the St. Vincent, were awarded bronze medals for rescuing T. Hunt, who became immersed while engaged in hoisting the gig to the davits. In this case the tackle gave way, and the boat turned bottom upwards, the boy remaining underneath, totally unable to extricate himself. Lieut. Fisher and Rose immediately jumped over, righted the boat, and rescued the lad. The bronze medal was awarded to John Quinn, ship's corporal, of the Clyde, for rescuing a seaman, named Ritchie, who became immersed in Aberdeen Docks on Jan. 18 last. Quinn promptly jumped off the quay and held the man above water until assistance came.

NAVAL APPOINTMENTS AND PROMOTION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The remarks on Naval appointments given in your last week's number, must of necessity meet the approval of all lovers of justice and fair-play. As an outsider, and one who is in no wise affected by them, I have lately been both amused and puzzled to see how the favoured few keep the ball rolling, dropping quietly from one good appointment to another, and never tasting the bitterness of what you so aptly call "the cold shade of unemployed half-pay." Are these gallant officers endowed with any extraordinary ability above their fellows; or is it to personal interest they owe this constant run of good-luck in this magic circle? You, Sir, with your knowledge of the inner working of the Naval service, may be able to inform

FAIR-PLAY.

SIR,—Can you tell us what are the prospects for senior lieutenants as regards promotion? Most of these officers had not the luck to be serving in the Mediterranean during the Egyptian Campaign, but have still a lingering hope that constant and faithful service may entitle them to some consideration; or are they to continue obscured in the dust raised by the rush to the Commanders' List of the victorious Egyptian heroes, and so be forgotten until too old? It would seem that service afloat, for however long a period, is of no avail, and that promotion at the present time can only be obtained for each individual at the personal request of some influential friend. Please tell us if this is so with regard to the remaining lieutenants (I mean those with nothing against them) who head the list, and over whose heads juniors are passing day after day? Most of those passed over can count 14 or 15 years' actual sea time as commissioned officers. Any remarks you may be pleased to make on this subject will be read with interest and gratitude by the unfortunate

SENIOR LIEUTENANTS.

NAVAL UNIFORM.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—There are several points in your article on this subject, which appeared in last week's issue, upon which I should like to comment. It is evident, as you point out, that officers cannot appeal to the Instructions to justify them in wearing plain clothes, for, as it is there laid down that "permission may be given," it may also, by inference, be withheld; but let any one who is well acquainted with the service compare the old Instructions with those of 1879, at present in force. There is only one deduction to be drawn from the comparison, and that is that the latter instructions were intended to legalise the custom which, with the full knowledge, and therefore with the tacit sanction, of the highest authorities, had existed for many years. That the custom has existed, and that it has been systematically winked at, I presume that not even the Commander-in-Chief at Portsmouth will attempt to deny. I believe I am right in saying that no civil law could be legally enforced which had been knowingly allowed to fall into desuetude for five-and-twenty years or so; but in any case, nothing is more irksome than the sudden application of the "screw" under such circumstances; and as the naval officers stationed at Portsmouth do not believe that it is the wish of their Lordships that this permission should be withheld, they very naturally complain of this summary withdrawal, at the caprice of a single individual, of a privilege which they have enjoyed, probably with scarcely an exception, during the whole period of their service. It is commonly reported that Admiral Hornby denies that term "ordinary leave" is intended to include going for a walk in Southsea. If it be not so intended, then the framer of the paragraph, must be put down as either a very stupid or a very disingenuous person; for what is "ordinary leave," if it is not landing under "ordinary" circumstances,—that is, for the afternoon, to take a walk or visit friends? Then again, why is the order, or "wish," couched in such ambiguous terms that, while one captain feels bound to issue a stringent order to his officers, another puts it in a form which may be disregarded with impunity? This, I am assured, is the case, and it tends to discredit the whole business. A wish, as Admiral Hornby must be perfectly well aware, goes for nothing, where it clashes with personal comfort or convenience. Why, then, not issue a written order? The universal and obvious inference is that he fears he would not be borne out by the Admiralty in so doing. You imply, in your remarks, that it is only Naval officers of ward-room rank who persistently wear plain clothes at Portsmouth, and state that "officers and men of the Army, and superior and subordinate officers of the Navy, appear habitually in uniform." In this you have been entirely misinformed. There is no such custom. The orders to military officers are but little attended to, and, in fact, it is the rarest thing possible to meet any one in uniform at all. Whether this universal doffing of uniform when on shore is a good thing or otherwise, is quite another question. I myself am of opinion that, as his ship, and nowhere else, except under well-known conditions, which are habitually recognised, is a naval officer's place of duty, he may without detriment to the service be permitted to appear in plain clothes when absent from it. One thing at any rate is certain, and that is that every naval officer, except Admiral Hornby, believes that the intention of the authorities in introducing the paragraph about "ordinary leave," was to legalise the prevailing custom; the only pity is, that they had not the courage of their opinions. They hoped, no doubt, that it would go on all right, and that "permission" would always be given. The present state of things at Portsmouth is sufficient condemnation of such half-measures, and it is to be hoped that their Lordships will not now be slow to recognise the evils of

LOCAL OPTION.

SIR,—In your issue of March 3, you make some remarks in a leading article on the recent request expressed by Admiral Hornby that officers should wear uniform when on shore. It appears to me that you have not quite grasped the matter, and with your permission I will make a few observations on your article. You say that officers "insist on wearing plain clothes, and assert their right to do so." Now there may, of course, be officers who do say so, but the majority of them do nothing of the sort. The Admiralty Instructions are very clear on the subject, and what officers object to in Admiral Hornby's request is not that he is infringing a right, but that a privilege which has always existed in the service has been taken away from those officers who chance to be at Portsmouth without any apparent cause; and further, that this privilege has been taken away, not by the Admiralty, but by one particular Admiral. If officers did not dress decently in plain clothes, or if they were made a shield behind which to indulge in rowdyism, then the request would be perfectly legitimate; but since such is by no means the case, it appears to myself and others to be, to say the least of it, unnecessary. You further say that, "In no other military nation does this exist," and this is quite true; but I would venture to point out that in no other military nation are the officers collectively drawn from so high a rank in life as ours are, in addition to which, it seems to me that the logical deductions from this kind of argument would compel us to eat with our knives, forswear soap, ard cultivate a taste for garlic. One more remark of yours I will draw attention to, and it is this, "In a large port, such as Portsmouth, where officers and men of the Army, and superior and subordinate officers of the Navy and seamen, appear habitually in uniform;" and I should wish to point out to you that in Portsmouth officers of the Army do not appear habitually in uniform. To take two examples of superior officers. H.S.H. Prince Edward of Saxe-Weimar does not, and Admiral Hornby himself does not, other superior officers of both services following their good example.—I am, &c., MAGNA CHARTA.

SIR,—As you invite opinions relative to Naval uniform, and living, as I do, at Portsmouth, the habitat of so many gallant officers, I beg to inform you that among my Naval friends, especially the younger officers, the order has been received with general satisfaction. So long as Naval officers are only ordered to wear their proper uniform—and surely they cannot be ashamed of it?—the action of Admiral Hornby must commend itself to all reasonable men and women. If Naval officers must provide themselves with gold-laced unmentionables, surely there is no hardship in wearing them, instead of allowing them to mould away or become moth-eaten at the bottom of their drawers? A young friend of mine told me that he had worn his gold-laced trousers—he called them "trous."—for the first time last mess guest-night. They had been to China and back, and never been taken out of his chest of drawers, except to be aired. It is when Naval men are ordered to provide themselves with and wear articles of costume which are not uniform, they very reasonably complain. Admiral Hornby has given no such order, but I am told that other officers have usurped the authority, not only of the Admiralty, but of Commanders-in-Chief, and ordered all sorts of fancy dresses to be worn. "If there were no differences in opinion, there would be no fancy waistcoats," says the old proverb; but Naval men rightly object to be subjected to orders to comply with which on different stations they have to incur a very considerable expense, so as to meet the views of Admirals and Captains, as they come and go. They tell me they would gladly see, as you suggest, the full and undress uniform made one, and they would hail with acclamation an Admiralty Order that during hot weather a light patrol-jacket "should," not "may," be uniform, and a "service hot-weather head-dress" ordered. The expense of providing these would be more than met by the unification of the full and undress uniform.—I am, &c.,

A NAVAL OFFICER OF TWENTY-FIVE YEARS' SERVICE.

Naval Assistant-Paymasters of five years' seniority will no longer be allowed the option of joining the ward-room mess, but are, on board all ships, to be ward-room officers.

Instructions have been issued at Chatham Dockyard to the effect that the privilege granted to visitors to inspect that establishment on obtaining a pass has been withdrawn, and all visitors will now be accompanied on their tour of inspection by a policeman. This order has been issued in consequence of certain information which has come into the possession of the authorities.

The Admiralty have directed that the following six ships on arrival are to be paid off at Devonport and placed in the fourth division of the Steam Reserve, viz., the Thetis, Lily, Firebrand, Moorhen, Sheldrake, and Firefly.

The Edinburgh is expected to arrive at Portsmouth from Pembroke on Monday. Mr. Philip Watts, Assistant-Constructor at the Admiralty, and Mr. Robert Barnaby, Constructor at Portsmouth, have been detailed to watch her behaviour at sea.

An Admiralty order has been received at Sheerness Dockyard directing the cessation of all overtime, and the immediate discharge of nearly 100 of the mechanics who were taken on at the time of the Egyptian War. Capt. Codrington, who has been appointed to succeed Capt. Hopkins as Superintendent of Sheerness Dockyard, will take up his appointment on April 6.

The death is recorded of that esteemed Shakespearian actor, Mr. Henry Marston, who expired a few days since, on the verge of his eightieth year. Mr. Marston, who held a distinguished position on the London stage for more than half a century, had a complimentary benefit given to him at the Lyceum in April, 1879, as a deserving testimony to his talents as exhibited on the stage, and his claims to the personal regard and esteem of all who knew him in private life.

MARRIAGES.

GABBETT—RICHARDSON.—On the 27th inst., at Holy Trinity, Lee, by the Reverend B. W. Bucke, M.A., Pool Robert Dalton Gabbett, A.M.D., eldest son of the late Major R. P. Gabbett, Royal Artillery, to Edith Mary, youngest daughter of Lieutenant-Colonel W. Stewart Richardson, C.B., commanding 2nd Battalion Duke of Cornwall's Light Infantry.

NINNIS—SUTTON.—On the 28th inst., at the Parish Church, Streatham, by the Rector, the Rev. J. R. Nicholl, M.A., assisted by the Rev. Herbert Witherby, M.A., Belgrave Ninnis, M.D., Fleet-Surgeon Royal Navy, to Ada Jane, elder daughter of the late James Sutton, Esq., of Pembroke House, Streatham.

DEATH.

RUSPINI.—On the 26th inst., at 156 Davidge Terrace, Kennington Road, the Chevalier B. Ruspini, of bronchitis, aged 83.

Advertisements.

MESSMAN WANTED, for a small Militia Regiment, going into camp this year in North Wales for 27 days, from May 28. Probable number of officers, 13. To save time and unnecessary correspondence, applicants are requested to state in detail at what charge they are prepared to supply everything required. The Officers find their own wine and plate, and pay their own wine butler. There is a good town within half-a-mile of the camp. —Address, Major G. W. RAIKES, Dunnington Heath, Alcester.

FOR SALE.—PORTABLE FURNITURE, by ROSS, of Dublin, used about three months; half-price.—For particulars, apply, "X.," Post Office, Bramley.

THE PARASCHO CIGARETTES.

THE PARASCHO CIGARETTES are now being made from the New Crop of Yenijeh Tobacco, and will be found to possess in perfection the peculiar and delicate aroma for which these Cigarettes have become so famous. The Parascho Cigarettes are made only from the finest Yenijeh (Turkey) Tobacco, and are rolled in the best paper procurable, free from Nitre, and made specially for the Parascho Cigarettes. The Parascho Cigarettes will be found different from and superior to all others. The Parascho Cigarettes are pronounced by connoisseurs to be "the only Cigarettes worth smoking."

The Parascho Cigarettes are supplied to the leading members of Fashionable Society, Clubs, and Messes.

The Parascho Cigarettes are made in eight different sizes, and are put up in boxes, each containing 50, 100, and 250 Cigarettes. The Parascho Cigarettes may also be had in sample boxes, containing 24 Cigarettes (accompanied by a detailed Price List), on receipt of 2s 6d in stamps, or postal order.

THE PARASCHO CIGARETTE DEPOT, 65 Park Street, Grosvenor Square, London, W.
And may be had from all the leading Tobacconists.

NATIONAL LIFE ASSURANCE SOCIETY,

"FOR THE BLOOD IS THE LIFE."

CLARKE'S

WORLD-FAMED

BLOOD MIXTURE.

THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases.—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—"BLOOD MIXTURE."

HOLLOWAY'S PILLS.—INDIGESTION, STOMACH AND LIVER COMPLAINTS.—Persons suffering from any derangements of the liver, stomach, or the organs of digestion should have recourse to Holloway's Pills, as there is no medicine known that acts on these particular complaints with such certain success. Its peculiar properties purify and regulate the circulation, strengthen the stomach, increase the appetite, and rouse the sluggish liver. It is invaluable to dyspeptics, restoring the patient to the soundest health and strength, These preparations may be used at all times and in all climates by persons affected by biliousness, flatulency, colic, nausea, or disordered liver; for heartburn, water-pangs, and sick-headaches they are specifics. Indeed, no ailment of the digestive organs can long resist their purifying and corrective powers.

THE VERSMANN'S

PATENT

GERMAN MOSS LITTER.

This Litter is specially prepared from a moss-peat found in Germany, and introduced into this country by the Patentee, Dr. VERSMANN, Ph.D. After a most severe and extensive trial in public and private stables, cowsheds, and kennels, it is pronounced by the highest practical and scientific authorities to be the best and cheapest litter known.

ITS ADVANTAGES ARE:

1. Cheapness, it being not more than one-half the cost of straw.
2. Absorptiveness, as absorbing all the urine, and rendering drains and flushing of stables unnecessary.
3. Prevention of decomposition and generation of bad odours.
4. Affording an excellent soft and elastic bed, particularly agreeable and beneficial to the feet and limbs of horses.
5. Horses do not eat it as they do straw litter. therefore they do not require to be racked up or muzzled to prevent indigestion or broken wind.
6. It is easily managed in the stable, and does not soil or stain horses.
7. It has a wonderful influence on the growth of the hoofs and in maintaining the feet in health.
8. It is extremely portable, being compressed into bales weighing each about 3 cwt., ¾ cwt. to 1 cwt. being sufficient to litter a horse for a month or six weeks.
9. It is not inflammable, and therefore offers but little danger from fire.
10. It is essentially a sanitary litter.
11. The manure is much more valuable than that of straw, and occupies considerably less space.

It will be found of immense advantage to Veterinary Infirmaries, in Stud Farms, Dairies, Kennels, &c.

Address:—

The Versmann's Moss Litter Company,
LIMITED.
63 QUEEN VICTORIA STREET, LONDON, E.C.

CAUTION.—Proceedings will be taken against persons infringing the Company's patent.
